and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, H. M. Swalley, 745 Wesley avenue, Oakland. The dwelling will be erected on the west side of Walker street, south of College avenue, and has been designed to contain eight rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. Plans provide for furnace heat and open fire place. Mantel will be of brick. Tile wainscoting will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence alterations, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner O. A. Gies. This work will include new interior finish, mostly pine, hardwood floors, new plumbing, electric work and plastering. Some exterior wood work will also be called for. Plans are complete and figures are now being taken by the architect.

BERKELEY, ALAMEDA CO., CAL.—Residences, 2, 2 story and base, frame, \$3,500 each. Architect, none. Owners, Marshall & Duggs, Berkeley. These two dwellings will be erected on Ashby west of Claremont street, and each will contain seven rooms and bath. Interiors will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be large open fire places in each of the living rooms. Mantels will be of brick and tile. Bath rooms and kitchens will have the wainscot. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are in the hands of the owners who will do the work by Day Labor.

HAYWARD, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Mr. De Lucchi. The dwelling has been designed for a six-room house with bath. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Manuel August, 913 Bancroft Way, Berkeley. The dwelling will contain seven rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place in the living

room with a brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor. All materials are being purchased.

SACRAMENTO, CAL.—Residences, 1 and 2 story and base. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: George Weissman and Anell Hoffman, 708 K street, 3 1/2 story frame, \$1,500 each; J. A. Schumate, 2982 Minzanita avenue, 1 story frame, \$1,900; P. E. Reed, 2613 28th street, alteration to frame, \$1,000, and Charles J. Schmid, 2914 26th street, 1 story frame, \$1,000.

SEATTLE, WASH.—Residence, 2 story and base. Class A construction, \$150,000. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owner, W. F. Boeing. The house has been designed for a high class city residence and will be erected in the Highlands. The house will be the largest home in the Highlands and will contain besides a number of living rooms, a ball room, billiard room, gymnasium and many baths. Interior finish will be of pine and hardwoods with hardwood floors throughout. There will be steam heat, a vacuum cleaning system and hot water system. All bath rooms will have tile floors and wainscot. Considerable marble and tile will be used. Exterior of the house will be faced with pressed brick. Plans are complete and now out for figures.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$15,000. Architect, A. B. Benton, 144 North Spring street, L. A. Owner, Mrs. Jules Kauffman. The house will contain 12 rooms, 3 baths and sleeping porch. Design is in the French Renaissance style. Interior finish will be of pine, hardwoods and white enamel. Hardwood floors will be used throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile. Tile floors and wainscot will be used in the bath rooms. An automatic water heater will be installed. A garage will also be erected on the lot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

Contracts Awarded.

BAKERSFIELD, KERN CO., CAL.—Residence, 2 story and base, frame, \$12,000. Architect's name not given. Owner, P. B. Blesman. Contractor, Frank Adams, Bakersfield. Contract price not stated.

SCHOOLS

DAVIS, YOLO CO., CAL.—Farm dormitory, 2 story and base, frame, \$34,000. Architects, Cunningham & Pollock, First National Bank Bldg., S. F. Owner, University of California. Contractor, R. J. Duffa, 3678 17th street, S. F. Contract price, \$34,000. Fifteen sets of figures were received for this

work and are all finished under the heading of Sacramento, Stockton and Northern California in this issue.

Contracts Awarded.

CARRUTHERS, FRESNO CO., CAL.—School, 1 story, frame, \$3,000. Architect, J. Carl Thayer, Forsythe Bldg., Fresno. Owners, Blakemore School District. Contractor, F. M. Cartwright, Fresno. Contract price, \$2,450.

BAKERSFIELD, KERN CO., CAL.—School heating system, \$5,956. Architect, Orville Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Contractors, American Heating and Contracting Co., Bakersfield. Contract price, \$5,956.

BAKERSFIELD, KERN CO., CAL.—School, 2 story and base brick and steel, \$38,000. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Contractors, Trewblitt & Shields, Hanford, general construction only. Contract price \$38,000.

STORE.

SAN FRANCISCO—Stores and lofts, 2 story and base, brick and steel. Cost not stated. Architect, Earl E. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will be erected at the corner of Davis and Washington streets covering a considerable ground area. There will be two stores on the first floor and lofts on the upper floor. Interior finish will be of pine throughout. Plans provide for metal window sash and frames. There will be plate glass windows and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Store window alterations, \$4,000. Architect, Henry H. Meyers, Kold Bldg., S. F. Owners, D. Samuels Co. The present display windows will be enlarged and new interior fixtures and trim installed. The work calls for a large amount of hardware, electric work, plastering and painting. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Stores and offices, 20 story and base. Class A construction, \$1,200,000. Architect, Clarence C. Cuffs, Sacramento. Owners, Western Securities Co. An agreement has been made to the effect that Sacramento is to have a 20-story skyscraper, which will be erected on J street, between 8th and 12th streets, the exact location being withheld for the present. Preliminary studies have been completed and proposed. It is stated and working drawings will be commenced at once. No details of the building have been made public. Further mention will be made of its work as the plans progress.

PORTLAND, ORE.—Store, 1 story and base, brick and steel. Architects, R. N. Hockmeyer & Co., Abington Bldg., Portland. Owner, R. T. Dohney. The building will be erected at the corner of 2nd and Bellmomy streets. The structure has been designed for a four-story building, but only the first floor will be erected at the present. When upper floors are added these will be arranged for apartments. There will be no stores. Interiors will be finished in pine and hardwood. There will be patent

store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Telephone exchange, 6 story and base. Class A construction. Cost not stated. Architect, Architectural Department Pacific States Tel. and Tel. Co., 333 Grant avenue, S. F. Owners, Pacific States Tel. and Tel. Co. This work has been mentioned here before. The building will be erected on South Hill street, covering an area of 1747½ feet. Construction will be Class A throughout, having a complete steel frame, reinforced concrete floors and brick walls faced with pressed brick or terra cotta. The entire building will be used to house the company's offices and exchange. Interior finish will be of pine and hardwoods with considerable marble, tile and ornamental plaster. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for at once.

HOLLYWOOD, LOS ANGELES CO., CAL.—Stores and offices, 1 story and base, brick and steel, \$90,000. Architect, E. F. Parcher, 1524 Labaga avenue, L. A. Owner, C. E. Toberman. The building will cover an area of 75 feet square, and has been designed for four stores on the first floor, offices and living apartments on the upper floors. Interior finish will be of pine throughout. There will be steam heat and a hot water system. Patent store fronts and metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Stores and offices, 11 story and base. Class A construction. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owners, syndicate headed by Attorney Herbert J. Goudge, 309 Exchange Bldg., L. A. This syndicate has secured a lease of 50 years on the property on the west side of Spring street, between 6th and 7th streets, and will undertake to finance a 11-story Class A office building. The site is 120x175 feet. Details of construction have not been determined. Further mention will be made as plans progress.

Contracts Awarded.

CORONA, RIVERSIDE CO., CAL.—Stores, offices and bank, 2 story and base, brick and steel. Cost not stated. Architect, H. G. Koerner, Broadway Central Bldg., L. A. Owners, Corona Development Co., Contractors, The Remington Co., Broadway Central Bldg., L. A. Contract price not stated.

PORTLAND, ORE.—Store and theatre, 1 story and base, reinforced concrete. Cost not stated. Architect, Charles W. Fritz, Northwest Bldg., Portland. Owners, Duke Bros. Contractors, Irish Bros., Lents. Cost not stated.

THEATRES.

SAN FRANCISCO—Theatre, 8 story and base. Class A construction, \$350,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owner's name withheld. Reports published in the morning newspapers relating to the construction of a large Class A theatre building in the Market Street District,

have been substantiated. From reliable sources information comes stating that the Kahn people of New York have closed their option of over a year's standing on the property on Stevenson street, between 3rd and 4th streets. An announcement was made in September, 1912, in the "Builder" that Architect B. Marcus Pretica, Empire Bldg., Seattle, had been commissioned to prepare plans for an eight-story Class A structure to be erected on this property at a cost of approximately \$350,000. A Market street entrance will be secured probably through the property now occupied by the California Dairy Kitchen.

SAN FRANCISCO—Theatre alterations, interior work, etc., \$5,000. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Turner & Dahken Circuit. This work will be done on the old Globe Theatre on Mission street, and will include new interior painting, ornamental plaster and decoration. Some plumbing and electric work is also called for in the plans. Bids are now being taken.

Contracts Awarded.

PORTLAND, ORE.—Ice hippodrome, 1 story, reinforced concrete and steel, \$55,950. Architect, J. McClure, Lewis Bldg., Portland. Owners, Portland Ice Hippodrome Co. Contractor, Victor Carlson, 145 Vancouver avenue, Portland. Contract price, \$55,250. Note: This price does not include the ice machinery.

SEALED PROPOSALS.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 20th day of October, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of door and window shades and linoleum for eight buildings comprising the main group of the San Francisco Hospital.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the date of the receipt of written notice from the Board of Public Works, and completed within ninety (90) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$10,000.00.

All proposals offered must be accompanied by a check, certified by a responsible bank, payable to the order of the City and County of San Francisco, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works, F. J. CHURCHILL, Secretary.

PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals, indorsed "Proposals for Addition to Kitchen" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. November 1, 1913, and then and there publicly opened, for addition to kitchen at the U. S. Marine Barracks, Mare Island, Cal. Plans and specifications can be obtained on application to the bureau or to the com-

mandant of the navy yard, Mare Island, Cal. H. R. STANFORD, chief of bureau.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR NO. 1.—Proposals for Steel Ladders, Fire Hydrants, Track Crossing, Frogs, and Switch Points and Blacksmith Coal.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 2:30 p. m. October 11, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Plans and general information relating to this circular (No. 1) may be obtained from this office or the office of the assistant purchasing officer, Isthmian Canal Commission, 100 North Point street, San Francisco, Cal. P. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR FOUNDRY EQUIP.
SEALED BIDS FOR FURNISHING complete spark catching device similar to one at the Western Foundry, located in the Polytechnic High School, also for the construction of foundry at said school, will be received in open session of the Board of Education to be held at 2 p. m. of the 10th day of October, 1913. The conditions may be obtained on application to the undersigned.

M. R. NORRIS,
Acting Secretary Board of Education.

PROPOSALS FOR BUILDING.
BUILDING, ETC.—Treasurer Department, Supervising Architect's Office, Washington, D. C.—Sealed proposals will be opened in public at 2 p. m. October 23, 1913, for the construction, complete (including mechanical equipment, interior, lighting fixtures and approach), of the United States post office at Douglas, Wyo. The building is two stories and basement and has a ground area of approximately 1,430 square feet, brick and stone, and tile and composition roof, first floor only of fireproof construction. Drawings and specifications may be obtained from the custody of this office, at Douglas, Wyo., or at this office, at the discretion of the supervising architect, O. WENDTROTTH, supervising architect.

PROPOSALS FOR STRUCTURAL STEEL.

STEEL WORK.—Sealed proposals are endorsed "Proposals for Steel Work, Pearl Harbor," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. October 18, 1913, and then be publicly opened, for structural steel work for coaling plant, naval station, Pearl Harbor, Hawaii. Estimated cost, \$250,000. Plans and specifications can be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

NOTICE TO BUILDERS.
NOTICE is hereby given that the Board of Trustees of the Board of School District, Sacramento County, California, will receive sealed bids until Thursday, Oct. 10th, 1913, at the office of the County Superintendent of Schools, Court House, Sacramento, for the erection of a two-story school building in above-named school district. Plans and specifications may be had at the office of the County Superintendent of Schools. Earnest check for ten per cent of the amount must accompany each bid. The award will be made to the lowest bidder. Bids will be opened at the County Superintendent of Schools, Friday, Oct. 11th at 10 a. m.

PROPOSALS FOR ICE PLANT.
ICE PLANT.—Sealed proposals are endorsed "Proposals for Building an Ice Plant" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. November 1, 1913, and then be publicly opened, for building for ice-making and cold-storage plant, Naval Station, Pearl Harbor, Hawaii. Estimated cost, \$100,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station, Honolulu. T. H. H. R. STANFORD, chief of bureau, September 11, 1913.

PROPOSALS FOR CANAL WORK.
RECLAMATION.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Oakland, Cal., until 2 p. m. October 15, 1913, for the construction of about six and one-half miles of canal in Colusa County, Cal. The work involves the excavation of about 200,000 cubic yards of material and is situated near the town of Stonyford, about 23 miles from Sates, the terminus of the Colusa and Lake Railroad. For particulars address the United States Reclamation Service, Washington, D. C., or Portland, Ore., or Orland, Cal. J. M. McKINNEY, acting director.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR NO. 1.—Proposals for Road Roller, Galvanized Roofing, Galvanized Sheet Steel or Iron, Rivets, Bolts, Bronze Bars, Sheet Copper, Sheet Lead, Pig Lead, Steel and Iron Pipe, Pipe Fittings, Valves, Cocks, Bibbs, Tray Plugs, Shower Heads, Copper Gaskets, Lead Bends, Ball Cocks, Forge Cups, Rimmers, Hackaw Blades, Vitrifired Sewer Pipe, Fire Brick, Asbestos Cement, Horse Brushes, Ropes for Bunks, Copying Books, Paper, Padlocks, Japans, Oiler, Turpentine, Shellac, Chrome Green, Varnish, Lumber and Spud Timbers.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. October 10, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Plans and general information relating to this circular (No. 1) may be obtained from this office or the office of the assistant purchasing agent, North Point street, San Francisco, Cal., also from the U. S. engineering offices in the following cities: Seattle, Wash.; Los Angeles, Cal. P. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR STEEL WORK.
STEEL WORK.—Sealed proposals are endorsed "Proposals for Steel Work, Pearl Harbor," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. October 18, 1913, and then be publicly opened, for structural steel work for coaling plant, naval station, Pearl Harbor, Hawaii. Estimated cost, \$250,000. Plans and specifications can be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 113 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11:30 A. M., Thursday, October 23, 1913, for Constructing The Fine Arts Building, in accordance with the plans and specifications of the same in the office of the Director of Works. Each proposal must be accompanied by certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered a award. The contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the full performance of the contract; the surties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made and the right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company. Plans and specifications for the work may be obtained from the Director of Works, Room 205, Exposition Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide

All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including twelve o'clock, noon, Tuesday, October 22nd, 1913, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor for the following work in the State Capitol Building at Sacramento, California, in accordance with the specifications thereof, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Bids will be received:
First—For remodeling elevator grilles in the State Capitol Building.
Second—For the construction and erection of two new passenger elevators, with equipment for same, in the State Capitol Building.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for Elevators and grilles in the State Capitol, Sacramento, California."

(Signed) W. F. McCLURE,
State Engineer. (*)

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., October 1, 1913.—SEALED PROPOSALS will be received at this office until 3 o'clock P. M. on the 30th day of October, 1913, and then opened, for an electric passenger elevator, including hoistway, etc., in the United States post office building at St. Louis, in accordance with the drawing and specification, copies of which may be obtained at this office at the discretion of the Supervising Architect, O. WENDTROTTH, supervising architect. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including twelve o'clock noon, Thursday, October 30th, 1913; said bids then and there to be publicly opened and read for furnishing all plant, materials and labor to do the work required for the erection of five fire escape ladders in California Institution for the Deaf and Blind, Berkeley, California, in accordance with the plans and specifications thereof, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California. The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for Fire escape ladders in the Deaf and Blind, Berkeley, California."

(Signed) W. F. McCLURE,
State Engineer. (*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base frame, \$12,000. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, J. Black, Jr. The dwelling has been designed for ten rooms, three baths and a sleeping porch. Interior finish will be of pine, hardwoods and white enamel. There will be hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscoting will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A fine site has been selected on 15th avenue near the Presidio wall. Plans are complete and figures are being taken.

RESIDENCES—1, 2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, P. Nelson, 30 Presidio Terrace, S. F. These houses will be erected on 16th avenue north of California street, and each will contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms and dining rooms. Each living room will have an open fire place with brick or tile mantel. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster, rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCES—2, 2 story and base, frame, \$5,000. San Francisco. Architect, E. E. Young, 251 Kearny street, S. F. Owner, Thomas Seoble, 363 14th avenue, S. F. These houses will be erected on the east side of 25th avenue north of Lake street. Each house will contain seven rooms and bath. Interior finish will be of pine and hardwoods with some elm panels. Hardwood floors will be used in the living rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscoting will be used in the bath rooms and kitchens. Automatic water heaters will be used. Exterior of the houses will be covered with rustic cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLUNGMOUS—2, 1 story and base, frame, \$7,500. San Francisco. Architect, none. Owner, O. Swanson, 1650 18th street, S. F. The houses will be erected on Atkins near Excelsior street, and each house will contain six rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. Each living room will have a large open fire place. Mantels will be of tile. The wainscoting will be used in the living rooms and kitchens. Exteriors will be covered with rustic. Plans are complete and work will be done by Day Labor.

RESIDENCES—6, 2 story and base, frame, \$3,500 each. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, J. P. Fletcher. The houses will be erected on property on Fulton street near 35th avenue, and each house has been designed to contain seven rooms and bath. Interiors will be finished in pine, redwood and some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be an open fire place in each living room. Mantels will be of brick and tile. Bath rooms and kitchens will have tile wainscoting. An automatic water heater will be installed. Exteriors will be covered with cement plaster on metal lath and rustic. Work will be done by Day Labor. Mr. Fletcher controls 40 building lots in this section and will eventually improve all of them.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, E. E. Manseau, 164 Panassus avenue, S. F. The house will be erected on 35th avenue north of Irving, and will contain seven rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Tile will be used in the bath rooms and kitchens. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$12,000. San Francisco. Architect, J. A. Leonard, Phelan Bldg., S. F. Owner's name withheld. The dwelling will be erected at the corner of Monmouth Way and Cedar street, and has been designed for a ten room house with three bath rooms and sleeping porch. Interior will be finished in pine, white enamel and hardwoods. Hardwood floors will be used in the principal rooms. There will be a central heating system, probably hot water, an open fire places. Mantels will be of brick and tile. A garage will also be erected on the property. Considerable tile work is included in the plans. An automatic water heater and vacuum cleaning system will be installed. Exterior of the dwelling will be covered with cement plaster. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$12,000. San Francisco. Architects, Ward & Bohme, Alaska Commercial Bldg., S. F. Owner, H. L. Harrison. This house will be erected in St. Francis Wood and has been designed to contain ten rooms, three baths and sleeping porch. A garage will also be erected on the lot. Interior finish will be of pine, hardwoods and white enamel. The design is in the Colonial style. Hardwood floors will be used throughout. Plans provide for a central heating system and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater and vacuum clean-

ing system will be installed. Exterior of the building will be covered with rustic. Plans are nearly ready for figures.

RESIDENCE—1 story and base, frame, \$5,000. San Francisco. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner, Lena Winkler Farewell. The dwelling, which has been designed for an eight-room house, will be erected at the corner of Ralph and Paris streets. Plans show a private garage in connection. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles. Plans are complete and a contract will be let at once.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Walter Vadden, 1915 Cole street, S. F. Owners, Thomas Vadden & Son, 1915 Cole street. The dwelling has been designed for a seven-room house, and will be erected on 18th avenue near Lake. Interior finish will be entirely of pine. There will be hardwood floors and some hardwood veneer. Plans provide for furnace heat and open fire places. Mantels will be of tile. Tile wainscoting will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

THEATRE—8 story and base. Class A construction, \$350,000. San Francisco. Architect, B. Marcus Pretina, Empire Bldg., Seattle. Owner's name withheld. Reports published in the morning newspapers relating to the construction of a large Class A theatre building in the Market Street District, have been substantiated. From reliable sources information comes stating that the Kahn people of New York have closed their option of over a year's standing on the property on Stevenson street between 3rd and 4th streets. An announcement was made in September, 1912, in the "Builder" that Architect B. Marcus Pretina, Empire Bldg., Seattle, had been commissioned to prepare plans for an eight-story Class A structure to be erected on this property at a cost of approximately \$350,000. A Market street entrance will be secured probably through the property now occupied by the California Dairy Kitchen.

APARTMENT HOUSE—6 story and base, brick and steel, \$125,000. San Francisco. Architects, Fish & Knoll, Heist Bldg., S. F. Owner, J. H. Hjul, Merchants' Exchange Bldg., S. F. This building is to be erected on the south line of Sutter street west of Jones, and will have a street frontage of 68 feet 2 inches by a depth of 123 feet. The structure will contain a total of 51 suites arranged in two and three rooms. Interior finish will be of pine, elm panels and mahogany. Hardwood floors will be used in the halls and living rooms. All suites will have private bath rooms and wall beds. Plans provide for steam heat, elevator service and a vacuum cleaning system. Bath rooms will have cement floors

and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—3 story and base, brick and steel. \$20,000. San Francisco Architect, Louis M. Gardner, Phelan Bldg., S. F. Owners, Cameron and Disston, Hearst Bldg. The building will be erected on the west side of Hyde street south of Post, covering an area of 29x56 feet. There will be 14 suites of two and three rooms. Interior finish will be of pine throughout. All suites will have wall beds and private bath rooms. There will be steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owners who are well known contractors and will carry on the construction by Day Labor.

CHURCH—1 story, frame. \$12,900. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Japanese Mission. This building has been mentioned here before when the architects were first commissioned to prepare plans. The building will cover an area of 50x100 feet, and has been designed in the Greek Classic style. Interior will be finished in pine throughout. A central heating system will be installed. Ornamental plaster and art glass will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are now out for figures.

FIRE HOUSE—2 story and base, brick and steel. Cost not stated. San Francisco. Architects, Ward & Blohm Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. Plans for a new fire station to be erected at the corner of East and Commercial streets have been completed by the architects and turned over to the Board of Public Works. The structure will contain the usual apparatus room and upper floor will be arranged for quarters for the men. Interior finish will be of pine and hardwoods. Special plumbing and electric work will be installed. Plans provide for steam heat. Exterior of the building will be faced with pressed brick. Bids will be called for as soon as the plans receive final approval. Further mention will be made of the work at that time.

FOUNDRY EQUIPMENT AND SPARK CATCHER—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and bids are now being called for by the Board of Education for furnishing and installing a spark catcher and certain other foundry equipment in the Polytechnic High School. Full particulars can be secured from the Board of Education, Temporary City Hall. Bids will be opened on October 7th.

HOSPITAL SHADES AND LINOLEUM—Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be received on October 8th by the Board of Public Works for furnishing and installing window shades and linoleum in the eight principal buildings of the San Francisco

Hospital group. Full particulars can be secured from the Board of Public Works, Temporary City Hall Building.

HOTEL—3 story and base, frame. \$12,000. San Francisco. Architect, Joseph Cohen, 15 Kearny St., S. F. Owner, Isidor Rosenberg. The building will be erected on the east side of Larkin street north of California, and will contain a store on the first and about 10 guest rooms on the upper two floors. Interior finish will be of pine throughout. Besides the guest rooms there will be a number of public baths. Tile wainscot will be used in the bath rooms. Plans provide for a hot water supply. Exterior of the building will be covered with white Melusa cement. Plans are complete and the work will be done by Day Labor.

STORES AND LOFTS—2 story and base, brick and steel. Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will be erected at the corner of Davis and Washington streets, covering a considerable ground area. There will be two stores on the first floor and lofts on the upper floor. Interior finish will be of pine throughout. Plans provide for metal window sash and frames. There will be plate glass windows and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

STORE WINDOW ALTERATIONS—\$4,000. San Francisco. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, D. Samuels Co. The present display windows will be enlarged and new interior fixtures and trim installed. The work calls for a large amount of hardwood, electric work, plastering and painting. Plans are complete and figures are being taken.

THEATRE ALTERATIONS—Interior work, etc., \$5,000. San Francisco. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Turner & Dalenken Circuit. This work will be done on the old Globe Theatre on Mission street, and will include new interior painting, ornamental plaster and decoration. Some plumbing and electric work is also called for in the plans. Bids are now being taken.

FINE ARTS BUILDING—Steel and fireproof construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications are now out for figures for the general construction of the Fine Arts Building. This will be of fireproof construction with a complete steel frame. A contract for the steel work has already been awarded. Bids will be opened for the general construction on October 23rd by the Buildings and Grounds Committee. Plans can be secured from the Director of Works. An official proposal appears in another column of this issue.

Contracts Awarded.

RESIDENCES—2, 2 story and base, reinforced concrete, \$70,000. San Francisco. Architect, Kenneth MacDonald, Holbrook Bldg. Owner, Louis Saroni. Contractors, MacDonald & Kahn, Riata Bldg., S. F. general construction only. Contract price, \$70,000.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE ALTERATIONS — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, O. A. Gies. This work will include new interior finish, mostly pine, hardwood floors, new plumbing, electric work and plastering. Some exterior work will also be called for. Plans are complete and figures are now being taken by the architect.

RESIDENCES—2, 2 story and base, frame, \$3,500 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, Marshall & Diggs, Berkeley. These two dwellings will be erected on Albany west of Claremont street, and each will contain seven rooms and bath. Interiors will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be large open fire places in each of the living rooms. Mantels will be of brick and tile. Bath rooms and kitchens will have tile walls. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are in the hands of the owners and will be done by Day Labor.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Cal. Architect, none. Owner, B A Simpson, 359 42nd street, Oakland. The house will be erected on 47th street west of Hillcress avenue, and has been designed to contain seven rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places.

Mantels will be of brick and tile. The wall will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner and will be done by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, H. M. Swalley, 745 Wesley avenue, Oakland. The dwelling will be erected on the west side of Walker street south of College avenue, and has been designed to contain eight rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. Plans provide for furnace heat and open fire place. Mantel will be of brick. The wainscoting will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

BUNGALOW — 1 story and base, frame, \$3,000. Hayward, Alameda Co., Cal. Architect, Clay N Burrell, Albany Bldg., Oakland. Owner, Mr. De Lucchi. The dwelling has been designed for a six-room house with bath. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. The wainscot will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Manuel August, 913 Bancroft Way, Berkeley. The dwelling will contain seven rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire place in the living room with a brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—2 story and base, brick and frame, \$75,000. Oakland, Cal. Architect, Clay N Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected on Harrison street, covering a large ground area. Plans provide for a total of 115 rooms, which are to be arranged in suites of two, three and four rooms. All interior finish will be of pine. Some hardwood floors will be used. There will be steam heat, a vacuum cleaning system and hot water supply. All suites will have wall beds and private bath rooms. Composition floors and tile wainscot will be used in the bath rooms. Entrance will be finished in marble and tile. Exterior of the building will be covered with brick veneer. Plans are complete and figures are being taken.

GARAGE—1 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S

F. Owners, Pacific Coast Agency, Kissell star. This work has been mentioned here before when plans were first started. The building will be erected at the corner of 24th street and Broadway, and will be classic in design. Interior of the front portion of the structure, which is to be used for sales rooms, will be handsomely finished in pine and hardwoods. Rear portion will contain storage space and a vacuum department. Construction will be fireproof. Considerable ornamental plaster, marble and tile will be used. Exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$4,000. Oakland, Cal. Architect, Clay N Burrell, Albany Bldg., Oakland. Owner, Mr. Healy. The building will be erected on 29th street near Richmond Boulevard, and has been designed to contain two modern flats of five rooms and bath. Interior finish will be of pine and redwood. Some hardwood floors will be used. There will be a large open fire place in each living room. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared. Bids will be called for in about two weeks.

HOTEL—7 story and base, steel and brick, \$10,000. Oakland, Cal. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Friedman Realty Co. This work has been mentioned here before. The structure will be erected at the southwest corner of Clay and 16th streets, having a frontage on one street of 100 feet and of 60 feet on the other. There will be four stories besides the hotel lobby on the first floor. Each of the upper floors will contain 12 guest rooms and 12 private baths. Interior will be finished in pine and hardwood. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with grey pressed brick. Plans are complete and figures are being taken.

HOTEL ADDITION—Brick and steel construction, \$10,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg. Oakland. Owners, Morris and Muller. An addition of a large banquet room and dance hall, public saloon and several private dining rooms is to be made to the hotel building recently erected by Morris and Muller. Plans for the work include interior finishing, plastering, painting, plumbing and electric work. Details are complete and the work is now being done by Day Labor.

LODGE HALL—3 story and base, reinforced concrete. Cost not stated. Berkeley, Alameda Co., Cal. Architect, W H Ritchell, Jr., First National Bank Bldg., Berkeley. Owners, Berkeley Elks Hall Association. This work has been mentioned here before when plans were first started. Working drawings are now complete and bids are being taken. The building will be erected at the corner of Alston and Harvard streets, and when completed will be the finest lodge hall in Berkeley. Interior will be finished in pine and hardwoods. Plans include several large lodge rooms, ball room

banquet hall, library, ladies' and gentlemen's parlors, billiard room and living apartments. There will be steam heat, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with cement plaster.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Martin O'Hara. The building will be erected on Oceanavenue and will have a frontage of 100 feet and a depth of 150 feet. There will be stores on the first floor and about 40 rooms arranged in two and three room suites on the upper floors. Interior finish will be of pine throughout. All suites will have wall beds and private bath rooms. There will be steam heat and a hot water system. Bath rooms will have cement floors and tile wainscoting. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—4 story and base, brick and steel. \$55,000. Los Angeles, Cal. Architect, E. B. Hogan, 1564 West 46th street, L. A. Owner, Ernest C. Hillman. The building will be erected on Ingraham street near Hill, and will cover an area of 54 feet by 120 feet. There will be a total of 86 rooms, which will be arranged in two and three room suites. Plans also provide for amusement rooms, lobby and ball room and billiard hall. Interior finish will be of pine with some elm panels. There will be steam heat, elevator service, hot and cold running water and a vacuum cleaning system. All suits will have connecting baths and wall beds. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor. Charles Arisman, 2714 East 4th street, will be in charge.

CHURCH—Class A construction \$260,000, to \$250,000. Los Angeles, Cal. Architects, Imbs & Comes, St. Louis, Mo. Owners, St. Vincent's Roman Catholic Church, Rev. Father Joseph Glass. Father Glass and Mr. Imbs have just returned from a European trip, and working drawings will shortly be started for a handsome new edifice which is to be erected at the corner of West Adams and Figueroa streets. No details of the construction have been determined. Further mention will be made of this work as the plans progress.

CHURCH—1 story, frame. Cost not stated. Los Angeles, Cal. Architect, Harold Cross, Consolidated Realty Bldg., L. A. Owners, Grace Presbyterian Church. A new building covering an area of 54x60 feet will be erected for the Grace Presbyterian Church. Design is in the classic style, exterior being faced with cement plaster. There will be Sunday school rooms besides the main auditorium. Interior finish will be of pine throughout. Some art glass will be used. Plans are complete and the work will be done by Day Labor. H. B. Meninger, 1442 Mt. Pleasant street, will be in charge of the work.

BREWERY ADDITION—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, John R. Kunst, Higgins Bldg., L. A. Owners, Mathie Brewing Co. This work will be done at the company's plant on North Main street. Construction will be of steel and brick. Work includes several large tanks and a 90-foot

ste. tower. No interior finish will be required. Exterior of the building will be faced with red pressed brick. Plans are now being prepared.

FACTORY—2 story and base, brick. Cost not stated. Torrance, Los Angeles Co., Cal. Architects, J. Martyn Haenke and W. J. Dodd, Story Bldg., L. A. Owners, National Mosaic Tile Co. The building will cover an area of 200x100 feet. Considerable structural steel will be used in the building and roof trusses. There will be metal window sash and frames and a cement and tile floor. Roof will be of tile. Interior of the office portion of the building will be finished in pine. Exterior will be faced with pressed brick. Plans are being prepared.

HOSPITAL—Administration building, 4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. Plans for the administration building, which will cover an area of 141x60 feet have been completed and have received the approval of the Building Committee. Contractors are now figuring the excavating and concrete work. Other parts of the work will be let in segregated contracts. Plans can be secured from the architects.

HOTEL—12 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Lyman Farwell, Story Bldg., L. A. Owners, Ira W. Byrnes and associates. Mr. Byrnes has secured a fifty-year lease of the property at the northwest corner of Franklin and Spring streets, 120x218 feet, from the Phillips Estate. Preliminary plans have been prepared for a modern hotel structure containing 700 guest rooms. The building is to be erected by a syndicate of which F. L. Spaulding, 1460 Dana street, L. A., is a member. Construction will be carried on by Mr. Spaulding.

HOTEL—4 story and base, brick and steel. \$50,000. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Consolidated Realty Co. The building will be erected at the southwest corner of 11th and Hill streets on property having a frontage of 60 feet on one street and 97 feet on the other. There will be three stories on the first floor besides the hotel lobby. Upper floors will be arranged for 50 guest rooms and 18 baths. Interior finish will be of pine and elm. All rooms will have hot and cold running water. There will be steam heat and elevator service. Bath rooms will have cement floors and tile wainscot. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—11 story and base. Class A construction, \$100,000. Los Angeles, Cal. Architects, Barnett, Haynes & Barnett, Wright and Callender Bldg., L. A. Owner, Fred Grass, S. F. This building will be erected on Main street, between 8th and 9th streets, covering an area of 36x75 feet. The building will have a complete steel frame and exterior walls of brick, faced with terra cotta. Floors will be of reinforced concrete. First floor will be arranged for the lobby, office, a public dining room and kitchen. Upper floors will contain a total of 150 guest rooms, all of which will have private

baths. Interior finish will be of pine and hardwoods. Both rooms will have tile floors and tile wainscot. There will be three elevators, two passenger and one freight, steam heat, a vacuum cleaning system and hot water supply. The floors will be used in the lobby and halls. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

LIBRARY—1 story and base, reinforced concrete, \$90,000. Beaumont, Riverside Co., Cal. Architect, E. L. Hopkins, Hollis Bldg., L. A. Owners, City of Beaumont. Plans have been approved for a one-story reinforced concrete library building funds for the construction of which have been donated by the Carnegie Library Association. The building will cover an area of 26x60 feet and will contain a reading room, office and stack room. Interior finish will be of pine and oak with maple floors and oak linoleum. Metal shelves will be used. There will be furnace heat and modern plumbing. Exterior of the building will be faced with cement plaster. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$15,000. Los Angeles, Cal. Architect, A. B. Benton, 111 North Spring street, L. A. Owner, Mrs. Jules Kauffman. The house will contain twelve rooms, three baths and sleeping porch. Design is in the French Renaissance style. Interior finish will be of pine, hardwoods and white enamel. Hardwood floors will be used throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile. The floors and wainscot will be of tile. The bath rooms. An automatic water heater will be installed. A garage will also be erected on the lot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once.

TELEPHONE EXCHANGE—6 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Architectural Department Pacific States Tel. and Tel. Co., 333 Grant avenue, S. E. Owners, Pacific States Tel. and Tel. Co. This work has been mentioned here before. The building will be erected on Santa Hill street, covering an area of 11x75 feet. Construction will be Class A throughout having a complete steel frame, reinforced concrete floors and brick walls faced with pressed brick or terra cotta. The entire building will be used to house the company's offices and exchange. Interior finish will be of pine

and hardwoods with complete marble, tile and ornamental plaster. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures will be called for at once.

STORES AND OFFICES—1 story and base. Brick and steel, \$90,000. Hollywood, Los Angeles Co., Cal. Architect, E. L. Forester, 1524 Ladora avenue, L. A. Owner, C. E. Tolman. The building will cover an area of 75 feet square, and has been designed for four stories on the first floor, offices and living apartments on the upper floors. Interior finish will be of pine throughout. There will be steam heat and a hot water system. Patent store fronts and metal window sashes and frames are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES AND OFFICES—11 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Tadin & Williams, Exchange Bldg., L. A. Owner, syndicate headed by Attorney Herbert J. Goudge, 309 Exchange Bldg., L. A. This syndicate has secured a lease of 50 years on the property on the west side of Spring street, between 6th and 7th streets, and will undertake to finance an 11-story Class A office building. The site is 120x155 feet. Details of construction have not been determined. Further mention will be made as plans progress.

Contracts Awarded.

APARTMENT HOUSE—1 story and base, brick and steel, \$60,000. Los Angeles, Cal. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Contractors, E. W. Smith & Sons, Trust and Savings Bldg., L. A. Contract price, \$60,000.

STORES, OFFICES AND BANK—2 story and base, brick and steel. Cost not stated. Corona, Riverside Co., Cal. Architect, H. G. Koerner, Broadway Central Bldg., L. A. Owners, Corona Investment Co., Contractors, The Remington Co., Broadway Central Bldg., L. A. Contract price not stated.

PORTLAND AND OREGON.

BANK AND OFFICES—1 story and base, brick, \$29,000. Beaverton, Ore. Architects, Clausen & Clausen, Mackay Bldg., Portland. Owner's name withheld. The building will be erected on a corner site and will contain,

E. H. Williams

Chalmer Munday

Munday & Williams Attorneys-at-Law

Special Attention Given to Building
Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building, San Francisco

besides the banking rooms, one store on the first floor and a number of modern offices on the second floor. Interior finish will be of pine and hardwoods. There will be fireproof coin and safe deposit vaults. Some ornamental plaster and iron will be used. Plans provide for steam heat. Exterior of the building will be faced with pressed brick. Plans are being prepared.

WAREHOUSE—2 story and base, brick and steel, \$60,000. Portland, Ore. Architects, Emil Schacht & Son, Commonwealth Bldg., Portland. Owners, D. P. Thompson Estate. The building will be erected on the East Side, and will have a frontage of 200 feet by a depth of 100 feet. Construction will be of the heavy mill type. Spur track facilities have been provided. No interior finish will be used. Plans provide for metal window sash, fireproof doors and an automatic sprinkler system. Exterior of the building will be faced with stock brick. Plans are complete and figures are now being taken by the architects.

STORES—1 story and base, brick. Cost not stated. Portland, Ore. Architects, R. N. Hockenberry & Co., Abington Bldg., Portland. Owner, R. T. Delaney. The building will be erected at the corner of 29th and Belmont streets. The structure has been designed for a four-story building, but only the first floor will be erected at the present. When upper floors are added there will be arranged for apartments. There will be four stores. Interiors will be finished in pine and hardwood. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

ICE HYPODROME—1 story, reinforced concrete and steel, \$55,950. Portland, Ore. Architect, J. McClure, Lewis Bldg., Portland. Owners, Portland Ice Hypodrome Co., Contractor, Victor Carlson, 145 Vancouver avenue, Portland. Contract price, \$55,950. Note: This price does not include the ice machinery.

CONCRETE RETAINING WALL—\$11,026. Portland, Ore. Engineer, City Department of Engineering, Portland. Owners, City of Portland. Contractors, J. S. White's Co., Portland. Contract price, \$11,026.

STORE AND THEATRE—1 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Charles W. Ertz, Northwest Bldg., Portland. Owners, Dulke Bros. Contractors, Irish Bros., Lentz. Cost not stated.

nel. It is believed that the tunnel would capture the large share of the present business across the channel. The distance is but thirty miles, and, were the tunnel through, the journey between London and Paris would be a matter of but five or six hours.—Seattle Post-Intelligencer

CALIFORNIA PRODUCES OVER \$26,000,000 IN METALS

Gold, Silver, Copper, Lead, and Zinc Output in 1912—Increase in Production as Compared with 1911 Reported by the U. S. Geological Survey.

The mine output of gold, silver, copper, lead and zinc in California in 1912, according to Charles G. Yale, of the United States Geological Survey, was valued at \$26,382,946, an increase of \$1,209,269 over the corresponding value for the year 1911. The increase is due mainly to gain in yield of gold from deep mines, increased value from copper and silver, and increased output of zinc. The greatest gain was in the value of copper and was due to an advance in commercial value of the metal, as the quantity produced was materially less in 1912 than in 1911. To a less degree the same may be said of silver; the zinc quantities and values also increased.

The mine production of gold in 1912 was valued at \$19,713,478, a nominal decrease of \$25,430 from 1911. The output of silver was 1,309,136 fine ounces, valued at \$799,581, an increase of 29,691 ounces in quantity and of \$126,248 in value. The production of copper was 33,451,672 pounds, valued at \$5,519,526, a decrease of 2,864,464 pounds in quantity but an increase of \$989,009 in value. The output of lead was 1,144,731 pounds, valued at \$51,512, which is a decrease of 253,289 pounds in quantity and of \$11,402 in value. The output of zinc was 1,345,591 pounds, valued at \$299,846, an increase for the year 1912 of 1,538,556 pounds in quantity and \$129,845 in value.

There were 1,941 metal-mining properties reported productive in 1912, of which 322 were deep mines and 509 placers of various kinds. This shows a total decrease of 119 producing mines in 1912. There were 470 deep gold mines, 12 silver, 24 copper, 25 silver-lead-zinc, and 1 zinc.

Of the placer producers 141 were hydraulic mines, 65 dredges, 146 drift, and 157 surface or sluicing mines. There were 61 less deep and 76 less placers producing in 1912 than in 1911.

The deep mines of California produced 2,641,497 tons of ore in 1912, a decrease of 155,564 tons. Of this output 2,225,429 tons was siliceous ore, and 4,172 tons zinc ore. The siliceous ore output decreased 79,918 tons, the copper ore decreased 85,659 tons, the lead ore decreased 1,063 tons, and the zinc ore increased 1,847 tons.

Ores Yield Larger Returns.

The total average value from all ore sold or treated in California in 1912 was \$6.71 a ton, against \$5.49 a ton in 1911 and \$6.71 a ton in 1910. At gold and silver mills in California in 1912 the tonnage milled was 2,077,200 short tons, yielding \$10,371,317 in gold and 267,206 ounces of silver, valued at \$188,992, or an average value in gold and silver of \$5.08 a ton, compared with \$1.64 in 1911 and \$5.25 in 1910.

Of this average value \$1.17 was recovered as bullion in batteries and on plates in mills. The smelting ores, 456,735 tons, produced all the copper and zinc and practically all the lead, as well as 955,967 fine ounces of silver, valued at \$587,366 and \$592,532 in gold. There were also treated 107,462 tons of old tailings, yielding \$103,936 in gold, an average of 96 cents a ton, and \$1,298 in silver, an average of 1 cent a ton.

Nearly \$0,000,000 from Placers.

The placers of California in 1912 yielded \$8,645,663 in gold and 35,652 ounces of silver, valued at \$21,926, a decrease of \$339,895 from the placer output of 1911. The hydraulic mines showed an increase of gold output of \$14,196, the dredges a decrease of \$236,506, the drift mines a decrease of \$91,908, and the surface placers a decrease of \$26,646 in gold. The placers produced 43.86 per cent of the total gold yield of the State and the deep mines 56.14 per cent. The dredges produced 37.68 per cent of the entire output of gold in the State in 1912 and 55.93 per cent of the placer gold. The total gold-dredge output of California from 1899, when only \$296,302 was produced, has been \$55,415,191, including the \$7,429,951 obtained from this source in 1912.

JAPANESE PREPARE TO MOVE TO FLORIDA.

A general exodus of Japanese farmers from California will be only a matter of a few months if the Florida colonization plans of L. S. Mogi, a Japanese farmer and promoter from Southern California, are carried out.

Mogi has been in Sacramento for the last few days enlisting Oriental recruits for the trip to Florida, where he says that a tract of 61,000 acres has been set aside for intensive cultivation, this tract being open to Japanese settlers.

A party of eight of ten Sacramento Japanese has already been recruited and will leave for the south. In Los Angeles they will join a score more of their countrymen, gathered from various parts of the State, and thence the party will proceed to Florida.

BUILDING OPERATIONS CONTINUE TO BE BRISK.

Private Construction Work reaches Two Million Mark.

Private building activities throughout the city for the month of September, as reported by the Bureau of Building Inspection of the Board of Public Works, show a total of 386 permits issued at an estimated cost of \$2,273,723.

These figures include \$900,000 for the construction of the Panama-Pacific International Exposition Company's Auditorium which is now under construction in the Civic Center in the block bounded by Larkin, Hayes, Polk and Grove streets. This structure will cover an area of 263 by 401 feet and will be four stories and basement Class "A," the main feature being a disappearing stage. Plans for this building were prepared by the Consulting Architects of the City, John Galen Howard, John Reid Jr. and Fredrick H. Meyer.

Report of 1913.

Class	No. of Bldgs.	Amount
Class "A"	1	\$900,000
Class "B"	3	122,500
Class "C"	16	665,121
Frames	162	438,932

Total	244	1,783,145
Alterations	317	171,044

TIN IN ALASKA.

In speaking of mining conditions in Seward peninsula, Governor Strong of Alaska incidentally called attention to the fact that there is a dredger working on the placer tin deposits in the York district, which will have an output this season of nearly sixty tons, which will bring in somewhere between \$30,000 and \$50,000. This serves to recall one of the many opportunities present on this coast which have, as yet, been overlooked.

There is no other portion of the world, with a similar number of inhabitants, which consumes such quantities of tinplate as the Pacific States and Alaska. California puts up a greater value of canned goods than any other state in the Union, as Washington puts up more canned fish than any other state. The consumption of tinplate in the season on this Coast is measured in trainload lots. One of the greatest tin can factories in the world is located at Bellingham. The condensed milk factories use trainloads of tinplate. The canning industry is expanding steadily and at a rapid rate. All of this tinplate is imported from other states, where it is manufactured and coated with tin imported from abroad.

The tin being mined in Alaska goes to Wales for reduction, comes back to the Pennsylvania and Middle West tinplate plants, and from them back to the Coast to be utilized. The present production of tin in Alaska would go a long way toward coating all of the tinplate in use on this Coast. The connection is so obvious that it is hard to understand why the tin ore is not reduced here and why the tinplate is not manufactured here in quantities sufficient to meet the heavy local demand.—Seattle Post-Intelligencer.

A PANAMA FORECASTER.

Forecasts of the effect of the Panama canal on the world's business are of the first importance today to business men, to investors, to parents, to workers, in short, to whoever knows the need of an income and has an eye on the future. Of these forecasts there will be many in months to come. One of the earlier ones to consider the subject with scientific grasp, yet with the public's viewpoint, is Professor A. W. Kirkaldy, who read an address on the canal's prospective trade results lately before the British Association.

After pointing out that we, with our advantage of possession of the canal, and with coaling and naval stations and a ready supply of cheap coal for the ships on the Panama routes, may be in a position to press hard the trade and shipping of both England and Germany throughout the Pacific and

A FLOATING CITY.

CERRILLOS COAL FIELD, NEW MEXICO.

The coals of the Chemung have been developed in so few places that little is known of the nature of the beds that no useful estimate of available tonnage can be made. The coal-bearing rock extends for 100 miles, but the uncertainty of the occurrence of coal in the Chemung coal beds in many places makes it impossible to estimate that might be the amount.

It is evident from the figures of production of asphalt in California that the industry is expanding rapidly. This expansion is easy to explain, for practically unlimited amounts of asphalt which can be separated from the bituminous, especially from the heavier grades. During the latter part of the Standard Oil Co. of California's recent marketing efforts for grade extension the new isologues B-1, B-2 and C-1 produced an asphalt of a medium to a heavy grade, and a high asphaltic residue. These new asphalt

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

The best and cheapest reversible window on the market.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

" " " "	1 1/2 inch	to	2 1/4 inch

.....

Roofing Gravel to 1-2 inch
Cobble Stones for Bungalows.

.....

With a Modern Equipped Plant at Niles We Are
 Able To Give All Orders PROMPT ATTENTION

.....

CALL Douglas 2944

Mr. James J. Hill says:--

"Unless the facilities of the Terminals of our Railroads are increased, the congestion, evergrowing, which often paralyzes traffic today, will result in industrial chaos."

---From N. Y. Sun, January 19, 1913

The Remedy:--

Equip Your Railway Freight Stations, Storage Warehouses,
Steamship Docks, Piers, Etc., with

Otis Inclined Elevators

Mechanical Continuous-Motion Carriers which meet every condition of Merchandise and Freight handling---and by the use of which **congestion is eliminated.**

Running continuously in one direction, up or down, Otis Inclined Elevators move everything without stops to load or unload.

No matter what the loads may weigh or how fast they come, Otis Inclined Elevator will handle them. Its capacity is limitless---it cannot be overloaded. It will handle from 600 to 1,960 loads per hour according to speed. It will keep up this capacity year after year. An electric motor is all that is required for operation, and, results considered, the current cost is almost negligible.

Write for Catalog giving full particulars about various types

Without obligation we will gladly supply full information. Put your "moving problems" up to us---we offer you real help and a positive solution.

Frank Neidick

Carpenter and Builder
Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Longitudinal Section of Self-Sentering. Actual Size.

Concrete Floors

can be built without form work

if you make use of the new form of expanded metal which is a centering and reinforcing combined.

Self-Sentering is a material perfected after years of study and experiment in reinforced concrete construction. It consists of a series of heavy, cold-drawn ribs connected with the most efficient form of expanded metal.

Self-Sentering is adaptable to practically every type of concrete construction. It affords

the simplest and most economical method of building concrete, floors, roofs, ceilings, side walls, and partitions. It is adaptable for both flat and curved construction. It can be used for roofs of any type, as it supplies a bond which will hold the concrete until set on any inclined surface.

Write for our Fireproofing Handbook on low cost fireproof construction with Self-Sentering. We shall be glad to send you a complimentary copy on request. Write today.

Cross Section of Self-Sentering—Showing Side Lap. Actual Size.

The LILLEY & THURSTON CO.
Rialto Bldg.---San Francisco

The Annual Report of the Mississippi Commission for the fiscal year ending June 30, 1912, published as an appendix to the report of the Chief of Engineers, United States Army, is especially interesting for its official records concerning the great floods of 1911. From examinations of the records the commission says: "It seems obvious that reservoirs at the great headwaters would not have been of much use in preventing the flood on the Mississippi River below Cairo. The fact disproves again the prevalent belief that floods are caused by overflow of the top land area to the collection of levees, and reports on the question of flood control seem to be in favor of a system of levees and a few reservoirs at the upper end."

The Sun Power Plant Reflectors and Generators In Egypt.

By Frank C. Perkins.

Designed by an American Engineer, Frank Shuman, Egypt has a sun power plant, used for pumping, and which has been the subject, of late, of many news reports. The reflectors and generators of the sun power plant in Egypt differ from the Philadelphia steam generators in which plane mirrors were used. In the Egyptian plant the reflectors are parabolical and the power is said to be much greater, or one hundred as against thirty.

This Egyptian plant is located at Meadi, a suburb of Cairo, on the road to Helouan, and the steam generator part of the installation covers a great deal of ground, as there are five reflectors, each 294 feet long, the cross section being in the form of a parabola with the generator units at the focus.

It is of interest to note that the latter is made of zinc, and is of rectangular section, 14 inches wide, with sides only 3/4-inch apart and is painted with a special black paint of high heat absorbing qualities. The glass plates and the insulators used in the original plan have been discarded and at the upper edge the generator is enlarged into a steam collector four inches in diameter, having a fall of six inches in its length of 294 feet, the collector being connected to the main steam pipe at the upper end and the feed water introduced at the lower end.

Mr. Shuman states that the sides of the reflector are lined with silvered glass mirrors ranging in size from about a square foot at the mouth to a quarter that size near the vertex. The reflector and boiler are carried on eight braced steel cradles, the outer circumference of which is in the form of a segment of a circle and has a rack attached, gearing with a pinion which serves to rotate the reflector so that it may always face the sun.

The main engine furnishes the power for this operation through a pair of friction pulleys which are put in gear by a special regulator, of which a thermostat is an important part. The reflectors follow the sun automatically throughout the day. There are only

two banks of boilers in this entire plant instead of the 26 used in America, and they have been put widely apart so that no one shall shade another, an extra hour of sunshine at each end of the day being thus saved.

There is a troublesome matter in Egypt, and with it in view provision has been made for tilting the whole generator to one side and washing them off with a hose. It has been found best to work with a pressure of 150 lb. below that of the atmosphere, and corresponding to a temperature of 32 to 39 degrees Fahr. In order to get a low pressure steam efficiently converted, has designed an engine which has given exceedingly good results under test. A surface condenser of the vacuum being obtained because of the vacuum being maintained by running the engine with a special petrol motor, the vacuum being as good as the vacuum

is obtained and the main engine is operating.

In reference to the generation of mechanical power by the absorption of the sun's rays, Mr. Shuman points out that the direct utilization of the natural forces in the development of power suitable for human activities has been for centuries a matter of continued scientific research. While to a limited extent these forces have been used from the dawn of civilization in the common forms of the windmill and various types of water-driven motors, it has not been hitherto possible to practically utilize the central dominating forces of nature—the sun's heat—in any direct manner, though obviously all power generators are dependent upon this great force for their existence. Although for many years engineers and physicists have been occupied with this problem; notably John Ericsson, Perry, Millican, Monnier and Tellier, in France; Langley and Williss in America, they based their efforts either upon the use of lenses or mirrors to concentrate the sun's rays upon a small surface, or upon the heating of fluids of a low-boiling point, with subsequent power generation from the vapor under pressure.

It has always been attempted to create vapor at high pressure and then utilize this in the ordinary engine, but with the high temperatures involved, the losses by conduction and convection are so great that the power produced was of no commercial value. Where lenses or mirrors are used, the primary cost of the lenses, and the apparatus necessary to continuously present them toward the sun, have rendered them impracticable. Where fluids of low boiling point, such as ether, sulphurous acid and liquid ammonia were used, the results were of little value because of the inherent inefficiency of these fluids as power generators.

Mr. Shuman holds that a sun-power plant, in order to be practicable, must possess high efficiency, low cost of installation and maintenance, well-marked length of service, and should not require special trained mechanics for its operation. He maintains that in order to be efficient it is not necessary that the plant generate continuously, inasmuch as the great value of such a plant lies in its use as an irrigation apparatus, it is only necessary that the plant run about eight hours daily. It must, however, consist of units which may be assembled to produce a power plant of any required size, the larger the plant the greater the efficiency. It is entirely practicable to produce a sun-power plant up to 10,000 hp. and over. An ideal plant must be subject to little or no vibration; hence it must be near the ground in order not to be affected by storms and winds. The unit must be removable without stopping the operation. Construction must be simple and easily understood

by the ordinary steam engineer, and wear and tear must be reduced to a minimum.

The first cost of a sun-power plant to be practical, and of commercial value, must be sufficiently low so that the interest on the investment does not make it unprofitable. This is the rock on which, thus far, all sun-power propositions have been wrecked but this one. It is not necessary that the cost of the sun heat absorber shall be as low as that of a steam boiler and fitting of the same power. The cost of the plant described here is twice that of the ordinary steam power plant of the same size. This price is sufficiently low, however, so that even if the extra interest is taken into consideration, the fact that after installation no fuel is required is such an enormous advantage as to entirely offset the increased cost, and in addition cause great profits.

A decade ago Mr. Shuman became interested in the problem of obtaining power by absorbing the sun's rays. It was found, by experiment, that a vessel was so arranged that the sun's rays could impinge upon it, and if all heat losses by conduction, convection and radiation are prevented by a theoretically perfect method of insulation, the temperature within the vessel would rise certainly to 1,000 degrees Fahr. without any attempt being made to concentrate the rays of the sun. For commercial purposes it is impossible to secure any form of insulation which would even approach the theoretical.

Commercially, the main object is to produce practical power at a minimum cost, and this has been done by the use of well known and cheap forms of heat insulation. Were no steam made in these vessels as they are arranged in the present plant the temperature therein would go up to 350 degrees Fahr. in latitude north, and possibly to 450 degrees Fahr. near the equator. The production of steam at atmospheric pressure, however, keeps the temperature in the vessels down to 212 degrees and whatever excess of heat is produced by the sun's rays over and above the ground, and which permitted and may therefore be utilized.

No doubt sun-power must go through the same long and gradual course of development that has brought other forms of mechanical power to the present high plane of efficiency, but the principal will remain fundamentally correct.

The first Shuman generator consisted of a wooden box covered by two layers of glass, between which was a small air space, and in the box was placed a miniature ether boiler. This apparatus was exposed to the sun's rays, the ether distilled, and the amount of heat which might be absorbed was determined. As an experiment, a small toy engine was successfully run with this original apparatus. A second generator consisted of a 2-inch steam pipe 16 feet long, insulated at the bottom and enclosed in a box cov-

ered by a double layer of glass. Here again ether as distilled, and the number of heat units absorbed were determined. A third type of power plant was composed of a cast-iron water pipes properly insulated against heat loss, the unit being 18x30 feet, and the motor being an ether engine. With this apparatus 3½ hp. was obtained.

With the knowledge acquired the next generator to be designed below was gradually evolved. This sun-power plant consists of an absorber, a low-pressure steam engine, condenser and auxiliaries. In this sun-power plant the absorber was composed of a series of units, each containing a flat metal honey comb water vessel, rectangular in shape, and resembling, locally, a large waffle. This vessel was enclosed in a flat wooden box covered with two layers of glass having a one-inch air space between them, and laying the under surface of the box insulated against heat loss downward by a two-inch layer of regranulated cork and two layers of waterproofed board.

The boxes were mounted on supports which elevated them some six inches above the ground, and it was permitted them to be inclined perpendicular to the sun at the meridian. Plane mirrors of cheap construction were mounted on two sides of the boxes in order that more rays of the sun might be absorbed and reflected upon the water vessel. This latter is connected at one end of a feed pipe from the water supply, and at the other end to a steam pipe. The steam pipes from the various units are connected together and empty into a main eight inches in diameter in the present plant, which conveys the steam to the engine.

The power of this first plant was used for pumping water by means of a reciprocating steam pump, of the ordinary type, and when the sun shone this plant pumped water successfully and practically. The capacity of the plant was 3,000 gallons of water per minute lifted to a height of 33 feet.

From actual tests made in Philadelphia it was found that the absorber of 26 banks of units, each containing 22 single units, and having a light absorbing area of 1,260 square feet, there could be developed during eight hours, 1,825 pounds of steam. The power produced was much greater than normal to the plant, as it was built for tropical use and was entirely unsuited for commercial work in northern latitudes.

The loss of heat by conduction and convection in northern latitudes is enormous. When the present apparatus is placed in an area where the temperature of 100 degrees Fahrenheit is obtained throughout all the day, regions where power can be multiplied tenfold. The immediate application of sun-power are in those regions of the tropics where the sun practically shines throughout the year, and which is very expensive, coal costing from one hundred to \$20 per ton.

Mr. Stuman says that there is room now for at least half a million horsepower in such tropical lands as the nitrate district of Chile, the borax industry in Death Valley, and for general purposes in places where the outside temperature runs from 110 degrees to 140 degrees Fahrenheit. As an irrigation engine there is no limit to the

amount of power that can be practically utilized; and for this purpose the conditions need not be so very favorable as those mentioned above. Throughout most of the tropical regions sun-power will prove very profitable in irrigation. One advantage of the sun-power, or, in fact, of any condensing plant for irrigating purposes is that the water used for the condenser costs nothing, as the main output of the engine can be passed through the condenser first before entering the irrigating canals.

The interior of Australia was at one time, a fertile country, as is evidenced by the fossilized trees. There is an area of 600 miles in either direction which is entirely valueless. During a drought there have been times when one-third of the sheep raised on the margins of this desert died from thirst, causing great financial loss. In this locality the sun shines with an intensity sufficient to produce an average daily temperature of 100 degrees to 110 degrees Fahr. The occasional rain nourish the sparse vegetation necessary for sheep, which are watered from wells driven in the ground and pumped generally by horsepower, very often by handpower, and sometimes by means of fuel oil, which by the time it reaches its destination, brings the cost equivalent up to some \$20 per ton. By building sun engines in this region, and pumping from the always present underground water which in this region lies at a depth of from 15 to 40 feet, this country can be made productive and valuable.

Throughout Eastern India and Ceylon many thousands of square miles of farm land can be improved three-fold by mechanical irrigation. Hand pumping is mainly the present form of irrigation used.

In Egypt agriculture depends entirely upon irrigation furnished by the River Nile through its periodic overflow. The English government built the Assuan Dam at an enormous expense, and widened the irrigable area about half a mile on each side of the Nile, thus adding greatly to the tillable portion of Egypt. Of course, when the Nile is in flood infinitely more water than necessary is furnished, but the demand is for a supply that can be depended on from day to day, especially at seasons of low water. This supply at present is furnished by the hand labor of some 100,000 fellahs who pump after the manner of their ancestors. The sun engine now installed in Egypt does the work of about a thousand of these laborers.

In the States throughout Arizona, Nevada, New Mexico and Southern California, there is room for any amount of power, for irrigating purposes alone. These States show an average of 90 per cent sunlight, and the cost of fuel is practically prohibitive in most of these regions.

In the Egyptian sun-power plant the engine, condenser and auxiliaries are similar to those in daily use by steam plants, and may, therefore be eliminated from comparison, leaving the absorber and the ordinary steam boiler alone to be compared. It is found that it is true the initial cost of the sun-power absorber in question is about double that of a first-class boiler plant of equal power. The great economy of equal power. The great economy of equal power. The great economy of equal power.

is well suited for sun-power the cost of coal, or its equivalent, is usually very high, the price ranging generally from \$10 to \$30 per ton. To offset the cost of fuel at all is required by the water. In the matter of maintenance and repairs, also the advantages with the sun-power. It is estimated that the repairs should not be in excess of 5 per cent per year on the total cost, inasmuch as the apparatus works at low temperature, while the ordinary boiler requires flue gases up to 500 degrees.

Many parts of the sun-power plant, such as the metal heaters, piping, foundation and insulation are practically everlasting, barring accidental breakage, the only item of repair being the wooden frames and glass covers, and it is found that after an installation of glass has once been tested out by the heat and the badly annealed sheets replaced, the ones left will last for years. This was evidenced by the small 18x30 foot heater in operation for three years in Philadelphia. There was a replacement of about 10 per cent, necessitating the first three weeks, thereafter the heater ran three seasons without to or three sheets of glass needed replacement, these being accidentally broken.

Mr. Stuman says that the future development of solar power has no limit. Where great natural water power exists sun-power cannot compete; but sun-power generators will, in the near future, displace all other forms of mechanical power over at least 10 per cent of the earth's land surface.

IMPROVEMENTS IN INCANDESCENT LAMP MANUFACTURE.

In a paper by Ward Harrison and John J. Edwards, read before the Illuminating Engineering Society, Pittsburgh, Pa., it is brought out that the strength of tungsten filaments has increased more than 300 per cent since 1911, and the strength of drawn wire has increased 40 per cent since 1911. The use of chemicals in the bulb has become general during the past year has reduced the blacking of bulbs to a marked degree and has made possible a substantial reduction in bulb size for several lamps, thus reducing manufacturing costs and by extending the application of the lamps. The introduction of coiled filaments makes possible many new designs of lamps which heretofore could not be manufactured. The strength of the filament is increased by this process and the candle-power maintenance is not affected.—Scientific American.

NEW POWER COMPANY IN PORTLAND.

PORTLAND, October 7.—Entrance of the Northwestern Electric Company, a Blackacker concern, into the Portland field in competition with the Portland Railway Light and Power Company, means a saving per year in electric bills of at least \$20,000, stated a commissioner of Public Utilities this morning. In bids just opened the new company underbid the new company 20 cents per amp for underground and \$1.40 for overhead service. The bids of the new company were lower than the present contract of the old company.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items, all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, none. Owner, R. J. Wymann, 1959 Hayes street, S. F. The building will be erected on Hyde street north of California, covering an area of 27½ x 112 feet. There will be a total of 12 suites arranged in three and four room apartments. Each apartment will have a private bath and will be equipped with a wall bed. Interior finish will be of pine redwood and elm panels. Some hardwood floors will be used. Plans provide for a hot water system. Bath rooms will have the wainscot. Exterior of the building will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$100,000. Architects, Dunn & Kearns, Monahan Bldg., S. F. Owners, George M. Cesar et al. The building will be erected on the northeast corner of Post and Leavenworth streets, covering an area of 62½ x 81½ feet. There will be a complete steel frame, contract for which has been awarded. Interior will be arranged for a large number of handsomely finished suites, ranging from two to five rooms. All apartments will have private entrances, connecting baths and wall beds. Interior finish will be of pine, redwood and hardwood. There will be steam heat, a vacuum cleaning system, elevated service and hot water supply. All bath rooms will have cement floors and the wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Structural engineering has been taken and contracts will be awarded at once.

SAN FRANCISCO—Apartment house, 4 story and base, frame, \$12,000. Architect, C. O. Chusen, Pichler Bldg., S. F. Owner's name will add. The building will be erected on Sacramento street east of Divisadero and has been designed to contain twelve suites of four rooms each. Interior finish will be of pine, elm, some elm panels and hardwood floors. There will be steam heat and hot water supply. All suites will have private bath rooms and wall beds. Bathrooms will have composition floors and tile wainscot. Plans are in the hands of the architect who is also doing the structural engineering. Plans are now being secured.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel, \$75,000. Architects, Dunn & Kearns, Pichler Bldg., S. F. Owners, George M. Cesar et al. The building will be erected on the northeast corner of Post and Leavenworth streets, covering an area of 62½ x 81½ feet. There will be a complete steel frame, contract for which has been awarded. Interior will be arranged for a large number of handsomely finished suites, ranging from two to five rooms. All apartments will have private entrances, connecting baths and wall beds. Interior finish will be of pine, redwood and hardwood. There will be steam heat, a vacuum cleaning system, elevated service and hot water supply. All bath rooms will have cement floors and the wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Structural engineering has been taken and contracts will be awarded at once.

redwood. Some hardwood floors will be used. Plans are now being secured. The building will be erected on the northeast corner of Post and Leavenworth streets, covering an area of 62½ x 81½ feet. There will be a complete steel frame, contract for which has been awarded. Interior will be arranged for a large number of handsomely finished suites, ranging from two to five rooms. All apartments will have private entrances, connecting baths and wall beds. Interior finish will be of pine, redwood and hardwood. There will be steam heat, a vacuum cleaning system, elevated service and hot water supply. All bath rooms will have cement floors and the wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Structural engineering has been taken and contracts will be awarded at once.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$30,000. Architects, Alvin J. Stern, 1547 Broadway, Oakland. Owners, City Investment Co. The building will be erected on the north side of Grand avenue, between Station and Parking streets. There will be a large number of two, three and four room apartments. All have private entrances and wall beds. Interior finish will be of pine, redwood and hardwood floors will be used in the principal rooms. Plans provide for steam heat and hot water supply. Bath rooms will have composition floors and the wainscot. Exterior finish will be of brick and cement plaster. Plans are complete and in the hands of the architect who is also doing the structural engineering.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$20,000. Architects, Nelson & Nelson, 1547 Broadway, Oakland. Owner, M. K. Kelson. The building will be erected on the north side of Grand avenue, between Station and Parking streets. There will be a large number of two, three and four room apartments. All have private entrances and wall beds. Interior finish will be of pine, redwood and hardwood floors will be used in the principal rooms. Plans provide for steam heat and hot water supply. Bath rooms will have composition floors and the wainscot. Exterior finish will be of brick and cement plaster. Plans are complete and in the hands of the architect who is also doing the structural engineering.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$20,000. Architects, Nelson & Nelson, 1547 Broadway, Oakland. Owner, M. K. Kelson. The building will be erected on the north side of Grand avenue, between Station and Parking streets. There will be a large number of two, three and four room apartments. All have private entrances and wall beds. Interior finish will be of pine, redwood and hardwood floors will be used in the principal rooms. Plans provide for steam heat and hot water supply. Bath rooms will have composition floors and the wainscot. Exterior finish will be of brick and cement plaster. Plans are complete and in the hands of the architect who is also doing the structural engineering.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$20,000. Architects, Nelson & Nelson, 1547 Broadway, Oakland. Owner, M. K. Kelson. The building will be erected on the north side of Grand avenue, between Station and Parking streets. There will be a large number of two, three and four room apartments. All have private entrances and wall beds. Interior finish will be of pine, redwood and hardwood floors will be used in the principal rooms. Plans provide for steam heat and hot water supply. Bath rooms will have composition floors and the wainscot. Exterior finish will be of brick and cement plaster. Plans are complete and in the hands of the architect who is also doing the structural engineering.

COURT HOUSES.

SAN FRANCISCO—City Hall, Class A construction, \$1,500,000. Architects, Eakwell and Brown, 251 Kearny street, San Francisco. Owners, City and County of San Francisco. Plans for the plan and reinforced concrete work and for all fireproofing on the new City Hall Building have been completed and approved. Bids are now being called for by the Board of Public Works. Bids will be opened on October 22nd. Plans can be secured from the City Department of Agriculture. An official proposal appears in another column of this issue.

SAN FRANCISCO—Carving and finishing two granite pediments for city Hall. Cost not stated. Architects, Eakwell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened for this work show the McGilveray-Raymond Granite Co. low at \$15,931. A complete list of these figures will be found under the heading of San Francisco in this issue.

MARTINEZ, CONTRA COSTA CO., CAL.—Court house heating system. Cost not stated. Engineer, W. F. Leonard, Merchants' Exchange Bldg., S. F. Owners, Contra Costa County. Plans for the complete alteration of the present heating system in the County Court House are being prepared. The work will include an oil burning system. Bids will be advertised for as soon as plans are complete.

SACRAMENTO, CAL.—Elevator work State Capitol. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Bids are now being called for remodeling elevator grilles and installing two new passenger elevators in the State Capitol at Sacramento. Plans, specification and full particulars can be secured from the State Department of Engineering, Sacramento. An official proposal appears in another column of this issue.

WALLA WALLA, WASH.—Court house, 2 story and base, reinforced concrete and steel, \$200,000. Architect, Osborn, 108 First avenue, Walla Walla County. The building will occupy the center of a large public park and will cover an area of 116 by 188 feet. The design is in the classic style. Interior, 108 First avenue arranged for two large court rooms besides offices for all county officials. Construction will be reinforced concrete and interior partitions of hollow tile or metal lath and plaster. A number of fireproof vaults will be specified. Marble, tile and granite and other work is also specified. Interior finish will be of pine and oak. Exterior of the building will be faced with cement plaster. A pediment and a statue of Liberty have been eliminated reducing the cost of the building by about \$10,000. Work on the building is being completed and bids will be called for shortly.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Canada and Alaska, 2 story and base, Class C construction, \$11,000. Architect, C. O. Chusen, Pichler Bldg., S. F. Owner, Ship & Cargo Works. The building will be erected on the south side of Turk

the Place, covering an area of 12 feet. There will be three flats rooms and bath. Interior finish of pine and redwood with plywood floors. Each living room have an open fire place. Mantel, stove. Tile wainscot will be in the bath rooms and kitchens will be finished in tile and Exterior of the building will be with rustic and stucco. Complete and the work will be by Labor. All materials purchased by the owner.

GARAGES.

KELLEY, ALAMEDA CO., CAL.—
A story and base, brick, \$16,000.
15-Broadway and Rousseau.
Back Bldg. S. F. Owner's name
not given. This building will be erect on
east side of Sattuck street, 91
feet of Haste, and has a plan to de-
velop a commercial garage and
warehouse. The building will have
a depth of 45 feet and a depth of
10 feet. Interior will be finished in
plaster. Plans provide for metal window
frames. Exterior will be
with pressed brick. A com-
plete floor plan of the entire area. Plans
are complete and figures will
be taken.

GOVERNMENT WORK AND
SUPPLIES.

[illegible]

operating table. The sluice gates are to be 36 inch. The miscellaneous screw gate and globe valve shall be standard, non-rising stem, right hand, designed for 100 pounds pressure. Pressure reducing valves are to be 6 inch and 1 inch. Design to take air at 110 pounds. Swinging check valves to be 16 inch. The 16-inch gate valves to be any standard, cast-iron body, bronze mounted, double disc, stem rising, bell end gate valve, designed for 50 pounds per square inch pressure.

C.—The 14 special efficient controllers consist in general of a bronze piston and cylinder with frame, bronze orifice, copper float and returning device for the 4-way valve.

D.—The 14 filter operating tables required shall be any standard so-called roller operating table, constructed throughout of high-grade black slate not less than 1½ inches in thickness, with bevel edges. The tables are to be inclosed on three sides; open on the back and on the bottom, with large slate doors on the front side. Each table to be shipped completely piped up with the necessary table piping and equipped for the different valves.

E.—Venturi meters.—The 30-inch meter shall be register indicator, recorder, type M. The meter described is the one corresponding to those made by the Builders' Iron Foundry of Providence, R. I. Bulletin 75, catalogue 2015, length, 20 feet 10 inches; 1,560 gallons per minute minimum, 20,500 gallons per minute maximum, and shall be furnished complete with tube and all indicating apparatus and stands. The outlet shall be furnished spigot to fit into standard bell for class B cast-iron 30-inch water pipe. The 20-inch meter to be of the same manufacture of the 30-inch, length 14 feet 2 inches, 655 gallons per minute minimum, 9,020 gallons per minute maximum.

F.—Steel pipe, screwed, galvanized, brass pipe, vitrified pipe, brass and malleable iron fittings, pipe railings, and filter strainers. All steel galvanized pipe shall be standard, lap welded, screw pipe, designed for 100 pounds pressure. Strainer pipes and strainers are to be installed on the floor of each filter.

G.—Structural steel, including floor girders, rolled shapes, and miscellaneous small parts.—All structural steel girders and rolled shapes to be furnished in accordance with the different detailed drawings. All steel shall come without being painted. Character of steel to be in accordance with I. C. C. specifications 252 and fabrication in accordance with specifications 254.

H.—Copper ventilators for roof.—To be in accordance with and similar to ventilators made by the Royal Ventilator Co. of Philadelphia. Twelve of the ventilators shall have their bottom neck diameter 24 inches, made of copper, tapered out, furnished without downspout, set of ridge of the roof and under ½ inch thick red tile laid on 2-inch concrete base. Twelve-inch ventilators to be of the same general specification as the 24-inch. Sixteen-ounce copper to be used on both sizes of ventilators.

All of the material listed in the schedule and as specified will be required at the earliest date practicable.

Fresno, Cal., Freight Lift.

As previously reported, the contract

for the installation of a new hoistway and freight lift in the U. S. post office, Fresno, Cal., was awarded to the Otis Elevator Co. at \$1,771. In the prosecution of the work elevator machine, motor, and controller manufactured by the Otis Elevator Co. will be used.

Kitchen at Mare Island.

Bids are to be opened on November 1 at the bureau of yards and docks, Navy Department, in accordance with advertisement appearing elsewhere in this issue for an addition to the kitchen at the U. S. Marine barracks, Mare Island, Cal. The building shall be of brick with concrete foundation and floor and steel and wood framing. Roof shall be covered with wood sheathing and built-up asbestos roofing. Concrete floor shall rest on earth or gravel fill, the fill to be puddled so as to properly set before concrete floor is placed thereon. The general dimensions of the building shall be as follows: 21 feet 1½ inches wide, 54 feet 8 inches long, and about 18 feet from grade to top of wall.

Coaling Plant, Pearl Harbor.

The time for opening bids for structural steel work for coaling plant at Pearl Harbor, Hawaii, has been postponed from October 15 to November 1.

Magazine Building, Pearl Harbor.

The contract for the construction of seven magazine buildings at Pearl Harbor, Hawaii, under bids opened at the bureau of yards and docks, has been awarded to the Lord-Young Engineering Co. of Honolulu, Hawaii, at \$109,400.

Pearl Harbor Dry Dock.

Mr. Alfred Noble, of New York City, a civil engineer who is making a report to the Navy Department on the condition at the site of the new dry dock under construction at the naval station at Pearl Harbor, Hawaiian Islands, has not submitted his report, as yet, but is expected to do so within a few days. After the dock was partially wrecked in February Mr. Noble went to the Hawaiian Islands and examined the foundations and gave a preliminary report that the construction of a graving dock upon the site was feasible. It is expected he will now give a detailed account of his investigation and submit recommendations for the reconstruction of the dock. These recommendations will be submitted direct to the Secretary of the Navy.

Portland, Ore., Stone, Etc.

The following bids were received by the light house inspector, Portland, Ore., for supplying and placing stone at Mulhitee Point Light Station.

Sam McGee, Port Townsend, Wash., \$1,560.

Spalding Construction Co., Chamber of Commerce Bldg., Portland, Ore., item 1, \$18,720, 2, no change; 3, add \$100; 4, deduct \$100; 5, deduct \$250; 6, deduct \$250; 7, deduct \$100; 8, deduct \$100; 9, add \$100.

Transformers, San River Project.

The following bid, were opened under advertisement 229, by the U. S. Reclamation Service, Los Angeles, Cal.,

for transformers for the San River project:

Item 1, 2 25-K. V. A. transformers; 2, alternative, do, 30-K. V. A.

B. F. Kierulff, Jr., & Co., Los Angeles, Cal., item 1, \$301.52, at Port Wayne, and \$334.80, San Francisco, weight 1,148 pounds each; 2, \$361.63, Port Wayne, and \$380.70, San Francisco, weight 1,424 pounds.

Crocker-Wheeler Co., Los Angeles, Cal., item 1, \$350.10, at San Francisco, weight 1,650 pounds.

General Electric Co., Los Angeles, Cal., item 1, \$369, weight 1,265 pounds; 2, \$421, weight 1,515 pounds; delivery at either San Francisco or Portland.

Westinghouse Electric & Mfg. Co., Los Angeles, Cal., item 1, \$369.36, weight 1,081 pounds; 2, \$421.80, weight 1,195 pounds; delivery, Seattle.

Allis-Chalmers Co., Los Angeles, Cal., item 1, \$370, weight 1,000 pounds; delivery at Portland.

Work for Navy Yards.

Secretary Daniels has under consideration a plan by which he hopes to induce all the executive branches of the government to send to navy yards the work of repairing all types of floating craft possessed by the government, including the construction of such vessels. He takes the position that it is exceedingly important that the various naval stations, since they are essential auxiliaries to the fleet, should be kept in as high a state of efficiency as the battleships themselves. As far as it is within their power to contribute to naval efficiency, therefore, every executive department of the government possessing floating craft should be in accord in establishing the policy of directing that all work upon floating craft possessed by such executive department should be done at a navy yard. When there is considered the number of revenue cutters, transports, lightships, tugs, barges, etc., that the several executive departments possess, it becomes evident that the construction and repair of these craft constitute a logical and necessary employment for the force of mechanics essential to the efficiency of the operation of our naval stations as auxiliaries to the fleet, and the failure to give continuous employment at these stations to a limited number of skilled mechanics may seriously impair their usefulness for times of emergency. In the operation of the Panama Canal it will be found necessary to continuously call for the construction of tugs, dredges, barges, and colliers. There will also be a large demand for various standard engineering, mechanical and electrical appliances, and considerable of this work could be and should be done at our navy yards and particularly at the southern naval stations. It is extremely probable that if there was assigned to our various naval stations this additional government work there would not only result a marked decrease as regards the cost of making repairs to hull and machinery of all floating craft, but the military efficiency of the stations for emergency conditions would greatly be promoted, for it is the lack of continuous work at certain stations that now constitutes an almost insuperable barrier to efficient and well-rounded development.

Ventilators, Burley Substation.

Bids were opened by the U. S. Reclamation Service, Los Angeles, Cal., for Ventilators for the Burley substation, Minidoka project, Idaho, as follows:

California Cornice Works, Los Angeles, Cal., \$129.

THEATRES.

SEATTLE, WASH.—Theatre and office, 4 story and base. Class A construction, \$300,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owner, Alex. Pantages. The building will be erected at the corner of 3rd and University streets covering an area of 119 to 120 feet. Construction will be fireproof throughout, the building having a complete steel frame, walls and floors of reinforced concrete and interior partitions of hollow tile and metal lath and plaster. Plans provide for steam heat, a modern ventilating system in the theatre, vacuum cleaning and elevator service in the office section. Metal window sash and frames will be used. Interior will be finished in pine and hardwoods with a large amount of ornamental plaster in the theatre. Marble and tile will also be used. Exterior will be faced with white glazed terra cotta. Plans are complete and figures will be called for shortly. All parts of the work will be segregated.

SPOKANE, WASH.—Theatre, 2 story and base. Class A construction,

Sealed proposals will be received at the office of the United States Reclamation Service, Manila, Morot, until 2 o'clock p. m., November 12, 1913, for

earthwork and structures. Vandalla culvert yards of excavation, 2,500 cubic yards of reinforced concrete, the placing of 250,000 pounds of steel reinforcement and the placing in wooden structures of about 130,000 feet, b. m. of lumber. The work is situated on the south side of Milk River adjacent to the main line of the Great Northern Railway in the vicinity of Vandalla, Tumpico and Glasgow, Mont. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont., or Malta, Mont. A. P. DAVIS, acting director.

PROPOSALS FOR VALVES.

REGULATING VALVES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, California, until 2 o'clock p. m. November 19, 1913, for furnishing four needle regulating valves for the Fort Stanton Irrigation Project, Nebraska. For particulars address the United States Reclamation Service, 605 Federal Building, Los Angeles, California, or Washington, D. C. A. P. DAVIS, acting director.

NOTICE TO CONTRACTORS.

Office of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal., October 9, 1913.

SEALED PROPOSALS or bids will be received at this office at or prior to 11:30 o'clock A. M. on Thursday, October 23, 1913, for furnishing materials and constructing an Engine House on State Lot No. 2, at the water front of the City and County of San Francisco, in accordance with the plans and specifications prepared therefore by the Assistant State Engineer and adopted by the Board July 12, 1913, and on file in this office to which special reference is hereby made.

The materials to be used in this work shall consist of the requisite quantities of Portland cement (which will be furnished to the Contractor by the Board), sand, crushed rock, gravel, reinforcing materials, structural steel, bolts, castings, lumber, piles, wood block paving, roofing and painters materials, glass, window frames, doors, etc. All materials used will be subject to a rigid examination and test, and if found defective, unsuitable, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the Contractor at his expense.

No bid will be received unless it is made on a blank form furnished from this office, and is accompanied by a certified check in the sum of ten to five per cent of the amount of the proposal, to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, the sum of ten to five per cent mentioned in said check shall be deemed liquidated damages for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The bond required to be not less than one-half of the total amount of the bid, with two or more sureties to be approved by the Board of State Harbor Commissioners and conditioned for the faithful performance by the Contractor of all the terms and conditions of said contract according to the true intent and meaning thereof, and the satisfaction of said Board, and said bond shall also be effective as provided in an Act approved May 1, 1911, for the protection of the harbor, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary of the Board, or the Assistant Secretary at the office of the Board of State Harbor Commissioners, at or prior to 11 o'clock A. M. on Thursday, October 23, 1913, at which time and place the bids will be opened.

The Board reserves the right to reject one or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids.

Plans and specifications of this work

to be had at Room No. 18 Union Depot and Ferry House, upon depositing \$20 for same, which amount will be returned on return of plans and specifications.

Bidders are requested to mark envelopes containing bid, "BID FOR ENGINE HOUSE."

J. J. DWYER
THOMAS S. WILLIAMS,
J. H. McCALLUM,
Board of State Harbor Commissioners.
JEROME NEWMAN
Assistant State Engineer.
LEO V. MEIER, JR.,
Secretary.

Oct 21-1913

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., October 1, 1913.—**SEALED PROPOSALS** will be received at this office until 3 o'clock P. M. on the 30th day of October, 1913, and then opened in public session, of which notice is hereby given. Bids obtained at this office at the discretion of the Supervising Architect O. WENDELTH, Supervising Architect. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including twelve o'clock, noon, Tuesday, October 22nd, 1913; said bids then to be returned to the office and read for furnishing all plant, materials and labor for the following work in the State Capitol Building at Sacramento, California, in accordance with the specifications thereto, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

First—For remodeling elevator grilles in the State Capitol Building.

Second—For the construction and erection of two new passenger elevators, with equipment for same, in the State Capitol Building.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any formality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for elevators and grilles in the State Capitol Building, California."

(Signed) W. F. McCLURE, State Engineer. (*)

PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals indorsed "Proposals for Addition to Kitchen" will be received at the Bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. APARTMENT HOUSES—2 1/2 story and base, brick and steel, \$75,000, San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Shaw. These buildings will be erected on the north side of Bush street, between Hyde and Larkin. Each building has been designed to contain 18 apartments with private bath. The arrangement is such that each suite will have the maximum of light and fresh air. Interior finish will be of pine, elm and redwood. Some hardwood floors will be used. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have cement floors and tile wainscot. The design is in the colonial style, exterior being faced with red pressed brick trimmed with white stone. The owner's original intention was to cover the entire lot with one building, plans for which were also prepared by Mr. Clausen. Working drawings for the two structures are now nearly complete and work will be started at once under the day labor system, the owner purchasing all materials.

CITY HALL—Class A construction, \$450,000, San Francisco. Architects, Bakewell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans for the plain and reinforced concrete work and for all fireproofing on the new City Hall building have been completed and approved. Bids are now being called for by the Board of Public Works. Bids will be opened on October 22nd. Plans can be secured from the City Department of Architecture. An official proposal appears in another column of this issue.

CARVING AND FINISHING TWO GRANITE PEDIMENTS FOR CITY HALL—Cost not stated, San Francisco. Architects, Bakewell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened for this work on the McGilvray-Raymond Granite Co. low at \$15,921. A complete list of these figures will be found under the heading of San Francisco in this issue.

RESIDENCE—2 story and base, frame, \$6,000, San Francisco. Architect, none. Owner, C. C. Hall, 369 14th avenue, S. F. The house will be erected on Santa Barbara street in St. Francis Wood, and has been designed to contain eight rooms and two baths. Interior finish will be largely of pine with some hardwood veneer and floors. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater

will be installed. Bath rooms will have composition floors and tile wainscot will be used in both bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,000, San Francisco. Architect, none. Owner, W. R. Kenny, 120 Arguello Boulevard, S. F. The house will contain six rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room and dining room. There will be a large open fire place in the living room with brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic and ship lap. Plans are complete and the owner is now purchasing all materials. Work will be done by Day Labor.

RESIDENCE—2 story and base, frame, cost not stated, San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Edward Hall. This dwelling has been mentioned here before when working drawings were first started. The house will be erected on Ashbury street near Frederick, and will contain eleven rooms, three baths and a sleeping porch. A garage will occupy the basement. Interior finish will be of pine and veneer hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with brick veneer and cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,000, San Francisco. Architect, A. Howard Peterson, 717 Mills Bldg., S. F. Owner, Alfred Kolm. The house will be erected on San Fernando Way in St. Francis Wood, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

BUNGALOW—1 1/2 story and base, frame, \$2,000, San Francisco. Architect, none. Owner, Emil Nelson, 580 Jersey street, S. F. The dwelling, which has been designed for a seven room house, will be erected on 16th avenue south of Anza street. Interior finish will be of pine and elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick mantel. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$7,500, San Francisco. Archi-

tect, Albert Farr, Foxcroft Bldg., S. F. Owner, A. O. Smith. This house will be erected in St. Francis Wood, and has been designed to contain eight rooms, bath and sleeping porch. All interior finish will be of pine and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and bids will be called for at once.

RESIDENCE—2 story and base, frame, \$12,000, San Francisco. Architect, Fred B. Wood, 2211 Steiner street, S. F. Owner, Attorney Cobb. The house will be erected in the Marine View district, and will be designed to contain in the neighborhood of ten rooms, several baths and sleeping porch. A garage will also be erected on the lot. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used throughout. There will be a central heating system, probably hot water. Open fire places will be used with tile and brick mantels. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$5,000, San Francisco. Architect, Leonard Phelan Bldg., S. F. Owners, Urban Realty Co. This house will be erected in Ingleside Terrace, and has been designed to contain seven rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$6,000, San Francisco. Architect, A. Howard Peterson, Mills Bldg., S. F. Owner, Louis L. Bondeli. The house has been designed for a seven-room dwelling with bath and sleeping porch, and will be erected in St. Francis Wood. Interior finish will be largely of pine with some hardwood in the living room and dining room. Hardwood floors will be used throughout. Plans provide for furnace heat. Open fire place will be used in the living room with a large brick mantel. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$2,500, San Francisco. Architect, none. Owner, A. R. Lapham, 1835 McAllister street, S. F. The house will contain six rooms and bath. All interior finish will be of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be an open fire place and tile

mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

PIRE HOUSE—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Assistant State Engineer, Ferry Bldg., S. F. Owners, State Board of Harbor Commissioners. Plans have been completed and approved by the State Board of Control for a reinforced concrete fire house which will be erected on Sea Wall Lot No. 8. The building will cover a large area and will contain a fire station with eight stalls, round house, blacksmith shop and machine shop. Interior will be finished in pine. Cement floor and metal window sash and frames will be used. Exterior will be faced with cement plaster. Bids will be opened by the State Board of Harbor Commissioners on October 23rd. An official proposal appears in this issue. Plans and specifications can be secured from the Assistant State Engineer, Ferry Building.

LAUNDRY AND ROOMS—2 story and base. Cals C construction \$11,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Adolph Schwartz. The building will be erected on the south side of Pink street west of Larkin, and will have a frontage of 25 feet and a depth of 137 1/2 feet. Entire first floor will be occupied by a laundry. Upper floor will be divided into 14 rooms and several baths. Interior will be finished in pine and redwood. A large amount of special laundry machinery will be purchased. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

WAREHOUSES—2 1/2 story and base, reinforced concrete, \$160,000. San Francisco. Architect, Constructing Quartermaster, Fort Mason. Owners, United States Government. Plans are complete and specifications are now being printed for the construction of two large three-story reinforced concrete warehouses which are to be erected by the government at the Army Supply Depot, Fort Mason. Each of these buildings will cover an area of 200 by 60 feet and will be carried on concrete pile foundations. Each building will be equipped with two large electric freight elevators, automatic sprinklers, modern plumbing and electric work, steel rolling doors and metal window sash and frames. Some marble work will be used. Floors have been designed to carry a load of 500 pounds to the square foot. Exteriors will be faced with cement plaster. Mission tile roofs will be used. This work is estimated to cost \$160,000. Bids will be called for shortly.

SEWER AND ROAD WORK—Cost not stated. Fort Mason, Cal. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Plans have been completed by the Constructing Quartermaster's office at Fort Mason for a sewer system, which will be constructed at that post. The work contemplated includes the entire reservation and all cost in the neighborhood of \$100,000. Bids will shortly be called. The wharf at Fort Baker will undergo temporary repairs. Plans have been prepared for the com-

plete overhauling of this structure but only temporary repairs will be made at this time. Work on the road system at Fort Mason has been begun in earnest. Oiled macadam will be used throughout, hard red rock will be used for the top screening and Angel Island rock for the bottom course. A large amount of road oil and equipment will be required.

Contracts Awarded.

TELEPHONE EXCHANGE—2 story and base, brick and steel, \$27,330. San Francisco. Architect Engineering Department Pacific States Telephone and Telegraph Co., 323 Grant Ave., S. F. Owner, Pacific States Tel. and Tel. Co. Contractors, Matthies and Griffith, Builders' Exchange, S. F. Contract price, \$27,330.

Much Government Work To Be Let.

Plans Nearly Ready for Two Large Reinforced Concrete Warehouses at Army Supply Depot.

Engineer O. W. Degen, of the Constructing Quartermaster's office at Fort Mason, has returned from a vacation trip, the greater part of which was spent along the North Fork of the Eel River in Trinity County. Mr. Degen is a student of the period of the cave dwellers and during his vacation he explored the ruins of the early Indian villages and cave dwellings in Trinity County. Four large caves and remarkable acorn floor grinding pots cut out of the solid rock in series of three and more were discovered. Mr. Degen will submit photographs and descriptions of ancient hieroglyphic inscriptions discovered on the moss covered boulders, and supposed to be the mythology of prehistoric Indian tribes, to the University of California.

Two Warehouses.

Since his return Mr. Degen has been very busy and considerable government work will shortly be on the market. Plans are complete and specifications are now being printed for the construction of two large three-story reinforced concrete warehouses which are to be erected by the government at the Army Supply Depot, Fort Mason. Each of these buildings will cover an area of 200 by 60 feet and will be carried on concrete pile foundations. Each building will be equipped with two large electric freight elevators, automatic sprinklers, modern plumbing and electric work, steel rolling doors and metal window sash and frames. Some marble work will be used. Floors have been designed to carry a load of 500 pounds to the square foot. Exteriors will be faced with cement plaster. Mission tile roofs will be used. This work is estimated to cost \$160,000. Bids will be called for shortly.

Sewer and Road Work.

A complete new sewer system is to be constructed at Fort Mason at a cost of approximately \$10,000. It is planned to include the entire reservation and plans will be out for figures within a month.

Work on the new road system at Fort Mason has been started in earnest and a large amount of materials, road oil and equipment will be required. All

roads will be of oiled macadam with hard red rock for top screening and Angel Island rock for the bottom course.

Temporary repairs will be made at once to the Fort Baker Wharf. Plans have been prepared calling for the complete overhauling of this wharf, but only temporary repairs will be made at this time.

Official proposals for all of the above work will be published in the columns of the Daily Pacific Builder.

City Bids Opened.

McGilvray-Raymond Granite Co. Low for Carving Two City Hall Pediments—Other Bids Opened.

Bids were opened at the Wednesday session of the Board of Public Works for shades and linoleum for the eight principal buildings at the San Francisco Hospital and also for carving and finishing two large granite pediments for the City Hall. The McGilvray-Raymond Granite Co. presented the low figure for the latter work, and D. N. and E. Walter were low bidders for the shades and linoleum. Low bidder in each case will probably be awarded the contracts. Following is a list of all figures submitted:

Door and Window Shades and Linoleum, S. F. Hospital.

Prop. No. 1, entire take; Prop. No. 2, price per square yard for linoleum; Prop. No. 3, unit price per square yard for Duplex shades if specified.

D. N. and E. Walter, Prop. 1, \$16, 036; Prop. 2, \$1.19 1/2 per sq. yd.; Prop. 3, 3 cents per sq. yd.

W. and J. Sloan Co., Prop. 1, \$18,235; Prop. 2, \$1.34 per sq. yd.; Prop. 3, 5 cents per sq. yd.

Carving and Finishing Granite Work on Two Pediments, City Hall.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—1 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owners, Harold Havens Co. The house has been designed to contain seven rooms, sleeping porch and bath, and will be erected in North Cragmont. Interior finish will be of pine and hardwood. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the living and dining rooms. There will be an automatic water heater. Bath room will have composition floor and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOW—1 story and base, frame. \$2,000. Oakland, Cal. Architect, W H Judson, Albany Bldg., Oakland. Owner, Mr. Gilvane. The house will be erected in Pleasant Valley Court, and will contain six rooms and bath. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. The work will be carried on by the Home Builders' Syndicate.

BUNGALOW AND GARAGE—1 story and base frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, S. J. E. Newsum, Nevada Bank Bldg., S F. Owner, Edgar E. Jamison. The house will be erected on Shattuck ave-

nue near Los Angeles, and will contain seven rooms and bath. A frame garage will be erected in the rear. Interior finish will be of pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,500. Oakland, Cal. Architect, none. Owner, C. J. Pfang, 126 Claremont avenue, Oakland. The house will contain seven rooms and bath, and is to be erected on Grand avenue north of Elwood. Interior finish will be of pine and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,300. Berkeley, Alameda Co., Cal. Architect, none. Owner, M. C. Ford, 231 Russell street, Berkeley. This house will contain seven rooms, bath and sleeping porch, and will be erected on the south side of Ocean Drive. Interior finish will be largely of pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat. Open fire places will also be used. Mantels will be of brick and tile. An automatic water heater will be installed. Composition floor and tile wainscot will be used in the bath rooms. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

BUNGALOW—1 story and base, frame, \$2,150. Oakland, Cal. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Mr. Ashley. The house will be erected on 61st street, and will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the two principal rooms. A large open fire place and brick mantel will be a feature of the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. The work will be carried on by Day Labor under the direction of the Home Buyers.

GARAGE—2 story and base, brick, \$16,000. Berkeley, Alameda Co., Cal. Architects, Rousseau and Rousseau, Monmouth Bldg., S F. Owner's name withheld. This building will be erected on the east side of Shattuck avenue 90 feet south of Haste street, and has been designed for a commercial garage and machine shop. The building will have a frontage of 15 feet and a depth of 120 feet. Interior will be finished in pine. Plans provide for metal window sash and frames. Exterior will be faced with pressed brick. A cement floor will cover the entire area. Plans are nearly complete and figures will shortly be taken.

Get It From Bacon

"A Mix a Minute"

BIG-AN-LITTLE BATCH CONCRETE MIXER.

Just the thing for mixing concrete for foundations, bridges, walls, culverts, etc.

PORTLAND AND OREGON.

HOTEL—2 story and base, brick and steel, \$35,000, Portland, Ore. Architect, Robert F. Tegen, Morgan Bldg., Portland. Owner, A. L. Parkhurst. The building has been designed with stores on the first floor and a number of guest rooms on the upper floor. Foundations and walls are heavy enough to carry an additional story. Plans provide for steam heat and a hot water system. Interior will be finished in pine and redwood. Stores will have patent fronts and plate glass windows. A marble base will be used. Exterior of the building will be faced with pressed brick. Plans are being figured.

STORES—2 story and basement brick, cost not stated. Portland, Ore. Architects, Camp and De Puy, 426 East Alder street, Portland. Owner, P. L. Leach. The building, which has been designed for an undertaking establishment, will be erected on East SIXth street at the corner of Washington and will cover a ground area of 50 by 50 feet. Interior finish will be of pine and white enamel. Some art glass will be used. Upper floor will be fitted up for living rooms. Plans provide for steam heat. Exterior of the building will be faced with

"This system has handled 1150 separate fires so far this season, 88 per cent of which were discovered, reported, reached and extinguished before they reached ten acres in size. Since September 1st over 218 fires have been extinguished, four of which reached serious proportions, or over 1000 acres, eight more being between 100 and 1000 acres and the remaining 206 held below 100 acres.

"Very businesslike terms of co-operative fire protection are offered by the Forest Service to owners of land within the national forests. I would be very glad to explain these terms in detail to any land owner whose property is so situated that it can be covered into this protection system."

FOUD ALLEGED IN TIMBERLANDS

SALEM (Ore.), October 9.—The C. A. Smith Lumber Company, of which the Smith-Powers Logging Company is an affiliated corporation, has been called upon by Governor West to defend its title to approximately 10,000 acres of timber lands in this State. The Governor declares he has information which indicates the land was obtained by fraud, by means of dummy selections of school lands. The Smith-Powers logging plant, of which W. H. Powers is manager, was prominently connected with the recent Industrial Workers of the World deportation cases at Marshfield. Today the Governor sent the following telegram to C. A. Smith at San Francisco:

"You may have a hearing at this office any day this or next week that you suggest to show cause why this office should not bring suit on the part of the State to set aside, on the ground of fraud, certain State deeds covering a large acreage of timber lands held by you. Please do not send your man Powers, for, owing to his recent outlaw activities, I will not discuss the matter with him."

OAKLAND ANTIOCH TO LOWER TIME.

Electricity will take another spurt in its race against steam between Oakland and Sacramento when the Oakland, Antioch and Eastern's new time schedule goes into effect in about ten days. The interurban electric system, which is making a strong bid for the passenger traffic between the bay and the capital, so long monopolized by the Southern Pacific, has announced and is out in its running time. Each of the eight daily trains over the route will make the trip between Sacramento and San Francisco in three hours and fifteen minutes, according to the new time card. This will make the average running time of the Oakland-Antioch trains equal to the best time made by the Southern Pacific flyers, only one or two of which attempt to equal this record.

The Oakland-Antioch officials have tested their new roadbed thoroughly, and they are satisfied that the new schedule can be maintained without difficulty.

POWER PLANT IN SIERRA.

OROVILLE (Butte Co.), October 9.—An appropriation of waters of the Middle Fork of the Feather River to be used for the generation of electric power for a plant to cost \$250,000,

was filed with the County Clerk here Tuesday afternoon by Sacramento capitalists.

Among the Sacramentans behind the project are L. P. Breuner, F. G. Eby and S. H. Whisner.

The filing states that a power plant capable of developing 60,000 horsepower is to be constructed within five years. A fall of 1000 feet from the point of diversion of the water is secured.

A feature of the project will be a dam capable of impounding 15,000,000 cubic feet of water.

FOREIGN TRADE OPPORTUNITIES.

[Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

CORRESPONDENCE WITH CONSULS.

The suggestion is made that all communications to consular officers be addressed

The American Consul,

At _____,

the name of the officer not being given. Any communication so addressed will be opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name, it might be forwarded to him unopened, should he be absent, and delay would thus result.

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 11734. Automobile accessories.—

An American consular officer in Canada has forwarded the name of a well-established firm which desires to receive from American manufacturers catalogues and price lists of automobile accessories.

No. 11736. Cottonseed oil.—An oil mill in Europe now working on peanuts and other edible seeds has a refinery and deodorizing plant. The owners have a large trade in the best grade edible oils, and inform a commercial agent of the Department of Commerce that they would be interested in cottonseed oil to deodorize and mix with other oils.

No. 11737. Piano sounding boards.—

An American consul in a European city has received a letter from an important piano manufacturer in that city in which he states that in consequence of the increasing cost of spruce wood for sounding boards in the European markets, he has decided to negotiate with producers in the United States. The inquirer is anxious to place a small trial order, to be paid for immediately on receipt if it conforms to purchase conditions. Correspondence should be in Spanish.

No. 11738. Artesian well drills, heating plant, and other machinery.—

A report from an American consul states that a resident of his district has requested to be furnished with catalogues of American firms manufacturing artesian well drills, steam and hot-water heating plants, general sanitary equipment and appliances, equipment for slaughterhouses, ovens for buri-

ing refuse and dead animals, and gold-mining machinery, both placer and quartz. The inquirer advises that he has, up to the present, imported machinery from Germany, but that neither he nor his clients are satisfied with the same and wish to secure American products. Correspondence should be in Russian, and prices should be quoted c. i. f. port of destination. If impossible to make c. i. f. quotations, prices should be given f. o. b. American seaboard, and shipping weights and measurements as well as freight rates stated.

No. 11739. Fire apparatus.—

The American consular agent at Nelson, British Columbia, reports that the City of Nelson is considering the purchase of a motor hook and ladder truck for use in the fire department. Manufacturers of this equipment should communicate with the City Clerk, City of Nelson, British Columbia, Canada, for details regarding requirements.

No. 11740. Snow plows and track cleaners for electric railroads.—

The director of a foreign tramways company informs an American consulate that he desires catalogues, prices, and full particulars for snow plows and track cleaners for electric street railroads. The type most desired is one to be attached in front of the cars. In view of the probable extension of street railways into a hilly country later, there may also be opportunity for the sale of larger plows and cleaners than are desired at present. Correspondence may be in English.

No. 11733. Tenders for metal bridge.—

The American consular agent at Nelson, British Columbia, reports that bids are called for furnishing the material and erecting a metal bridge across the Kootenay River at Taghum, British Columbia, a few miles below Nelson. It is reported that work will be started this fall. Information may be had from the Public Works Engineer, Victoria, British Columbia, or from the Government Agent at Nelson. Tenders will be received until October 14.

No. 11727. Cottonseed oil.—

An oil mill in Europe making high grade peanut oil is now constructing a plant for hydrogenating edible oils by a hydrogen process that is said to be free from the objectionable trace of nickel that has been found in most of these oils. The hardened oil will be sold to the Margarin factories. A commercial agent of the Department of Commerce writes that the plant will be in operation in November, and if successful may buy a lot of fine cottonseed oil to harden and supply to this almost unlimited demand.

No. 11728. Hardware, electric apparatus, and machinery.—

A business firm in Australia has written an American consulate that it is prepared to represent two or three good American manufacturers. Its business is that of manufacturers' agents, and is confined mostly to all the large wholesale buyers throughout the different Australian States. The firm writes that the lines it could push best would be confined to the hardware, electrical, and machine trades, and it would be able to handle the following articles: Tools (pliers, files, wrenches, gardening tools, etc.), builders' hardware, enamel and aluminum ware, household appliances, and labor-saving devices.

No. 11731. Motor lifeboat.—A foreign business man informs an American consulate that he desires to purchase a lifeboat equipped with a motor. The speed of the boat should be from 10 to 21 miles an hour, and the motor is to be run with kerosene fuel. The boat should be from 25 to 30 feet long, seaworthy, and able to stand rough weather. An ordinary seaman in a motor boat will not answer the requirements, and the inquirer only wishes to receive specifications or catalogue showing lifeboats equipped with motors. Correspondence may be addressed to the port of destination, with approximate date of delivery.

No. 11731. Catalogues of motor cars and motor boats.—An American consul requests that manufacturers especially those of motor cars and motor boats, file in his office as soon as possible their catalogues and price lists for 1913.

No. 11729. Machinery for wagon makers' shop.—A report from an American consul in South America states that a letter has been received at his office requesting illustration and prices of machinery for wagon makers' shop. A circular bench saw, band saw, and planing machine were specifically mentioned, but from the letter it seemed apparent that a complete outfit for a small shop is required.

No. 11733. Motor fire truck.—A report from an American consul in Canada states that a local board of fire commissioners has under consideration the purchase of a motor truck. It is proposed to purchase a machine that will be a combined steamer, cannon hose and ladder truck.

No. 11736. Port works.—Tenders for the construction of minor and extensive port works, estimated at not about \$6,500,000, at Porto Alegre, Rio Grande do Sul, will be received by the Secretario de Estado Negocios das Obras Publicas of the State of Rio Grande do Sul, Brazil, until October 29. The general conditions of the competition of the character of the work to be undertaken, comprising new warehouses, houses, and complete outfit of a maritime port with harbor, discharging equipment, etc., are contained upon application to the Bureau of Foreign and Domestic Commerce. The American consul general at Rio de Janeiro writes that notice may be accomplished toward securing the whole or a part of the work by an American firm unless the same is submitted by a local agent who represents the Government as to the competency and financial responsibility of the firm bidding and who is prepared to give a cash bond for the faithful performance of the work.

THE WORKMEN'S COMPENSATION ACT.

On January 1, 1913, the new Workmen's Compensation Act will go into effect. One of the best points of that law is that which authorizes the State of California to guarantee the business of insuring employees against industrial accidents. Here the business insurance policies are written by private companies.

It was considered a great pity only just to the employer, and the State made it could not be otherwise.

pensate his injured workmen, it in turn should see to it that he is able to get insurance at cost to cover the risks of industrial accident.

The man who will have charge of that part of the work will undoubtedly have his hands full. He and his assistants will decide what insurance rates shall be charged by the Industrial Accident Commission, so as to make a business self-supporting. He will make settlements, resist unjust claims, make it possible for everybody to get an amount just as easily as they now get the stamps or money orders, and must manage the business so as to make it pay for itself.

The State will compete with the large number of private companies which are already in the field. It will make no attempt to monopolize the business, to the exclusion of private capital. All that it will aim to do will be to furnish the employer with the most satisfactory sort of compensation insurance and at the most satisfactory rates.

California is the first state in the Union to take up this form of state activity. Other States have tried other ways of meeting the problems involved, but not one of them has ever gone into the business of writing compensation insurance in competition with private companies.

REFORMS IN PRISON MANAGEMENT

California is accomplishing some reforms in prison management. Bread and water diet is proving much more successful in maintaining discipline than was the cruel straight jacket in use some years ago. Only two per cent and a fraction of the men released on parole engage in crime again. No other State equals California's record. The success of the parole system is complete.

Segregation of criminals will soon be possible at San Quentin. The first offender and the man who wants to reform will be kept apart from the hardened prisoners. The latest stripes will be replaced by a less offensive punishment for those convicts who show good purpose.

A new cell building will be completed at San Quentin before the first of the year, and segregation can then be carried out. The new building at Folsom will not be finished till late, and segregation will be delayed at that institution.

Pontieri has, with considerable degree of correctness, been regarded as a school for crime. Under the new administration of prison affairs in this State much is being accomplished toward removing this reproach.

AWARDS CONTRACT FOR BRIDGE APPROACH.

MARYSVILLE (Yuba Co.) awarded the following a conference and to the Board of Supervisors of Yuba County the City of Marysville. The afternoon law firm of the contract for the building of the new approach to the Port of River Bridge to George W. Martin & Son of San Francisco. The bid was \$200,000. The State will be the contractor for the bridge, and the city will be the contractor for the approach.

The State Highway, agreed to pay one-half of the cost.

Work is to commence within twenty-one days after the signing of the contract, and the bridge must be completed within five months. The approach is to be of concrete with a wooden flooring. The foundation for the bridge will be six feet below the surface. It is estimated that the total cost of the approach will be \$21,000. The supervisors limited their share to \$10,000. They insisted upon a clause in the contract providing for a twenty per cent roller test upon the completion of the structure.

The State Highway Commission and the members of the State Reclamation Board have approved the plans.

SACRAMENTO TO SAUSALITO.

SANTA ROSA (Sonoma Co.), October 10.—Runners that the Hastings and other interests have under consideration the construction of an electric railroad from Sacramento to Sausalito, reducing the distance from the State Capital to San Francisco by 100 miles, reached the ears of the Senators of Sonoma and Marin Counties Wednesday and caused them to delay the choice of a site for the construction of a joint bridge across the Petaluma River at Black Point, in connection with the Black Point cutoff. It was said that the railroad project could be decided in about two weeks.

WHERE PUBLIC POLICY IS AT STAKE.

Conservation involves a great public policy. It is probably the most vital public concern of this period and of the future.

The study feels that the people themselves must determine the conservation issue.

At the basis of the right of the Nation to reserve public domain from private ownership to conserve its natural resources is the power of the President to conserve. By this means President Roosevelt conserved the best of the natural resources of Alaska, and conserved the great Western forests.

The United States Supreme Court has now asked how to decide whether the President has the right to withdraw the public lands from entry. The request has been made by Judge Hook of the United States Circuit Court of Appeals. It is a properly wished so important question to be determined judicially by the highest judicial tribunal.

The statement of supremely important facts presents sharply the preserving power of the courts in the American governmental plan. No one can dispute that the judicial department should have the power to veto the executive department and the legislative department. Perhaps it is necessary. But since the courts have the final delegated power in the preservation of vital public policy, the executive power must be no longer absolute.

That fact is understood there is no one with it a general understanding of why it is essential to the Nation that the courts shall have the power to veto the executive power must be no longer absolute. City Star.

BOTH THE OWNER and the ARCHITECT are particularly interested in all kinds of building material, heating and cooling systems, building specialties, every accessory thing that goes into the building. Every issue of the Building and Industrial News contains hundreds of such building and construction reports giving the names and addresses of the owners, the architects. Both the owner and architect receive copies of the Building and Industrial News containing mention of their individual projects. Thus the builder and the architect have in their hands the names and addresses of items of their particular project, but also the names and addresses of energetic business men who have goods to sell that will help them to construct and equip the undertaking. Bind your copies of the Building and Industrial
News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder.
The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Article

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

CALL Douglas 2944

Mr. James J. Hill says:---

"Unless the facilities of the Terminals of our Railroads are increased, the congestion, evergrowing, which often paralyzes traffic today, will result in industrial chaos."

---From N. Y. Sun, January 19, 1913

The Remedy:—

Equip Your Railway Freight Stations, Storage Warehouses,
Steamship Docks, Piers, Etc., with

Otis Inclined Elevators

Mechanical Continuous-Motion Carriers which meet **every** condition of Merchandise and Freight handling---and by the use of which **congestion is eliminated.**

Running continuously in one direction, up or down, Otis Inclined Elevators move everything without stops to load or unload.

No matter what the loads may weigh or how fast they come, Otis Inclined Elevator will handle them. Its capacity is limitless---it cannot be overloaded. It will handle from 600 to 1,960 loads per hour according to speed. It will keep up this capacity year after year. An electric motor is all that is required for operation, and, results considered, the current cost is almost negligible.

Write for Catalog giving full particulars about various types

Without obligation we will gladly supply full information. Put your "moving problems" up to us---we offer you real help and a positive solution.

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Longitudinal Section of Self-Sentering. Actual Size.

Concrete Floors

can be built without form work

if you make use of the new form of expanded metal which is a centering and reinforcing combined.

Self-Sentering is a material perfected after years of study and experiment in reinforced concrete construction. It consists of a series of heavy, cold-drawn ribs connected with the most efficient form of expanded metal.

Self-Sentering is adaptable to practically every type of concrete construction. It affords

the simplest and most economical method of building concrete, floors, roofs, ceilings, side walls, and partitions. It is adaptable for both flat and curved construction. It can be used for roofs of any type, as it supplies a bond which will hold the concrete until set on any inclined surface.

Write for our Fireproofing Handbook on low cost fire-proof construction with Self-Sentering. We shall be glad to send you a complimentary copy on request. Write today.

Editorial Comment.

General reports in the building situation indicate that September has been at least a normal month in the business throughout the country. Sixty-nine cities representing building centers throughout the country show a gain of about one-half of one per cent, which after the slump in August shows at least a normal condition. In detail the report made to the American Contractor, Chicago, shows the following figures:

	Sept. 1913.	Sept. 1912.
City—		
Akron	293,645	325,856
Atlanta	284,723	268,587

Total\$56,749,572 \$56,528,939

Of the Pacific Coast cities San Francisco, Seattle and Spokane show a gain while the others show a decrease. New York shows a material decrease while Chicago and Philadelphia show a gain. Altogether, while the building business has not been particularly active, it has done pretty well to hold its own under present conditions.

The Mexican situation has assumed serious conditions so far as this government is concerned. Huerta has assumed entire control and the proposition of holding an election is such a palpable farce that not even a child could pretend to be misled by such a pretense at voting. For that matter the elections of Porfirio Diaz were little more than name as a man's word usually depended upon how he voted.

Huerta's power seems to be founded entirely upon intrigue. He does not seem to be the head of any party that looks to the advancement of Mexico or its people. So that it is merely a question of political intrigue and the power of vested interests whether or not he will hold his power. And as to whether he seems to be without the popular support of the people.

Polson was the idol of the army and the popular choice of the people in the revolt against kinas. Cromwell and the support of the Religionists and the enemies of the king. But so far as Huerta is concerned about all he has seems to be to play one party off against another and as yet he has succeeded in preventing any combinations against him that are formidable enough to show his power. This dictator seems not liable to succeed without the support of foreign powers. The reason that foreign powers would support him would be that he would be able to furnish protection to foreign nations in their persons and property. He does not seem able to do so and his power certainly is held by a very slender thread.

Decoration In Architecture.

Some Features Respecting Decorated Construction and Constructed

Decoration as Viewed by a Discriminating Architect.

W. P. Major, A.R.C.H.A.

Mr. President and Gentlemen:—It is at your request I am compelled to read a paper to you tonight, and therefore I have no apology to make if what I have to say lacks interest. You have chosen and now you must suffer the consequences of your choice. It is my intention to lay before you some of my thoughts in regard to designing the decorative and artistic side of architecture in the hope that some of you at least may not entirely agree at the outset with what I have to say and that we may have some discussion from which benefit may be derived. I might entitle my paper *Decoration in Architecture*, and divide it under two principal heads, *Decorated Construction* and *Constructed Decoration*. Later I intend to suggest a third and one which, I think, you will agree with me applies more nearly to the methods of decoration which are, or perhaps rather should be, adopted in these days. *Decorated Construction* is as we are all no doubt aware, most adequately exemplified in the style of architecture we call *Gothic*, and there is scarcely a feature of this style in its pure form that is not *Construction Decorated*. The pillars, arches, groined ceilings, buttresses, pinnacles, parapets and beautiful ornamental wooden roofs. All of them necessary to the stability and purpose of the structure and yet beautiful examples of decorative art.

The Greeks, too, undoubtedly decorated their construction and in doing so tended to give to their construction the appearance of even greater stability, for example the entasis to the columns and other means adopted to correct optical delusions. In other words they realized that it was essential that their buildings should appear structurally correct in order that they might appear beautiful. So that whether we turn to *Classic* or *Gothic* architecture we find the best examples of either style to be *Construction Decorated*.

These two styles are the foundation of the architecture of the present day, and one would therefore naturally expect the vital principles of those styles to be carefully followed. Is this so as regards decoration? As we turn to the architecture of the present day what a very different aspect is presented to us, and how glaring are many of its faults! How frequently as one walks down the streets of any city on this continent can one see a moulded beam perhaps two feet or even three feet deep meant to represent a monolith of sandstone spanning a distance of twenty-five feet or more and resting on piers at either end eighteen inches to thirty inches wide, composed of similar material or of brick then piled on top of this or of a mass of stone, brick, terra cotta or similar material twenty to thirty feet high which is stone trim evidently intended to support it. How rarely the intended effect fails is apparent to all of us, and yet we go on repeating this same

obvious mistake day after day, year after year. Then consider the supporting piers. How absurdly small they are for all the tremendous weight that they appear to have to uphold.

Take again that favorite abomination of some of us which we see only too frequently. I mean a row of bricks on edge across an opening with ten or twenty feet of brickwork above it. We know and even the most uneducated readily realize that by the simple laws of nature it should fall to the ground without any mass of brickwork above it to help push it down.

Then we see the brickwork just continued straight across an opening which renders the result more deplorable than ever, and without doubt those people who have no knowledge of construction at all must sometimes wonder how the bricks or terra cotta stay in place, and possibly sometimes say to themselves what wonderful mortar must have been used in that building. The next glaring misuse of decorative features that comes to mind is the use of a wide span segmental arch frequently of brickwork with abutments of a very slender nature. Sometimes you can see this feature high up in a business block, sometimes at second floor level, also in dwellings and any and every kind of building, and if one did not know the secrets of the construction it would be a matter for amazement how ever the structure held together, and we should be waging on the hour of the day at which it would fall. One can hardly omit mentioning the method sometimes adopted—more especially over a store front—of decorating the upper stories of a building with a series of brick or stone pilasters which, the convenience of the designer has prompted him to place anywhere but directly over the piers on the lower storey. The effect given is necessarily that the pilasters are by some sticky method attached to the walls instead of appearing to be the main points of support. There are many other instances of a similar nature far too numerous to mention in a short paper like this where decorative features which should represent to the eye at least support and stability and give to the senses a feeling of restfulness fail in their purpose because of the lack of truth in their application. I think we may rightly determine these things to be a failure on the part of the architect to solve the problem of his elevation and it may not be inappropriate to mention here that if the architect who is a scientifically trained man in the design of *Architectural Decoration* frequently fails in the complete solving of the problems put before him, how can the man who has had no architectural training expect to find that his design when executed consists of a jumble of badly imitated features and grotesque details? And yet we find civic authorities continuing to allow at least the small civic buildings to be designed by all sorts and conditions of self-

styled artists, with the result that the building that was intended to beautify a park, square or civic centre is not only a cause for dissatisfaction in itself but has a soothing effect on its entire surroundings.

But to resume from this diversion. I want to make it clear that the failures, some of which I have mentioned, are not confined to any particular grade of architects, if there are grades, but are faults of which we are all capable and culpable. Unfortunately I am not doctor enough or clever enough to be able to point out the remedy for all these faults, I leave that for the individual to discover, but I do think that with more study of the problems in design before us that we can eliminate some of the more glaring instances of incorrect application of decorative features. We can certainly eliminate some, such as the brick on edge arch, by discontinuing their use.

In designing the decorative part of a building it is necessary to adhere most faithfully to the natural expression of the material in which we are working. For instance, if we build the top story of a building in granite and the lower stories in brick the effect is that the lower portion is not strong enough to support the top. Why? Because granite by its appearance imparts to the mind a sense of great strength and weight, whereas brickwork naturally appears to be a much lighter and weaker material, and therefore by their natural expressions the granite should be placed at the lower story and should support the brickwork. Oh, but you say, this is a ridiculous instance. You can pick up your *Construction* and see there as I have done many times a photograph of a brick and stone building with the top story executed in sandstone with wide joints, the wide joints being evidently put in to add to the effectiveness of the drawing, whereas in execution they give weightiness and strength to the appearance of the stonework which necessarily appears to be crushing the brickwork below. There are plenty of other similar instances to be found, and one does not have to look far afield.

No doubt in many of them the walls and facing material are supported on a steel frame and therefore the building is not affected structurally, but should we not characterize a man as foolish if in building solid constructional walls he put his brickwork on the lower story and his granite or stonework on the top story? And that being so are we not equally foolish when we try to decorate a building by reversing the order of materials?

Let us always remember that each material has an expression entirely its own, and is naturally suited to fill certain positions in a building, and fulfill certain requirements. If, then, its characteristics are not considered in the design it will invariably appear to be out of place when the design is executed. Now, for instance, can we expect to make a plaster arch appear

to support several stories of brick-work, and yet we see it attempted. It may do it on a drawing. Plaster is obviously suited to positions in a building where it fills no structural capacity, but is merely a protection from the elements and it is not suitable for panels and similar positions.

Possibly by now you may have the clue to my third heading when I spoke of in the beginning, Decorative Construction. We know by beautiful examples of an ancient past, Constructed Decoration we know from a near past, and my hope is that in the near present if we cannot solve over again the problems of Decorative Construction in our day we may adhere to our designs most faithfully to what I term Decorative Construction. This is more distinct from constructed Decoration than at first appears, inasmuch as the latter is not always decorative in fact, far too seldom is it so. You will readily acknowledge the truth of what I say and no doubt you have already some piece of decoration in your mind which rather than describe it as being decorative you would call it disfigurative. The distinction of the term then being acknowledged I will proceed with an outline of my interpretation of its meaning, and I think the first rule it would spell out to us is to be true and faithful use of materials according to the characteristics with which nature has endowed them. This I have already spoken of and there is no space for enlargement in a short paper.

The second rule, which is only second because there cannot be two firsts, is that the different features of the elevation should be so designed that they appear to be carrying out their entire function in helping to uphold the building of which they are a part. It may not be practicable to design the beam I spoke of before so deep that if it were composed of a quantity of sandstone it would withstand the stress of all the weight appearing to rest upon it, but it is possible even under modern conditions to immerse its depth considerably from that used in practice and by careful design to eliminate to a great extent the appearance of the weight of superstructure on why should it not be treated in the buildings so that it occupied the space of a whole story and thus obtain sufficient depth to counteract the weight above? These are only suggestions and there may be other means with some of us can devise to gain a satisfactory result.

Then, in regard to the pier of the piers, how obviously one of these is a Corinthian or Ionic cap or the lowest story where there is great weight above. The situation calls for a cap which is sturdy and strong in appearance, a cap which appears to be doing its work. Piers obviously should line exactly over those below and thereby appear to transmit directly the weight of the various stories above. A series of segmental arches under a building on an inside lot find a good comment in the adjoining building, and when on a corner lot a situation can be obtained usually by placing the two end piers closer together and using a semi-circular arch between them. If this end feature is carried up through the height of the building as a sort of tower it will be a superincumbent weight upon the stouter abutment. Moulding should be an impor-

tant part in the elevation and it is essential that they be designed to fit the particular position they are intended for. The third rule would apply to sculpture and carving, and it is very necessary to remember that these things have their proper place in a facade. It is a fallacy to imagine that a building can be made beautiful by covering the facade with carving and sculpture, as we sometimes see done. We are fortunately spared that danger in this city, as the cost of such work prohibits a prolific use of it. Perhaps the keynote of all these things is to be sounded in two words, proportion and unity.

Proportion is everything and Unity of part with part so that nothing looks out of place but all the individual features of the facade fit in together to form a complete whole. And above all let our buildings be constructive in their design. It is a comparatively easy matter to make a badly designed building look fairly decent on paper by putting in a few brick lines and some shading, but when the design is executed it is then that the main lines of the elevation tell their tale. The weakness of a pier shows up and the moulding which was hidden on the drawing by a multiple of lines stands out in all the nakedness of its horrible proportions. But I do not want to speak of proportion tonight—that deserves a paper to itself. I only mention it because it is essential in the fitness of things, and this paper is upon the fitness of features to the position that they occupy in the facade of a building. Architects in these days have to construct their decoration but if we would conscientiously do so as nearly as possible along the lines of Decorative Construction our buildings would undoubtedly show a vast improvement in architectural quality. This paper is not intended to question the fact that there are buildings erected in these days of which the design fulfills the requirements of Decorative Construction, but it is intended to bring to our special notice some of the features which, though entirely inartistic inasmuch as suggest a false method of construction have crept into the facades of buildings through the cleverness and ingenuity of our methods of construction in order to suggest that although we are able to apply all kinds of magic in our decoration we are still bound to a certain extent to the rules which governed our ancestors who constructed in stone and brick, if we wish our buildings to look as if they were erected with an eye to beauty as well as to use. This is for the present and until we can think of some method of decorating our buildings more applicable to our present day than by the use of brick, stone and terra cotta. This is a steel age—our buildings are erected in steel and reinforced concrete. Why cannot we design our elevations in the same intricate decorating our construction? That, I think, is the real problem before us, and I would suggest that if those clever Greek artists or those wonderful Gothic architects had lived in these times they would surely have found some means of decorating the buildings of these days in the material of which they are constructed.

Possibly if we had not the examples of the past to draw upon and if these examples were not dimmed into our

memory by every possible means education can employ—if we could in a word obliterate all that has gone before, forget our stone, terra cotta and brick, we might develop steel construction to a thing of beauty, but under conditions which rule in these days we are permitted no developing process of that kind.

The architect who is bold enough to attempt the construction of a steel frame building has to first have a fully developed and thought out design and has to stake his reputation on that design which will be compared with the best buildings in the usual materials, and he has moreover to contend with the taste of the public who have become naturalized to buildings of stone, terra cotta and brick. That is enough to frighten any man away from that kind of originality unless he is independent enough and rich enough to test his ideas in a building of his own. Let me give an outline suggestion of what might be done. There would in the first place have to be some method of treating steel to eliminate the action of weather, but we will suppose this done. Imagine the steel columns each carried up in one long continuous panel with ornamental steel brackets at the floor joists to support the horizontal girders which could be suitably moulded. The panels filled in with copper or some metal, or even brick, terra cotta, stone, or plaster, the windows of metal and the whole building crowned with an ornamental iron cornice not cast in the forms we are so familiar with, but executed in a design suitable to the material, say for instance along the lines of the designs for theatre canopies, though of course not with the same amount of projection. The store front would be a simple matter to deal with in metal or glass, and the space below the window could be carried out in metal, marble or some other suitable material. The entrance would readily adapt itself to being designed in ornamental steel, copper or iron, and thereby a maximum amount of light could be obtained to light the interior hall or lobby. In fact the whole design would readily lend itself to the uses of man inasmuch as a maximum amount of light could be obtained. The difficulty is to make the exterior appearance of the building such that it would be a pleasure to look at both from the view of the public and that of the trained architect. The interior of the buildings could still be decorated with imitations of a past art or possibly some original and progressive method of decoration could be devised.

This is architecturally an age of imitating the highly developed arts of the past to our present needs, and in many cases merely copying and imitating them, often bad imitations at that. You will readily acknowledge that the Greeks developed classical art to its highest pinnacle and it seems to me that ancient Greece would tell us that we are endeavoring to apply an art to our ten-story buildings which was found only applicable to one story. Surely the steel buildings of today cry out for some radical change in design, some radical change in the principles of design, some change in the principles of proportion, for it seems to me that the eye does not demand it if the principles of proportion adopted for

classical columns should be repeated in a steel stanchion.

I believe that a change of this nature must inevitably take place sooner or later, and when it does we shall be once more carrying out the principles of decorated construction. Let our thoughts be directed towards this end and in the meantime, as we can do no better, let us do no worse than carry out in our designs the principles of decorative construction as far as possible under modern conditions.

Plans Wanted.

The Board of Supervisors of Modoc County, California, are advertising for competitive plans for a new County Court House which is to be constructed in Alturas. This building is to be as near fireproof as possible and constructed either of brick and steel or reinforced concrete. Funds in the amount of \$90,000 are available. Plans and specifications are to be in the hands of the County Clerk by 10 o'clock on November 3rd and complete specifications and working drawings are to be completed not later than the January meeting of the Board of Supervisors. A six per cent commission is allowed but is to be deducted from the \$90,000 available for construction. Particulars can be secured from the County Clerk at Alturas.

A new County High School is to be erected in Monterey, California, and notice has been published inviting architects to submit competitive plans. The building will be erected at Monterey and is not to exceed \$30,000 in cost. Construction will probably be of reinforced concrete. A. E. Runkler is president of the board and A. J. Hennessey is secretary. Either will furnish all information and may be addressed at Monterey.

Bishop, Inyo County, California. Has sold its bonds amounting to \$30,000 and will use the proceeds to construct a modern school building in the Bishop District. The new building will be of the reinforced concrete type and will contain six or eight class rooms. No architect has yet been selected. Particulars can be had from the County Superintendent of Schools at Independence.

A bond election recently held at San Mateo, California, carried by a vote of 5 to 1. Of the total amount voted, the sum of \$100,000 is to be expended in constructing a City Hall. New bridges in the city will cost \$10,000. Competitive plans will be called for in securing a design for a city hall. The building will be a two-story structure of either brick and steel or reinforced concrete. The City Clerk of San Mateo will furnish all information.

Two bids have been received for the \$500,000 worth of bonds recently voted by the city of Chico, California, with which to build a new school in the Chico School District. Both offers were made by local firms but were submitted without conditions which have not been accepted. It is proposed to erect a building costing \$200,000 and to secure funds from other sources to finance it. No architect has been selected.

Bonds of the Pittsburg School District, California, are reported sold to Halsey & Co. of San Francisco. Funds received from this sale will be used in constructing a modern school building costing in the neighborhood of \$65,000. Competitive plans will be called for shortly. Particulars can be had by addressing the Secretary of the Board of Education at Pittsburg.

A bond election will shortly be called in Pleasanton, California, to raise funds for the construction of a City Hall. The City Clerk is now at work on the necessary papers. Bonds in the sum of \$10,000 will be voted on. It is said that no opposition exists. The building is to

be of brick or reinforced concrete construction. No architect has been selected.

It has been decided by the Board of Education of Fresno, California, to call a special bond election at once, at which time the voters will be asked to bond the city for \$125,000 with which to construct new schools. Plans of the Board of Education contemplate five new grammar schools, each of which is to contain eight class rooms. All construction is to be fireproof. Date of the election has not been set as yet. It is said that the Fresno public strongly favors the election. Architects will be called on to submit competitive plans.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment houses, 2 and 3 story frame, \$10,000. Architect, Paul F. Demartini, 451 Columbus avenue, S. E. Owner's name withheld. These two buildings will be erected on the north side of Union street near Hyde, the three story structure on the front of the lot and the two story building in the rear. There will be five apartments of two, three and four rooms. Interiors will be finished in pine and redwood. Each apartment will have a private bath and wall beds. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath and shiplap. Terrazzo will be used in the entrance vestibules. Plans are now being prepared.

SAN FRANCISCO—Apartment houses, 2-story and base, frame, \$5,000 each. Architect, none. Owners, Buegg Bros., 719 Pacific Bldg., S. E. These two houses will be erected on Ramona street south of 14th street. Each house will have a frontage of 25 feet and a depth of 56 feet. There will be four four-room apartments in each building. All suites will have private baths and wall beds. Interior finish will be of pine throughout. Bath rooms will have composition floors and tile wainscot. Exterior of the buildings will be covered with rustic and shiplap with brick veneer bases. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Apartment house, 3-story and base, frame, \$50,000. Architect, Clay N. Barrell, Albany Bldg., Oakland. Owners, Summarstrom Bros., 35 Rose avenue, Oakland. This building will be erected on Alice street and will cover a considerable ground area. Interior has been arranged for a large number of two, three and four room suites. All apartments will have wall beds, private entrances and connecting bath rooms. Pine, redwood and elm will be used for interior finish. Some hardwood floors will be used in the halls and living rooms. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in tile and marble. Plans provide for steam heat and a hot water supply. Exterior of the building will be covered with cement plaster on metal

lath. Plans are complete and work will be done by Day Labor.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick, \$37,000. Architect, J. B. Nicholson, Wright & Callender Bldg., L. A. Owner, James H. Atkin. The building will cover a ground area of 50 by 150 feet and has been designed to contain 80 rooms arranged in two and three room suites with private baths. Wall beds will be used in all apartments. Interior finish will be of pine and redwood. Plans provide for steam heat, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with pressed brick. All bath rooms will have composition floors and tile wainscot. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class C construction, \$60,000. Architect, Ferdinand Parmentier, Byrne Bldg., L. A. Owner, Mrs. Harvey Ingerson. Contractor, Milton A. Fly, 2516 Alcatraz street, L. A. Contract price \$60,000.

BRIDGES AND DAMS.

SANTA BARBARA COUNTY, CAL.—Bridges, steel and reinforced concrete. Cost not stated. Engineer, County Engineer, Santa Barbara. Owners, Santa Barbara County. Plans have been completed by the County Engineer for three concrete and steel highway bridges which are to be erected as follows: An 80 foot steel span bridge over Los Alamos Creek on the State Highway in the 5th Road District, a concrete girder bridge in the same road district over Graciosa Creek and a concrete girder bridge over the same creek in Section B of the 5th Road District. Separate bids are now being taken for the construction of each of these bridges. Plans, specifications and full particulars of the work can be secured from the County Engineer, Santa Barbara. Bids will be opened by the Board of Supervisors on November 2nd at 10 a. m. C. A. Hunt is County Clerk.

Contracts Awarded.

MARYSVILLE, YUBA CO., CAL.—Bridge, steel and reinforced concrete \$70,250. Engineer, County Surveyor, Marysville. Owners, Yuba County. Contractors, George W. Martin & Son, Sacramento. Contract price, \$70,250.

FACTORIES & WAREHOUSES.

Contracts Awarded.

SAN FRANCISCO—Lath and plaster, 1-story and base, brick. Cost \$300. Architect, C. O. Clausen, Pielan Bldg. S. F. Owner, Adolph Schwartz. Contractor, C. D. Rankin, 724 Gould street, S. F. general construction only. Contract price, \$8,200.

FIRE HOUSES AND JAILS.

BAKERSFIELD, KERN CO., CAL.—County jail, 2 story, base and mezzanine floor. Class A construction, \$150,000. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. The Board of Supervisors recently selected the designs of Architect Clark for the new County Jail and awarded the second prize to Thomas B. Wiseman of Bakersfield, \$250, and third prize to J. W. Dooliver of San Francisco, \$125. The building will be classic in design, of reinforced concrete construction faced with terra cotta. Floors and roof slabs will also be of reinforced concrete. Interior partitions will be of hollow tile and metal lath and plaster. The structure will cover an area of 112 by 100 feet. Basement will contain mechanical room, engineer's quarters, fumigation and bath rooms, armory, storage space and garage. The sheriff's office, general office, three deputy's offices, jailer's rooms and two tiers of steel cells will occupy the first floor. Second floor will be arranged for wash room, dining rooms and kitchen and quarters for the female prisoners. Interior finish will be largely of metal and hardwood. A hospital and cells for inebriates are also provided for in the plans. There will be a steam heating system, vacuum cleaning and hot water supply. Plans will be completed as rapidly as possible and bids will be called for before the first of the year.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Jail, 1 story reinforced concrete. Cost not stated. Architect, none. Owners, Santa Cruz County. Plans for a small branch county jail have been completed and approved by the Board of Supervisors. Bids for the construction of the building and for the equipment are to be opened October 22nd. Interior finish will be of pine. Plans call for a number of steel cells and other jail equipment. Exterior of the building will be covered with cement plaster. Plans and specifications can be secured from the County Clerk at Santa Cruz.

OAKLAND, CAL.—Jail equipment. Cost not stated. Architects, Palmer & Hornbostel, New York associated with Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans are complete and bids are being called for all materials and equipment in connection with the completion of the new City Jail at the City Hall Building. Bids will be opened on November 6th. Plans and specifications from Architect J. J. Donovan, Security Bank Bldg., Oakland. A detailed proposal appears in another column of this issue.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,500. Architect, Paul F. Demartini, 451 Columbus avenue, S. F.

Owners, David and John Demartini. These flats will be erected on the west side of Powell street north of Lombard. Each flat will consist of five rooms and bath. Interiors will be finished in pine and redwood. Bath rooms will have tile wainscot. Entrance will be finished in terrazzo and marble. A gas grate will be used in each living room. Exterior of the building will be covered with shiplap and rustie. Plans are complete and subfigures will be taken at once by the owners.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, Paul F. Demartini, 451 Columbus avenue, S. F. Owner, S. N. Busalacchi. The building will be erected on Francisco street east of Powell and has been designed to contain three modern flats of five and six rooms. Bath rooms will be finished in tile. Open fire places and tile mantels will be used in each of the living rooms. Entrances will have marble wainscot and terrazzo steps. Exterior of the building will be covered with cement plaster on metal lath, rustie and shiplap. Plans are complete and bids are now being taken by the architect.

SAN FRANCISCO—Flats, 3 story and base, frame, \$6,000. Architect, none. Owner, Burt T. Owsley, Sharon Bldg. S. F. The building will be erected on the west line of Chilton street, south of Hayes street and will have a frontage of 25 feet and a depth of 68 feet. There will be three flats of five and six rooms each. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living rooms. Bath rooms will have composition floors and tile wainscot. Open fire places and tile or brick mantels will be used in each living room. Exterior of the building will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 3 story and base, frame, \$6,000. Architect, Paul F. Demartini, 451 Columbus avenue, S. F. Owner, J. Sauter. These flats will be erected on the east side of Taylor street south of Union covering an area of 25 by 63 feet. Each flat will have six rooms and bath. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. An open fire place and brick or tile mantel will be installed in each living room. The wainscot will be used in the living rooms and kitchens. Exterior of the building will be covered with rustie and shiplap with brick veneer base. Entrances will be finished in marble and terrazzo. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architects, none. Owners, A. and R. Brisa, 525 Vallejo street, S. F. The building will be erected on Filbert street west of Jones and will cover an area of 34 feet 4 inches by 60 feet. Plans provide for four modern flats of four and five rooms. Interior finish will be of pine and redwood with some elm panels and hardwood floors. There will be open fire places and tile mantels. Tile wainscot will be used in the bath

rooms and kitchens. Exterior of the building will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and work will be done by Day Labor. Materials are now being purchased by the owners.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000 each. Architect, Paul F. Demartini, 451 Columbus avenue, S. F. Owner's name withheld. These buildings will be erected on property on Filbert street between Grant avenue and Kearny street, one building on the front of the lot and one in the rear. Each will be arranged for two modern five room flats. Interiors will be finished in pine and redwood. An open fire place with the mantel will be used in each of the living rooms. Tile wainscot will be used in the kitchens and bath rooms. Entrances will be covered with rustie and shiplap. Plans are now being prepared. The work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, Paul F. Demartini, 451 Columbus avenue, S. F. Owner's name withheld. The building will be erected on North Point street between Leavenworth and Montgomery streets and will be arranged for four modern flats. Interior finish will be of pine and redwood with some elm panels and hardwood floors. Living rooms will have open fire places and tile or brick mantels. Tile wainscot will be used in the bath rooms and kitchens. Entrance will be finished in marble and terrazzo. Exterior of the building will be covered with rustie and shiplap with a brick veneer base. Plans are now being prepared for the work.

GARAGES.

PIEDMONT, ALAMEDA CO., CAL.—Garage, 2 story and base, frame. Cost not stated. Architects, Milvain Bros., Belcher Bldg., Oakland. Owner, Mrs. Ellen Frances Cushing. The building has been designed for a private garage and will be erected in the rear of the owner's residence. Upper floor will be arranged for living rooms. First floor will have cement floor and will contain storage space for four machines. Special storage tanks for gasoline will be installed. Roof will be of Mission tile. Interior finish will be of pine throughout. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERNDALE, HUMBOLDT CO., CAL.—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, Cream City Mechanical Co. Plans and specifications for a new fireproof garage building covering a large area have been completed. Bids have been taken from a number of contractors and a contract will be awarded within a few days. The building will contain storage space for eight machines besides a paint and repair shop. There will be double window sash and frames of the ground floor and roof. Exterior of the building will be faced with cement plaster.

GOVERNMENT WORK AND SUPPLIES.

PROSPECTIVE BIDDERS. Supervising Architect.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Douglas, Wyo. Construction, October 23.
King Lumber Co., Charlottesville, Va.
W. D. Lovell, 1415 E. 5th street, Minneapolis, Minn.

Casper, Wyo. Construction, October 24.
Robert L. Li Fountain, Cheyenne, Wyo.

W. D. Lovell, 1415 5th street south-east, Minneapolis, Minn.

J. H. Wiese, City National Bank Building, Omaha, Neb.

J. H. Esmy Co., Douglas, Wyo.

J. F. Jenkins & Co., Ocala, Fla.

King Lumber Co., Charlottesville, Va.

George Hinchliff Co., Paragould, Ark.

Yards and Docks.

Specifications for work under the bureau of yards and docks, Navy Department, have been furnished to the following firms in addition to those previously mentioned in these columns:

Mare Island, Kitchen, November 1.

John Douglas Co., Washington, D. C.

Pearl Harbor, Coal Plant, November 1.

Belmont Iron Works, Philadelphia, Pa.

Treadwell Construction Co., Midland, Pa.

Puget Sound Bridge and Dredging Co., 433 Monadnock Building, San Francisco, Cal.

Pearson Construction Co., Seattle, Wash.

Phoenix Bridge Co., Philadelphia, Pa.

Riter-Conley Co., Pittsburg, Pa.

McIntire-Marshall Construction Co., Pittsburg, Pa.

Pennsylvania Steel Co., Steelton, Pa.

San Francisco Bridge Co., San Francisco, Cal.

Worden-Allen Co., 2 Rector street, New York City.

Snare & Trist Co., New York City.

U. S. Steel Products Co., 39 Church street, New York City.

McMyler Interstate Co., Bedford, Ohio.

Neumeyer Diamond, 82 Beaver street, New York City.

Carnegie Steel Co., Philadelphia, Pa.

Hamilton & Chambers, 29 Broadway, New York City.

Penn Bridge Co., Beaver Falls, Pa.

King Bridge Co., Cleveland, Ohio.

Pearl Harbor, Ice Plant, November 1.

Hamilton & Chambers, 29 Broadway, New York City.

Reclamation Advertisement No. 230.

Abstract of bids for 2500-volt oil switch for Boise reclamation project, opened at Los Angeles, Cal., under advertisement No. 230:

Westinghouse Electric & Mfg. Co., Los Angeles, Cal., delivery Pittsburgh, Pa., 2 days, \$39.15, weight 50 lbs.

Western Electric Co., Los Angeles, Cal., delivery Boston, Mass., 14 days; \$16.80, weight 150 lbs.

Redding Rock, Cal., Steel Tower.

The following bids were opened by the lighthouse collector, San Francisco, Cal., for constructing steel tower, Redding Rock light station, Cal.:

Judson Mfg. Co., \$950.

Moore & Scott Iron Works, \$750.

Schneider Iron Works, \$818.

Golden Gate Structural & Ornamental Iron Works, \$700.

Ocean Shore Iron Works, \$575.

Vulcan Iron Works, \$785.

Ralston Iron Works, \$931.

Muir & Symon, Inc., San Francisco, Cal., \$549.95; accepted.

San Francisco, Custom House.

The contract for interior painting in the U. S. custom house, San Francisco, Cal., has been awarded to I. H. Kissel, 1723 Polk street, San Francisco, Cal., at \$8,500.

Repairing Hospital, Vancouver Barracks.

Awards have been made as follows for repairs to the hospital building at Vancouver Barracks, Wash.: E. J. Claus, Vancouver, Wash., painting hospital, \$1,012; painting dental surgeon's office, \$26, George W. Sykes, Vancouver, Wash., for plumbing in hospital, \$671.

Canal Circular 801-A.

An advertisement appears elsewhere in this issue calling for bids to be opened October 14 for furnishing supplies as follows under circular 801-A:

Class 1, 30 steel locker cabinets.

Class 2, 200 fire hydrants.

Class 3, 1 90-degree crossing, 2 frogs, and 2 pairs switch points.

Class 4, 150 tons blacksmith's coal.

Miscellaneous Buildings, Puget Sound.

The contract for the construction of miscellaneous buildings at the naval station, Puget Sound, has been divided as follows: American Bridge Co., Baltimore, Md., for all structural steel work, \$149,640, W. N. Concanon Co., San Francisco, Cal., for all construction, proper, \$88,134.

Sale of Canal Equipment.

The purchasing officer of the Isthmian Canal Commission at Washington, D. C., has available for distributing a catalogue listing all of the equipment now on the isthmus, the great majority of which is to be sold in the near future. In connection with this catalogue the following circular is being forwarded through the office of the commission to those probably interested:

Attention is invited to the inclosed equipment catalogue listing certain equipment which was purchased for use on the Panama Canal and the Panama Railroad between July 1, 1904, and January 1, 1913.

Most of the equipment, except floating equipment, will be available for sale in the immediate future. Some of the equipment, however, particularly the floating equipment, will be required for permanent use after the construction work proper is completed, it not being practicable at the present time to designate the units which later it may be found advisable to reserve. No floating equipment will be available for sale for at least a year, with the possible exception of a few barges or lighters. All of the 12-inch gauge locomotives and cars have been sold since the publication of the catalogue.

It might be noted in connection with the rolling stock that the gauge is not standard, same being 5-foot gauge. It has been determined that the cost of standardizing the cars and shovels will not exceed \$30 per unit, and the com-

mission will be prepared later on to furnish figures regarding the cost of standardizing the locomotives.

The equipment purchased will be placed in serviceable condition at the commission's shops when so desired by the contractor. The service will be performed for the contractor on the basis of the cost of labor plus overhead charges.

The following subcharges will be added in all cases where labor and material are furnished:

Shop work.—The shop expense percentage fixed for the shop in which the work is performed will be added to the distributed labor. The percentage for each shop will be fixed from time to time by the chairman's office.

All other labor without machinery.—Ten per cent on labor.

Material.—A surcharge of 15 per cent will be added for additional material used in repair work.

No statement or information given relative to the condition of material is to be accepted or acted upon as a warranty, but purchasers must make their own examination and act upon their own estimates as to the condition of material and the facilities or difficulties that may be expected in removing the same.

Payment for equipment purchased is to be made to such disbursing officer of the Isthmian Canal Commission as may be designated by the chairman and chief engineer. Payment for all materials shall become due upon delivery of the material to the contractor and his acceptance of the same, and payment shall be made immediately upon delivery and acceptance or, at the option of the chairman and chief engineer, within 30 days after acceptance, provided a satisfactory bond, in an amount to be approved by the chairman and chief engineer, is given. The title to material shall not pass to the contractor until it is fully paid for. Should conditions arise which, in the opinion of the chairman and chief engineer, would prevent the commission from tendering or contractor from accepting the entire material purchased at any one time, the contractor shall pay for that portion accepted such a portion of the contract price of the entire bid as the chairman and chief engineer shall deem justifiable. Material will be considered as having been delivered to the contractor when it is tendered by the commission for acceptance.

The commission will pay all duty on dutiable material brought into the United States. The title to all dutiable materials brought into the United States shall remain in the United States until duty is paid thereon. This provision, however, shall not relieve the contractor from the transportation risks, and payment shall be made as though the title had passed at the time of delivery.

It is suggested that if interested in any of the material listed in the equipment catalogue that a letter quotation be submitted in triplicate either to his office or to the chief quartermaster, Canal Zone, based on deliveries as follows:

For the material in condition as it lies, delivered on dock at—

a. Colon or port of Ancon, Isthmus of Panama.

b. United States or foreign port (naming port).

If not interested in any of the above—

mentioned equipment this office would be glad to receive the names of any firms, railroad companies, or construction companies whom would likely bid for the material.

If any further information is desired address either this office or the chief quartermaster, Culbraz, Canal Zone, sending letter in duplicate.

Naval Foundry Problem.

Foundry development at navy yards is practically at a standstill. At many of the yards foundry conditions are considered little better off than they were at the close of the civil war. There is not a single naval foundry on the Atlantic coast capable of producing a casting for a steel stem or sternpost for a battleship. The naval foundry conditions on the Atlantic coast constitute a travesty upon economy and efficiency, and the more carefully the matter is investigated the more urgent appears the necessity for immediate action. While such action is not now imperatively necessary, unless a radical change is made in the foundry conditions, it will constitute a serious bar to naval operations in time of war. Officers of the Navy have recently been examining into the foundry conditions and have recommended that one yard be equipped for the largest and most important work, at the same time maintaining the other yards in condition to make the small and average-sized castings required for repair work on naval vessels. The board has recommended that the Philadelphia yard be selected as the logical location for a naval foundry on the Atlantic coast. The question of the establishment of such a foundry on the Pacific coast has not been gone into, but it is believed from a military standpoint that the demand for a modern central foundry plant on the Pacific coast is of no less importance than the establishment of such a plant on the Atlantic coast. The establishment of the latter foundry, however, is believed to be the most urgent need for the Navy, and it could in case of necessity supply most of the larger wants of the Pacific coast. The central foundry should be of sufficient size and sufficiently well equipped to make all the important iron and steel castings for the entire Navy required by present and probable future conditions. It is not believed to be in line with military preparedness to depend upon private firms to meet the emergency foundry demands of the government, particularly when such firms do not possess the equipment to meet their own increasing demands.

Closing Steel Foundry.

The steel foundry at the New York navy yard has been closed and the employees discharged. This is the result of an investigation recently made with regard to obtaining castings for battleship No. 39. Bids were asked for these castings from outside sources by the constructing officer, in view of the cost of the steel castings made for the New York, and the bids submitted were about a third of what the yard Steel plant charged. The board found that the cost of the castings was considerably greater than the bids submitted by American commercial manufacturers, and, in comparison with the bid submitted by a British manufacturer, was excessively high. Objection was made by some of the officials to obtaining

the castings from outside sources, and as a result of the investigation the Navy Department ordered the plant closed. The condition of affairs at the yard with relation to the naval foundry is considered due to the manner in which the general foundry problem has been treated as a whole by the Navy Department. It is a bad thing for the navy yard not to be able to make its castings, and such a situation would be a grave menace in time of war. There is criticism of the action taken in closing the plant, as it is believed a further investigation should be had and determine whether or not it is the fault of the administration of the plant if the castings can not be made as cheaply at the navy yard as at outside concerns.

HALLS & SOCIETY BLDGS.

OAKLAND, CAL.—Municipal auditorium, 2 story and base. Class A construction, \$500,000. Architects, Palmer & Hornbostel, New York, associated with Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. A motion introduced by Harry S. Anderson, Public Works Commissioner of the City of Oakland, providing for the revision of the plans and specifications on the Municipal Auditorium was carried. City Architect J. J. Donovan of Oakland will revise the plans and new bids will be called for at once. The lowest bid received for the general construction was \$78,000 in excess of the amount available.

PORTERVILLE, TULARE CO., CAL.—Lodge hall and stores, 2 story and base, brick and steel. Cost not stated. Architect, J. L. Roberts, Porterville. Owner, Porterville Odd Fellows' Hall Association. A site at the corner of Main and Cleveland streets has been secured and plans are now being prepared for a building containing two stories on the first floor and modern lodge halls and banquet room on the upper floor. Interior finish will be of pine and redwood. A maple floor will be used in the ball room. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are now being completed and bids will shortly be called.

HOSPITALS.

NORWALK, LOS ANGELES CO., CAL.—Hospital group, 1 and 2 story and base, reinforced concrete, \$140,000. Architect, State Architect George B. McDonald, Sacramento. Owners, State of California. Only preliminary plans have been prepared for this group of buildings and details are not available. The tract on which these buildings are to be erected covers an area of 205 acres. Construction will be fireproof throughout. Working drawings are to be prepared as soon as the preliminary sketches have received the approval of the State Board of Control.

STOCKTON, SAN JOAQUIN CO., CAL.—Hospital, 2 story and base, reinforced concrete, \$110,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, St. Joseph's Home. This work has been mentioned here before when the plans were first out for figures. The building will be erected on North California street covering a large area and will be fireproof throughout. There will be a number of wards besides pri-

vate rooms and operating room. Interiors will be finished in pine and hardwood. Plans provide for steam heat and elevator service. Metal window sash and frames will be specified. Exterior of the building will be faced with cement plaster. Plans are complete and new figures are being taken. Patrick McGough is in charge of the work.

HOTELS.

SAN FRANCISCO.—Hotel, 5 story and base, reinforced concrete, \$30,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, J. B. Reite. The building will be erected on the south side of Post street west of Larkin. Plans show a total of sixty guest rooms and thirty baths. Interior finish will be of pine and redwood with some hardwood veneer. There will be steam heat, elevator service and a hot water system. Bath rooms will have cement floors and tile wainscots. Some ornamental plaster will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SANTA VIENETTA, MARIN CO., CAL.—Hotel, pavilion, etc., 1 and 2 story reinforced concrete. Cost not stated. Architects, Maybeck & White, Lack Bldg., S. F. Owners, Santa Vienetta Co. These buildings are proposed and only preliminary sketches have been made. Santa Vienetta is a new tract which is to be placed on the market and the improvements are to be erected by the company. Further details of this work will be given as the plans progress.

FRESNO, FRESNO CO., CAL.—Hotel alterations, frame construction. Cost not stated. Architect, Eugene Mathewson Forsythe Bldg., Fresno. Owner, T. C. White. The present building located at the corner of I and Merced streets will undergo extensive repairs. First floor will be altered for a number of stores and upper floors will be completely remodeled. Stores will have patent store fronts and plate glass windows. Interior finish will be of pine throughout. A new heating system will be installed. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and steel, \$150,000. Architects, O. P. Dennis and H. H. Hewitt, Play Bldg., L. A. Owner, L. D. Hines. The building will be erected on Hollywood Boulevard near St. Andrews Place. The building has been designed in the shape of a letter H with extreme dimensions of 150 by 150. Interior will contain 150 guest rooms, 75 per cent of which will have private baths. Interior finish will be of pine and white enamel. Hardwood floors will be used in the ball yards. There will be steam heat, elevator service and a vacuum heating system. All bath rooms will have cement floors and tile wainscots. Exterior of the building will be faced with ruffled brick. Considerable marble and tile will be used. Plans are being prepared and figures will be called for at once.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$35,000. Architects, Richards-Neustadt Const. Co., Walnut & Callender Bldg., L. A. Owner, N. E. Cramer, 200 Title Insurance Bldg., L. A. The building will be erected on North Los Angeles street

covering an area of 67 by 73 feet. There will be a total of 12 guest rooms on the upper floors. First floor will contain, besides the hotel entrance, five stores. Interior finish will be of pine throughout. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat, elevator service and a hot water system. Stores will have patent store fronts and plate glass windows. Some marble and tile wainscot will be used. Exterior of the building will be faced with pressed brick. Plans are in the hands of the owner who is taking subfigures on the various parts of the work.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel, 3 story and base, brick and steel. Cost not stated. Architect, A. W. Smith, 1001 Broadway, Oakland. Owners, English and Hagerity. The building will be erected on a corner site and has been designed for a store besides the hotel lobby on the first floor. Upper floors will contain in the neighborhood of 54 guest rooms and a number of public baths. Interior finish will be of pine. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat and a hot water system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

BIG CREEK, FRESNO CO., CAL.—Hotel, 1 story, rustic construction, \$25,000. Architect, J. Carl Thayer, Forsythe Bldg., Fresno. Owner, J. E. Bass, Fresno. The building is to be erected at Big Creek Lake and will be rustic in design with exterior of redwood logs. Plans show a total of 54 guest rooms, large lobby, ladies' and gentlemen's parlors and a large dining room. Two fire places large enough to consume huge redwood logs will be constructed, one in the lobby and the other facing an open porch. Interior finish will be such as will harmonize with the surroundings. Hot and cold water will be supplied to all rooms. The hotel will be conducted as a winter and summer resort. Plans are now being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 12 story and base, brick and steel, \$350,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Hart Bros. Contractors, P. O. Engstrom Co., 5th and Seaton streets, L. A. The following work is not included in the contract: Plumbing, steam heating, elevators, power plant, ornamental iron, structural steel, mail chutes, marble and tile work, store fronts, terra cotta work, electric wiring, electric fixtures, painting, vacuum cleaning, ventilating and interior finish. SAN FRANCISCO—Hotel, 6 story and base, reinforced brick, \$75,000. Architect, G. Albert Langburgh, 709 Mission street, S. F. Owner, A. Eisenberg. Contractors, MacDonald & Kahn, Rialto Bldg., S. F., general construction. Contract price not stated.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State exhibit building, frame and plaster, \$250,000. Architect, Charles B. Meyers, 1 Union Square West, New York. Owners, State of New York. Working drawings for the New York State Exhibit building which is to be erected in the Panama-Pacific Exposition grounds are complete and copies of the same have been forwarded to the Directors in this city. Bids are now being taken and will be opened by the New York State Commission, 140 West 42nd street, New York, on November 8 at 12 o'clock noon. Separate figures will be taken for the general construction, plumbing, heating and electric work. Time allowed for completing the general contract is set at 250 calendar days and for the heating and plumbing 225 days, and 100 days for the electric work. Plans may be secured from the Director of Works, Service Bldg., San Francisco, or from the Architect in New York. An official proposal appears in another column of this issue.

—POST OFFICES— Contracts Awarded.

PASADENA, LOS ANGELES CO., CAL.—Post office, 2 story and base, Class A construction, \$184,246. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor, Eugene Schuler, Wabpeton, North Dakota. Contract price, \$184,246.

RESIDENCES.

SAN FRANCISCO—Bungalows, 2 1/2 story and base, frame, \$2,500 each. Architect, none. Owners, Western Union Home Builders, Inc., 1617 Telegraph ave., Oakland. These two houses will be erected on 19th avenue west of California street and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms and dining rooms. Each living room will have a large open fire place with brick mantel. Tile will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residences, 2-story and base, frame, \$3,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, J. P. Fletcher, 310 Lack Bldg. This is the first of several two-story dwellings which Mr. Fletcher will erect on his property on 35th avenue near Fulton street. Each of the houses will contain seven rooms and bath. Interiors will be finished in pine, redwood and some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile and brick mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath, rustic and shingles. Plans for the first two of these houses have been completed and work will be started at once under the Day Labor system. Mr. Fletcher is now in the market for all materials.

SAN FRANCISCO—Residence, 2-story and base, frame, \$3,500. Architect, none. Owners, Eva and Charles E. Reinhardt, 17th and Kansas streets, S. F. The dwelling, which has been designed for a seven-room house with bath and sleeping porch, will be erected at the corner of Rivolt and Cole streets. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect none. Owner, J. Anderson, 423 16th avenue, S. F. The dwelling will contain six rooms and bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. There will be a large open fire place with brick mantel in the living room. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner, who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story, attic and base, brick and steel, \$60,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, F. Sheldon Potter. This house, designed for one of the handsomest homes in San Francisco, will be erected at the northwest corner of Cherry and Jackson streets on property having a frontage of over 80 feet. The design is in the Tudor Gothic style and will be carried out of pressed brick and cut stone. Interior has been arranged for in the neighborhood of 16 rooms, a number of baths and sleeping porches. Interior finish will be of French walnut and Siberian oak. Many other hardwoods and white enamel will also be used in the finish. Hardwood floors will be used throughout except in the bathrooms which will have composition floors and tile wainscot. Plans provide for a central heating system, either steam or hot water. There will be elevator service, a vacuum cleaning system and other modern improvements. Marble, tile and ornamental plaster are also specified. Plans will be completed within a few days and segregated figures will be called.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, Robert L. Sommons, 512 Cole street, S. F. Owner, W. Stiller, 4167 20th street. The house will be erected on 19th avenue north of Cabrillo street and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place with brick mantel in the living room. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect,

none. Owner, Emil Nelson, 200 Jersey street, S. F. The house will contain six rooms and bath and will be erected on the west side of Lombard street, south of 21st. All interior finish will be of pine or redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. The wainscots will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the owners will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base frame, \$2,500. Architects, none. Owners, Johnson and Johnson, 2330 Divisadero street, S. F. The house will be erected on 2330 Divisadero street, of Irving and has been designed for a seven room house with bath. Interior will be finished in pine and oak with hardwood floors in the living and dining rooms and reception hall. The living room will have a large open fireplace with brick mantel. An automatic water heater will be installed. The wainscot will be used in the living room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the owners will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base frame, \$2,000. Architects, none. Owner, E. Glinley, 1317 Broadway, S. F. The dwelling will be erected on the west side of 9th avenue, north of Clement street and will contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A brick veneer base will also be used. Plans are complete. Work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base frame. Cost not stated. Architects, Coxhead & Knapp, Central Bank Bldg., Oakland. Owners, Mrs. Clara Kummer, 2032 Broadway. The house will be erected on Monte Vista street, near Moraga and will contain seven rooms, several baths and sleeping porch. Interior finish will be of pine, hardwoods and white enamel. Plans provide for furnace heat and open fire places. Mantels will be of brick. Hardwood floors will be used in the principal rooms. Boilers of 52 gallons capacity will be installed. Composition wainscots will be used in the principal rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base frame, \$1,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, John G. Wolf, 2136 Center street. The house will be erected in Claremont and will be designed to contain eight rooms, a bath and sleeping porch. A large fireplace will be erected on the living room. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and

open fire places. Mantels will be of tile. There will be a vacuum cleaning system and an automatic water heater. Bath rooms will have ceramic tile floors and tile wainscots. Interior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base frame. Cost not stated. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner's name not stated. The dwelling will be erected on Northbrae and has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscots. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base frame, \$3,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, Hugo Koch. This house, designed for a six room dwelling with bath and sleeping porch, will be erected in Northbrae. Interior finish will be of pine with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. The architect is now completing working drawings for the building. Bids will be called out shortly.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base frame. Cost not stated. Architect, Mary I. Eggs, Berkeley. Owners, Marshall and Eggs. The dwelling will be erected on Asby avenue near where the same owners have been operating for some time. The house has been designed to contain seven rooms and bath. Interior will be finished in pine with some elm panels and hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. The wainscots will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owners and work will be supervised by Day Labor. All materials are being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base frame. Cost not stated. Architect, John S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mr. O. Lettice. The dwelling will be erected on Bartlett avenue and has been designed for a seven room house with bath and sleeping porch. Interior finish will be of pine with some hardwood floors and a veneer. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room and kitchen will have tile wainscots. Composition floor will be used in the living room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and

work will be done by Day Labor. **ALAMEDA, ALAMEDA CO., CAL.**—Residence, 2 story and base frame, \$8,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, W. H. Edwards. The dwelling will be erected on Waterside Terrace and has been designed for an eight room house with two baths and a sleeping porch. Interior finish will be of pine, white oak and hardwoods. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for a hot water system of heating and open fire places. Mantels will be of brick and tile. Automatic water heater will be installed. Bath rooms will have composition floors and tile wainscots. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalows, 1 story and base frame. Cost not stated. Architects, none. The following Day Labor jobs are reported to be started in San Jose: Northridge Bros., 785 East St. John's st., San Jose 1 story 6 room bungalow, \$2,000 and F. Peres, 6th and Martha street, San Jose 1 story 4 room cottage, \$1,500.

STOCKTON, SAN JOAQUIN CO., CAL.—Bungalow, 1½ story and base frame, \$1,500. Architect, Joseph Losekann, Stockton Bldg., Stockton. Owner, Dr. O. H. Peterson. The bungalow will contain seven rooms and bath and will be erected in the new residence tract known as "The Oaks." Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath and wainscots. Plans are complete and figures are being taken.

HOLLYWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base frame. Cost not stated. Architects, J. M. H. Haenke and W. J. Dodd, Story Building, L. A. Owner, Mr. Wiehman. The house will contain fourteen rooms, three baths and sleeping porches. Interior finish will be of pine, mahogany and oak. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. All the rooms will have tile floors and wainscots. A hot water system will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A red clay tile roof will be used. Plans are complete and figures are being taken.

SEWERS, STREET WORK AND WATER SYSTEMS.

SANTA BARBARA CO., CAL.—Highway work, materials, etc. Cost not stated. Engineer, County Engineer Santa Barbara. Owners, Santa Barbara County. Bids will be opened on November 3rd at 10 a. m. for furnishing labor and materials, tools, etc. for construction of 8,000 feet of highway. The work is to be done in the Road District. Plans and figures can be had of applicant. Santa Barbara County Engineer, Santa Bar-

SCHOOLS.

OAKLAND, CAL.—School, 1 story and base, reinforced concrete, \$75,000. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened at the last meeting of the Oakland Board of Education for the construction of the Lockwood School show all bids to be in excess of the amount available. It is probable however, that the contract will be awarded to the lowest bidder. Bids were received on a number of alternate propositions. A complete list of these figures will be found under the heading of Oakland and Alameda in this issue.

STOCKTON, SAN JOAQUIN CO., CAL.—School addition, 2 story and base, reinforced concrete. Cost not stated. Architects, Stone & Wright, 24 South California street, Stockton. Owners, City of Stockton. The present building located at the corner of Jackson and San Joaquin streets is to be enlarged. Plans for this work have been approved by the Board of Education and figures are now being taken. Bids will be opened on October 22. Plans and full particulars can be secured from the architects.

CLAREMONT, LOS ANGELES CO., CAL.—School of music, 2 story and base, reinforced concrete, \$90,000. Architect, Myron Hunt, Huberman Bldg., L. A. Owners, Pomona College. The building, designed for a music hall, will be in the shape of a letter Y with a length of 260 feet and an average width of 45 feet. The main auditorium will seat 1,000 people. Besides the main auditorium plans provide for eight large studios and 16 practice rooms. Construction will be fireproof throughout with cement floors and roof slabs and hollow tile walls and interior partitions. Interior finish will be of pine and hardwoods. A central heating system and modern ventilating plant will be installed. Exterior will be faced with cement plaster. Plans will be out for figures within ten days.

CHINO, SAN BERNARDINO CO., CAL.—School, 1 story and base, brick, \$35,000. Architects, Withey & Davis, Story Bldg., L. A. Owners, Chino School District. The building will cover a large ground area and has been designed to contain 12 standard size class rooms, library and assembly hall. Interior finish will be of pine. Slate blackboards will be used. An automatic water heater will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

WILLOWS, GLENN CO., CAL.—School, 2 story and base reinforced concrete, \$60,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Willows School District. Bonds for a new school building have been voted and plans submitted by Architect Weeks some time ago and approved by the Board of School Directors will be completed and bids called for shortly. The building will contain a number of standard size class rooms and a large assembly hall. Interior finish will be of pine and maple floors. A central heating system, probably steam heat, will be installed. Exterior of the building will be faced with cement plaster. Full completion of this work will be made in one and a half years.

EUREKA, HUMBOLDT CO., CAL.—School, 2 story and base, reinforced

concrete. Cost not stated. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Eureka Union High School District. Plans presented by Architect Weeks in competition with one other San Francisco firm and the local firm of Ackerman & Reese were selected by the Board of Education. The building will be fireproof and will contain besides the usual class rooms, a large auditorium, domestic science rooms and a manual training department. Interior will be finished in pine with maple floors. Plans provide for steam heat and a modern system of ventilation and vacuum cleaning. Exterior of the building will be faced with cement plaster. Bids will be called for as soon as plans can be completed.

Contracts Awarded.

STOCKTON, SAN JOAQUIN CO., CAL. School, 2 story and base, reinforced concrete, \$17,500. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Stockton School District. Contractors Chihlhart and Nystedt, Stockton, general construction only. Contract price, \$17,500. A complete list of these bids appears under the heading of Sacramento, Stockton and Northern California in this issue.

STORES AND OFFICES.

RICHMOND, CONTRA COSTA CO., CAL.—Store, 1 story and base, brick. Cost not stated. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Teherassy. This building will be erected at the corner of Richmond avenue and Park Place and will be designed for a large wholesale and retail grocery house. Considerable marble and tile will be used. Interior finish will be of pine. Patent store fronts and plate-glass windows will be used. Exterior of the building will probably be faced with cement plaster. Plans are now being prepared.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, Class A construction. Cost not stated. Architect, George W. Harding, Washington Bldg., L. A. Owners, Kelow and Brown. The building will be erected at the corner of Boyd and Omar streets with a frontage of 65 feet on one street and 100 feet on the other. Upper floors will be arranged for light manufacturing plants like printers, etc. First floor will contain the office and paint of the owners. Construction will be fireproof throughout with a complete steel frame and exterior walls, doors and roof of reinforced concrete. Plans provide for elevator service, vacuum cleaning system and mail chutes. Metal window sash and frames will be used. Exterior will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Stores and theatre, 1 story and base, brick and steel, \$35,000. Architects, Austin and Pennell, Wright & Callender Bldg., L. A. Owners, H. L. McAllister and J. M. Dobbins. This work has been mentioned here before when plans were first started. The building will occupy a corner site and will contain a theatre seating 850 people and five stores. Interior finish will be of pine and hardwood. Considerable ornamental plaster will be used in the theatre. There will be cement floors, metal window sash and frames and patent store fronts. Exterior of the building will be faced with pressed brick. Plans

are complete and figures are being taken.

Contracts Awarded.

SAN FRANCISCO—Office building annex, 12 story and base, Class A construction. Cost not stated. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Ogden Mills. Contractors, Clinton Fireproofing Co., concrete work. Contract price not stated. James McLaughlin, 214 Kearny street, carpentry work. Contract price not stated.

SAN FRANCISCO—Offices, 10 story and base, Class A construction, \$150,000. Architect, E. A. Bozio, 1125 Laguna street, S. F. Owners, French American National Bank of Savings. Contractor, P. J. Walker, Monadnock Bldg., general construction. Contract price, \$150,000.

THEATRES.

LOS ANGELES, CAL.—Greek theatre, reinforced concrete construction, \$150,000. Architects, Heath and Grove, Tacoma, Wash., associated with S. Tilden Norton and Frederick H. Wallis, Title Insurance Bldg., L. A. Owner, City of Los Angeles. This structure will be erected in Vermont Canyon and is a gift to the city from Col. G. J. Griffith. The theatre will be built in a natural amphitheatre with sufficient seating area for 25,000 people. The present seating capacity of the theatre will be 10,000. A stage 200 feet in width and with complete dressing rooms and storage space for scenery has been provided. The classic style of architecture will be used. Exterior will be faced with artificial stone. Plans are being prepared.

LOS ANGELES, CAL.—Ice rink, 1 story and base, brick and steel, \$150,000. Architect, Frederick Noonan, Wright & Callender Bldg., L. A. Owner's name withheld. The building will be erected at the corner of Grand avenue and Jefferson street covering an area of 175 by 125 feet. Besides the ice rink and ice making machinery there will be two stores and a moving picture theatre. A steel trussed roof covered with glass will be used. Interior finish will be of pine. Exterior of the building will be faced with pressed brick. Plans are nearly complete and bids will be called for within a week. Contract for machinery will be let separately.

SEATTLE, WASH.—Theatre, 2 story and base, reinforced concrete. Cost not stated. Architect, J. A. Creutzer, New York Bldg., Seattle. Owners, Isis Land Co. The building will be erected on Broadway near Pine and will have a street frontage of 36 feet and a depth of 120 feet. There will be one store beside the theatre. Construction will be fireproof. Interior will be finished in pine and ornamental plaster. There will be steam heat and a modern system of ventilation. The main auditorium will have a seating capacity of 500 people. Exterior of the building will be faced with cement plaster. The general contract will not include heating, plumbing, electric work or interior decorating. Plans are complete and figures are being taken.

SEALED PROPOSALS.

NOTICE INVITING BIDS.

Notice is hereby given that bids will be received by the Clerk of the Board of Supervisors of San Jo-

the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said works, in an amount equal to fifty per cent. (50%) of the amount named in said agreement.

A set of the forms of proposal and of the required affidavits, agreement bonds, acknowledgment and specifications will be furnished contractors on demand at the office of the Architects at City Hall Building. The plans and drawings may be had at the said office of the Architects after October 15th, 1913, within a reasonable time after application, and upon a deposit of Twenty-five Dollars (\$25.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architects in good condition, and complete set of plans and drawings required for the work will be furnished each applicant. Additional copies will, however, be furnished provided the applicant pays the cost of reproduction, and additional copies to be returned to the Architects together with the first set.

All information relative to the requirements for building, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Architects upon application at the office of the City Engineer.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted. Each bid shall be accompanied by the affidavit of the bidder as required by Section 126 of the Charter of the City of Oakland.

By order of the Council of the City of Oakland,
FRANK M. SMITH, City Clerk.

NOTICE TO BIDDERS.

Office of the Clerk of the Board of Supervisors, San Mateo County.

Sealed bids will be received by the clerk of the Board of Supervisors of San Mateo county at his office, until 2 o'clock a. m., Monday, November 3d, 1913, for the construction of 1.567 miles of highway, upon local road commonly known as Mission Road (or El Camino Real), beginning at a point on said road distant about 1715 feet southerly from where the northerly limits of Redwood City cross said road, and extending to the southerly limits of Redwood City, in the Third Road District of said county of San Mateo.

Specifications for this work are on file in the office of said Board, to which bidders are hereby referred.

All bids must be made upon blank form, to be obtained at the County Assessor's office of said county at Redwood City; must give the prices proposed both in writing and figures, and must be signed by the bidder with his address.

The bid is to be accompanied with a certified check equal to ten (10) per cent. of the total of the bid, upon the condition that if said bid shall be accepted the party bidding will duly enter into a contract and faithfully perform his contract in accordance with his bid and the plans and specifications. Such check to be made payable to said County of San Mateo.

Bids must be enclosed in a sealed envelope addressed to the clerk of the Board of Supervisors and must be endorsed "Bids for Highway at Redwood City on County Road within the city limits of Redwood City."

The Board of Supervisors reserves the right to reject any and all bids received, and to award the contract to the lowest bidder.

Attest: J. H. NASH,
Clerk of the Board of Supervisors of the County of San Mateo.

NOTICE TO CONTRACTORS.

OFFICE OF THE CITY ENGINEER, THE NEW YORK STATE COMMISSION, 110 West Forty-sixth Street, New York City, will receive bids up to 12 o'clock noon of November 1st, 1913, for the construction of a new building at the corner of West Forty-sixth Street and Broadway, New York City, and will be taken on the same day. The work allowed for complete building is as follows: plumbing and heating, electric and hot water, electrical wiring, plumbing, heating, and electrical work. The contract is to be let on a lump sum basis, and the office of the Commissioner, 110 West Forty-sixth Street, New York City, and

drawings may be obtained from the Architect, Charles B. Meyers, 1 Union Square West, New York City, and at the office of the Panama-Pacific International Exposition, San Francisco, Cal. Contractors desiring blue prints will be required to deposit six (6) dollars, the cost of printing, Norman E. Mack chairman.

PROPOSALS FOR CANAL SUPPLIES.

C., until 10:30 a. m., October 30, 1913, at which time they will be opened in public and the lowest bidder awarded the contract. Blanks and general information relating to this circular (No. 802) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point Street, San Francisco, Cal. and also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal., F. C. 190678. Consulting engineers: U. S. A., general purchasing officer.

PROPOSALS FOR EARTHWORK AND STRUCTURES.

EARTHWORK AND STRUCTURES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m., November 12, 1913, for earthwork and structures, in the South Canon, involving about 85,000 cubic yards of excavation, 2,600 cubic yards of reinforced concrete, the placing of 250,000 pounds of steel reinforcement, and the placing in wooden structures of about 130,000 feet, b. m. of lumber. The work is situated on the south side of Milk River adjacent to the main line of the Great Northern Railway in the vicinity of Vandaria, Tannico and Glasgow, Mont. For particulars address the United States Reclamation Service, Washington, D. C., Great Falls, Mont., or Malta, Mont. A. P. DAVIS, acting director.

PROPOSALS FOR VALVES.

REGULATING VALVES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, California, until 2 o'clock p. m., November 16, 1913, for furnishing four steel regulating valves for Minuteman Dam, North Platte Project, Nebraska. For particulars address the United States Reclamation Service, 605 Federal Building, Los Angeles, California, or Washington, D. C. A. P. DAVIS, acting director.

NOTICE TO CONTRACTORS.

THE SUPERVISING ARCHITECT, Office of the Supervising Architect, Washington, D. C., October 1, 1913—SEALED PROPOSALS will be received by this office until 3 o'clock p. m., on the 30th day of October, 1913, and then opened, for an electric passenger elevator, including hoistway, etc., in the United States post office at St. Louis, Mo., in accordance with the drawing and specification, copies of which may be obtained at this office at the discretion of the Supervising Architect. A. W. CLEROTH, Supervising Architect.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including twelve o'clock noon, of October 28th, 1913; said bids then and there to be publicly opened and read for furnishing all plant, materials, and labor, for the following work in the State Capitol Building at

Sacramento, California, in accordance with the specifications therefore, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Bids will be received:
First—For remodeling elevator grilles in the State Capitol Building.

Second—For the construction and erection of two new passenger elevators, with equipment for same, in the State Capitol Building.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids, and to waive any formality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for elevators and grilles in the State Capitol, Sacramento, California."

(Signed) W. F. McCLURE,
State Engineer.

PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals, indorsed "Proposals for Addition to Kitchen" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., November 1, 1913, and then and there to be publicly opened, in addition to kitchen at the U. S. marine barracks, Mare Island, Cal. Plans and specifications can be obtained on application to the commanding officer, or the commandant of the navy yard, Mare Island, Cal. H. R. STANFORD, chief of bureau.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, October 16, 1913—SEALED PROPOSALS will be opened in this office at 3 P. M., on January 15, 1914, for the construction, complete, including mechanical equipment and appurtenances of the United States post office, customhouse and courthouse at Hilo, Hawaii. The building will be of two stories, basement and ground floor, with a ground area of 12,000 square feet. The construction throughout is of reinforced concrete, with tile and copper roof. Drawings and specifications may be obtained from the custodian of site at Hilo, Hawaii, from the architect, Henry B. Whitfield, 160 Fifth Avenue, New York City, or at this office, at the discretion of the Supervising Architect, A. W. CLEROTH, Supervising Architect.

PROPOSALS FOR ICE PLANT.

ICE PLANT—Sealed proposals, indorsed "Proposals for Building for Ice Plant" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., November 1, 1913, and then and there publicly opened, for building for ice-making and cold-storage plant, Naval Station, Pearl Harbor, Hawaii. Estimated cost, \$9,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station, Honolulu, T. H. H. R. STANFORD, chief of bureau, September 11, 1913.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., October 1, 1913—SEALED PROPOSALS will be opened in this office at 3 P. M., November 26, 1913, for the construction, complete, including mechanical equipment and appurtenances of the United States post office at Albany, Oregon. Two-story and basement building, ground area 4,500 square feet, stuccoed exterior and terra cotta in the roof. Drawings and specifications may be obtained from the custodian of site at Albany, Oregon, or at this office, at the discretion of the Supervising Architect, A. W. CLEROTH, Supervising Architect.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

EUNGALOWS—2 1/2 story and base, frame, \$2,500 each, San Francisco. Architect, none. Owners, Western Union Home Builders, Inc., 161, Telegraph ave., Oakland. These two houses will be erected on 19th avenue west of California street and each is now designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living rooms and dining rooms. Each living room will have a large open fire place with brick mantel. Tile will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCES—2-story and base, frame, \$3,000, San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, J. P. Fletcher, 310 Lick Bldg. This is the first of several two story dwellings which Mr. Fletcher will erect on his property on 35th avenue near Fulton street. Each of the houses will contain seven rooms and bath. Interiors will be finished in pine, redwood and some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile and brick mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath, rustic and shingles. Plans for the first two of these houses have been completed and the work will be started at once under the Day Labor system. Mr. Fletcher is now in the market for all materials.

RESIDENCE—2 story and base, frame, \$3,500, San Francisco. Architect, none. Owners, Eva and Charles E. Reinhardt, 17th and Kansas streets, S. F. The dwelling, which has been designed for a seven room house with bath and sleeping porch will be erected at the corner of Rivoli and Cole streets. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,000, San Francisco. Owner, J. Anderson, 423 16th street, S. F. The dwelling will contain six rooms and bath. All interiors will be of pine or redwood. Some hardwood floors will be used. There will be a large open fire place with brick mantel in the living room. A wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner

who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story, attic and base, brick and steel, \$60,000, San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, F. Sheldon Potter. This house, designed for one of the handsomest homes in San Francisco, will be erected at the northwest corner of Cherry and Jackson streets on property having a frontage of over 80 feet. The design is in the Tudor Gothic style and will be carried out of pressed brick and cut stone. Interior has been arranged for in the neighborhood of 16 rooms, a number of baths and sleeping porches. Interior finish will be of French walnut and Scharlin oak. Many other hardwoods and white enamel will also be used in the finish. Hardwood floors will be used throughout except in the bath rooms which will have composition floors and the wainscot. Plans provide for a central heating system, either steam or hot water. There will be elevator service, a vacuum cleaning system and other modern improvements. Marble, tile and ornamental plaster are also specified. Plans will be completed within a few days and segregated figures will be called.

RESIDENCE—2 story and base, frame, \$2,500, San Francisco. Architect, Robert L. Sommons, 512 Cole street, S. F. Owner, W. Stiller, 1167 20th street. The house will be erected on 19th avenue north of Cabrillo street and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood. Some hardwood floors will be used. There will be a large open fire place with brick mantel in the living room. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,500, San Francisco. Architect, none. Owner, Emil Nelson, 580 Jersey street, S. F. The house will contain six rooms and bath and will be erected on the west side of Diamond street south of 21st. All interior finish will be of pine or redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,500, San Francisco. Architect, none. Owners, Johnson and Johnson, 55A Devisadero street, S. F. The house will be erected on 23rd avenue north of Irving and has been designed for a seven room house with bath. Interior will be finished in pine throughout with hardwood floors in the living and dining rooms and reception hall. Living room will have a large open fire place with brick mantel. An au-

thomatic water heater will be installed. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the owners will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000, San Francisco. Architect, none. Owner, E. Ginley, 131 5th avenue, S. F. The dwelling will be erected on the west side of 9th avenue north of Clement street and will contain seven rooms and bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A brick veneer base will also be used. Plans are complete. Work will be done by Day Labor.

APARTMENT HOUSES—2 and 3 story, frame, \$10,000, San Francisco. Architect, Paul F. Demartini, 451 Columbus avenue, S. F. Owner's name withheld. These two buildings will be erected on the north side of Union street near Hyde, the three story structure on the front of the lot and the two story building in the rear. There will be five apartments of two, three and four rooms. Interiors will be finished in pine and redwood. Each apartment will have a private bath and wall beds. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath and shiplap. Terrazzo will be used in the entrance vestibules. Plans are now being prepared.

APARTMENT HOUSES—2, 2 story and base, frame, \$5,000, each San Francisco. Architect, none. Owners, Ruegg Bros., 719 Pacific Bldg., S. F. These two houses will be erected on Ramona street south of 14th street. Each house will have a frontage of 25 feet and a depth of 36 feet. There will be four four-room apartments in each building. All suites will have private baths and wall beds. Interior finish will be of pine throughout. Bath rooms will have composition floors and tile wainscot. Exterior of the buildings will be covered with rustic and shiplap with brick veneer bases. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

FLATS—2 story and base, frame, \$5,000, San Francisco. Architect, Paul F. Demartini, 451 Columbus avenue, S. F. Owners, David and John Demartini. These flats will be erected on the west side of Powell street north of Diamond. Each flat will consist of two rooms and bath. Interiors will be finished in pine and redwood. Bath rooms will have tile wainscot. Entrances will be finished in terrazzo and marble. A gas grate will be used in each living room. Exterior of the building will be covered with shiplap and rustic. Plans are complete and measures will be taken at once by the owners.

FLATS—3 story and base, frame, \$7,000, San Francisco. Architect, Paul F. Demartini, 451 Columbus avenue, S. F. Owner, S. N. Buschbach. The

building will be erected on Francisco street east of Powell and has been designed to contain three modern flats of five and six rooms. Interior finish will be of pine and redwood with some hardwood floors. Bath rooms will be finished in tile. Open fire places and tile mantels will be used in each of the living rooms. Entrances will have marble wainscot and terrazzo steps. Exterior of the building will be covered with cement plaster on metal lath, rustic and shiplap. Plans are complete and bids are now being taken by the architect.

PLATS—3 story and base, frame, \$6,000. Architect, none. Owner, Burt T. Owsley, Sharon Bldg., S. F. The building will be erected on the west line of Clayton street south of Hayes street and will have a frontage of 25 feet and a depth of 68 feet. There will be three flats of five and six rooms each. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living rooms. Bath rooms will have composition floors and tile wainscot. Open fire places and tile or brick mantels will be used in each living room. Exterior of the building will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

PLATS—3 story and base, frame, \$6,000. San Francisco. Architect, Paul P. Demartini, 451 Columbus avenue, S. F. Owner, J. Sauter. These flats will be erected on the east side of Taylor street south of Union covering an area of 25 by 63 feet. Each flat will have six rooms and bath. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living and dining rooms. An open fire place and brick or tile mantel will be installed in each living room. Tile wainscot will be used in the bath rooms and kitchens. Exterior of the building will be covered with rustic and shiplap with brick veneer base. Entrances will be finished in marble and terrazzo. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

PLATS—2 story and base, frame, \$1,400. San Francisco. Architect, none. Owners, A. and R. Brisa, 527 Vallejo street, S. F. The building will be erected on Filbert street west of Jones and will cover an area of 34 feet 4 inches by 60 feet. Plans provide for four modern flats of four and five rooms. Interior finish will be of pine and redwood with some elm panels and hardwood floors. There will be open fire places and tile mantels. The wainscot will be used in the bath rooms and kitchens. Exterior of the building will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and work will be done by Day Labor. Materials are now being purchased by the owners.

PLATS—2 story and base, frame, \$3,000 each. San Francisco. Architect, Paul P. Demartini, 451 Columbus avenue, S. F. Owner's name withheld. These buildings will be erected on property on Filbert street between Grant avenue and Kearny street, one building on the front of the lot and one in the rear. Each will be arranged for two modern five room flats. Interiors will be finished in pine and red-

wood. An open fire place with tile mantel will be used in each of the living rooms. The wainscot will be used in the kitchens and bath rooms. Exterior will be covered with rustic and shiplap. Plans are now being prepared. The work will be done by Day Labor.

PLATS—2 story and base, frame, \$6,000. San Francisco. Architect, Paul P. Demartini, 451 Columbus avenue, S. F. Owner's name withheld. The building will be erected on North Point street between Leavenworth and Montgomery street and will be arranged for four modern flats. Interior finish will be of pine and redwood with some elm panels and hardwood floors. Living rooms will have open fire places and tile or brick mantels. The wainscot will be used in the bath rooms and kitchens. Entrance will be finished in marble and terrazzo. Exterior of the building will be covered with rustic and shiplap with a brick veneer base. Plans are now being prepared for the work.

HOTEL—5 story and base, reinforced concrete, \$20,000. San Francisco. Architects, Roussau & Roussau, Monadnock Bldg., S. F. Owner, J. B. Reite. The building will be erected on the south side of Post street west of Larkin. Plans show a total of sixty guest rooms and thirty baths. Interior finish will be of pine and redwood with some hardwood veneer. There will be steam heat, elevator service and a hot water system. Bath rooms will have cement floors and tile wainscot. Some ornamental plaster will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

STATE EXHIBIT BUILDING—frame and plaster, \$250,000. Architect, Charles B. Meyers, 1 Union Square West, New York. Owners, State of New York. Working drawings for the New York State Exhibit building which is to be erected in the Panama-Pacific Exposition grounds are complete and copies of the same have been forwarded to the Directors in this city. Bids are now being taken and will be opened by the New York State Commission, 140 West 12nd street, New York, on November 8 at 12 o'clock noon. Separate figures will be taken for the general construction, plumbing, heating and electric work. Time allowed for completing the general contract is set at 250 calendar days and for the heating and plumbing 225 days and 100 days for the electric work. Plans may be secured from the Director of Works, Service Bldg., San Francisco, or from the Architect in New York. An official proposal appears in another column of this issue.

Contracts Awarded.

OAKLAND AND ALAMEDA

RESIDENCE — 2 story and base, frame. Cost not stated. Oakland, Cal. Architects, Coxhead and Knowles, Central Bank Bldg., Oakland. Owner, Mrs. Clara Kummer. The dwelling will be erected on Monte Vista avenue near Moraga and will contain eight rooms, several baths and sleeping porch. Interior finish will be of pine, hardwoods and white enamel. Plans provide for furnace heat and open fire places. Mantels will be of brick. Hardwood floors will be used in the principal rooms. Boilers of 52 gallons capacity will be installed. Composition floors and tile wainscot will be used in the bath rooms. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE — 2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Leonard H Ford, 2136 Center street, Berkeley. Owner, John G. Weir. The dwelling will be erected in Claremont and has been designed to contain eight rooms, baths and sleeping porch. A garage will also be erected on the lot. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile. There will be a vacuum cleaning system and an automatic water heater. Bath rooms will have composition floors and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner's name withheld. The dwelling will be erected in Northbrae and has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Bath rooms will have composition floors and the wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RENTALOW — 1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, Leonard H Ford, 2136 Center street, Berkeley. Owner, Hugo Koch. This house, designed for a six room dwelling with bath and sleeping porch, will be erected in Northbrae. Interior finish will be of pine with some hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room and kitchen. An

automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. The architect is now completing working drawings for the building. Bids will be called for shortly.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Maury I. Burgess, Berkeley. Owners, Marshall & Biggs. The dwelling will be erected on Ashby avenue near where the same owners have been operating for some time. The house has been designed to contain seven rooms and bath. Interior will be finished in pine with some elm panels and hardwood floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owners and work will be carried on by Day Labor. All materials are being purchased.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mr. Ocheltree. The dwelling will be erected on Bonita avenue and has been designed for a seven room house with bath and sleeping porch. Interior finish will be largely of pine with some hardwood floors and hardwood veneer. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$6,000. Alameda, Alameda Co., Cal. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner W. P. Edwards. The dwelling will be erected on Waterside Terrace and has been designed for an eight room house with two baths and a sleeping porch. Interior finish will be of pine, white enamel and hardwoods. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for a hot water system of heating and open fire places. Mantels will be of brick and tile. Automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. Tile will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSES — 3 story and base, frame, \$50,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Sommerstrom Bros, 35 Rose avenue, Oakland. This building will be erected on Alice street and will cover a considerable ground area. Interior has been arranged for a large number of two, three and four room suites. All apartments will have wall beds, private entrances and connecting bath rooms. Pine, redwood and elm will be used for interior finish. Some hardwood floors will be used in the halls and living rooms. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in tile and marble. Plans provide for steam heat and a hot water supply. Ex-

terior of the building will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

JAIL EQUIPMENT—Cost not stated. Oakland, Cal. Architects, Palmer and Hornbostel, New York, associated with Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans are complete and bids are being called for all the materials and equipment in connection with the completion of the new City Jail in the City Hall Building. Bids will be opened on November 6th. Plans can be secured from Architect J. J. Donovan, Security Bank Bldg., Oakland. An official proposal appears in another column of this issue.

MUNICIPAL AUDITORIUM—2 story and base, Class A construction, \$500,000. Oakland, Cal. Architects, Palmer & Hornbostel, New York, associated with Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. A motion introduced by Harry S. Anderson, Public Works Commissioner of the City of Oakland, providing for the revision of the plans and specifications on the Municipal Auditorium was carried. City Architect J. J. Donovan of Oakland will revise the plans and now bids will be called for at once. The lowest bid received for the general construction was \$78,000 in excess of the amount available.

GARAGE—2 story and base, frame. Cost not stated. Piedmont, Alameda Co., Cal. Architects, Milwan Bros., Delger Bldg., Oakland. Owner, Mrs. Ellen Frances Cusling. The building has been designed for a private garage and will be erected in the rear of the owner's residence. Upper floor will be arranged for living rooms. First floor will have cement floor and will contain storage space for four machines. Special storage tanks for gasoline will be installed. Roof will be of Mission tile. Interior finish will be of pine throughout. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL—1 story and base, reinforced concrete, \$75,000. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened at the last meeting of the Oakland Board of Education for the construction of the Lockwood School show all bids to be in excess of the amount available. It is probable, however, that the contract will be awarded to the lowest bidder. Bids were received on a number of alternate propositions. A complete list of these figures will be found under the heading of Oakland and Alameda in this issue.

Lockwood School Bids Are Opened.

Oakland Board of Education Receive Ten Sets of Figures For Concrete School Building.

Ten sets of figures were opened by the Oakland Board of Education at the Tuesday night session for the construction of the Lockwood School, a building estimated to cost \$75,000. Plans were prepared by the City Architect,

John J. Donovan. All bids were referred to the City Attorney. Following is a complete list of figures. Bids were submitted with the following seven alternates: (1) substituting wood for concrete roof; (2) extending both class room wings so as to provide an additional class room in each; (3) as in 2 providing for two additional class rooms in each wing; (4) extending auditorium at stage and providing for boiler room in basement; (5) substituting wood for concrete roof in alternate No. 2; (6) substituting wood for concrete roof in alternate No. 3, and (7) substituting wood for concrete roof as in alternate No. 4.

MARIN, CONTRA COSTA AND
SONOMA COUNTIES.

HOTEL, PAVILION, ETC.—1 and 2
story, reinforced concrete. Cost not
stated. Santa Venetia, Marin Co., Cal.
Architects, Maybeck and White. Lick
Bldg., S. P. owners, Santa Venetia
Co. These buildings are proposed and
only preliminary sketches have been
made. Santa Venetia is a new tract
which is to be placed on the market
and the improvements are to be erected
by the company. Further details of
this work will be given as the plans
progress.

HOTEL.—3 story and base, brick and
steel. Cost not stated. Richmond,
Contra Costa Co., Cal. Architect, A. W.
Smith, 1004 Broadway, Oakland. Own-
ers, English and Haegerty. The build-
ing will be erected on a corner site
and has been designed for a store be-
sides the hotel lobby on the first floor.
Upper floors will contain in the neigh-
borhood of 54 guest rooms and a num-
ber of public baths. Interior finish will
be of pine. Bath rooms will have com-
position floors and tile wainscot. Plans
provide for steam heat and a hot water
system. Exterior of the building will
be faced with pressed brick. Plans are
nearly complete and figures will be
called for shortly.

STORE—1 story and base, brick. Cost
not stated. Richmond, Contra Costa
Co., Cal. Architect, C. O. Clauson, Phe-
lan Bldg., S. P. Owner, Mr. Telerassy.
This building will be erected at the cor-
ner of Richmond avenue and Park place
and will be designed for a large whole-
sale and retail grocery house. Consi-
derable marble and tile will be used.
Interior finish will be of pine. Patent store
fronts and plate glass windows will be
used. Exterior of the building will
probably be faced with cement plaster.
Plans are now being prepared.

FRESNO, MODESTO, STANIS-
LAUS AND CENTRAL
CALIFORNIA.

COUNTY JAIL.—2 story, base, and
mezzanine floor, Class A construction.
\$150,000. Bakersfield, Kern Co., Cal.
Architect, Orville L. Clark, Brower
Bldg., Bakersfield. Owners, Kern
County. The Board of Supervisors re-
cently selected the designs of Archi-
tect Clark for the new County Jail and
awarded the second prize to Thomas
R. Wiseman of Bakersfield, \$250, and
third prize to J. W. Dolliver of San
Francisco, \$125. The building will be
classic in design, of reinforced con-
crete construction faced with terra
cotta. Floors and roof slabs will also
be of reinforced concrete. Interior
partitions will be of hollow tile and
metal lath and plaster. The structure
will cover an area of 112 by 100 feet.
Basement will contain mechanical
room, engineer's quarters, fumigation
and bath rooms, armory, storage space
and garage. The sheriff's office, gen-
eral office, three deputy's offices, jail-
or's rooms and two tiers of steel cells
will occupy the first floor. Second floor
will be arranged for wash room, din-
ing rooms and kitchen and quarters
for the female prisoners. Interior fin-
ish will be largely of metal and hard-
wood. A hospital and cells for inber-
ates are also provided for in the plans.
There will be a steam heating system,
vacuum cleaning and hot water supply.
Plans will be completed as rapidly as
possible and bids will be called for be-
fore the first of the year.

HOTEL ALTERATIONS.—Frame con-
struction. Cost not stated. Fresno,
Fresno Co., Cal. Architect, Eugene
Mathewson, Forsythe Bldg., Fresno.
Owner, T. C. White. The present build-
ing located at the corner of I and Mer-
ced streets will undergo extensive re-
pairs. First floor will be altered for
a number of stores and upper floors
will be completely remodeled. Stores
will have patent store fronts and plate
glass windows. Interior finish will be
of pine throughout. A new heating
system will be installed. Plans are be-
ing prepared.

HOTEL.—1 story, rustic construction.
\$25,000. Big Creek, Fresno Co., Cal.
Architect, J. Carl Thayer, Forsythe
Bldg., Fresno. Owner, J. E. Bass.
Fresno. The building is to be erected

at Big Creek Lake and will be rustic
in design with exterior of redwood
logs. Plans show a total of 54 guest
rooms, large lobby, ladies' and gentle-
men's parlors and a large dining room.
Two fire places large enough to con-
sume huge redwood logs will be con-
structed, one in the lobby and the
other facing an open porch. Interior
finish will be such as to harmonize
with the surroundings. Hot and cold
water will be supplied to all rooms.
The hotel will be conducted as a winter
and summer resort. Plans are now be-
ing prepared.

LODGE HALL AND STORES.—2 story
and base, brick and steel. Cost not
stated. Porterville, Tulare Co., Cal.
Architect, J. L. Roberts, Porterville.
Owner, Porterville Odd Fellows' Hall
Association. A site at the corner of
Main and Cleveland streets has been
secured and plans are now being pre-
pared for a building containing two
stores on the first floor and modern
lodge halls and banquet room on the
upper floor. Interior finish will be of
pine and redwood. A maple floor will
be used in the ball room. Exterior of
the building will be faced with pressed
brick. Patent store fronts are speci-
fied. Plans are now being completed
and bids will shortly be called.

SACRAMENTO, STOCKTON &
NORTHERN CALIFORNIA.

BUNGALOW.—1½ story and base,
frame, \$3,000. Stockton, San Joaquin
Co., Cal. Architect, Joseph Losekann,
San Joaquin Bldg., Stockton. Owner,
Dr. O. H. Peterson. The bungalow will
contain seven rooms and bath and will
be erected in the new residence tract
known as "The Oaks." Interior finish
will be of pine and redwood. Hard-
wood floors will be used in the principal
rooms. There will be furnace heat and
open fire place. Mantel will be of
brick. Tile will be used in the bath
room and kitchen. An automatic water
heater will be installed. Exterior of
the house will be covered with cement
plaster on metal lath and rustic. Plans
are complete and figures are being
taken.

GARAGE.—1 story and base, rein-
forced concrete. Cost not stated. Fer-
nand, Humboldt Co., Cal. Architect's
name not given. Owners, Cream City
Mechanical Co. Plans and specifica-
tions for a new fireproof garage build-
ing covering a large area have been
completed. Bids have been taken from
a number of contractors and a con-
tract will be awarded within a few
days. The building will contain stor-
age space for eight machines besides
a paint shop and repair shop. There
will be metal window sash and frames
and fireproof floor and roof. Exterior
of the building will be faced with ce-
ment plaster.

HOSPITAL.—3 story and base, rein-
forced concrete, \$110,000. Stockton,
San Joaquin Co., Cal. Architect, Wal-
ter King, Elks' Bldg., Stockton. Own-
ers, St. Joseph's Home. This work has
been mentioned here before when the
plans were first out for figures. The
building will be erected on North Cali-
fornia street covering a large area and
will be fireproof throughout. There
will be a number of wards besides pri-
vate rooms and operating room. Inter-
ior will be finished in pine and hard-
woods. Plans provide for steam heat
and elevator service. Metal window

sash and frames will be specified. Exterior of the building will be faced with cement plaster. Plans are complete and new figures are being taken. Fattler McGough is in charge of the work.

SCHOOL—2 story and base, reinforced concrete, \$60,000. Willows, Glenn Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Willows School District. Bonds for a new school building have been voted and plans submitted by Architect Weeks some time ago and approved by the Board of School Directors will be completed and bids called for shortly. The building will contain a number of standard size class rooms and a large assembly hall. Interior finish will be of pine with maple floors. A central heating system, probably steam heat, will be installed. Exterior of the building will be faced with cement plaster. Further mention of this work will be made when bids are called.

SCHOOL—2 story and base, reinforced concrete. Cost not stated. Eureka, Humboldt Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Eureka Union High School District. Plans presented by Architect Weeks in competition with one other San Francisco firm and the local firm of Aykerman and Reese were selected by the Board of Education. The building will be fireproof and will contain besides the usual class rooms, a large auditorium, domestic science rooms and a manual training department. Interior will be finished in pine with maple floors. Plans provide for steam heat and a modern system of ventilation and vacuum cleaning. Exterior of the building will be faced with cement plaster. Bids will be called for as soon as plans can be completed.

SCHOOL ADDITION—2 story and base, reinforced concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Are Heets, Stone & Wright, 24 South California street, Stockton. Owners, City of Stockton. The present building located at the corner of Jackson and San Joaquin streets is to be enlarged. Plans for this work have been approved by the Board of Education and figures are now being taken. Bids will be opened on October 22. Plans and full particulars can be secured from the architects.

Contracts Awarded.

BRIDGE—Stone and reinforced concrete, \$20,990. Marysville, Yuba Co., Cal. Engineer, County Surveyor, Marysville. Owners, Yuba County. Contractors, George W. Martin & Son, Sacramento. Contract price, \$20,990.

SCHOOL—2 story and base, reinforced

concrete, \$47,900. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, 24 South California street, Stockton. Owners, Stockton School District. Contractors, Chirhart and Nystedt, Stockton, general construction only. Contract price, \$47,900. A complete list of these bids appears under the heading of Sacramento, Stockton and Northern California in this issue.

LOS ANGELES AND SOUTH CALIFORNIA.

RESIDENCE—2 story and base
frame. Cost not stated. Hollywood
Los Angeles Co. Cal. Architect J. Martin
Hoelke and W. L. Dodd, Story Bldg.
L. A. Owner Mr. Wachman. The house
will contain fourteen rooms, three bat-
rooms and sleeping porches. Interior
finish will be of pine, mahogany and
walnut. Hardwood floors will be used
in the principal rooms. Plans provide
for furnace heat and open fire places.

Mantels will be of tile and brick. All
other rooms will have tile floors and
plainscot. A hot water system will
be installed. Exterior of the dwelling
will be covered with cement plaster
and metal lath. A red clay tile roof will
also be used. Plans are complete and
figures are being taken.

APARTMENT HOUSE—3 story and
base brick, \$37,000. Long Beach, Los
Angeles Co., Cal. Architect, J. B.
Nelson, Wright and Callender Bldg.
L. A. Owner, James H. Atkin. The
building will cover a ground area of
50 by 150 feet and has been designed
to contain 80 rooms arranged in two
sets of three room suites with private
baths. Wall bells will be used in all
bedrooms. Interior finish will be of
pine and redwood. Plans provide for
steam heat, a vacuum cleaning system
and hot water supply. Exterior of the
building will be faced with pressed
brick. All bath rooms will have com-
position floors and tile wainscot. Plans
are being prepared.

BRIDGES—Steel and reinforced con-
crete. Cost not stated. Santa Bar-
bara County, Cal. Engineer, County
Engineer Santa Barbara. Owners
Santa Barbara County. Plans have
been completed by the County En-
gineer for three concrete and steel high-
way bridges which are to be erected as
follows: An 80 foot steel span bridge
over Los Amigos Creek on the State
Highway in the 5th Road District. A
concrete girder bridge in the same road
district over Graciosa Creek and con-
crete girder bridge over the same
creek in Section B of the 5th Road Dis-
trict. Separate bids are now being
asked for the construction of each of
these bridges. Plans, specifications
and full particulars of the work are
to be received from the County Engineer,
Santa Barbara. Bids will be opened
before the Board of Supervisors on No-
vember 3rd at 10 a. m. C. A. Hunt is
County Clerk.

HOSPITAL GROUP—1 and 2 story
and base reinforced concrete, \$140,000.
Newark, Los Angeles Co., Cal. Archi-
tect, State Architect George R. Mc-
Dougal, Sacramento. Owners, State of
California. Only preliminary plans
have been prepared for this group of
buildings and details are not available.
The tract on which these buildings are
to be erected covers an area of 295
acres. Construction will be fireproof
and 2 out. Working drawings are to
be prepared as soon as the preliminary
sketches have received the approval of
the State Board of Control.

HOTEL—3 story and base brick and
steel, \$150,000. Los Angeles, Cal. Ar-
chitects, O. P. Dennis and H. H. Hewitt,
Los Angeles. L. A. Owner, L. D. Hines.
The building will be erected on Holly-
wood Boulevard near St. Andrews
Place. The building has been designed
in the shape of a letter H with extreme
extensions of 150 by 150 feet. Interi-
or will contain 150 guest rooms, 75 per
cent of which will have private bath.
The finish will be of pine and white
oak. Hardwood doors will be used
through all ways. There will be steam
heat, elevator service and a vacuum
cleaning system. All bath rooms will
have composition floors and tile wainscot.
The roof of the building will be faced
with pressed brick. Clay tiles will be
used for tile. The tile will be used. Plans are
being prepared and figures are being
taken at once.

HOTEL—4 story and base, brick and steel, \$35,000. Los Angeles, Cal. Architects, Richards-Noustal Const. Co., Wright and Callender Bldg., L. A. Owner, N. E. Chamber, 200 Title Insurance Bldg., L. A. The building will be erected on North Los Angeles street covering an area of 67 by 73 feet. There will be a total of 72 guest rooms on the upper floors. First floor will contain, besides the hotel entrance, five stores. Interior finish will be of pine throughout. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat, elevator service and a hot water system. Stores will have patent store fronts and plate glass windows. Some marble and tile wainscot will be used. Exterior of the building will be faced with pressed brick. Plans are in the hands of the owner who is taking subleases on the various parts of the work.

HIGHWAY WORK, MATERIALS. FIVE—Cost not stated. Santa Barbara Co., Cal. Engineer, County Engineer, Santa Barbara, Owners, Santa Barbara County. Bids will be opened on November 3rd at 10 a. m. for furnishing all labor and materials, tools, etc., for the construction of 8,000 feet of highway. The work is to be done in the Fifth Road District. Plans and full particulars can be had on application to the County Engineer, Santa Barbara.

SCHOOL OF MUSIC—2 story and base, reinforced concrete, \$90,000. Claremont, Los Angeles Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Pomona College. The building, designed for a music hall, will be in the shape of a letter Y with a length of 260 feet and an average width of 15 feet. The main auditorium will seat 1,000 people. Besides the main auditorium plans provide for eight large studios and 16 practice rooms. Construction will be fireproof throughout with cement floors and roof slabs and below tile walls and interior partitions. Interior finish will be of pine and hardwoods. A central heating system and modern ventilating plant will be installed. Exterior will be faced with cement plaster. Plans will be out for figures within ten days.

SCHOOL—1 story and base, brick, \$35,000. Chino, San Bernardino Co., Cal. Architects, Withey and Davis, Story Bldg., L. A. Owners, Chino School District. The building will cover a large ground area and has been designed to contain 12 standard size class rooms, library and assembly hall. Interior finish will be of pine. Slate blackboards will be used. An automatic water heater will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

STORES AND LOFTS—5 story and base, Class A construction, Cost not stated. Los Angeles, Cal. Architect, George W. Harting, Washington Bldg., L. A. Owners, Kelow and Brown. The building will be erected at the corner of Ford and Ohio streets with a frontage of 65 feet on one street and 100 feet on the other. Upper floors will be arranged for light manufacturing plants like painters, etc. First floor will contain a large office and plant of the owners. Construction will be fireproof throughout with a complete steel frame and exterior walls, floors and roof of reinforced concrete. Plans provide for electric service, vacuum cleaning system and mail chute. Metal window

sash and doors will be used. Exterior will be faced with cement plaster. Plans are being prepared.

STORES AND THEATRE—1 story and base, brick and steel, \$35,000. Los Angeles, Cal. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, H. L. McAllister and J. M. Dobbins. This work has been mentioned here before when plans were first started. The building will occupy a corner site and will contain a theatre seating 550 people and five stores. Interior finish will be of pine and hardwood. Considerable ornamental plaster will be used in the theatre. There will be cement floors, metal window sash and frames and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GREEK THEATRE—Reinforced concrete construction, \$150,000. Los Angeles, Cal. Architects, Heath & Grove, Tacoma, Wash., associated with S. Tilden Norton and Frederick H. Wallis, Title Insurance Bldg., L. A. Owner, City of Los Angeles. This structure will be erected in Vermont Canyon and is a gift to the city from Col. G. J. Griffith. The theatre will be built in a natural amphitheatre with sufficient seating area for 25,000 people. The present seating capacity of the theatre will be 10,000. A stage 200 feet in width and with complete dressing rooms and storage space for scenery has been provided. The classic style of architecture will be used. Exterior will be faced with artificial stone. Plans are being prepared.

ICE RINK—1 story and base, brick and steel, \$150,000. Los Angeles, Cal. Architect, Frederick Noonan, Wright & Callender Bldg., L. A. Owner's name withheld. The building will be erected at the corner of Grand avenue and Jefferson street covering an area of 175 by 125 feet. Besides the ice rink and ice making machinery there will be two stores and a moving picture theatre. A steel trussed roof covered with glass will be used. Interior finish will be of pine. Exterior of the building will be faced with pressed brick. Plans are nearly complete and bids will be called for within a week. Contract for machinery will be let separately.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, Class C construction, \$60,000. Los Angeles, Cal. Architect, Ferdinand Penmetter, Byrne Bldg., L. A. Owner, Mrs. Harvey Ingerson. Contractor, Milton A. Ely, 2516 Alhambra street, L. A. Contract price, \$60,000.

HOTEL—12 story and base, brick and steel, \$350,000. Los Angeles, Cal. Architects, Parkinson and Bergstrom, Security Bldg., L. A. Owners, Hart Bros. Contractors, F. O. Engstrom Co., 24th and Seaton streets, L. A. The following work is not included in the contract: Plumbing, steam heating, elevators, power plant, ornamental iron, structural steel, mail chutes, marble and tile work, store fronts, terra cotta work, electric wiring, electric fixtures, painting, vacuum cleaning, ventilating and interior finish. Contract price not stated.

HOTEL—1 story and base, brick and steel, \$5,000. Los Angeles, Cal. Architects, Milwaukee Bldg. Co., Wright and Callender Bldg., L. A. Owners, Sidney Goldman and Charles Jacoby, Contractors, Milwaukee Building Co.,

Wright and Callender Bldg., L. A. Contract price, \$55,000.

POST OFFICE—2 story and base, Class A construction, \$184,216. Pasadena, Los Angeles Co., Cal. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor Eugene Schuler, Walpole, North Dakota. Contract price \$184,216.

SEATTLE AND WASHINGTON.

THEATRE—2 story and base—reinforced concrete. Cost not stated. Seattle, Wash. Architect, J. A. Greutner, New York Bldg., Seattle. Owners, Isis Land Co. The building will be erected on Broadway near Pine and will have a street frontage of 36 feet and a depth of 120 feet. There will be one store beside the theatre. Construction will be fireproof. Interior will be finished in pine and ornamental plaster. There will be steam heat and a modern system of ventilation. The main auditorium will have a seating capacity of 500 people. Exterior of the building will be faced with cement plaster. The general contract will not include heating, plumbing, electric work or interior decorating. Plans are complete and figures are being taken.

EXPOSITION PROGRESS.

Detailed Report Submitted By Director of Works.

Director of Works, Harris D. H. Connick, in a report submitted to President Charles C. Moore, of the Panama-Pacific International Exposition, on October third states:

Up to date, 11,176 feet of pipe for the high pressure water system has been laid.

In grading the Exposition site, the contractors are using 115 head of stock with the necessary scrapers, plows, wagons, etc. These are principally used in grading the drill ground and race track, Fine Arts Pool, Musical Concourse and Concessions road.

The service water supply system contract has been completed as has also the freight slip and approach. The hydraulic plant for operating the freight slip has also been installed.

There is every probability that the carpenter work on the Palace of Machinery will be completed within four weeks. The only work remaining to be done being the wall framing in the east and west entrances; wainscoting, partitions and mill work. Up to date, 7,260,000 board feet of lumber have been installed. All window frames are on the grounds and about half of them are set in place and ready for the glass.

Fifty per cent of the roof covering is in place and a corresponding amount of sheet metal work finished. Of the stucco and plaster work, 6,000 square yards of plain surfaces has been completed. About one-third of the stucco work has been set in place and that on the north end of the building is practically completed.

Three-fourths of the plumbing on the structure is finished and its total completion is a matter of a couple of weeks.

During the past month about 100,000 feet of the super-structure of the Educational Palace was erected. The wall and roof framing is under way.

Concrete work has been started on the roof line and is about three-fourths completed.

Approximately 75% of the columns and trusses are in place. The pile foundation contract for the Transportation Building has been completed.

About 90% of all the structural material of the Food Products Plant has been framed and most of the steel essential for assembling is on the grounds. Concrete work has been completed to about the floor of

All lumber for the Agricultural Palace has been delivered and about 65% of all framing has been completed. Three fire stations are under construction and two of them are nearly completed.

The entire floor work on the Liberal Arts Building has been completed. The framing of the columns and trusses is about 60% completed, and practically all of the plumbing work below the floor line is finished.

The grading on the Exposition Auditorium site is completed and the only thing that remains to be done is the back filling. The structural steel is being shipped and 770 tons are now on the grounds.

The construction of a bath house has been completed. About 75 of the columns and trusses on the Manufacturers Building has been finished. The erection of the trusses and columns will be inaugurated within the next ten days.

About one million feet of lumber has been placed to date in the floor of the Varied Industries Building. The framing of the columns and trusses is proceeding with great activity.

In the construction of the Mines Building, 1,150,000 board feet of lumber has been installed to date and the framing of the columns and trusses has started and the concrete work is under way.

Ten pointing machines are being used in the Department of Science in preparing the enlargements to identify the grounds and buildings.

The Government warehouses are now being removed and numbers one and two have been set up on a new site. Warehouse No. 4 has been razed and is now being moved to its new location.

Grading for the railway yards is progressing rapidly and the work of laying tracks has been carried on with such rapidity that this work will be completed at an early date.

All the architectural plans are now practically completed and the detail plans, which will be necessary to be made in the general drawing room of the Service Building.

The preparing of the lawn in the south gardens is practically completed. The lawn in the foreward terminal yard is nearly ready for its first cutting.

Japanese honey-suckle and other vines have been planted along the fence of the Hospital Building and the Presidio. The work of buttoning and lifting encycliptus, cypress, etc., in Lobo Square, has reached an advanced stage, and are ready for removal.

THE WORLD'S LARGEST BUILDING.

Work has been started on the New York City Water & Sewer Board's record building, and one of the so heavy and so costly it will already form the standard for new ones to

come. The new Equitable building of Broadway, Nassau, Pine and Cedar streets will cost when completed close to \$26,000,000. It will weigh 20,000 tons, as against 193,000 for the Woodworth building, and will require 36,000 tons of steel, as against 21,000 tons used in the next largest structure. As a matter of fact, it will be virtually four separate buildings, each having separate shafts for electric wires, telephone wires and other devices. By this means, together with distinct systems of water tanks, it is hoped that in the event of the in any one section the other three will be safely isolated.

RAILROAD'S BID ACCEPTED.

SACRAMENTO, Oct. 14.—The bid of the Southern Pacific company for furnishing all labor and material in the reconstruction of the city levees from a point 500 feet south of the Suttersville Road to a point 9,500 feet northwest of Brighton for \$262,100 was accepted unanimously by the City Commission.

According to Commissioner Wilder, after deducting the cost of all items except strictly earthwork on the levees concerned, the cost will approximate 94 cents per cubic yard, which is a saving of 4 cents per yard as compared with the previous bid of the company.

CONSTRUCTION WORK ABROAD.

APPENDIX

New Central Railway Station at Tokyo.

The most elaborate railway station in the Far East, the new Central Railway Station, at Tokyo, will be completed next year at a cost of approximately \$1,400,000. The main building is 1,083 by 132 feet, and the station is being constructed on a centrally located 50-acre tract of land which will be decorated with Japanese gardens, fountains, etc.

Asbestos from 1,300 tons of structural steel, being less than half of the amount utilized in the frame work, and a quantity of the all the materials used in the construction of the new station. 7,500,000 bricks, 8,800 cubic yards of concrete, 60,000 cubic feet of granite, 26,000 barrels of cement, 150,000 square feet of copper sheeting—which is used on the domes and in the roofing compartments—and 200,000 cubic feet of lumber.

The building will be provided with the usual dining rooms, waiting rooms, etc., and provision may be made later for hotel accommodations. It is the intention of the Japanese authorities to have this station completed some time in advance of the coronation of the Emperor in October, 1914.

It is, of course, customary to give preference to Japanese-made products, price and quality being equal. In this instance the result is clearly a monument to the advance in the use of composite goods in Japan.

 Mg; NiCO_3

New Electric Plant.

Another new electric plant has been completed in Acapulco by Electric & Company, who produced the equipment in Mexico City, except for the turbine from San Francisco.

Its initial capacity is 2,000 lights of 16 candlepower. The municipality is contracted for lights for the streets. The company announces that the wiring and installation of lights will be installed free, but it appears that the high cost of the service will preclude a very general patronage. The cash-in-advance rates per month for lamps run from \$2 for a 16 candlepower to \$8 for 100 candlepower and \$20 for 400 candle power, with discounts of 5 per cent for 5 to 10 lamps, 10 per cent for 10 to 20 lamps, and 10 per cent for 20 to 50 lamps. However, the company will probably realize that a meter system will prove more popular. The new plant will provide a market restricted at first, for many electrical devices. Correspondence should be in Spanish to the company named.

PANAMA.

Fire-Engine Building.

The National Government of Panama will erect an up-to-date two-story fire-engine building for the fire department of Colon, materials, concrete and wood, will be galvanized iron roof, all sand and gravel used in the concrete must be obtained from the Chame locality and River Chagres, and all stone from Ancon. Plans and specifications may be seen at the Department of Public Works at Panama, to which office all bids must be sent accompanied by a receipt showing that \$100 gold has been deposited with the Treasurer General of the Republic, Panama. The work is to be done under supervision of the Government construction engineer and completed within 60 days. The contract must be approved by the President of the Republic, and no increase in amount called for in the contract will be permitted without permission from the Secretary of Public Works, and the contractor must deposit \$250 for fulfillment of the work.

PHILIPPINES,

slipway for Manila.

For Eastern shipbuilding interests to be so materially affected by the opening of new shipyards and a shipyard of large size by the Erishaws Shipways & Engineering Co. (Ltd.), on the former basin of Manila Harbor. The new plant comprises an inclosure of some 33,000 square meters and has a complete cradle for landing vessels of up to 3,000 tons dead weight. The slipway projects 150 feet out of water, enabling it to make any of the vessels engaged in interland traffic and most of the vessels on the regular Cebu-Cooking-Philippines run, most of which have been coming heretofore to Hongkong for repairs. The plant is equipped with a foundry, machine shops, and a black and white marine shops with the latest appliances in the way of lathes, latels, drills, and other steel-working and cutting devices; with a complete hoist plant for all kinds of drilling, erecting, calking, and general service work; with hydraulic plants, electric and hydraulic cranes and all other conveniences. It is expected that the new concern will care for the most of the shipbuilding in the Philippines.

the business center of the city, has been in flood with disastrous results. It has now been decided by the municipality to straighten the outlet and enlarge the existing channel to a width of 100 feet and an average depth of 11 feet. This channel will be 1,600 feet long and will have a concrete bottom.

The present bridge near the river outlet will be replaced by a single-span road bridge 128 feet long and 60 feet wide, carrying two lines of trams and built on the skew crossing the river at an angle of 65 degrees to 75 degrees. The bridge will be constructed of steel with stone abutments.

If the plans of the town engineer are followed by the municipal council the work will be let in three contracts, one for the steel bridge itself, another for placing it in position, and a third for the stone abutments and concrete river bed. The total cost of these improvements is expected to approximate \$275,000.

\$900,000. Yet the cost of collections, proportionately, is little, if any, greater.

State Controller John S. Chambers has been given special attention to the work of the inheritance tax department with a view to increasing its efficiency. He is taking a personal interest in all the litigation involved and this week will appear in Los Angeles to take charge of the hearings in the estate of Eli Hancock Ross. This estate was appraised, in round numbers, at \$1,500,000, but as a result of investigations made by agents of Controller Chambers, he has become convinced that there is an under appraisal of at least \$3,000,000. He will now seek to have the appraisers revise their figures, and should they decline to do so, he will throw the matter into Court. If successful, the State will benefit to the extent of from \$50,000 to possibly \$200,000 in taxes, depending upon the amount of the increase finally secured.

FOREIGN TRADE OPPORTUNITIES.

[Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

CORRESPONDENCE WITH CONSULS.

The suggestion is made that all communications to consular officers be addressed

The American Consul,

At _____,

the name of the officer not being given

Any communication so addressed will be opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name, it might be forwarded to him unopened, should he be absent, and delay would thus result.

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 11742, *Plumbers' supplies and sanitary goods.*—The demand in a European country for plumbers' supplies and sanitary goods of American manufacture has increased to a considerable extent during the last few years. Most of these goods, however, come through Germany and often reach the market as German goods. Local dealers are desirous of importing direct from the American manufacturers. Some of these dealers state that it is impossible to import American supplies, as all inquiries are referred to general European sales agents, who try by every means possible to sell European goods rather than American. An American consular officer has forwarded the names of three dealers who have made inquiries in regard to the uses of goods mentioned.

No. 11745, *Resin.*—A report from an American consular officer states that there is at present a considerable demand in a European country for resin for use in gas works, and paper factories, etc. A local business man is desirous of entering into negotiations with American firms that are able to supply this article.

ANNUAL INCOME FROM INHERITANCE TAX.

Few people realize what a benefit the inheritance tax department of the State Controller's office is to the taxpayers of California. And as the Legislature increases the department's powers and provides it with additional funds for the application thereof, this benefit will become more and more pronounced.

During the last three years the collections have been well in excess of \$1,000,000 annually. In two of the years exceeding a million and a half, as compared in the three years previous to from \$600,000 to a trifle over

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Mr. James J. Hill says:--

"Unless the facilities of the Terminals of our Railroads are increased, the congestion, evergrowing, which often paralyzes traffic today, will result in industrial chaos."

---From N. Y. Sun, January 19, 1913

The Remedy:—

Equip Your Railway Freight Stations, Storage Warehouses,
Steamship Docks, Piers, Etc., with

Otis Inclined Elevators

Mechanical Continuous-Motion Carriers which meet **every** condition of Merchandise and Freight handling---and by the use of which **congestion is eliminated.**

Running **continuously** in one direction, up or down, Otis Inclined Elevators move everything without stops to load or unload.

No matter what the loads may weigh or how fast they come, Otis Inclined Elevator will handle them. Its capacity is limitless---it cannot be overloaded. It will handle from 600 to 1,960 loads per hour according to speed. It will keep up this capacity year after year. An electric motor is all that is required for operation, and, results considered, the current cost is almost negligible.

Write for Catalog giving full particulars about various types

Without obligation we will gladly supply full information. Put your "moving problems" up to us---we offer you real help and a positive solution.

Frank Neidick

Carpenter and Builder
Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd
San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Longitudinal Section of Self-Sentering. Actual Size.

Concrete Floors

can be built without form work if you make use of the new form of expanded metal which is a centering and reinforcing combined.

Self-Sentering is a material perfected after years of study and experiment in reinforced concrete construction. It consists of a series of heavy, cold-drawn ribs connected with the most efficient form of expanded metal.

Self-Sentering is adaptable to practically every type of concrete construction. It affords

the simplest and most economical method of building concrete, floors, roofs, ceilings, side walls, and partitions. It is adaptable for both flat and curved construction. It can be used for roofs of any type, as it supplies a bond which will hold the concrete until set on any inclined surface.

Write for our Fireproofing Handbook on low cost fire-proof construction with Self-Sentering. We shall be glad to send you a complimentary copy on request. Write today.

Editorial Comment.

A peculiar incident showing how comparatively few people in a great city know even a public man, happened recently in New York City. Timothy D. Sullivan was perhaps the best known man in New York. Not only was he known in his own city but he was a national figure. He was the political boss of Tammany Hall and dispensed his charities and political favors to the lower classes and the general population of the slums of the East side district. No man was better known to the police or to the public generally. Yet when he wandered away from a Sanatorium and was killed by a freight train in a railroad yard his body was taken to the morgue and laid there for a week without being recognized. This too when the fact was known and published that he had escaped from the sanatorium. A policeman who had known big Tim in his lifetime chanced to go by and recognized him else he would have been buried in the potters' field in another day among the unknown dead. Thus was one of the most striking figures in New York City rescued from oblivion amongst the very people he ruled.

Timothy D. Sullivan was a lord in the feudal system that obtains in the political life of a great city. He was a big hearted political boss. He dispensed charity with open hand, looked after the welfare of his supporters and was the general arbiter of their fortunes. All he asked in return was for his henchmen to vote his ticket and by his system he was as much a ruler as any feudal lord of the middle ages. Perhaps this system is changing and in the passing of Big Tim the system itself will change.

Painting the town a lurid red, figuratively speaking, is a favorite occupation of the cowboy, the granger, and the sailor when he blows in from the range or the briny deep after a year's cruise in the gulf or on the trackless ocean. The garmine color is usually by his brain, however, seen through the rusty hue of John Barley corn and sometimes through the grout windows of the cooler. And while the buildings may glow in the night time because of the revels and the burning of electric lights the expression of painting the town red is still figurative and simply denotes a state of mind.

Scientists, however, have seriously considered the possibilities of painting the town a luminous color, not red necessarily, but with a paint that would give back the light absorbed from the rays of the sun during the daytime. The question of producing a phosphorescent

paint at a commercial price is one that is exercising the minds of inventors. The sulphides of calcium and strontium are known to possess the property of emitting light for a considerable time after having been exposed to brilliant sunlight.

Here in the west with its clear skies and brilliant sun why would it not be possible to paint the town with such paints that the walls would glow like fox fire in the dusk? In such a case a city could be seen like a jack-o lantern in the night and the dark alleys would be hiding places for no one.

Considering the lapse of time the last half century has progressed more rapidly than all record time before it. As an illustration it might be compared to the progress in transportation. Seventy or eighty years ago the first locomotive engines were in use and the first railroads in the world were built. The steamboat had been in use some years before. Now the railroad girdles the world, the whistle of the locomotive is heard in the profoundest solitudes and the great ships of commerce plow all the seas, in spite of wind or tide. The perfection of the gas engine has extended locomotive transportation to the wagon road. And even the inconstant air has been made a road of travel and the machine has perfected to such an extent that the birds are rivaled in their distant flights. America has always led in railroad building. As an incident of locomotive building the following facts published in the Scientific American concerning the work of the Baldwin Locomotive Works is illustrative:

That a firm of builders should have recently completed its forty-thousandth locomotive bears testimony to the magnitude of the locomotive-building industry of this country. The Baldwin Locomotive Company, who have accomplished this feat, built their first locomotive in 1822. The one-thousandth was turned out from the works in 1881; and in 1880, the five-thousandth locomotive appeared. No. 10,000 was built in 1889, and No. 20,000 in 1900. It took only five years for the company to build its next 10,000 locomotives, and the present year sees the completion of the forty-thousandth, a fast passenger "Pacific" type. This locomotive has cylinders 26 inches in diameter by 26 inches stroke, 80-inch driving wheels, 4,525 square feet of heating surface, weighs 189,500 pounds, and has a tractive force of 28,300 pounds. It was built for the Pennsylvania Railroad.

As the difference in number of locomotives manufactured now and in 1880 is about equal to the difference in style and efficiency of the

PROTECTED MACADAM.

By E. H. Kellogg, C. E., Assistant City Engineer and Street Superintendent Of San Bernardino

Much has been written on oiled macadam paving and a wide range of experiment, more or less intelligent and more or less successful, has added much to our knowledge of a subject comparatively new,—new because the few years since its use began have sufficed only to eliminate the methods which were palpably wrong, and have not served to furnish the test of time to those which, by accident or design, have so far proved satisfactory.

Given the character and weight of traffic which prevailed eight or ten years ago, and there can be no reasonable doubt that the best types of construction as practised today would amply serve their purpose. As applied to the streets of interior cities, it is quite possible to predict that certain of them will never be subjected to the stress of heavy traffic, as the lines of such traffic will be governed by the shortest distance between termini and controlling gradients. Hence if a less costly pavement will serve for a period of years, with low cost of maintenance, the assessed property owners naturally incline to its adoption. The question to be answered by engineers in the selection of paving types have to do chiefly with the character of anticipated traffic and the needs of the particular street under construction. As a rule the traffic on the streets of a residential district, except such boulevards or main arteries as are certain to be used for heavy transportation, will be relatively light, and easily sustained by an inexpensive pavement. It would then seem unnecessary and burdensome to invest in the more costly types. Again, miles of such inexpensive improvement may be secured for a small city, which will improve sanitary conditions, abate the dirt and dust of a neglected street, raise the standard of civic pride through which comes the beautified, and the town as a whole will take its place in the progressive procession. Even such ultra cheap improvement as "gravel and oil," as such covering is now laid, may be used as that much better than nothing, and the investment is so small that the loss is negligible when some permanent construction proves necessary. In a general way the same is true of country roads which are off the main highways.

While the protected concrete road has been gaining in popularity in late years through the demonstration in Eastern states, and its adoption by the California State Highway Commission, it is far from proven that its increased cost is warranted, except for trunk lines, especially in Southern California, where climatic conditions and abundance of the best material, specially lend themselves to the protected macadam. In Angeles County has now nearly become of this pavement, in the building of which the errors of early specifications have been discovered and eliminated as the idiosyncrasies of material and treatment

become better understood. It is noticeable that on this system, the macadam itself is everywhere intact,—the wearing surface only of the earlier construction proving defective.

In measuring the stress of traffic on these really remarkable roads, it must be remembered that the width was limited by state law to sixteen feet, which was supplemented by borders six or eight feet wide of oil and screenings, serving only for convenience of turning out. The weight of travel is therefore confined to a double eight foot strip which, with great width, would be more widely distributed. In other words, the tonnage per square yard is thus enormously increased. And yet many of these highways are carrying a staggering weight of travel successfully. Naturally, maintenance cost has been a large item for reasons now well understood, but as methods of repair work improve, these costs will decline.

The interior cities of Pasadena, Riverside, Redlands and San Bernardino present notable examples of oiled macadam, which under moderate stress have given great satisfaction with initial low cost and nominal cost of upkeep. In each of these cities the same mistake was originally made, namely that of excessive oiling,—a mistake now recognized and avoided. We now know that road oil, once covered with a closely hammered skin, does not bind the aggregates of the macadam, but remains indefinitely in a plastic condition, losing nothing of its volatile contents, and acting more as a lubricant than a binder. Latter day practice, therefore, aims at only just enough oil penetration to secure a good adhesion for the thin wearing surface. And this wearing surface is no longer a thick pad of oil and fine screenings, but is composed of coarse screenings rolled into two light spreadings of oil, the function of the latter being merely to hold the fragments of small rock in secure contact with the macadam base. The weight of moving loads is thus transmitted through the smaller to the larger stones and not through the elastic medium of the heavy oil pad. It is obvious that the maturing of such a pavement must be more rapid, and its enjoyment much sooner realized.

It would serve no good purpose to cite failures or refer to freakish experiments by ambitions but misguided engineers. In this as in other branches of engineering, the wise man seeks the best examples of the best types and the why of each success. It sometimes happens that two streets have been paved under the same specifications, with the same material and under like weather conditions, and one of them will be excellent and the other poor. The reason most often lies in the personality and understanding of the contractor and inspector, or both. It may be that friction between contractor and city officers has destroyed

harmonious team work in one case and the work may have suffered for lack of patient and conscientious attention to details, or from wilful misinterpretation of specifications; in the other the opposite being true, the contractor gives rather more than less of required attention to detail with correspondingly good results. Inquiry in this direction is often illuminating.

It is not to be assumed that even with the large measure of success attained in the construction of oiled macadam pavements, we have reached the last word. There are too many earnest investigators in the field, and too many problems to be solved. But the net result of the work already done, and now being proved by service, is to establish the fact that no pavement of equal endurance under traffic conditions to which it is adapted or at so reasonable a cost, has been found.

The following abbreviated specifications with comments may serve to somewhat clarify an understanding of recent practice in the cities mentioned.

Foundation, brought to sub-grade, watered and rolled, until depressions are fully developed. These to be eliminated by harrowing and leveling, followed by second watering and rolling until a uniformly firm surface is secured.

In cases where the soil is sandy or otherwise unstable, it may be necessary to remove two or three inches from the surface and refill with material which will, under the roller, present a decently firm subgrade.

Macadam, up to and including six inches of compressed thickness, one course of "crusher run" rock, 1 inch to 3 inches, is evenly spread, allowing twenty-five per cent for compression, and one-half inch for wearing surface. Roll dry until a fairly uniform surface is secured, cover with dry limestone screenings three-eighths inch to dust. Roll and brush, adding screenings as the first application disappears until the voids in the rock are completely filled. Water freely until the fine dust is thoroughly wet. Roll until no motion of surface rocks under the roller can be detected. During this rolling the trained inspector

will search for the slight depressions which will inevitably develop, and correct them by additions of small rock, to be again rolled.

The surface will then be swept with steel brooms to remove surplus of screenings. This must leave tops of macadam stones prominently exposed, and the spaces between them irritated for the better penetration of the oil.

Wearing Surface. It has been found that the best road oil is that, which by treatment, has an asphalt content of 90 per cent or better. This when heated to 250 or 275 degrees becomes sufficiently fluid for spraying. A total of one gallon per square yard is the outside limit of quantity, six-tenths going into the first application. Power spreaders, drawn by the roller, are used, the roller giving uniform speed

and straight drives, neither of which can be attained with teams. Several hours before applying the oil, the surface should be lightly sprinkled to remove all traces of dust. Oil should only be applied in warm weather and after spreading should lie uncovered two or three days to encourage penetration and escape volatile matter, over with a half inch of No. 3 (3/4-inch to 1-inch) screenings. Roll until the small rock fragments are driven into the oil which fills the space between exposed rocks of the base. Brush over of surplus, sprinkle lightly, apply four-tenths gallon of oil, cover with a liberal spread of No. 3 screenings and roll to a finish. The surface should now, if swept clean of surplus screenings, present a mosaic appearance with small stones embedded in oil. In hot weather, however, the uncombined oil will "sweat" to the surface, and drifting under traffic over the stones, give a result hardly to be distinguished from sheet asphalt except in its greater elasticity and freedom from noise.

During its first summer it will require attention to prevent a tendency to stickiness through "sweating." But proper care and judgment have been used in laying the wearing surface, and little if any trouble need be anticipated.

The question of endurance of such a wearing surface cannot yet be determined, as none has been in service long enough. In Pasadena, one street carrying a moderately heavy traffic has a record of seven years without repairs of any kind. Riverside shows several streets four and five years old with no maintenance charges against them. Redlands and San Bernardino now examples two to four years old with like records. It is estimated that complete re-oiling with say half a gallon of oil per yard will not be necessary under ten years, and possibly more.

The stability of the macadam base constructed substantially as above described depends on the complete filling of the voids in the rock with a highly cementitious material, and such thorough rolling, after wetting, that each stone is driven to its final resting place. Thereafter the strains resulting from moving vehicles, being less than those resulting from the roller, cannot disturb the positions of individual stones, which might easily result in the weakening of the surrounding mass. Therefore stinging rolling must be avoided.

In Riverside and San Bernardino the best results have been attained with limestone, chiefly because slab shaped fragments are more readily broken, with a consequent reduction of voids, and the grinding of the stones together under the roller produce a certain quantity of the desired fine dust filler. Scarcely inferior results have been obtained from hard rock. For the wearing surface hard rock No. 3 screenings are preferred, as likely to hold up somewhat longer.

A reasonable deduction from the foregoing is that well laid oil macadam is "good for what it is good for." It has its honorable place in the scheme of street improvement, and its low initial cost and light cost of maintenance appeals strongly to the majority of people who must be assessed to pay for it.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, brick and steel. \$30,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, M. S. Shaw. The building will be erected on the north side of Bush street west of Hyde covering an area of 34 feet 5 inches by 124 feet. The building will contain 16 suites of two and three rooms each with private baths and wall beds. Interior will be finished in pine and elm panels. Hardwood floors will be used in the halls and entrances. There will be steam heat, automatic elevator and a hot water system. A vacuum cleaning system will also be installed. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick and artificial stone. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 2 story and base, frame, \$7,500. Architect, J. W. Plachok, 1424 Spring street, Berkeley. Owner, Dr. J. H. Wood. The building will be erected on Russell street at the corner of Hillegass and has been designed to contain four suites of three rooms and bath each. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be a central heating system, probably furnace heat. Each living room will have an open fire place and tile mantel. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

STOCKTON, SAN JOAQUIN CO., CAL.—Apartment house, 2 story and base, frame, \$2,500. Architect, Ralph P. Merrill, Odd Fellows' Bldg., Stockton. Owner's name withheld. The building will contain three suites of four rooms and bath. Interior will be finished in pine throughout. All suites will have wall beds. Hot water will be supplied in all rooms. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FORTYVILLE, TULARE CO., CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect Deni G. McDonald, Sheldon Bldg., S. F. Owner, V. D. Knapp. The building will be erected on a corner site and has been designed for stories on the first floor and a number of two and three room suites on the second floor. Interior finish will be of pine throughout. Plans provide for a central heating system and hot water supply. All suites will have wall beds and private bath rooms. Stores will have plate glass windows in patent store fronts. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

FIRE HOUSES AND JAILS.
SAN FRANCISCO. Fire house, 1 story and base, reinforced concrete. \$20,000. Architect, Asst State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids opened by the State Board

of Harbor Commissioners on October 22nd for the construction of the fire house and roundhouse which is to be erected on Sea Wall Lot No. 8 show Tiesha Bros. low at \$19,324. A contract for the work has been awarded to them. A complete list of all figures received appear under the heading of San Francisco in this issue.

SAN FRANCISCO—Apartment house alterations, 2 story and base, frame, \$3,500. Architects, Smith & Stewart, 241 Kearny street, S. F. Owner, Sidney Pringle. This work will consist of rearranging the present two story flat building at the corner of Sacramento and Spruce streets into four modern four room apartments. There will be new plastering, plumbing, electric work, interior finish and painting. Wall beds will be used. Exterior will not be altered. Plans are being prepared for the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Masonic streets, S. F. The building will be erected at the northeast corner of Masonic and Grove street and will cover an area of 25 by 72 feet. Interior has been arranged for six modern apartments of four rooms and bath. Finish will be of pine and elm panels. Oak floors will be used in the living rooms. There will be wall beds and private baths. Hot water system will be installed. Composition floors and tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and shiplap. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

CHURCHES.

ANAHEIM, ORANGE CO., CAL.—Mausoleum, 1 story reinforced concrete. \$50,000. Architect, Charles E. Sattuck, Mason Bldg., L. A. Owners, Pacific Mausoleum Co., 262½ East Center street, Anaheim. Plans and specifications may be obtained either at the office of the company or the architect. Bids must be submitted to the secretary of the company at the company's office at Anaheim by Saturday, Nov. 1, 1913. The building will be reinforced concrete with marble trim; will contain 300 crypts. Design is in the classic style.

FACTORIES & WAREHOUSES.

SACRAMENTO, CAL.—Packing plant, 1 story and base, reinforced concrete. Cost not stated. Architects, Seadler & Hoof, Forum Bldg., Sacramento. Owners, Swanton Packing Co. This work was mentioned here sometime ago when plans were first started. The building will be erected in the Huggin Court and has been designed for one of the most modern packing plants in the west. Construction will be fireproof throughout with exterior walls, floors and roof slabs of reinforced concrete. There will be metal window sash on all doors. Special machinery will be used. Office portion of the building will be finished in pine and hardwood. Ex-

terior will be faced with cement plaster. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Warehouses, 2 3-story and base, reinforced concrete. \$160,000. Architect, Constructing Quartermaster, Fort Mason. Owners, United States Government. Plans for the two large fireproof warehouses which are to be erected at Fort Mason have been completed and are now out for figures. Each building will cover an area of 60 by 200 feet, and will be carried on pile foundations. There will be concrete floors designed to carry loads of 500 pounds to the square foot. Interior will be finished in pine. There will be two extra large elevators in each building. Metal window sash and frames are specified. Automatic sprinklers will be used. Exteriors will be faced with cement plaster. Roofs will be of red clay tile. Plans and specifications can be secured from the office of the Constructing Quartermaster. Bids will be opened on November 21st. Official proposals appear in another column of this issue.

LOS ANGELES, CAL.—Warehouse addition, 4 story and base, Class A construction. Cost not stated. Architect, A. Earnside Sturges, Story Bldg., L. A. owners, Lyon Fireproof Storage Co. The building will be erected on property adjoining the company's present building on Vermont avenue near Washington street and will cover an area of 50 by 145 feet. Construction will be fireproof throughout, with reinforced concrete walls, floors and roof slabs. Interior will be finished in pine and metal trim. There will be elevator service and steam heat. Metal window sash and frames and fireproof doors are specified. An automatic sprinkler will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared

will be two flats of five rooms in each building. Interiors will be finished in pine with some veneer hardwoods and oak floors. Open fire place and tile mantel will be used in the living rooms. Bath rooms will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath and brick veneer bases. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architects, Zanolini and Jewett, 601 Montgomery street, S. F. Owners, G. and F. Oppiel. The building will be erected on the west side of Grant avenue north of Greenwich, covering an area of 22½ feet by 53 feet 9 inches. Each flat will contain five rooms and bath. Interior will be finished in pine throughout. Some oak floors will be used. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms and kitchens. Terrazzo and tile will be used in the entrance vestibule. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Flats, 2 story and base, frame. Cost not stated. Architect, John Carson, Bacon Bldg., Oakland. Owner, A. C. Brill. The building has been designed to contain four modern flats and will be erected on Filbert street south of 12th. Interior finish will be of pine and redwood with some veneer hardwood. Canal Administration.

Until the commerce of the world actually is flowing smoothly through the Panama Canal no change in either the operation of the big ditch or in the government of the Canal Zone will be made.

It developed also that through this decision President Wilson planned to pay a delicate compliment to the men who have accomplished the herculean task of joining the oceans by giving them the opportunity to enjoy the fruition of their labors. Congress has provided for a civil government for the zone, but for the time being its control will be left to the Isthmian Canal Commission and the Army engineers.

Secretary Garrison and Col. George V. Goethals, the genius of the canal, have made considerable progress in formulating a plan of government and operative administration.

The secretary and Col. Goethals, however, share the belief that there is no imperative necessity to put the operation of the canal into civilian hands as soon as it is open to traffic, an opinion in which President Wilson shares.

The canal commission has ample authority to proceed with the operation of the waterway and, in the opinion of Secretary Garrison, it will be intelligently done by the present administration of the zone.

Walla Walla, Wash., Furniture.

The following bids were received by the supervising architect, Treasury department, Washington, D. C., for furniture for the U. S. post office, Walla Walla, Wash.:

Jacob Bittel & Son, York, Pa., \$1,685; 95 days.

S. post office, Pasadena, Cal., has been awarded to Eugene Schuler, Santa Barbara, Cal., at \$179,000; plus alternate A, substituting Keene cement for hard plaster in connection with all walls, \$1,471; alternate 5, painting plaster surface of finished rooms, \$2,775, and substituting birch stain mahogany for California eudwood, \$1,000; total amount, \$184,446.

HALLS AND SOCIETY BUILDINGS.

LOS ANGELES, CAL.—Club house, 3 story and base, brick. Cost not stated. Architects, Hunt and Burnes, Langdon Bldg., L. A. Owners, Automobile Club of Southern California. The building will be erected on Figueroa street south of Pico and will be designed in the classic style. Interior will be arranged for large social rooms, library, ball room and banquet hall. Interior finish will be of pine and hardwoods. Hardwood floors will be used throughout. There will be steam heat and large open fire places. Mantels will be of brick and tile. Elevator service and dumb waiters are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

FILLMORE, VENTURA CO., CAL.—

Lodge hall, 2 story and base, reinforced concrete. Cost not stated. Architect, Homer Glidden, Wright and Callender Bldg., L. A. Owners, Masonic Temple Association of Fillmore. The building will be erected on Central avenue having a frontage of 50 feet. There will be two stories on the first floor and upper floors will be arranged for lodge rooms, offices and a large auditorium. Interior will be finished in pine and hardwood. Maple floor will be used in the auditorium. Furnace heat is specified. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

HOSPITALS.

LOS ANGELES, CAL.—Hospital, 5 story and base, reinforced concrete. \$100,000. Architects, Garrett and Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. The building will be erected on South Hope street near Jefferson. The work has been mentioned here before. The 1st floor will contain an office, directors' room, ward, eight private rooms, baths, toilets, and a sun room, and the two upper stories will each contain eleven private rooms, general ward, diet kitchen, toilets and baths. The fifth floor will contain three operating rooms, sterilizing room and special surgical departments. The basement will be occupied by a dining room, kitchen, pantry, laboratory, laundry, and refrigerating rooms; and the cellar will contain the furnace rooms and storage department. There will be tile and marble entrance, tile floors in corridors and bath rooms, 1 freight and 1 passenger elevator, plate glass, steam heat and vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOTELS.

BURLINGAME, SAN MATEO CO., CAL.—Hotel, 3 story and base, reinforced concrete. \$50,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, J. H. Hatch, Burlingame. The building will be erected on San Mateo Drive near the business center of the city and will cover an area of 60 by 100 feet. First floor will contain a large lobby, office, public dining room and ladies' and gentlemen's parlors. Upper two floors have been arranged for a total of 75 guest rooms nearly all of which have private baths. Interior finish will be of pine and hardwoods. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat, an automatic elevator, hot water supply and vacuum cleaning system. Exterior will be faced with cement plaster. Plans are being prepared.

PETALUMA, SONOMA CO., CAL.—Hotel and stores, 3 story and base, brick and steel, \$66,000. Architect, Brainard Jones, Petaluma. Owners, Petaluma Development Co., E. J. Dole, Attorney, Prince Bldg., Petaluma. The building is to be erected at the southeast corner of Washington and Kentucky streets, one of the city's principal business corners. First floor will contain six stores besides the hotel entrance, lobby and office. Upper floors will be subdivided into about 70 guest rooms and a number of baths. Interior will

be finished in pine and some hardwoods. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat, running hot and cold water in all rooms and a vacuum cleaning system. Stores will have large plate glass display windows and patent store fronts. Exterior will be faced with pressed brick. Working drawings are being prepared.

OAKLAND, CAL.—Hotel, 7 story and base, brick and steel, \$110,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Friedman Realty Co. The building will be erected at the southwest corner of Clay and 16th streets covering an area of 60 by 100 feet. There will be stores on the first floor besides a large hotel lobby and office. Upper floors will be arranged for a large number of hotel rooms and baths. There will be a complete steel frame, exterior walls of brick, faced with pressed brick and terra cotta. Floors and interior partitions will be of fire-proof construction. Interior will be finished in pine and hardwoods. Plans provide for steam heat, elevator service, hot and cold running water in all rooms and a vacuum cleaning system. Metal window sash and frames will be used. All bath rooms will have composition floors and tile wainscot. Plans are complete and figures are now being taken.

SAN DIEGO, CAL.—Hotel, 6 story and base, reinforced concrete. \$150,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owner, Dr. Fred Stauffer, Salt Lake City. Construction will be of reinforced concrete throughout, walls, floors and roof slabs. Interior partitions will be of hollow tile. Entire first floor will be devoted to the main office, lobby, public dining room and parlors. Upper floors will contain in the neighborhood of 135 guest rooms and 68 baths. A large restaurant will be located in the basement. Interior finish will be of pine, hardwood and white enamel. There will be steam heat, elevator service, a vacuum cleaning system and mail chutes. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with cement plaster. Metal window sash and frames are specified. Plans are now nearly complete.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Victor Ponet. The building will be erected at the northeast corner of Pico and Hope streets, covering a large area. There will be six stories besides the hotel lobby on the first floor. Upper floors will contain 120 rooms and a number of public and private baths. Interior finish will be of pine and hardwood. Bath rooms will have composition floors and tile wainscot. There will be steam heat, elevator service, a hot water supply and vacuum cleaning system. Metal window sash and frames will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$50,000. Architect, George F. Costerisan, California Bldg., L. A. Owner, Charles E. Murray. The building will be erected on Olive street near 8th and will contain a number of stores on the first floor. The structure will cover an area

of 60 by 165 feet with a wing 60 by 70 feet. Upper floors will be arranged for a total of 120 guest rooms about fifty per cent of which will have private baths. Interior finish will be of pine and hardwood veneer. Some oak and tile floors will be used. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Metal window sash and frames and patent store fronts are specified. Bath rooms will have composition floors and the wainscot. Exterior of the building will be faced with pressed brick and artificial stone trim. Plans are now being prepared.

PANAMA - PACIFIC EXPOSITION WORK.

NOTICE TO CONTRACTORS. PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

Sealed proposals will be received by the Building and Grounds Committee of the Panama-Pacific International Exposition Company at Room 212, Service Building, Fillmore and Chestnut Streets, San Francisco, California, at **11:00 A. M. Thursday, November 6th, 1913**, for the installation of the Plumbing, Sewers, Water and Gas Pipe and Hot Water Heating of the Horticultural Building in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject all and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER, Chairman.

NOTE.—Particular attention is called to the place of opening of bids, as given in the first paragraph of this advertisement.

The building will be erected on the west side of Grant avenue north of Greenwich covering an area of 224 feet by 53 feet 9 inches. Each flat will contain five rooms and bath. Interior will be finished in pine throughout. Some oak floors will be used. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms and kitchens. Terrazzo and tile will be used in the entrance vestibule. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and figures are now being taken.

APARTMENT HOUSE ALTERATIONS—2 story and base, frame, \$2,500. San Francisco. Architects, Smith Stewart, 214 Kearny street, S. F. Owner, Sidney Pringle. This work will consist of rearranging the present two story flat building at the corner of Sacramento and Spruce streets into four modern four room apartments. There will be new plastering, plumbing, electric work, interior finish and painting. Wall beds will be used. Exterior will not be altered. Plans are being prepared for the work.

APARTMENT HOUSE—2 story and base, frame, \$10,000. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Masonic streets, S. F. The building will be erected at the northeast corner of Masonic and Grove street and will cover an area of 25 by 72 feet. Interior has been arranged for six modern apartments of four rooms and bath. Finish will be of pine and elm panels.

Oak floors will be used in the living rooms. There will be wall beds and private baths. Hot water system will be installed. Composition floors and tile wainscot will be used in the bath rooms. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

POSTOFFICE—2 story, mezzanine and base, reinforced concrete. Cost not stated. Hilo, Hawaii. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans for the new federal building to be erected in Hilo have been complete and figures will be opened on January 15th. The building is to cover approximately 12,000 square feet of ground area and will be fireproof throughout. Interior finish will be of native woods, pine and metal trim. Tile and concrete floors will be used. There will be a central heating system and a vacuum cleaning plant. Hollow tile partitions will be used. Exterior will be faced with cement plaster. Plans can be secured from the Supervising Architect at Washington, D. C. or from the Custodian of the site at Hilo. An official proposal appears in this issue.

RESIDENCES—2 story and base, frame, \$5,000 each. San Francisco. E. E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue, S. F. These dwellings will be erected on the north side of Lake street west of 19th avenue and have been designed to contain seven rooms and baths. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

POST OFFICE—2 story and base, stone, brick and steel. Cost not stated. Albany, Ore. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans for a new federal building at Albany have been completed and forwarded to this coast for figures. The building is designed in the classic style and will cover an area of approximately 4,700 square feet. There will be a complete steel frame, exterior walls of brick, cut stone and terra cotta. Interior partitions will be of metal lath and hollow tile. A steam heating system and a vacuum cleaning plant will be installed. Interior will be finished in pine and hardwoods. Bids will be opened on November 26th. Plans can be secured from the Supervising Architect at Washington or from the Custodian of the site at Albany. An official proposal appears in another column of this issue.

STORES—1 story and base, reinforced concrete, \$10,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Malcolm-Jacobs and Burtt. The building will be erected on the north side of Washington street east of Davis, having a frontage on Washington street of 10 feet and a depth of 120 feet. Construction will be

of the Class C type, foundations being carried on scow construction. There will be cement floor and metal window sash and frames. Interior finish will be of pine throughout. Exterior of building will be faced with cement plaster. Plans are now being prepared.

STORES—1 story and base, Class C construction, \$10,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Waterfront Realty Co., S. F. The building will be erected at the corner of Washington and East streets and has been designed to contain several stores and a large saloon. Interior will be finished in pine throughout. A cement floor will be used. Metal window sash and frames are specified. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

THEATRE—2 story and base, Class A construction, \$150,000. San Francisco. Architect, William Bessley, 127 Montgomery street, S. F. Owners, J. Grauman, Rudolph Zukor and R. S. Kahn. The building will be erected on Market street between 5th and 6th streets, the exact location being withheld for the time. Construction will be Class A throughout with a complete steel frame, reinforced concrete floors and walls. Interior will be finished in pine, and metal trim. There will be steam heat and a modern system of ventilation. Interior partitions will be of hollow tile and metal lath and plaster. Considerable ornamental plaster will be used. Marble and tile will be used in the vestibule. Exterior of the building will be faced with cement plaster. Plans are now nearly complete and figures will be taken shortly.

PLUMBING, SEWERS AND HOT WATER SYSTEM—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the installation of the sewers, plumbing, gas and water pipes and the hot water system in the Horticulture Building have been completed and are now out for figures. Bids will be opened on November 6th at 11 a. m. Plans can be secured from the Director of Works, Service Building. An official proposal appears in another column of this issue.

Contracts Awarded.

FIRE HOUSE—1 story and base, reinforced concrete, \$20,000. San Francisco. Architect, Asst. State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids opened by the State Board of Harbor Commissioners on October 22nd for the construction of the fire house and roundhouse which is to be erected on Sea Wall Lot No. 8 show Tieslan Bros. low at \$19,325. A contract for the work has been awarded to them. A complete list of all figures received appear under the heading of San Francisco in this issue.

Harbor Board Opens Bids For Firehouse.

Tieslan Bros. Awarded Contract For Construction of Building on Sea Wall Lot No. 8.

Nineteen sets of figures were opened at the State Board of Harbor Commissioners at their meeting on October

23rd for the construction of a round house and fire station on Sea Wall Lot No. 8. A general contract for the work was awarded to Tieslau Bros., the lowest bidders, at \$19,325.

The building will be a one-story reinforced concrete structure designed by the Assistant State Engineer. Following is a complete list of bids opened:

Fire House for Harbor Road.

most plastic material. Plans are complete and figures are being taken.

RESIDENCE—1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, F. R. Peike Co., 2127 University ave., Berkeley. The dwelling designed for a seven room house will be erected on Colusa avenue. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or rock mantels. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the house will be covered with shingles. Plans are in the hands of the owners who will do the work by Day Labor.

BUNGALOW—1 1/2 story and base, frame, \$2,500. Oak and Cal. Architect, Olin S. Groves, 2911 Telegraph avenue, Berkeley. Owner, Mrs. Reynolds. The house will be erected on Kales avenue and will contain five rooms and bath. A private garage will also be erected on the lot. Interior finish will be of pine and redwood, with some hardwood floors. There will be furnace heat and open fire place. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$1,500. Oakland, Cal. Architect, George Anderson, 6036 Laxton avenue, Oakland. Owner, T. Anderson. The dwelling will be erected on Laxton avenue and will contain eight rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. The floors of the kitchen and bath will be covered with cement plaster on metal lath. Plans are in the hands of the owner and work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—1 story and base, frame, \$3,500. Berkeley, Cal. Architect, Charles H. Miller, Foxcroft Bldg. S. F. Owner, W. C. Cooper. The dwelling is designed for a seven room house and will be erected in Mount Airy Heights. Interior finish will be of pine and redwood and white oak. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

BUNGALOW—1 1/2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, H. C. Peake. The house will be erected on Fresno street and will contain eight rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire place in the living room and a tile or rock mantel. The bathroom will have a tile wainscot. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with shingles.

shingles and rustle. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—2 story and base, frame, \$7,500. Berkeley, Alameda Co., Cal. Architect, J. W. Planchok, 1424 Spring street, Berkeley. Owner, Dr. J. H. Wood. The building will be erected on Russell street at the corner of Hillbloss and has been designed to contain four suites of three rooms and bath each. Interior will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be a central heating system, probably furnace heat. Each living room will have an open fire place and tile mantel. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS—2 story and base, frame. Cost not stated. Architect, John Carson, Bacon Bldg., Oakland. Owner, A. C. Brill. The building has been designed to contain four modern flats and will be erected on Filbert street south of 12th street. Interior finish will be of pine and redwood with some veneer hardwood. Oak floors will be used in the living rooms. There will be open fire places and tile mantels. Tile will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HOTEL—7 story and base, brick and steel, \$10,000. Oakland, Cal. Architect, Henry H. Meyers, Kaul Bldg., S. F. Owners, Friedman Realty Co. The building will be erected at the southwest corner of Clay and 16th streets covering an area of 60 by 100 feet. There will be stores on the first floor besides a large hotel lobby and office. Upper floors will be arranged for a large number of hotel rooms and baths. There will be a complete steel frame, exterior walls of brick, faced with pressed brick and terra cotta. Floors and interior partitions will be of fireproof construction. Interior will be finished in pine and hardwoods. Plans provide for steam heat, elevator service, hot and cold running water in all rooms and a vacuum cleaning system. Metal window sash and frames will be used. All bath rooms will have composition floors and tile wainscot. Plans are complete and figures are now being taken.

UNIVERSITY WORK—Department addition and tank, reinforced concrete construction. Cost not stated. Berkeley, Alameda Co., Cal. Architect's name not given. Owners, University of California. The Regents of the University of California have voted \$25,000 to be spent in addition to the Women's Gymnasium, also a building to house the department of drawing and design, estimated cost not stated, and an outdoor swimming pool for women. The latter will be 10x70 feet and of reinforced concrete. Further mention of this work will be made when plans are completed and figures called for.

SHED—2 story and base, Class A construction, \$150,000. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. This opened for this work have been taken under advisement by the

Board of Education. Seven alternate propositions were considered. A complete list of the figures appears under the heading of Oakland and Alameda County in this issue.

Contracts Awarded.

BUNGALOW—1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, Mr. Gettiney. Contractor, L. J. Delbel, Berkeley. Contract price not stated.

Bids On Durant School, Oakland.

Bids For General Construction Opened With Seven Alternates. No Contract Awarded.

Four sets of bids were opened by the Oakland Board of Education on Monday night for the construction of the two-story Durant School, which is to be erected from plans by Architect J. J. Donovan. Bids were submitted with seven alternates. The first figure is for a Class "A" building. Alternates (a) making construction Class "C"; (b) omit 28 foot wings; (c) substituting Oregon pine floors in Class "A" building; (d) substituting Oregon pine floors in Class "C" building; (e) substituting Oregon pine mill work for oak in corridors; (f) substituting composition blackboards for slate in Class "A" building; (g) substituting composition blackboards for slate in Class "C" building.

The following is a complete list of all bids received. No action was taken on the award at last night's meeting:

General Construction Durant School.

Williams Bros. & Henderson, \$184,780

(a) \$169,340; (b) \$26,300; (c) \$2,300; (d) \$968; (e) \$2,657; (f) \$1,200; (g) \$1,200.

Burt T. Ownley, \$166,310; (a) \$151,261; (b) \$23,631; (c) \$1,500; (d) \$1,950; (e) \$2,100; (f) \$800; (g) \$900.

Van Sant-Houghton Co. \$169,211; (a) \$149,551; (b) \$22,865; (c) \$1,300; (d) \$1,500; (e) \$1,838; (f) \$500; (g) \$600.

Christenson Bros., \$184,872; (a) \$138,192; (b) \$24,967; (c) \$2,600; (d) \$2,700; (e) \$2,450; (f) \$900; (g) \$900.

2526 Park avenue, Sacramento, 2-story
and base frame dwellings, \$2,700 each,
and Frank P. Williams, 3117 71/2 ave-
nue, Sacramento, 2 story frame resi-
dence flats, \$6,500.

APARTMENT HOUSE—2 story and
base, frame, \$2,500. Stockton, San Joa-
quin Co., Cal. Architect, Ralph P. Mor-
rell, Odd Fellows' Bldg., Stockton.
Owner's name withheld. The building
will contain three suites of four rooms
and bath. Interior will be finished in
pine throughout. All suites will have
wall beds. Hot water will be supplied
in all rooms. Exterior of the building
will be covered with rustic and shap-
lap. Plans are complete and figures are
being taken.

PACKING PLANT—3 story and base,
reinforced concrete. Cost not stated.
Sacramento, Cal. Architects, Seader
& Hoen, Forum Bldg., Sacramento.
Owners, Swanston Packing Co. This
work was mentioned here some time
ago when plans were first started. The
building will be erected in the Higgins
Grant and has been designed for one
of the most modern packing plants in
the west. Construction will be fire-
proof throughout with exterior walls,
floors and roof slabs of reinforced con-
crete. There will be metal window
sash and frames. Special machinery
will be used. Office portion of the build-
ing will be finished in pine and hard-
wood. Exterior will be faced with ce-
ment plaster. Plans are complete and
figures will be called for at once.

STORES AND LOTS—3 story and
base, brick and steel, \$25,000. Stockton,
San Joaquin Co., Cal. Architect's name
not given. Owner, Peter Morreno, 26
South Center street, Stockton. The
building will be erected on Lots 15 and
16, Block 29, and has been designed for
stores on the first floor and lofts above.
Interior will be finished in pine
throughout. There will be metal win-
dow sash and frames. An automatic
sprinkler system will be installed. Ex-
terior of the building will be faced
with pressed brick. Plans are com-
plete and in the hands of the owner
who will do the work by Day Labor.
All materials are now being purchased.

RESIDENCE—1 and 2 story and base,
frame. Cost not stated. Stockton, San
Joaquin Co., Cal. Architect, none. The
following Day Labor jobs are reported
as about to be started in Stockton: W.
J. Nutter, 113 East Acadia street, Stock-
ton, 1 story and base, frame dwelling,
\$2,500; B. Cassidy, 816 East Washing-
ton, Stockton, 1 story frame dwelling,
\$1,000; Mrs. M. L. Rule, 1221 East Cham-

nel street, Stockton, 1 story frame
dwelling, \$2,881, and H. W. Johnson,
423 Mariposa street, Stockton, 1 story
and base, frame dwelling, \$1,900.

LOS ANGELES AND SOUTH-ERN CALIFORNIA.

STORES AND LOFTS—6 story and
base, Class C construction. Cost not
stated. Los Angeles, Cal. Architect,
Harold Cross, Consolidated Realty
Bldg., L. A. Owners, Lyon, McKinney
and Smith. The building will be erected
on South Hill street and will have
a frontage of 60 feet by a depth of 150
feet. Considerable structural steel
will be used. Interior finish will be
of pine throughout. Plans provide for
two elevators, one passenger and one
freight, an automatic sprinkler system,
metal window sash and frames, fire-
proof doors and a vacuum cleaning sys-
tem. Stores will have patent fronts
and plate glass windows. Marble
wainscot will be used. Exterior of the
building will be faced with pressed
brick with the inserts. Plans are com-
plete and figures are being taken.

SCHOOL BUILDINGS—2 story and
base, brick and steel \$75,000. Glendale,
Los Angeles Co., Cal. Architect,
Norman F. Marsh, Broadway Central
Bldg., L. A. Owners, Glendale School
District. One of these buildings has
been designed for a manual training
school and the other for a domestic
science building. Architectural design
and construction will be similar to the
present buildings, with pressed and
sandstone brick facing, and artificial
stone trim. Interior finish will be of
pine with maple floors. There will be
a modern system of heating and ven-
tilation. Program clocks and vacuum
cleaning system will be installed. Plans
for the work are now being prepared.
Bids will be called in the course of two
or three weeks.

SCHOOLS—4 2-story and base, brick.
Cost not stated. Long Beach, Los An-
geles Co., Cal. Architect, A. Burnside
Sturges, Story Bldg., L. A. Owners,
Long Beach School District. The Board
of Education of the Long Beach City
School District will receive bids up to
7:30 p. m. of Thursday, November 19,
1913 for the erection of four brick
school buildings in the city of Long
Beach. The buildings are designated
and will be located as follows: No. 1
at the corner of Odessa avenue and
Ellet street; No. 2 at the corner of East
Fourth street and Termino avenue, No.
3 at the corner of State street and Temple
avenue, and No. 4 at the corner of
Alhambra avenue and 11th street. Separate
bids will be taken on the general
contract, plumbing, electric wiring and
heating and ventilating. All contract-
ors will be required to submit a lump
sum bid for their work on buildings
Nos. 1, 2 and 3, and also a separate bid
for each building individually. The
bids for building No. 4 are to be sub-
mitted separately. A certified check
for five per cent is required. Bids
must be submitted in accordance with
the terms of the official proposal.

CLUB HOUSE—3 story and base,
brick. Cost not stated. Los Angeles,
Cal. Architects, Hunt and Barnes,
Lafayette Bldg., L. A. Owners, Auto-
mobile Club of Southern California.
The building will be erected on Figueroa
street south of Pico and will be de-
signed in the classic style. Interior
will be of a large size for large social
rooms, library, ball room and banquet hall.
Exterior finish will be of pine and hard-
wood. Hardwood floors will be used

throughout. There will be steam heat
and large open fire places. Mantels
will be of brick and tile. Elevator
service and dumb waiters are speci-
fied. Exterior of the building will be
faced with pressed brick. Plans are
now being prepared.

LODGE HALL—2 story and base, re-
inforced concrete. Cost not stated.
Fillmore, Ventura Co., Cal. Architect,
Homer Glidden, Wright and Callender
Bldg., L. A. Owners, Masonic Temple
Association of Fillmore. The building
will be erected on Central avenue hav-
ing a frontage of 50 feet. There will
be stores on the first floor and upper
floors will be arranged for lodge rooms
offices and a large auditorium. Interior
will be finished in pine and hardwood.
Maple floor will be used in the audi-
torium. Furnace heat is specified. Ex-
terior of the building will be faced
with cement plaster. Plans are now
being prepared.

HOSPITAL—5 story and base, re-
inforced concrete, \$100,000. Los Angeles,
Cal. Architects, Garrett and Farrell,
Currier Bldg., L. A. Owners, Metho-
dist Hospital Association. The build-
ing will be erected on South Hope
street near Jefferson. The work has
been mentioned here before. The first
floor will contain an office, directors'
room, ward, eight private rooms, baths,
toilets, and a sun room and the two
upper stories will each contain eleven
private rooms, general ward, diet
kitchen, toilets and bath rooms. The
fifth floor will contain three operating
rooms, sterilizing room and special
surgical departments. The basement
will be occupied by a dining room,
kitchen, pantry, laboratory, laundry
and refrigerating rooms; and the cellar
will contain the furnace rooms and
storage department. There will be tile
and marble entrance, tile floors in cor-
ridors and bathrooms, 1 freight and 1
passenger elevator, plate glass, steam
heat and vacuum cleaning system. Ex-
terior of the building will be faced
with cement plaster. Plans are com-
plete and figures are being taken.

HOTEL—6 story and base, re-
inforced concrete, \$150,000. San Diego,
Cal. Architect, H. M. Patterson, O. T.
Johnson Bldg., L. A. Owner, Dr. Fred
Stauffer, Salt Lake City. Construction
will be of reinforced concrete through-
out, walls, floors and roof slabs. In-
terior partitions will be of hollow tile.
Entire first floor will be divided to
the main office, lobby, public dining
room and patios. Upper floors will
contain in the neighborhood of 135
guest rooms and 68 baths. A large
restaurant will be located in the base-
ment. Interior finish will be of pine,
hardwood and white enamel. There
will be steam heat, elevator service, a
vacuum cleaning system and mail
chutes. Bath rooms will have tile
floors and wainscot. Exterior of the
building will be faced with cement
plaster. Metal window sash and
frames are specified. Plans are now
nearly complete.

HOTEL—1 story and base, brick and
steel. Cost not stated. Los Angeles,
Cal. Architects, Morgan, Walls & Mor-
gan, Van Nuys Bldg., L. A. Owner,
Victor Pontet. The building will be
erected at the northeast corner of Pico
and Hope streets, covering a large
area. There will be six stories besides
the hotel lobby on the first floor. Upper
floors will contain 120 rooms and a

number of public and private baths. Interior finish will be of pine and hardwood. Bath rooms will have composition floors and tile wainscot. There will be steam heat, elevator service, a hot water supply and vacuum cleaning system. Metal window sash and frames will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOTEL—4 story and base, brick and steel, \$30,000. Los Angeles, Cal. Architect, George F. Costersman, California Bldg., L. A. Owner, Charles E. Murray. The building will be erected on Olive street near 8th and will contain a number of stores on the first floor. The structure will cover an area of 60 by 165 feet with a wing 60 by 70 feet. Upper floors will be arranged for a total of 120 guest rooms, about fifty per cent of which will have private baths. Interior finish will be of pine and hardwood veneer. Some oak and tile floors will be used. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Metal window sash and frames and patent store fronts are specified. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick and artificial stone trim. Plans are now being prepared.

WAREHOUSE ADDITION—4 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Lyon Fireproof Storage Co. The building will be erected on property adjoining the company's present building on Vermont avenue near Washington street and will cover an area of 50 by 145 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior will be finished in pine and metal trim. There will be elevator service and steam heat. Metal window sash and frames and fireproof doors are specified. An automatic sprinkler system will be installed. Exterior of the building will be faced with cement plaster. Plans are now

being prepared.

MAUSOLEUM—1 story reinforced concrete, \$30,000. Anaheim, Orange Co., Cal. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owners, Pacific Mausoleum Co., 262½ East Center street, Anaheim. Plans and specifications may be obtained either at the office of the company or the architect. Bids must be submitted to the secretary, C. O. Culp, at the company's office at Anaheim by Saturday, Nov. 1, 1913. The building will be reinforced concrete with marble trim, will contain 300 crypts. Design is in the classic style.

SEATTLE AND WASHINGTON.

Contracts Awarded.

THEATRE—2 story and base, reinforced concrete, \$150,000. Seattle, Wash. Architect, A. Warren Miller, Arcade Bldg., Seattle. Owners, Alaska Theatre Co. Contractor, S. G. Coombs, Arcade Bldg., Seattle. Contract price, \$150,000. Note—Subfigures are now being taken on all parts of the work.

Completion Notices.

Veneered Panels of
unexcelled quality—
Sold only at

White Brothers

5th and Brannan Streets

San Francisco

Protect Yourself against substitutions.

There is but one panel that is absolutely guaranteed to stand the test of time---that's the Wybro panel.

Be sure you **insist** upon getting the Wybro pane's---don't accept any "just as good" substitutions, for there are none to equal the Wybro in point of quality and finish

PROFESSORSHIP IN CIVIC DESIGN.

Announcement is made of the estab-
lishment of the first chair of city
planning in an American university.
The pioneer is the University of Illinois.
Following the English precedent,
it is called the chair of Civic Design.
The incumbent is to be Charles Mel-
ford Robinson. This action of the trustees
follows instruction which was
given by Mr Robinson during three
brief visits in the last academic year,
to a group of seniors in the division of
Landscape Gardening of the College of
Agriculture. Mr Robinson, while taking
charge of the course will be in
residence for only brief periods, the
arrangement leaving him free to continue
his professional city planning work.
Harvard and the University of Michi-
gan have for some years given city
planning courses in their departments
of Landscape Architecture, but the in-
struction has been wholly by the
teachers in those departments. Colum-
bia has had an outside lecturer on city
planning. Wisconsin and Cornell have
recognized the subject, though making
it accidental to other instruction. The
University of California is said to be
contemplating the institution of such
a course. Illinois, however, is the first
university to create a distinct profes-
sorship in it. The action is largely due
to the progressiveness of Ralph Rob-
bles Root, a graduate of the Cornell and
Harvard courses, who assumed charge
of the Landscape Gardening division at
Illinois last Fall. As is little known,
the Illinois division of Landscape Gar-
dening is probably the oldest in the
United States, it having been offered
there forty-five years ago. In the
summer of students enrolled at its one

of the largest, if not the largest, in the
United States.—Architectural Record.

CONCRETE STOCKTON STREET TUNNEL.

Best Concrete Mixing Plant Ever Installed in San Francisco is now at Work.

The Tunnel now under construction,
along Stockton street from Sutter
to Sacramento streets in San Francisco,
is to be lined with concrete by a process
which is a new one on the Pacific
Coast.

A large stationary concrete mixing
plant has been installed by the con-
tractors, The Jacobson-Bade Company,
and K. C. Lundstrom, an overhead bin
being provided for the concrete aggregates
so arranged that two men can attend
the feed of the concrete mixer, which
is a No. 7 Foote Batch mixer,
electrically driven, and is the largest
concrete mixer ever used in San Fran-
cisco.

After the concrete is mixed it is dis-
tributed into a concrete blower, and
the concrete is conveyed under pres-
sured compressed air through the
pipes to the point where it is to be
used.

The Foote concrete mixer was sold
by the Edward R. Bacon Company, who
now maintain sales offices in both San
Francisco and Los Angeles, and is in
position to give complete information
concerning this new method of
mixing and placing concrete.

"UNWRITTEN LAW."

A weak and foolish woman in San
Francisco is not a weak and foolish man
and in case of the "unwritten law"
a weak woman may kill her "etrayer".
As has been illustrated once more the abso-
lutely invariable anomaly of this un-
written law. The "etrayer" was shot,
and the woman is betrayed, but for the cessat-
ion of grief. There are no exceptions
to the rule—not one. No woman ever
killed a man for leading her astray.
No woman kills a man with whom she
has had illicit relations, the
relationship always the same. The man
is deceived, or threatened, or seized,
or seduced. This statement is ab-
solute and universal, and there are no
exceptions to it. Therefore if the un-
written law has any validity at all,
the unwritten law—if a man wrongs a
woman he shall continue in that
wrong until if he ever ceases it, she is
justified in shooting him. Stated in
other words would the "law" have any
validity? Yet, in its actual applica-
tion, it is the only thing it ever
did do.—The No Republican

STOCKTON BACKS RICHMOND HAR- BOR.

STOCKTON, October 21.—The City
Council this morning adopted resolu-
tions approving the harbor plan of the
city of Richmond, and a copy of the
plan will be forwarded to the
Council of the Contra Costa city. Fol-
lowing are the resolutions:
Resolved, By the Mayor and the
City Council of the city of Stockton,
California, that the construction of the proposed
harbor at Richmond will be of great
benefit to the San Joaquin Valley and
the cities of Stockton and other cities

throughout the valleys, and that construction of said harbor will be an important factor in our permanent development; and be it

"Resolved, That we hereby petition the rivers and harbors engineers in Washington to give their approval to said Richmond harbor, as asked by the citizens there, not only for the benefit of the city of Richmond and the San Francisco bay region in general, but for that of the interior sections of the State tributary to the proposed harbor."

PIONEER LUMBERMAN DEAD.

DUNSMUIR (Siskiyon Co.), October 23.—Ole Nelson, pioneer and retired lumberman, who died at the home of his daughter, Mrs. A. E. Culver, Tuesday, was a native of Sweden, aged 76 years. He settled fifty years ago in Nevada County, where he was married to Miss Annie Robinson. He came to Dunsmuir when the railroad was being built through the canyon, and operated three sawmills at one time between Sisson and Dunsmuir.

POTASH INVESTIGATIONS.

"Potash in Western Saline Deposits" is the title of a report by James H. Hance, of the United States Geological Survey, just issued. The examination of the various saline lakes, marshes, flats, and wells described in the report were made in connection with the broad line of search which the Geological Survey is making throughout the West in quest of commercial potash deposits. While none of the

localities in question are shown to be promising as possessing potash in sufficient quantities to warrant development, the descriptions and analyses are published by the Survey as a contribution to the general subject. A copy of the report (Bulletin 540-P) may be obtained on application to the Director of the Geological Survey, Washington, D. C.

MAKING DAYLIGHT ARTIFICIALLY.

Various cabinets, lamps and lights to produce daylight have been manufactured, but none has stood the test. In this latest invention a cabinet is employed. The cabinet is constructed in various sizes, but the one which is most convenient is eighteen inches deep, thirty inches wide and twenty-eight inches high.

An incandescent gas light is placed at the top of the cabinet. There is a metal reflector to throw the light downward through the delicate screens which filter out the rays of red, orange and yellow, which are foreign to daylight except in a small way. In other words, the screens extract from the light excesses of these colors.

The invention has a great field of usefulness in surgery and certain industries. Surgeons depend upon the color of the tissues to tell whether they are diseased or not. A great deal of surgery is done at night. In artificial light the tissues have not their true color. The invention will remedy that, in that operations may be performed by aid of daylight at any hour of the night.

In textile manufacturing, dyeing and

color printing, for instance, the presses can be run only so long as the ink put in by daylight lasts. With the aid of the invention presses can be run all night. In the sorting of cigars it is impossible to tell their color by artificial light. Likewise in dental work, the exact color of artificial teeth cannot be determined at night. In paper manufacturing and in the manufacture of flour, daylight is needed to differentiate the various grades.

This invention can be made in various forms to be used for different purposes. For instance, it can be used to light a small room or closet. It can be used to illuminate a printed page, or for any other purpose where a perfect light is desired in the household. The inventor's dining-room table is illuminated by this artificial daylight.—Arthur St. George Joyce in Technical World Magazine

FINANCIAL STATEMENT OF THE EXPOSITION.

Up to and inclusive of August 31, 1913, the cash receipts of the Panama-Pacific International Exposition Company amounted to more than \$6,000,000. The expenses to that date amounted to less than \$5,000,000, and investment expenditures to \$167,581.16, leaving a cash balance on hand of \$1,279,261.61. The actual present available assets to the exposition company aggregate \$11,978,811.50. It will require about \$12,000,000 more to complete the work, and the actual net assets amount to this, without considering the sums to be derived from concessionaires, interest on money in bank and receipts from divers pre-exposition operations.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Longitudinal Section of Self-Sentering. Actual Size.

Concrete Floors

can be built without form work

if you make use of the new form of expanded metal which is a centering and reinforcing combined.

Self-Sentering is a material perfected after years of study and experiment in reinforced concrete construction. It consists of a series of heavy, cold-drawn ribs connected with the most efficient form of expanded metal.

Self-Sentering is adaptable to practically every type of concrete construction. It affords

the simplest and most economical method of building concrete, floors, roofs, ceilings, side walls, and partitions. It is adaptable for both flat and curved construction. It can be used for roofs of any type, as it supplies a bond which will hold the concrete until set on any inclined surface.

Write for our Fireproofing Handbook on low cost fireproof construction with Self-Sentering. We shall be glad to send you a complimentary copy on request. Write today.

Editorial Comment.

Government aid in the form of weather reports issued daily from the different stations throughout the country is of vast importance to the country. Meteorological records are regularly kept and the climatic changes are becoming more and more definitely described. Thus barometric pressures are constantly reported and winds and storms are predicted with a reasonable degree of assurance. And now that wireless reports are received from stations and ships at sea the records are becoming more and more complete and increasing value to seamen. For the Atlantic Coast Wireless Weather Reports for Marines, issued by the United States Weather Bureau, are now distributed broadcast every evening shortly after 10 o'clock by the Naval radio stations at Radio (Arlington), Va., and Key West, Fla. The report consists of two parts; the first giving in a simple figure code the barometric pressure, wind-direction, and wind-force (on the Beaufort scale) prevailing at 8 o'clock the same evening at Sydney (N. S.), Nantucket, Atlantic City, Cape Hatteras, Charleston, Key West, Pensacola, and Bermuda; the second giving, in words, a forecast of the probable winds for the next two days over specified sections of the Atlantic and Gulf of Mexico, extending about a hundred miles offshore, and warnings of severe storms as occasion may arise.

That the filaments in electric-light bulbs may be broken by dusting the bulbs with a feather duster has been discovered by a series of tests conducted for the purpose of determining the cause of the short life of incandescent lamps furnished to an eastern school. The reason for the breakage was ascertained by putting a number of new lamps in circuit and after brushing them with a feather duster, turning on the current, when several of the filaments immediately broke. In another set of lamps wiped with a cloth, instead of the duster, there was no breakage, indicating that the trouble was due to the action of static electricity produced by the feathers rubbing on the glass bulbs.

Sixteen-inch Gun To Be Mounted.

The experimental 16 inch, coast-defense gun, which was built a dozen years ago at the Watervliet Arsenal, is no longer a "white elephant" at the Sandy Hook Proving Ground, to which it was sent for test. The gun stood its trials satisfactorily; but because big guns such as this went out of favor and were displaced by high-velocity, 12 inch guns, the big piece has lain for a decade at Sandy Hook. A disappearing

gun carriage, however, is now being built to carry the piece, and it will form part of the battery of the defenses of the Panama Canal.—Scientific American.

The San Francisco Chronicle has published a Pan American edition in which it prints an account of the resources and developments of the industries of the South American republics.

Publicity for this part of the world is opportune. South America is the land of future opportunity. A country of vast and unknown resources it has scarcely been touched. A country that contains the highest mountains, the largest rivers and the greatest forests on the western hemisphere it supports but a small population.

These countries produce many and varied products. The high mountains of the Andes present the products of all climates under the Equator. The vast forests of the Amazon produce rubber and all kinds of hardwoods. The grazing fields of the southern portion are the cattle ranges for the world's beef and leather supply and the high mountains of the Pacific shores have great stores of mineral wealth.

South America is a great field for future development. The great agricultural countries of South America are on the Atlantic shores. The Panama canal will shorten our distance to these by one-half.

Further development means future trade with these countries. The years to come in the near future should witness as much development in the Pan American republic as in any place in the world.

A weekly paper is being published in New York by the Polyglot Publishing Company entitled "Below The Rio Grande." It is devoted to the interests of Huerta and his regime in Mexico. Whatever interest is behind the publication does not appear, but inasmuch as oil is the privileged industry down there is seems safe to infer that such a journal published in the United States must have some interested industry to back it.

Indirection is ever the method of special privilege. If Great Britain should interfere on behalf of the oil interests in Mexico it would be done in the name of humanity and progress.

Undoubtedly the oil interests in Mexico should be protected just as every other interest should be protected. But they should be protected in their own right and only so far as they are entitled. No combination of politicians or financing the enterprise of some political adventurer for the sake of favors should be countenanced. The time has come when the public should be dealt with frankly. Any one having interests to protect should publicly state his grounds for asking protection.

Sanitation In The City.

The Science of Sanitary Conditions and of Preserving Health in the "Crowded" Places—Disposal of Sewage by Economical Means

By Geo. Fordyce.

Sanitation is the science of sanitary conditions and of preserving health, synonymous with hygiene. The word sanitation is, however, usually restricted to the methods and apparatus for making and maintaining houses in a healthy condition.

It is by no means a modern science traces of it having been found in the oldest remains of habitations and cities.

In the prehistoric era, man, or as we now call them, savages, lived in a natural state, i.e., without the aid of any elaborate devices for sheltering himself from the elements, and did not congregate together in large numbers. In conditions such as these nature performed all the sanitation necessary, without scientific aid. When, however, man departed from the natural state and congregated together, forming habitations and cities, nature obviously could not cope with these unnatural conditions without the scientific aid of man. Thus sanitation became a necessity, nature still performing her work, but not without the aid of man.

Among the ancients, the Romans brought sanitation to the highest degree of perfection, as is shown by the remains of baths, aqueducts and sewers built by them, some of the latter being still in use, having been used continuously since being built over two thousand years ago.

Reverting back to the usual interpretation of the word sanitation, being the making and maintaining of houses in a sanitary or healthy condition, the three main factors necessary to make and maintain houses in the above condition are ventilation, water supplied and drainage.

Ventilation consists in supplying fresh pure air, warmed or cooled to a comfortable temperature, to drive out that which has become vitiated or used up. Ventilation may be broadly classified as natural or mechanical, the former being usually sufficient in private dwellings, houses and other small buildings, the latter having to be resorted to in the case of large public buildings, factories, etc.

Natural ventilation may be considered as that produced without mechanical power for the admission and exit of air. Buildings of ordinary construction receive some ventilation whenever the temperature inside is different from that of the surrounding air. Further ventilation is afforded by indirect or direct-indirect radiators, fireplaces, open windows, etc. Whenever air is introduced into a room as by indirect heating an equal amount of air must be driven out, or if the air is drawn from a room as by a fireplace or other hot air line an equal amount of air must enter the room, thus causing ventilation.

Mechanical ventilation, rendered necessary when a large number of people are congregated together in a comparatively small cubic space, requires power for the admission and expulsion of air. The power or mov-

ing air is usually by a fan operated by mechanical means, and may be effectual in two ways, first by the Plenum system, in which the air is forced into the room at the proper temperature, second by the Vacuum system in which the vitiated air is exhausted from the room.

The amount of air required for ventilation varies according to the nature of the room ventilated; churches, theatres, etc., requiring about 2,500 cubic feet per sitting per hour, hospitals requiring about 5,000 cubic feet per bed per hour, and factories where dust is very prevalent should not exceed five feet per second else a perceptible draught will be felt.

In order to preserve the health of the inhabitants of dwellings an ample supply of good water is essential both for drinking and cleansing purposes.

In up-to-date cities a continuous supply of water at all hours is available. This elaborate system of water distribution was of humble origin, from distribution by water carriers from natural sources on to an intermittent supply by means of pipes to cisterns and so on to the present system of continuous supply.

Where necessary water is purified by being passed through filter beds, then conveyed to reservoirs, preferably covered ones, and from thence distributed to the various points by means of aqueducts and pipes, materials used in the construction of reservoirs, aqueducts, cisterns and pipes ought to be of such a nature that there is no danger of the water being contaminated by contact therewith. The pipes used for the distribution of water throughout dwellings are usually of galvanized iron or lead, the latter being suitable in most cases except where the water is of such a nature that it is contaminated by contact with lead, causing lead poisoning to those who drink it. In such cases galvanized iron, or tin-lined lead pipes may be used.

In the case of isolated buildings a private supply is necessary and where a well is dug or bored great care ought to be taken that there is no danger of contamination of the water in the well owing to infiltration from drains or cesspools. Connections from supply pipes to baths, wash basins, etc., may be made direct, but in the case of connections to water closets, slop sinks, etc., intervention is necessary by means of small independent cisterns, rendered necessary both for flushing purposes and to remove the danger of contamination from soil in the basin. The amount of water necessary for household purposes is about twenty-five gallons per day for each person, varying to some extent owing to the climatic conditions of the country.

Drainage or to make dry is the drawing off of water by rivers or other channels, but in connection with dwelling houses is usually taken to mean the method and apparatus for removing excreta and waste water.

All apparatus in connection with drainage ought to be constructed in as simple a manner as possible without destroying efficiency and should be as far as possible self-cleansing. All corners and crevices where dirt would have a tendency to collect ought if possible to be avoided, where unavoidable, as in the case of traps should be accessible for cleansing purposes. In no case should the waste or soil from fittings discharge into pipes or drains without the interception of a trap, which trap to have ample water seal, and where there is any danger of it being syphoned to be back ventilated. All pipes and drains for the carrying off of the discharge from the various fittings ought to be constructed in such a manner that they can be thoroughly water and air flushed. In dwellings of ordinary size the former is accomplished by the discharge, which is largely composed of water, from the various fittings. In large buildings and city drainage systems it is in many cases necessary, however, to provide flushing tanks, preferably automatic, at the extremity or extremities of the drainage system to accomplish efficient flushing of the drains.

A house drain before it enters a street drain or sewer is sometimes trapped near the sewer, and immediately on the side of the trap next the house is a fresh air inlet taken from near the ground level, and at the extremity or extremities of the drain a pipe or pipes with open ends to be carried above all windows or other openings, thus providing a foul air outlet from the drains, and in conjunction with the fresh air inlet thoroughly air flushing the drainage system. The system of connecting the sewer without a trap is preferable to above provided fixtures are efficiently trapped.

Where the ground is of a wet nature provision ought to be made for draining same in the vicinity of dwellings, usually accomplished by means of open the drains discharging into soil drain through a trap. It is also necessary so as to ensure the health of the inhabitants to prevent the rising and penetrating of water into walls by means of damp proof courses and preferably to lay some over the whole area of the building.

The sewage from cities and isolated buildings where it cannot be got rid of by being discharged into the sea or other large volume of water where there is no danger of pollution to same, ought to be treated by being passed through a vessel called a septic tank, where the sewage undergoes various natural processes of fermentation, putrefaction and purification and thereafter through filter beds, thus rendering the effluent harmless.

Sunlight being a great disinfectant and impartor of health, ample provision should be made for its admission to dwellings; bedrooms especially ought to have a sunny aspect.

In the perfect city and dwelling, from a sanitary point of view, disease

could not be contracted by contamination or infection, but as perfection is unattainable disease occurs and then sanitation comes into play to combat and suppress it.

Hospitals ought above all things to be thoroughly sanitary and constructed in such a manner that every part thereof can be thoroughly cleansed, all corners, crevices, etc., where dirt and material of infectious nature could accumulate to be avoided. Hospitals for infectious diseases should be isolated from all other dwellings and the various infectious diseases isolated from each other, preferably by being treated in separate and isolated buildings.

In cities there is a large amount of garbage and waste material which cannot be discharged into sewers and must be got rid of by other means. In some cases there are places where rubbish is allowed to be deposited, this method of getting rid of it, or rather not getting rid of it, is unsatisfactory, as an accumulation of garbage breeds disease in many forms. The most satisfactory way of dealing with garbage is by having it burned in a refuse destructor, or as is done in some cases, by having it carried out to sea and deposited there.

Sanitation in every way ought to be of vital interest to mankind, aiming as it does at the prevention of disease in every form, and not only does it promote bodily health, but also mental health, which is the outcome of a healthy body.

INTERESTING CEMENT TEST.

Description of the Engineering Features
Fireproof Warehouse on
Heatty Street, Vancouver, B. C., for the National Drug Company of Canada, Ltd.

General Description of Building.
This building will be one of the most modern and best equipped warehouse drug warehouses on the continent. It has two freight elevators which serve every floor, each having a capacity of 5000 lbs. and a speed of 50 ft. per minute, and a dumb waiter for small articles up to 100 lbs. in weight with a speed of 100 ft. per minute. A freight chute which will deliver goods weighing 200 lbs. in weight from any floor in the basement, where they will be packed and after which they are placed in a chute and delivered to the sub-basement for shipment. This chute is so arranged that city and country orders are quite distinct and thus minimize labor.

A Lumpsom Pneumatic tube system will carry the orders from the office to the various floors.

From the top floor to the sub-basement is a rubbish chute, which will deliver all rubbish to the sub-basement for burning.

There will also be an intercommunicating telephone system.

Every precaution against fire will be taken. A complete sprinkler system is being installed throughout with a tank of 25,000 gallons capacity on the roof, four fire hydrants on each floor and a dry main at the rear of the building.

All the shelving has been designed

to suit the requirements of the various articles.

The offices will be located on the ground floor, and a special feature here will be the customers' room and the sample rooms. The offices, customers' and sample rooms will be finished in quarter cut oak.

The sample room will occupy a space of 66 ft. x 33 ft., and will be fitted with 400 feet of wall and show cases.

Electricity will be used for light and power, and gas will be installed in the laboratory for boiling, etc.

This building is designed to be of absolutely fireproof construction. The floors, columns, outside walls, stairs and stair enclosures are of reinforced concrete. The interior partitions are of hollow tile and brick.

The elevator shafts are enclosed by brick walls. All elevator and stair openings are protected by fireproof doors, arranged to close automatically in case of fire.

The building on plan 120 ft. x 100 ft. is divided into six bays by five rows of interior columns, the inner spans being 16 ft. 2 in., the two outside bays having a width of 17 ft. 8 in. from center of columns to face of outside wall.

The longitudinal spans between the columns are 16 ft. 8 1/2 in., the two end spans being 15 ft. center of column to face of outside wall. Each bay is divided into 21 panels of 5 ft. 8 in. average span by 8 in. x 18 in. beams, which are supported by 12 in. x 24 in. longitudinal girders. The floor slabs are 4 inches thick. The interior columns are octagonal, 26 inches in diameter in the basement, decreasing in size with a decrease of the load carried.

The floors are reinforced with Tri-angle Mesh Reinforcement, the beams, columns and walls with round or square columns and walls with round or square twisted bars. The slabs, beams, and girders are designed to give continuous action at all points; to this is attributed the very small deflections under test. The specifications called for a live load of 200 lbs. per square foot, and a test load of 600 lbs. per square foot. The concrete to be a 1-2-4 mixture with a gravel aggregate.

Some interesting and instructive tests of the slabs, beams and girders have been made in this building. All tests were made with the specified test load of 600 lbs. per square foot, by means of sacks of cement or sand piled on any part of the floor selected by the Architect.

The deflection of the slabs was too small to be measured by the instruments available.

The deflection of the beams was 1-16 inch, or 1-2500 of the clear span.

The deflection of the main girders was 1-16 in., or 1-2500 of the clear span.

The architect's specifications allow a deflection of 1-100 of the span, so that the actual deflections under test can be considered as being highly satisfactory. The concrete had been poured 60 days at the time of testing.

There are several 16 ft. 8 in. square panels in the building with 5 in. concrete slabs reinforced in both directions. Under a test load of 30 tons concentrated at the center of one of the panels, the deflection was only 1-20 of an inch, or 1-3750 of the clear span. The total load on this panel at 300 lbs. per square foot evenly dis-

tributed would be 41 tons. It is apparent that this two-way reinforced panel is excessively strong for the live load for which it was designed. The formula used was: B. M. equals WL squared by 24. From this and other tests that have been made, the French Government rule would seem to give a more correct formula for designing square panels.

The available floor area at the present time is 1 3/5 acres, which can be increased to 2 acres by the addition of two more floors, for which provision has been made in the designing of the columns and footings.

Mr. H. S. Griffith, of Vancouver and Victoria, is the architect for the building.

Mr. Phillip P. Brown, A. M. I. C. E., London Building, Vancouver, is the designing and supervising engineer for the reinforced concrete work.

The general contractors are Geo. Smiler & Brethour, Dominion Building, Vancouver, B. C.

THE COMING OIL AGE.

The oil production of the world in barrels, during 1912 was as follows:

United States	222,113,218
Russia	68,019,208
Mexico	16,558,215
British East Indies	10,845,624
Rumania	12,991,913
Canada	8,535,174
India	7,116,672
Japan	1,671,405
Peru	1,751,143
Germany	995,764
Canada	243,614
Italy	86,286
Other	250,000
Total	351,178,236

We are standing today upon the threshold of "The Age of Oil." How long an epoch it will cover depends partly upon the supply of that fuel and partly upon the extent to which science is able to broaden the sphere of electricity generated from water power, and later, perhaps, from solar power. But while that age endures—he it years or decades or centuries—just as oil will look no rival as a fuel in its own broad sphere, so also need not the nation which has unlimited oil of its own provide only that it makes the best of its opportunities, brook serious danger in working out its economic, industrial and political destinies.—Lewis R. Freeman, in the Review of Reviews.

RAILROADS NEEDED TO DEVELOP GOLD MINING IN ALASKA.

The advances in lode-gold mining development in the Yukon basin of Alaska during 1912 were largely confined to the Fairbanks district, according to A. H. Brooks, of the United States Geological Survey. There was no small lode mine in operation in the Fairbanks district, and a little work was done on lode prospects in the Chitina, Fortymile, and other Yukon districts. Most of these localities of lode occurrence are so isolated that the cost of operation is almost prohibitive. It is only through reducing freight and wagon roads that any advance in the lode-mining industry of Alaska can be brought about. The railroad development in Alaska would result in the opening up of innumerable rich mineral districts.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base frame, \$25,000. Architects, Futch and Knoll, Hearst Bldg., S. F. Owner, Miss D. Loodza. The building will be erected at the southwest corner of Washington and Taylor streets and has been designed to contain 18 suites of two and three rooms. Interior finish will be of pine. Some elm panels will be used in the living rooms and dining rooms. There will be steam heat and a vacuum cleaning system. All suites will have wall beds and private bath rooms. Ornamental plaster will be used in the lobby. Bath rooms will have composition floors and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Marble and tile will be used in the entrance vestibule. Plans are now being revised and bids will be called for shortly.

SAN FRANCISCO—Apartment, 2 story and base, frame, painting only. Cost not stated. Architect, none. Owner, A. Benzinzer, south side of Green street, near Montgomery, S. F. The owner is now taking figures on painting, interior and exterior, of the building now in the course of construction. There are twelve suites of two and three rooms. Mr. Benzinzer will be found at the building.

SAN FRANCISCO—Apartment house, 2 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Sarah Norton. This building will be erected on the north side of Hayes street west of Webster. The first floor will contain the residence of the owner and will be arranged for eight rooms. Upper floors will contain four suites of four rooms each. Interior will be finished in pine with some hardwood panels and imported tapestries in the first floor. All suites will have private bath rooms and wall beds. A central heating system and hot water plant will be installed. Bath rooms will have composition floors and tile wainscot. A large open fire place with tile mantel will be used in the owner's apartments. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic with a brick veneer base. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Apartment house 2 story and base, frame \$20,000. Architect, Olin S. Groce, 291 Telegraph avenue, Berkeley. Owner, Dr. Crawfish. This building is to be erected at the corner of Prince and Ellisworth streets covering a considerable area. Interior has been arranged for 12 suites with connecting baths and wall beds. Interior finish will be of pine and redwood. A central heating system, hot and cold running water and a vacuum cleaning plant will be installed. Bath rooms will have composition floors and tile wainscot. Tile and marble will be used in the entrance vestibule. Exterior of the building will be covered with cement plaster on metal lath. Plans are being

prepared for the work.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$25,000. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, J. H. Morrison. The building will be erected on St. Louis street and will cover an area of 60 by 125 feet. There will be five stores on the first floor and the entrance to the apartments above. Upper two floors will be arranged for 50 rooms, two and three room suites. Interior finish will be of pine and redwood. All suites will have private baths and wall beds. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat, elevator service and a vacuum cleaning system. Patent store fronts will be used in the stores. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared. Work will probably be done by Day Labor under the direction of the architects.

Contracts Awarded.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$11,000. Architect, C. O. Clausen, Pacheco Bldg., S. F. Owner, Morris and Minnie Green. Contractors, Ratto and Giannini, 332 Hartford street, S. F. Contract price, \$11,000.

BANKS.

Contracts Awarded.

BEAVERTON, ORE.—Bank, 2 story and base, brick and steel, \$20,000. Architects, Chussen and Claussen, Macleay Bldg., Portland. Owner, F. W. Cady. Contractor, Bert Houten, Beaverton. Contract price not stated.

BRIDGES AND DAMS.

SALEM, ORE.—Pile and concrete bridge. Cost not stated. Engineer, W. W. Lucius, Portland. Owners, City of Salem. Plans are now being prepared for a bridge 600 feet in length. A portion of this bridge 250 feet will be of reinforced concrete construction and the balance of pine and timber. There will be a 30 foot roadway and two six foot walks, one on each side of the roadway. Plans will be completed in the course of three weeks and bids will then be called for by the City Council. Further mention will be made of this work at that time.

CHURCHES.

WILLITS, MENDOCINO CO., CAL.—Church, 1 story and base, frame, \$10,000. Architect, E. W. Hyde, Willits. Owners, First Baptist Church of Willits. The building will be erected on a corner site and has been designed with a large auditorium and Sunday School rooms. Interior will be finished in pine and redwood. A central heating system, probably furnace heat, will be installed. Some art glass windows will be used. Design is in the Mission style and exterior will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans

for this work are now being prepared. **ONTARIO, SAN BERNARDINO CO., CAL.**—Church, 2 story and base, brick and frame, \$15,000. Architect, Norma F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of Ontario. The building will be designed in the classic style and will contain a main auditorium seating 200 people and Sunday School room also seating 500 people. Besides these rooms plan provide for 14 class rooms, study hall and ladies' parlors. Interior finish will be of pine and redwood. A central heating system will be installed. Ornamental plaster will be used. Exterior of the building will be covered with pressed brick and cement plaster. Plans are being prepared.

Contracts Awarded.

PORTLAND, ORE.—Church, 1 story and base frame, \$10,000. Architect, C. A. Houghtaling and Co., Henry Bldg., Portland. Owners, Blessed Sacrament Parish Church. Contractor, J. F. Donohue, 295 17th street, Portland. Contract price, \$10,000.

FACTORIES & WAREHOUSES.

PORTLAND, ORE.—Creamery, 3 story and base, reinforced concrete, \$30,000. Architects, Emil Schacht and Son, Commonwealth Bldg., Portland. Owners, Townsend Creamery Co. The building is to be erected at the corner of 7th and Everett streets covering an area of 100 feet square. Only the first floor will be of reinforced concrete, upper two stories being of brick and mill construction. The various departments of the creamery will be housed in separate parts of the building. Construction will be fireproof. Much marble and tile will be used. Concrete floors will be used throughout. The estimated cost does not include pasteurizing or cold storage machinery. Separate contracts will be let for the mechanical equipment. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

STEVESTON, B. C.—Packing plant, group of 1 and 2 story concrete and frame buildings, \$200,000. Architect, none. Owners, British Columbia Packers' Association, Steveston, B. C. All buildings will be carried on pile foundations and will have reinforced concrete walls. Other parts of the work will be of frame construction. Three separate contracts will be let, general construction of the buildings, electric work and mechanical equipment. Exterior will be covered with cement plaster and rustic. Plans are complete and in the hands of the owners who are now taking figures on the work.

LOS ANGELES, CAL.—Warehouse 1 story and base, brick and steel, Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owners, Parker Bros. The building will be erected at the corner of Moline and Palmetto streets covering an area of 105 by 120 feet. Considerable structural steel will be used. Interior finish will be of pine. There will be metal lath and plaster interior partitions, metal window sash and frames and fireproof floors. Elevator service and modern lighting and plumbing will be installed. Exterior of the building will be faced with stock brick. Plans are now being prepared.

FLATS.

SAN FRANCISCO—Residential flats, story and base, frame, \$7,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mary Wagner. The building will be erected on the east side of 18th avenue near Lincoln way and has been designed to contain 10 large residential flats of seven rooms each. Interiors will be finished in pine and veneer hardwood. Hardwood floors will be used in all rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. A garage is provided for in the basements. Exterior will be covered with shingles and half timber. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$1,000. Architects, Hutchinson Bros., 470 12th street, Oakland. Owner's name withheld. The building will contain two modern flats of five and six rooms each. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Bath rooms will have tile wainscot and composition floors. A large open fire place will be used in each of the living rooms. Mantels will be of tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

GARAGES.

SAN FRANCISCO—Garage and sales rooms, 2 story and base, reinforced concrete, \$30,000. Architect, O. K. Mayer, Merchants' National Bank Bldg., S. F. Owner, B. Davidson. The building will be erected on the east side of Van Ness avenue north of Jackson street and will have a frontage of 60 feet by a depth of 123 feet. The design is in the classic style. Construction will be practically fireproof. Interior partitions will be of metal lath and plaster. Metal window frames and sash are specified. Interior finish will be of pine and hardwood with tile and marble wainscoting and base. There will be steam heat and a vacuum cleaning system. Patent store fronts and plate glass windows will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Garage and sales rooms, 1 story, base and mezzanine floor. Reinforced concrete, \$25,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Walter Sullivan. This building will be erected on Van Ness avenue near Pine and will have a frontage of 60 feet and a depth of 120 feet. There will be a basement and sub-basement. Entire height of the building is 49 feet. Interior partitions will be of metal lath and plaster. Interior finish will be of pine, hardwoods and tile. Cement floors and metal window sash and frames are specified. Considerable marble and tile work will be used. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

OAKLAND, CAL.—Automobile sales room alterations, Cost not stated. Architect, Chester H. Miller, Foxcroft Bldg., S. F. Owner, Roy E. Fish. The

present building on Broadway will undergo extensive repairs. Included in the work will be new interior finish, pine, hardwood and tile, electric work, plumbing, painting and plastering. Cement floor will be laid. Exterior of the building will also undergo alteration. Plans are being prepared and figures will shortly be taken.

OAKLAND, CAL.—Garage and sales room, 1 story and base, brick and steel. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. This building has been mentioned here before when plans were first started. Working drawings have been completed and figures are being taken. The structure will be erected at the corner of Broadway and Brook street and will have foundations and exterior walls heavy enough to carry an additional story. Interior will be finished in pine and hardwood. Tile and marble wainscoting and base will also be used. A tile floor will be laid. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick.

TILLAMOOK, ORE.—Garage, 1 story and base, steel and reinforced concrete, \$15,000. Architect, E. E. McLaren, Lumber Exchange Bldg., Portland. Owner's name withheld. The building has been designed for a commercial garage and will cover an area of 100 by 103 feet. There will be a steel frame and exterior walls of reinforced concrete. A cement floor will cover the entire area. Plans provide for metal window sash and frames and special gasoline storage tanks. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. A general contract will be let.

Contracts Awarded.

STOCKTON, SAN JOAQUIN CO., CAL.—Garage, 1 story and base, brick and steel. Cost not stated. Architect, Ralph P. Morrell, Odd Fellows' Bldg., Stockton. Owner, Mrs. Frankenheimer. Contractor, Frank Tucker, North Sierra Nevada street, Stockton. Contract price not stated. Note—The entire building has been leased to Lee and Tucker, North Eldorado street, Stockton.

GOVERNMENT WORK AND SUPPLIES.

Puget Sound, Wash., Officers' Quarters. The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing marine officers' quarters at the U. S. navy yard, Puget Sound, Wash.:

Item 1, net price for building complete in accordance with the drawings and specification.

Item 2, amount to be added to or deducted from net price under item 1 if Tokoen marble for treads, platforms, and landings be omitted and black slate, free from ribbons or other defects, be used for treads and platforms, including tread at landing levels. Wood floors will be substituted for marble tile at entrance, first and second floor levels.

Item 3, amount to be deducted from net price under item 1 if iron stairs be omitted and wood stairs be used there-

for. All wood shall be fir. Treads shall be edge grain No. 1, 1 1/4 inches thick, risers shall be 13-16 inch thick; newels 5 inches square, with molded panels and caps and drops; rectangular balusters 1 1/4 inches by 3/4 inch; molded rail 2 inches by 3 inches. All wood shall be of grades same as those used for corresponding interior work. Strings shall be closed.

Item 4, amount to be deducted from net price under item 1 if all blinds be omitted.

Item 5, amount to be deducted from net price under item 1 if plumbing fixtures and accessories be omitted from each rear bathroom on first and second floors. Roughing-in shall be installed with outlets capped for possible future installation of fixtures.

Item 6, amount to be added to net price under item 1 if all plasterwork, except in baths, pantries, and kitchens, be given one coat of sizing and two coats of "Keystone," Harrison's Flat Finish or equivalent approved washable flat paint.

Item 7, amount to be added to net price under item 1 if all window and door openings, including doors from entrance halls to foyers, be screened as specified under "Alternative for screens," paragraphs 250 to 256, inclusive.

Item 8, amount to be added to net price under item 1 if both sides of party wall in first and second stories be furred with strips (the same as called for under carpentry), and covered with "Hydrex-Saniflor," or equivalent sound-deadening felt. The furring and sound proofing will be in addition to the furring specified for lathing.

Item 9, amount to be added to net price under item 1, if plate-glass mirrors not less than 3-16 inch thick be installed on room side of all bedroom closet doors in first and second stories. Mirrors shall extend from top rail to bottom rail and from stile to stile.

Carlson & Son, Seattle, Wash., item 1, \$42,459; 2, \$41,651; 3, \$39,832; 4, \$42,123; 5, \$41,859; 6, \$42,859; 7, \$42,884; 8, \$42,519; 9, \$42,634.

Summell & Calling, Seattle, Wash., item 1, \$49,928; 2, \$750; 3, \$2,400; 4, \$200; 5, \$600; 6, \$500; 7, \$525; 8, \$50; 9, \$144.

Ingram-Mercer Construction Co., Seattle, Wash., item 1, \$49,000; 2, \$48,802; 3, \$18,000; 4, \$48,742; 5, \$18,550; 6, \$49,000; 7, \$49,525; 8, \$49,040.

W. N. Concanon Co., Monadnock Building, San Francisco, Cal., item 1, \$49,800; 2, \$175; 3, \$1,375; 4, \$120; 5, \$600; 6, \$330; 7, \$550; 8, \$500; 9, \$150.

Brickson & Larson, Seattle, Wash., item 1, \$45,363; 2, \$403; 3, \$2,870; 4, \$500; 5, \$650; 6, \$160; 7, \$250; 8, \$75; 9, \$114.

Puget Sound Bridge & Dredging Co., Central Building, Seattle, Wash., item 1, \$18,445 and \$16,637; 2, \$160; 3, \$200; 4, \$458; 5, \$600; 6, \$500; 7, \$550; 8, \$900; 9, \$160.

Charles H. Schaer, 721 21st avenue, Seattle, Wash., item 1, \$46,660; 2, \$292; 3, \$180; 4, \$292; 5, \$570; 6, \$300; 7, \$477; 8, \$50; 9, \$120.

J. L. Murphy & Son, 2128 N. Ferdinand street, Tacoma, Wash., item 1, \$24,716; 2, \$250; 3, \$180; 4, \$122; 5, \$400; 6, \$800; 7, \$350; 8, \$100; 9, \$180.

Pumping Units, San River Project.

The following bids were opened at the U. S. Reclamation Service, Los Angeles, Cal., for furnishing pumping units of the San River project:

Item 1, 2-in direct-connected pumping unit; 2, 3-in direct-connected pumping unit; 3, for both items.

Krogh Mfg. Co., Los Angeles, Cal., item 1, \$172, weight 550 lbs; 2, \$294, weight 1,200 lbs; at San Francisco, 10 days.

Union Iron Works, Los Angeles, Cal., item 1, \$190, weight 630 lbs; 2, \$328, weight 1,220 lbs; at Oakland, Cal., 6 days.

Byron-Jackson Iron Works, Los Angeles, Cal., item 1, \$233, weight 750 lbs; 2, \$365, weight 1,500 lbs; West Berkeley, Cal., 21 days.

D'Oliver Centrifugal Pump & Machine Co., Philadelphia, Pa., item 3, \$636, total weight 2,000 lbs; at Philadelphia, 35 days.

Terry Engineering Co., Los Angeles, Cal., item 1, \$280, weight 1,120 lbs; 2, \$400, weight 1,425 lbs; at Los Angeles, 14 days.

C. F. Braun & Co., San Francisco, Cal., item 1, \$297, 900 lbs; 2, \$444, 1,600 lbs; at Newburgh, N. Y., 48 days.

San Francisco, Cal., Mint.

The contract for the installation of a burglar-alarm system in the U. S. mint, San Francisco, Cal., has been awarded to the Butte Engineering & Electric Co., 683 Howard street, San Francisco, Cal., at \$2,490; time to complete 90 days.

Sacramento, Cal., Screens.

The contract for furnishing door and window screens for the U. S. post office and court house, Sacramento, Cal., has been awarded to the Wilber Mfg. Co., Milwaukee, Wis., at \$1,000; time of completion 4 months.

Pearl Harbor, Cold-Storage Plant.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for an ice making and cold storage plant for the U. S. naval station, Pearl Harbor, H. T.:

Item 1, ice making and cold storage plant, with appurtenances and accessories, erected completed in all details and in perfect working order in accordance with plans and specifications; 1a, for all apparatus, etc., as contemplated by item 1, except the electric lighting as covered by paragraph 24; 2, ice making and cold storage plant, with appurtenances in full accordance with the intent of the specification, as contemplated by item 1, but differing in details as fully detailed under special heading entitled exceptions; 3, for electric lighting as contemplated by paragraph 24; 4, deduction from items 1 or 2 if the government furnished all labor except an expert superintendent; 5, change in price if brine circulation is substituted for ammonia cooling in the cold storage rooms, all as covered by paragraph 22; 6, deduction for the omission of one compressor; 7, deduction for omitting 1 inch of cork-board insulation.

Viter Mfg. Co., Milwaukee, Wis., item 1, \$26,800; alternate \$26,000; item 2, \$19,700; alternate \$20,000; item 3, \$750; 4, \$600; 5, \$100; 6, \$800; 7, \$650.

The Mayer Ice Machine & Engineering Co., Jersey City, N. J., item 2, \$21,-

262; 3, \$500, 4, \$3,950; alt \$1,073; 5, \$300; 6, \$1,801; 7, \$716.

Frick Co., Waynesboro, Pa., item 1, \$19,775, alternate.

Cleveland Ice Machine Co., Lorain, Ohio, item 1, \$14,500.

Canals and Laterals.

The secretary of the interior has authorized the award to Wilson Bros., of Vandalia, Mont., for constructing 36 miles of Pablo canals and laterals, Flathead irrigation project. The work involves the excavation of about 199,000 cubic yards of material. The contract price is \$33,231.

Canals and Laterals.

The following bids were opened at the office of the U. S. Reclamation Service, St. Ignatius, Mont., for laterals A and 31-A, Pablo canals, Flathead project, Mont., specification No. 245:

Wilson Bros., Vandalia, Mont., schedule 1, item 1, 16c; 2, 29c; 3, 74c; 4, 2c; schedule 2, item 5, 16c; 6, 29c; 7, 74c; 8, 2c; totals, schedule 1, \$16,641; 2, \$16,590.

H. J. Arnoldus, Lovell, Wyo., schedule 1, class 1, 15.9c; 2, 50c; 3, 75c; 4, 2c; total, \$16,650. Schedule 2, item 5, 15.9c; 6, 50c; 7, 75c; 8, 2c; total, \$16,711.

Charles Wilhite & Co., Malta, Mont., schedule 1, item 1, 16c; 2, 45c; 3, 90c; 4, 2c; total, \$16,785. Schedule 2, item 5, 16c; 6, 45c; 7, 90c; 8, 2c; total, \$16,910.

Nelson Rich, Polson, Mont., schedule 1, item 1, 16c; 2, 50c; 3, \$1; 4, 2c; total, \$15,850. Schedule 2, item 5, 17c; 6, 50c; 7, \$1; 8, 2c; total, \$18,020.

Querry & Hipson, Malta, Mont., schedule 1, item 1, 16.5c; 2, 50c; 3, \$1; 4, 2c; total, \$17,350. Schedule 2, item 5, 17c; 6, 50c; 7, \$1; 8, 2c; total, \$18,020.

Tebbs & Taggart, Crowley, Wyo., schedule 1, item 1, 18c; 2, 40c; 3, \$1; 4, 2c; total, \$18,800. Schedule 2, item 5, 19c; 6, 40c; 7, \$1; 8, 2c; total, \$19,540.

L. D. Borden, Stevensville, Mont., item 1, 27c; 2, 60c; 3, \$1.20; 4, 2c; total, \$27,980. Schedule 2, item 5, 27c; 6, 60c; 7, \$1.20; 8, 2c; total, \$27,920.

Phoenix, Ariz., Metal Vault Shelving.

The contract for installing metal vault shelving in the U. S. post office and court house at Phoenix, Ariz., has been awarded to the Watson Mfg. Co., Jamestown, N. Y., at \$1,216; time 90 days.

Canal Requisitions.

The Istibulan Canal Commission has received requisitions for the purchase of the following supplies and material for use on the Panama Canal:

30,000 ft. B. M. oak flooring.
The following electrical material:
10,000 ft. stage cable, No. 14, B. & S. gage, duplex rubber covered, 3-64 in.
10,000 ft. stage cable, No. 16, B. & S. gage, duplex rubber covered, 3-64 in.
1,100 inclosed fuses.
2,000 flat porcelain shades.
1,000 lbs friction tape, 3/4 in. wide.
12 single-phase transformers.
1 3-phase transformer.
50,000 ft. weatherproof copper wire, No. 12, B. & S. gage.
50,000 ft. weather proof copper wire, No. 14, B. & S. gage.
21 extra-heavy vitreous lavatories.
12 stone sinks.
30 porcelain urinals.
49 water closets, with fittings.

—HALLS & SOCIETY BLDGS.—

OAKLAND, CAL.—Armory, 2 story and base, brick and steel, \$11,000. Architects, Oliver and Thomas Pantages Theatre Bldg, Oakland. Owner, Charles S. Booth. The building will be erected on 24th street between Telegraph and Grove streets. First floor will be arranged for stores and the upper floor for large drill hall and club rooms. Interior finish will be of pine and redwood. A maple floor will be used in the drill hall. Metal window sash and frames are specified. There will be a central heating system and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

RICHMOND, CONTRA COSTA CO., CAL.—Women's Club, 2 story and base, frame, \$7,000. Architect, J. B. Ogborn, Macdonald ave., Richmond. Owners, Richmond Club. The building, which will be designed somewhat like a large residence, will be erected on Nevins avenue. Interior finish will be of pine and redwood. Hardwood floors will be used in several of the rooms. There will be a central heating system and open fire place. Mantel will be of brick. Exterior of the building will be covered with cement plaster. Plans are complete and construction will be started as soon as funds can be raised.

HOLTVILLE, IMPERIAL CO., CAL.—Lodge hall and store, 2 story and base, brick, \$20,000. Architects, Mayberry and Parker, Pacific Electric Bldg., L. A. Owners Holtville Masonic Temple Association. The building has been designed with four stores on the first floor, a number of offices and two lodge rooms on the second floor. All interior finish will be of pine and redwood. A maple floor will be used in the lodge rooms. There will be metal window sash and frames and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

HOSPITALS.

LOS ANGELES, CAL.—2 story and base, reinforced concrete solarium and alterations to present buildings. Cost not stated. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, College of Medicine. Besides the construction of the two story solarium the work will include new plaster in hospital plumbing, painting and installation of operating room equipment. A large amount of tile wainscoting will be used. A new steam heating system will be installed. Exterior of the new building will be faced with cement plaster. Plans are complete and figures are now being taken. Bids will be opened on November 7th.

Contracts Awarded.

PATTON, SAN BERNARDINO CO., CAL.—Hospital cottages, J. K. L. and M. frame construction, \$69,060. Architect, George B. McDougal, Sacramento. Owners, State of California. Contractors, Mulder and Hurnish, 143 South Locust street, L. A. Contract price, \$39,000.

HOTELS.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, \$45,000. Architect, Frank S. Holland, 100 Haight street, S. F. Owner's name withheld. The building will be erected on the south side of Sutter street near Taylor and will have a frontage of 10 feet by a depth of 86 feet. There will be one store besides the hotel entrance and lobby on the first floor. Upper floors will contain in the neighborhood of 75 guest rooms all of which will have private bath rooms. Plans provide for steam heat, elevator service and vacuum cleaning system. All rooms will be supplied with hot and cold running water. Interior finish will be of pine and hardwood. Some ornamental plaster will be used in the lobby. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and ready for figures.

FRESNO, FRESNO CO., CAL.—Hotel alterations, \$5,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, T. C. White. This work will consist of extensive alterations to the first floor of the building. Included in the work will be interior finish, plastering, painting and electrical work. New store fronts in patent fronts and plate glass windows will be installed. Marble and tile will also be used. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Victor Ponet. The building will be erected on a corner lot and has been designed for six stores on the first floor besides the hotel entrance and lobby. Upper floors will contain in the neighborhood of 125 rooms and a large number of baths. There will be steam heat, elevator service and a hot water supply. Interior finish will be of pine with some elm panels. Bath rooms will have composition floors and tile wainscot. There will be metal window sash and frames and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

WILLITS, MENDOCINO CO., CAL.—Hotel and stores, 2 story and base, brick and steel, \$20,000. Architect, E. W. Hyde, Willits. Owner T. Scheyz. The building is being erected on a corner and will contain stores, the post office and a moving picture theatre on the first floor. Upper floors are arranged for guest rooms. Interior finish will be of pine throughout. A central heating system and hot water supply will be installed. All interior finish in the postoffice will be of metal. There will be patent store fronts. Exterior of the building will be faced with cement plaster. The work is being carried on by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$35,000. Architects, Richards-Neustadt Construction Co., L. A. Owner, Newton E. Cramer, Contractors. The Willard-Slater Co., 2311 Santa Fe ave., L. A. Contract price, \$35,000.

RAILROAD CONST., STATIONS AND EQUIPMENT.

Contracts Awarded.

PORTLAND, ORE.—Depot sheds, steel frame, \$10,000. Architect, Engineering Department Northern Pacific Terminal Co., Portland. Owners, Northern Pacific Terminal Co. Contractor, Charles McConigle, Chamber of Commerce Bldg., Portland. Contract price, \$10,000.

REDONDO JUNCTION, LOS ANGELES CO., CAL.—Roundhouse, machine shops, etc., reinforced concrete construction, \$65,000. Engineer, Chief Engineer G. W. Harris, 6th and Main streets L. A. Owners, Santa Fe R. R. Co. Contractors, Van Sant-Houghton Co., 503 Market street, S. F. Contract price, \$65,000. Note—This work will consist of the following buildings: The main building will be a one-story office building and storage house, forty feet high, making it equivalent to a three-story structure. It will be 50x161 feet, with concrete foundation, walls and floors, reinforcing steel, composition and tin roof, metal lath partitions, steel doors and shutters, sprinkler system, plumbing, and heating plant. The cost is estimated at \$23,000. A concrete power house will be erected 61x76 feet, with concrete partitions, tar and gravel roof, brick floor on the first story, pine above, and steel beams and girders. The cost will be \$10,000. There will be a frame office building 24x60 feet, with rustic exterior, tin roof, pine floors and finish, and electric wiring. Cost, \$3,500. A frame machine shop 40 x 100 feet, will cost \$5500, and a sand house will cost \$2000. There will be a concrete toilet building 26x45 feet, with cement floors and composition roof to cost \$5,000. A reinforced concrete machine shop 60x148 feet, with concrete floors and composition and tin roof will be built to cost \$12,500.

RESIDENCES.

SAN FRANCISCO—Bungalow, 1½ story and base, frame, \$4,000. Architect, Joseph M. Geary, 23rd and Folsom streets, F. F. Owners, Parkside Home Building Co. The dwelling will be erected on 20th avenue north of Ulloa street and has been designed for a seven room house with bath and sleeping porch. Interior finish will be of pine, redwood and some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are complete and work will be done by Day Labor. All materials are being purchased by the owners.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Arthur Howard Peterson, Mills Bldg., S. F. Owner, Charles Anderson. The dwelling will be erected on 25th avenue in the Sunset District, and will contain seven rooms and bath. Interior will be finished in pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick or tile.

An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are being prepared and when complete the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,000. Architect, Edward P. Helms, 1334 Church street, S. F. Owner, O. E. Anderson. The house has been designed to contain seven rooms and bath and will be erected on the east side of 15th avenue north of California. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, A. H. Peterson, Mills Bldg., S. F. Owner, A. Kolm. This building has been mentioned here before when plans were first started. Working drawings are complete and construction has been started by Day Labor. The dwelling will be finished in pine and hardwood. There will be hardwood floors and tile wainscot. An automatic water heater will be installed. Exterior will be covered with cement plaster on metal lath. A clay tile roof will be used. All materials are being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. P. Evelyn. The dwelling will be erected on Russell street near Piedmont avenue and has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, none. Owner, H. M. Swalley, 715 Grant avenue, Oakland. The dwelling has been designed for a nine room house with bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, M. Mitchell. The house has been designed for a seven room dwelling and will be erected on Elvarado Road. In-

terior will be finished largely in pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and figures will be called for shortly.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame. Cost not stated. Architect, A. W. Smith, 1010 Broadway, Oakland, Owner, Mr. Grove. This dwelling, designed for a six room house, will be erected in one of the new residence tracts in Oakland. Interior finish will be of pine throughout. Some hardwood floors will be used. Elm panels will be used in the dining room. There will be furnace heat and open fire place. Mantel will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$7,000. Architect, Joseph T. Carter, Balboa Bldg., S. F. Owner, George Wallace. The dwelling will be erected in Piedmont and will contain eight rooms, baths and sleeping porch. Interior will be handsomely finished in pine and hardwood. Hardwood floors will be used throughout except in the bath room which will have a composition floor. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence 2 story and base, frame, \$4,500. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The dwelling will be erected in the Piedmont by the Lake tract and will contain six rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer. Principal rooms will have hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and will shortly be out for figures.

There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials will be purchased by Mr. Born.

PIEDMONT, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. The bungalow will contain six rooms, bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and an open fire place. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. Automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Asbestos roofing is specified. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, none. Owner, C. J. Pfanz, 5143 Shafter avenue, Oakland. The house has been designed for a six room dwelling and will be erected on Joseph street west of Monterey. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath rooms and kitchen. An automatic

water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$1,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Leon M. Gove. The house, which has been designed for a seven room dwelling with bath and sleeping porch, will be erected at the corner of Walker avenue and Boulevard Way. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and large open fire place. Mantel will be of brick or tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,700. Architect, none. Owner, Frank Pegel, 366 10th avenue, S. F. The dwelling has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Residences, 1 and 2 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started at San Jose: Alex York, Russ House, 1 story four room cottage, \$1,400; Rocco Martorona, S. W. William and Monor, 1 story frame cottage, \$800; and L. Morden, 662 Willis ave., repairs to cottage, \$709.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, J. Carl Thayer, Forsythe Bldg., Fresno. Owner, P. W. Niedermaier. The dwelling has been designed for an 11 room house with three baths and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Residences, 2 2-story and base, frame, \$3,500 and \$5,000 respectively. Architect, J. M. Saffell, New Fish Bldg., Fresno. Owner's name withheld. These dwellings will each contain seven rooms and bath. Interior finish will be of pine, redwood and hardwood. Hardwood floors will be used in the principal rooms. The more costly house will have furnace heat. Open fire places will be used in the living rooms and

mantels will be of tile and brick. Tile wainscot and composition floors will be used in the bath rooms. Automatic water heaters will be installed. Exteriors of the houses will be covered with cement plaster on metal lath, rustic and shiplap. Plans are now being prepared.

SCHOOLS.

VENICE, LOS ANGELES CO., CAL.—School group, 1 and 2 story, reinforced concrete, \$160,000. Architects, Russell and Singluff, Security Bldg., L. A. Owners, Venice School District. The building or group of buildings will be designed for a polytechnic school. A bond issue of \$250,000 was recently voted and the cost of the site will leave in the neighborhood of \$160,000 for construction. Only preliminary plans have been prepared and details of the work can not be published at this time. Mr. Russell has a San Francisco office in the Humboldt Bank Bldg. Further mention will be made of the work as plans progress.

CLAREMONT, LOS ANGELES CO., CAL.—Music hall, 2 story and base, reinforced concrete, \$300,000. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Pomona College. This work has been mentioned here before. The building is designed in the shape of a letter Y and will cover an area of 260 by 45 feet. The building will contain an auditorium seating 1000 people, eight studios and 16 practice rooms. Construction will be fireproof. Interior finish will be of pine and hardwoods. A central heating system, modern plumbing and electric work will be installed. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SANTA PAULA, VENTURA CO., CAL.—School, 2 story and base, reinforced concrete, \$60,000. Architects, Allison and Allison, Hibernian Bldg., L. A. Owners, Santa Paula School District. The building will cover an area of 55 by 165 feet. The design is in the Mission style. Plans provide for 16 standard sized class rooms, assembly hall, an auditorium seating 600 people, teachers' rooms and principal's office. Interior finish will be of pine with maple floors. Plans provide for a central heating system, probably steam, a modern system of ventilation, program clocks and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

PALMS, LOS ANGELES CO., CAL.—School, 1 story and base, brick, \$45,000. Architects, O. P. Dennis and H. H. Hewitt, Pay Bldg., L. A. Owners, Palms School District. The building will be erected on a corner site and contain eight standard sized class rooms, an assembly hall, teachers rooms and principal's office. Interior will be finished in pine with maple floors. A central heating system will be installed. There will be program clocks and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

EXCELSIOR SCHOOL, DISTRICT, KINGS CO., CAL.—School, 1 story, frame, \$5,000. Architect, J. Carl Thayer, Forsythe Bldg., Fresno. Owners, Excelsior School District. The building

has been designed for a one room district school. Interior finish will be of pine. Stoves will be used for heating. Exterior of the building will be covered with rustic and cement plaster. Plans are now being prepared.

Contracts Awarded.

BUENA VISTA SCHOOL, DISTRICT, KERN CO., CAL.—1 story, frame, \$3,000. Architect, J. M. Saffell, New Fish Bldg., Bakersfield. Owners, Buena Vista School District. Contractor, O. C. Sebatz, Bakersfield. Contract price, \$2,539.

VARIOUS STATE INSTITUTIONS, CALIFORNIA.—Concrete and frame construction, \$90,407. Architect, State Department of Architecture, Sacramento. Owners, State of California. The State Engineering Advisory Board has approved the plans and estimates calling for \$90,107 in improvements and buildings at nine different institutions. Included in the prospective improvements, which are to be made under the supervision of State Engineer McClure, was a \$17,500 boys' dormitory at the Sonoma State Home and \$2,685 to be expended for the restoration of the Sonoma Mission. The work approved was Berkeley Deaf & Blind Home, fire escapes, \$6500; Los Angeles Normal School, grand stand, \$2,500; clock and bell system, \$3,200; telephone system, \$5,000; Napa Hospital, laundry, \$18,000; San Francisco Normal School painting, \$1,900; San Jose Normal School manual training building, \$3,600; gymnasium, \$3,750; Yountville Veterans' Home improvement to building, \$2,550; repairs to dining hall, \$6,537; San Quentin Prison, guards' cottages, \$11,300; windows for cell building, \$1,701; plumbing, \$1,824; Folsom Prison dairy barn, \$5,900.

SEWERS, STREET WORK AND WATER SYSTEMS.

STATE HIGHWAYS, CALIFORNIA.—Highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans have been completed for state highway work in three counties and figures are now being called. Five separate contracts will be let for the work as follows: Fresno County from Fowler to Kingsburg, (VI, Pre., 4, A); about 8 miles in length, to be built of Portland cement concrete. Fresno County from Fowler to Fresno, (VI, Pre., 4, B); about 8 miles in length, to be built of Portland cement and concrete. San Bernardino County from Upland to Citrus Avenue (VII, S. Bd., 3, A); about 10 1/2 miles in length, to be built of Portland cement concrete. Santa Barbara County from Rincon Creek to Carpinteria Creek (V, S. B., 2, B); about 2 1/2 miles in length, to be graded and paved in part with Portland cement concrete. San Luis Obispo County from Paso Robles to the northerly county boundary (V, S. L., 0, 2, A); about 10 1/2 miles in length, to be built of Portland cement concrete. San Luis Obispo County from Santa Margarita to Atascadero Creek, (V, S. L., 0, 2, C); about 8 1/2 miles in length, to be built of Portland cement concrete. Plans, specifications and full particulars can be secured by addressing the State Highway Commissioners at Sacramento. Bids will be opened on November 17th. An official proposal appears in another column of this issue.

STORE.

SAN FRANCISCO.—Undertaking parlors, 2 story and base, frame, \$10,000. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owners, McAvoy and O'Hart. The building will be erected on the south side of Market street east of 11th street. First floor has been arranged for office, chapel and waiting rooms. Interior finish will be of pine and white enamel. Upper floor will contain living rooms and will be finished in pine and elm panels. There will be a central heating system and automatic water heater. Bath room will have the wainscot. Exterior of the building will be covered with rustic shiplap and cement plaster. Plans are complete and figures have been taken under advisement by the architect.

SAN FRANCISCO.—Wholesale house, 2 story and base, reinforced concrete, \$11,000. Architect, W. H. Crim, Jr., 425 Kearny street, S. F. Owner, Alfred Gonzalez. The building will be erected on the north side of Washington street east of Davis, in the wholesale district and will be arranged for one large store. The building will be carried on a pile foundation. Interior finish will be of pine throughout. Cement floor will cover the entire area. Metal window sash and frames will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures have been taken. A contract will be awarded within a short time.

SAN FRANCISCO.—Stores and lofts, 2 story and base, brick and steel, \$30,000. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, M. Fisher, 105 Montgomery street, S. F. The building will be erected at the southwest corner of Van Ness avenue and Sutter street and will cover an area of 120 by 100 1/2 feet. The building will probably be arranged for the automobile trade. Construction will be of steel and brick with exterior faced with pressed brick. Interior finish will be of pine and hardwood. A cement floor will be used on the ground floor. Upper floor will be finished in pine throughout. There will be plate glass windows in patent store fronts and metal window sash and frames. Plans are nearly complete and work will be done by Day Labor. Mr. Fisher will let sub-contracts on parts of the work.

FRESNO, FRESNO CO., CAL.—Store and residence, 1 and 2 story and base, brick and steel. Cost not stated. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner Jacob Richter. The building will be erected at the corner of Mono and I street, and will be arranged for a store on the first floor and the owner's residence on the upper floor. Interior finish will be of pine

and hardwood. There will be a central heating system and an open fire place. Mantel will be of brick. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architect.

FRESNO, FRESNO CO., CAL.—Stores and offices, 4 story and base. Class A construction, \$120,000. Architect's name not given. Owner, L. L. Cory, Fresno. The building will be erected at the corner of J and Fresno streets and will have frontages of 150 by 65 feet. There will be several stores on the first floor and a large number of offices on the upper floors. There will be a complete steel frame with exterior walls of brick and concrete faced with pressed brick or terra cotta. Interior partitions will be of hollow tile and rioid lath and plaster. Concrete floors will be used. There will be steam heat, elevator service, a vacuum cleaning system and mail chutes. Interior finish will be of pine, hardwood, metal trim and marble. Patent store fronts and plate glass windows are specified. The name of the architect and further details of the work will be published later. Construction will be started within a couple of months.

LOS ANGELES, CAL.—Stores, 1 story and base, brick. Cost not stated. Architect, Albert C. Martin. Higgins Bldg., L. A. Owner, Thomas Higgins. The building will be erected on a corner site and will cover an area of 90 by 100 feet. The building has been designed to contain five large stores. A cement floor will cover the entire area. There will be metal window sash and frames. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOLLYWOOD, LOS ANGELES CO., CAL.—Stores and lofts, 4 story and base, \$100,000. Architect, E. A. Parcler, 1524 Labaja avenue, L. A. Owner, C. E. Tolerman. The building will be erected on a corner site covering an area of 75 feet square. The first floor will contain four stores and second floor eight suites of offices. Third and fourth floors will contain sixteen apartments of two and three rooms each. Interior finish will be of pine and hardwood. There will be steam heat, elevator service and a hot water supply. Bath rooms will have composition floors and tile wainscot. There will be metal window sash and frames and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete.

THEATRES.

SAN FRANCISCO—Nickelodeon, 1 story frame, \$10,000. Architect, C. O. Clausen, Phebin Bldg., S. F. Owner's name withheld. The building will be erected at the southwest corner of Desavaderia and Grove streets and will cover an area of 10 by 105 feet. The auditorium will seat 329 people. Interior will be finished in pine throughout. A modern system of ventilation will be installed. Considerable ornamental plaster will be used. Exterior of the building will be covered with rustic and shiplap. A large ornamental marquee will be used on the main entrance. Plans are complete and figures are being taken.

SAN FRANCISCO—Amusement pier, 2 story reinforced concrete and frame, \$1,000,000. Architects, Coates and Traver, Addison Head Bldg., S. F. Owners, Ocean Pier Amusement Co., 706 Merchants' National Bank Bldg., S. F. The exact location of this pier has not been given to the public. Only preliminary sketches have been made and the promoters are now arranging for financing construction. There will be several buildings on the pier and they will house the various concessions. Further mention will be made if the work progresses.

ALAMEDA, ALAMEDA CO., CAL.—Amusement park and bath, concrete and frame construction, \$200,000. Architect, A. L. Mazarette, Bacon Bldg., Oakland. Owners, The Mammoth Baths, Casino and Swimming Co. These buildings are to be erected at the southwestern end of the city and include a large casino, power house, bath houses and swimming pool. Special mechanical equipment will be used in the power house including a hot water heating system. Interior of the casino and bath houses will be finished in pine and redwood. There will be structural steel, reinforced concrete work and a large amount of marble and tile used. Exterior of the buildings will be covered with cement plaster on metal lath. Plans are being prepared and bids will be called for as soon as working drawings can be completed.

Contracts Awarded.

LOS ANGELES, CAL.—Moving picture house, 1 story and base, brick, \$15,050. Architects, Austin and Pennington, Wright and Calender Bldg., L. A. Owner, Joseph L. Murphy. Contractors, Roman and Klarquist, Union League Bldg., L. A. Contract price, \$15,050.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR 804—Galvanized Steel or Iron, Tool Steel, Planchet Iron, Wire Cable, Chain Steel, Wire, Portholes, Machine Bolts, Lock Bolts, Nut Nails, Screws, Track Wrenches, Cable Clips, Wrought Iron or Steel Pipe, Castiron Pipe, Pipe Fittings, Stovepipe, Lead Pipe, Lead Bands, Brass Building Sheet, Brass, Bronze Bars, Sheet Copper, Sheet Lead, Sheet Zinc, Solder, Tracks, Valves, Cocks, Water-Closet Seats, Water Closets, Force Cups, Shovels, Spades, Picks, Files, Pliers, Hammers, Saws, Machetes, Night Latches, Snatch Blocks, Wheelbarrows, Galvanized Buckets, Corn Brooms, Paint Brushes, Ladles, Water Coolers, Melting Pans, Manila Rope, Suction Hose, Packing Tarpanlins, Cotton Canvas, Tackles, Sash, Cord, Twine, Emery Cloth, Leather, Fire Brick, Vitified Sewer Pipe, and Soft Polish.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., November 12, 1913, at which time they will be opened in public for furnishing the above-mentioned articles. Bids and general information relating to this circular No. 804 may be obtained from this office or the offices of the assistant purchasing agents, 1096 N. Point street, San Francisco, Cal., also from the U. S. engineer office in the following cities: Seattle, Wash.; Los Angeles, Cal.; E. C. ROGERS, corps engineers, U. S. A., general purchasing officer.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 317 Forum Bldg., Sacramento, Cal., until 2 o'clock P. M., on November 17th, 1913, at which time they will be publicly opened and read.

for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

Fresno County, from Fowler to Kingsburg, C. T. Prec. 4, A; about 8 miles in length, to be built of Portland cement concrete.

Fresno County, from Fowler to Fresno, C. T. Prec. 4, B; about 8 miles in length, to be built of Portland cement concrete.

San Bernardino County from Upland to Chino Avenue, C. T. Prec. 2, A; about 10½ miles in length, to be built of Portland cement concrete.

Santa Barbara County from Rincon Creek to Carpinteria Creek, C. T. Prec. 2, B; about 2½ miles in length, to be graded and paved in part with Portland cement concrete.

San Luis Obispo County from Paso Robles to the northern county boundary (C. T. Prec. 4) about 10½ miles in length, to be built of Portland cement concrete.

San Luis Obispo County from Santa Margarita to Carpinteria Creek (C. T. Prec. 4), about 8½ miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work occurs. The Division Engineers' offices are located at, White, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bids will be received unless it is made out on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to bid deemed for the best interests of the State.

BURTON A. TOWNE,

CHARLES D. BLANEY,

NEWELL L. DAKINOTON,

California Highway Commission.

AUSTIN B. FLETCHER,

Highway Engineer.

WILSON R. ELLIS, Secretary.

Dated: October 12, 1913. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Wednesday, November 26, 1913, said bids then and there to be publicly opened. Bidders furnishing all plant materials, and labor, and doing the work required for the construction and erection of a building to be known as the new State Home, at the site of the Sonoma State Home, Eldridge, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Each bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of \$10,000 Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to award the contract in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for Nursery Building for Males, Sonoma State Home, Eldridge, California."

(Signed) W. F. McClure, State Engineer. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Friday, November 28, 1913, said bids then and

there to be publicly opened and read for furnishing all plant materials, and labor, and doing the work required for construction and erection of a building known as the Laundry Building at the Napa State Hospital, Napa, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

Proposals may be addressed to W. F. McCLEURE, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Laundry Building, Napa State Hospital, Napa, California."

[Signed] W. F. McCLEURE,
State Engineer. (*)

PROPOSALS FOR CONSTRUCTING BUILDING.

BUILDING — Treasury Department, Office of the Supervising Architect, Washington, D. C. Sealed proposals will be received at this office until 3 p. m. November 26, 1913, for the construction, complete, of the U. S. post office at Albany, Oreg. Drawings and specifications may be obtained from the custodian of the site at Albany, Oreg., or at this office, in the discretion of the supervising architect. O. WENDE-ROTH, supervising architect.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 212, Building Service Building, Filmore and Chestnut Streets, San Francisco, California, at 10:00 A. M. Thursday, November 20, 1913, for Constructing the Court of Honor in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207, Service Building, Filmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

BUNGALOW — 1½ story and base, frame, \$1,000. San Francisco. Architect, Joseph M. Geary, 23rd and Folsom streets, S. F. Owner, Parkside Home Building Co. The dwelling will be erected on 20th avenue north of Ulloa street and has been designed for a seven room house with bath and sleeping porch. Interior finish will be of pine, redwood and some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are complete and work will be done by Day Labor. All materials are being purchased by the owners.

RESIDENCE — 2 story and base, frame, \$5,000. San Francisco. Architect, Arthur Howard Peterson, Mills Bldg., S. F. Owner, Charles Anderson. The dwelling will be erected on 25th avenue in the Sunset District and will contain seven rooms and bath. Interior will be finished in pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick or tile. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$6,000. San Francisco. Architect, Edward F. Helms, 1331 Church street, S. F. Owner, O. E. Anderson. The house has been designed to contain seven rooms and bath and will be erected on the east side of 15th avenue north of California. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will be finished in tile. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$5,000. San Francisco. Architect, A. H. Peterson, Mills Bldg., S. F. Owner, A. Kohn. This work has been mentioned here before when plans were first started. Working drawings are complete and construction has been started by Day Labor. The dwelling will contain seven rooms and is being erected in St. Francis Wood. Interior will be finished in pine and hardwood. There will be hardwood floors and tile or brick mantels. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior will be covered with cement plaster on metal lath. A clay

tile roof will be used. All materials are being purchased.

APARTMENT HOUSE — 3 story and base, frame, \$25,000. San Francisco. Architects, Falch and Knoll, Hearst Bldg., S. F. Owner, Miss D. Loaliza. The building will be erected at the southwest corner of Washington and Taylor streets and has been designed to contain 18 suites of two and three rooms. Interior finish will be of pine. Some elm panels will be used in the living rooms and dining rooms. There will be steam heat and a vacuum cleaning system. All suites will have wall beds and private bath rooms. Ornamental plaster will be used in the lobby. Bath rooms will have composition floors and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Marble and tile will be used in the entrance vestibule. Plans are now being revised and bids will be called for shortly.

APARTMENT HOUSE — 3 story and base, frame, painting only. Cost not stated. San Francisco. Architect, none. Owner, A. Benzinzer, South side of Green street near Montgomery, S. F. The owner is now taking figures on painting, interior and exterior, of the building now in the course of construction. There are twelve suites of two and three rooms. Mr. Benzinzer will be found at the building.

APARTMENT HOUSE — 3 story and base, frame. Cost not stated. San Francisco. Architects, Rousseau and Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Sarah Norton. This building will be erected on the north side of Hayes street west of Webster. The first floor will contain the residence of the owner and will be arranged for eight rooms. Upper floors will contain four suites of four rooms each. Interior will be finished in pine with some hardwood panels and imported tapestries in the first floor. All suites will have private bath rooms and wall beds. A central heating system and hot water plant will be installed. Bath rooms will have composition floors and tile wainscot. A large open fire place with tile mantel will be used in the owner's apartments. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic with a brick veneer base. Plans are complete and figures are being taken.

GARAGE AND SALES ROOMS — 2 story and base, reinforced concrete, \$20,000. San Francisco. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner, B. Daylow. The building will be erected on the east side of Van Ness avenue north of Jackson street and will have a frontage of 60 feet by a depth of 123 feet. The design is in the classic style. Construction will be practically fireproof. Interior partitions will be of metal lath and plaster. Metal window frame and sash are specified. Interior finish will be of pine and hardwood with tile and marble wainscot and base. There will be steam heat and a vacuum cleaning system. Patent store fronts and plate glass windows will be used.

Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

GARAGE AND SALES ROOMS—1 story, base, and mezzanine floor. Reinforced concrete, \$35,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Walter Sullivan. This building will be erected on Van Ness avenue near line and will have a frontage of 60 feet and a depth of 120 feet. There will be a basement and sub-basement. Entire height of the building is 49 feet. Interior partitions will be of metal lath and plaster. Interior finish will be of pine, hardwoods and tile. Cement floors and metal window sash and frames are specified. Considerable marble and tile work will be used. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Edward G. Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co., 660 Market street, S. F. This is the first of several high class homes which the S. A. Born Building Co. will erect on the property on 25th avenue near I street, recently purchased. The dwelling has been designed for a seven room house with bath, garage and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials will be purchased by Mr. Born.

HOTEL—6 story and base, reinforced concrete, \$15,000. San Francisco. Architect, Frank S. Holland, 109 Haight street, S. F. Owner's name withheld. The building will be erected on the south side of Sutter street near Taylor and will have a frontage of 40 feet by a depth of 86 feet. There will be one store besides the hotel entrance and lobby on the first floor. Upper floors will contain in the neighborhood of 75 guest rooms, all of which will have private bath rooms. Plans provide for steam heat, elevator service and vacuum cleaning system. All rooms will be supplied with hot and cold running water. Interior finish will be of pine and hardwood. Some ornamental plaster will be used in the bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and ready for figures.

ISLAND PARKS—Cost not stated. San Francisco. Engineer, City Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. J. G. Harney submitted the lowest regular figure to the Board of Public Works at their last meeting for constructing Island Park in Delancey street. This bid also will probably be accepted, is \$6,700. A complete list of the figures received appear under the heading of San Francisco in this issue.

UNDERTAKING PARLORS—2 story

and base, frame, \$10,000. San Francisco. Architect, W. H. Crim, Jr., 125 Kearny street, S. F. Owners, McAvoy & O'Hara. The building will be erected on the south side of Market east of 14th street. First floor has been arranged for office, chapel and waiting rooms. Interior finish will be of pine and white enamel. Upper floor will contain living rooms and will be finished in pine and elm panels. There will be a central heating system and automatic water heater. Bath room will have the wainscot. Exterior of the building will be covered with rustic shiplap and cement plaster. Plans are complete and figures have been taken under advisement by the architect.

WHOLESALE HOUSE—1 story and base, reinforced concrete, \$11,000. San Francisco. Architect, W. H. Crim, Jr., 125 Kearny street, S. F. Owner, Alfred Gonzalez. The building will be erected on the north side of Washington street east of Davis, in the wholesale district and will be arranged for one large store. The building will be carried on a pile foundation. Interior finish will be of pine throughout. Cement floor will cover the entire area. Metal window sash and frames will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures have been taken. A contract will be awarded within a short time.

STORES AND LOFTS—2 story and base, brick and steel, \$50,000. San Francisco. Architect, D. C. Coleman, Merchants' National Bank Bldg., S. F. Owner, M. Fisher, 105 Montgomery street, S. F. The building will be erected at the southwest corner of Van Ness avenue and Sutter street and will cover an area of 124 by 109 1/2 feet. The building will probably be arranged for the automobile trade. Construction will be of steel and brick with exterior faced with pressed brick. Interior finish will be of pine and hardwood. A cement floor will be used on the ground floor. Upper floor will be finished in pine throughout. There will be plate glass windows in patent case fronts and metal window sash and frames. Plans are nearly complete and work will be done by Day Labor. Mr. Fisher will let subcontracts on parts of the work.

NICKLEBOON—1 story, frame, \$10,000. San Francisco. Architect, C. O. Chaussen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected at the southwest corner of DeWadero and Grove streets and will cover an area of 40 by 105 feet. The auditorium will seat 500 people. Interior will be finished in pine throughout. A modern system of ventilation will be installed. Considerable ornamental plaster will be used. Exterior of the building will be covered with rustic shiplap. A large ornamental iron entrance will be used in the main entrance. Plans are complete and figures are being taken.

AMUSEMENT PIER—1 story, reinforced concrete and frame, \$100,000. San Francisco. Architects, Coates and Traylor, Addison Hotel Bldg., S. F. Owners, Ocean Pier Amusement Co., 706 Merchants' National Bank Bldg., S. F. The exact location of this pier has not been given to the public. Only preliminary sketches have been made and the promoters are now arranging

for manufacturing construction. There will be several buildings on the pier and they will house the various concessions. Further mention will be made if the work progresses.

CONCRETE AND FRAME CONSTRUCTION—\$90,167. Various state institutions, California. Architect, State Department of Architecture, Sacramento. Owners, State of California. The State Engineering Advisory Board has approved the plans and estimates calling for \$90,167 in improvements and buildings at nine different institutions. Included in the prospective improvements, which are to be made under the supervision of State Engineer McClure, was a \$17,500 boys' dormitory at the Sonoma State Home and \$2,685 to be expended for the restoration of the Sonoma Mission. The work approved was Berkeley Deaf and Blind Home, fire escapes, \$6,500; Los Angeles Normal School, grand stand \$2,200, clock and bell system \$3,200, telephone system \$3,000; Napa hospital, laundry \$18,000; San Francisco Normal School, painting \$1,900; San Jose Normal School, manual training building \$3,600, gymnasium \$3,750; Yountville Veterans' Home, improvement to building \$2,550, repairs to dining hall \$6,637; San Quentin Prison, guards' grotto \$11,900, windows for cell building, \$1,701, plumbing \$1,824, Folsom Prison dairy barn \$500.

RESIDENTIAL FLATS—2 story and base, frame, \$7,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mary Wagner. The building will be erected on the east side of 18th avenue near Lincoln Way and has been designed to contain two large residential flats of seven rooms each. Interiors will be finished in pine and veneer hardwood. Hardwood floors will be used in all rooms. There will be furnace heat and open fire places. Mantels will be of the or brick. Bath rooms will have tile wainscot and composition floors. A garage is provided for in the basements. Exterior will be covered with shingles and half timber. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$1,700. San Francisco. Architect, none. Owner, Frank Pegel, 366 10th avenue, S. F. The dwelling has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, frame, \$11,000. San Francisco. Architect, C. O. Chaussen, Phelan Bldg., S. F. Owner, Morris and Minnie Green, 814 Ford street, S. F. Contract price, Contractors, Ratto and Giannini, 232 \$11,000.

City Bids Opened.

Five Sets of Bids Submitted to Board of Public Works For Constructing Island Parks.

Bids were received by the Board of Public Works at their Wednesday afternoon session for constructing Island Parks along Dolores street, where parks are not already constructed. T. W. McClenahan submitted a figure of \$3,334, but claims a mistake of \$2,900. The next lowest figure was submitted by J. G. Harney for \$6,700. The following is a list of all figures received:

Constructing Island Parks.

Monson Bros.	\$10,790.00
Blanchard-Brown Co.	6,734.60
McSheehy Bros.	6,724.00
T. W. McClenahan.	3,334.00
J. G. Harney.	6,700.00

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. F. Evelath. The dwelling will be erected on Russell street near Piedmont avenue and has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame. Cost not stated. Oakland, Cal. Architect, none. Owner, H. M. Swalley, 545 Grant avenue, Oakland. The dwelling has been designed for a nine room house with bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mr. Mitchell. The house has been designed for a seven room dwelling and will be erected on Elvarado Road. Interior will be finished largely in pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and figures will be called for shortly.

BUNGALOW — 1½ story and base, frame. Cost not stated. Oakland, Cal. Architect, A. W. Smith, 1919 Broadway, Oakland. Owner, Mr. Grove. This dwelling, designed for a six room house, will be erected in one of the new residence tracts in Oakland. Interior finish will be of pine throughout. Some hardwood floors will be used. Ebn panels will be used in the dining room. There will be furnace heat and open fire place. Mantel will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$7,000. Piedmont, Alameda Co., Cal. Architect, Joseph T. Carter, Balboa Bldg., S. P. Owner, George Wallace. The dwelling will be erected in Piedmont and will contain eight rooms, baths and sleeping porch. Interior will be handsomely finished in pine and hardwood. Hardwood floors will be used throughout except in the bath room which will have a composition floor. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$4,500. Oakland, Cal. Architects, Hutchinson Bros, 170 13th street, Oakland. Owner's name withheld. The dwelling will be erected in the Piedmont by the Lake tract and will contain six rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer. Principal rooms will have hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and will shortly be out for figures.

APARTMENT HOUSE — 2 story and base, frame, \$20,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Dr. Crawfish. This building is to be erected at the corner of Prince and Ellsworth streets covering a considerable area. Interior has been arranged for 12 suites with connecting baths and wall beds. Interior finish will be of pine and redwood. A central heating system, hot and cold running water and a vacuum cleaning plant will be installed. Bath rooms will have composition floors and tile wainscot. Tile and marble will be used in the entrance vestibule. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared for the work.

GARAGE AND SALES ROOM — 1 story and base, brick and steel. Cost not stated. Oakland, Cal. Architects, Roussseau & Roussseau, Monahock Bldg., S. P. Owner's name withheld. This building has been mentioned here before when plans were first started. Working drawings have been completed and figures are being taken. The structure will be erected at the corner of Broadway and Brook street and will have foundations and exterior walls heavy enough to carry an additional

story. Interior will be finished in pine and hardwood. Tile and marble wainscoting and base will also be used. A tile floor will be laid. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick.

BUNGALOW — 1½ story and base, frame, \$3,000. Piedmont, Alameda Co., Cal. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. The bungalow will contain six rooms, bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and an open fire place. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. Automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Asbestos roofing is specified. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$5,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. J. Pfaff, 5459 Shafter avenue, Oakland. The house has been designed for a six room dwelling and will be erected on Joseph street west of Monterey. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of tile or brick. Tile wainscoting will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

RESIDENCE — 2 story and base, frame, \$4,000. Oakland, Cal. Architect, A. W. Smith, 1919 Broadway, Oakland. Owner, Leon M. Gove. The house, which has been designed for a seven room dwelling with bath and sleeping porch, will be erected at the corner of Walker avenue and Boulevard Way. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and large open fire place. Mantel will be of brick or tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being ordered.

AMUSEMENT PARK AND BATHS — Concrete and frame construction, \$200,000. Alameda, Alameda Co., Cal. Architect, A. L. Mazurette, Bacon Bldg., Oakland. Owners, The Alameda Baths, Casino and Swimming Co. These buildings are to be erected at the southwestern end of the city and include a large casino, power house, bath houses and swimming pool. Special mechanical equipment will be used in the power house including a hot water heating system. Interior of the casino and bath houses will be finished in pine and redwood. There will be structural steel, reinforced concrete work and a large amount of marble and tile used. Exteriors of the buildings will be cov-

erel with cement plaster on metal lath. Plans are being prepared and bids will be called for as soon as working drawings can be completed.

FLATS—2 story and 1/2, frame, \$1,000. Oakland, Cal. Architects, Hutchinson Bros 479 121 street, Oakland. Owner's name withheld. The building will contain two modern flats of five and six rooms each. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Bath rooms will have tile wainscot and composition floors. A large open fire place will be used in each of the living rooms. Mantels will be of tile. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

ARMORY—2 story and base, brick and steel. \$11,000. Oakland, Cal. Architects, Oliver and Thomas, Potagers Theatre Bldg., Oakland. Owner, Charles S. Booth. The building will be erected on 24th street between T-24th and Grove street. First floor will be arranged for stores and the upper floor for large drill hall and 100 rooms. Interior finish will be of pine and redwood. A maple floor will be used in the drill hall. Metal windows and frames are specified. There will be a central heating system and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

AUTOMOBILE SALES ROOMS ALTERATIONS—Cost not stated. Oakland, Cal. Architect, Chester H. Miller, Foxcroft Bldg., S. F. Owner, Roy E. Fish. The present building on Broadway will undergo extensive repairs. Included in the work will be new interior finish, pine, hardwood and tile electric work, plumbing, painting and plastering. Cement floor will be laid. Exterior of the building will also undergo alteration. Plans are being prepared and figures will shortly be taken.

MARIN, CONTRA COSTA AND
SONOMA COUNTIES.

RESIDENCE — 1 story and base,
frame. Cost not stated. Healsburg,
Sonoma Co., Cal. Architect, John Hud-
son Thomas, First National Bank Bldg.,
Berkeley. Owner, Laura E. Gilliss.
The dwelling has been designed to con-
tain seven rooms and bath. Interior
will be finished in pine and redwood.
Hardwood floors will be used in the
principal rooms. There will be a large
open fire place in the living room with
a brick or tile mantel. Automatic
water heater will be installed. Tile
wainscot will be used in the bath room
and kitchen. Exterior of the dwelling
will be covered with shingles. Plans
are being prepared.

WOMEN'S CLUB—2 story and base,
frame, \$7,000. Richmond, Contra Costa
Co., Cal. Architect, J. B. Osborn, 611
Macdonald ave., Richmond. Owners,
Richmond Club. The building, which
will be designed somewhat like a large
residence, will be erected on Nevin
avenue. Interior finish will be of pine
and redwood. Hardwood floors will
be used in several of the rooms. There
will be a central heating system and
open fire place. Mantel will be of
brick. Exterior of the building will
be covered with cement plaster. Plans
are complete and construction will be
started as soon as funds can be raised.

L. Cory, Fresno. The building will be
erected at the corner of J and Fresno
streets and will have frontages of 150
by 65 feet. There will be several stores
on the first floor and a large number
of offices on the upper floors. There
will be a complete steel frame with ex-
terior walls of brick and concrete faced
with pressed brick or terra cotta. In-
terior partitions will be of hollow tile
and metal lath and plaster. Concrete
floors will be used. There will be steam
heat, elevator service, a vacuum
cleaning system and mail chutes. In-
terior finish will be of pine, hardwood,
metal trim and marble. Patent store
fronts and plate glass windows are
specified. The name of the architect
and further details of the work will
be published later. Construction will
be started within a couple of months.

RESIDENCE — 2 story and base,
frame, \$8,000. Fresno, Fresno Co., Cal.
Architect, J. Carl Thayer, Forsythe
Bldg. Fresno. Owner, P. W. Niede-
rauer. The dwelling has been designed
for an 11 room house with three baths
and sleeping porch. Interior will be
finished in pine and redwood. Hard-
wood floors will be used in the principal
rooms. There will be furnace
heat and open fire places. Mantels will
be of tile. Bath rooms will have com-
position floors and tile wainscot. An
automatic water heater will be in-
stalled. Exterior of the dwelling will
be covered with cement plaster on
metal lath. Plans are complete and
figures are being taken.

RESIDENCES—2 2-story and base,
frame, \$3,500 and \$5,000 respectively.
Fresno, Fresno Co., Cal. Architect,
J. M. Saffell, New Fish Bldg. Fresno.
Owner's name withheld. These dwell-
ings will each contain seven rooms and
bath. Interior finish will be of pine,
redwood and hardwood. Hardwood
floors will be used in the principal
rooms. The more costly house will
have furnace heat. Open fire places
will be used in the living rooms and
mantels will be of tile and brick. Tile
wainscot and composition floors will be
used in the bath rooms. Automatic
water heaters will be installed. Ex-
teriors of the houses will be covered
with cement plaster on metal lath, rus-

sh and map. Plans are now being
prepared.

EXCISES—1 1-story, frame, \$5,000. Ex-
cise School District, Kings Co., Cal.
Architect, J. Carl Thayer, Forsythe
Bldg. Fresno. Owners, Excelsior
School District. The building has been
designed for a one-room district school.
Interior finish will be of pine. Stoves
will be used for heating. Exterior of
the building will be covered with rus-
sh and cement plaster. Plans are now
being prepared.

Contracts Awarded.

STREET—1 story, frame, \$3,000.
Buena Vista School District, Kern Co.,
Cal. Architect, J. M. Saffell, New Fish
Bldg. Bakersfield. Owners, Buena
Vista School District. Contractor, O. C.
Squibb, Bakersfield. Contract price,
\$2,500.

SACRAMENTO, STOCKTON &
NORTHERN CALIFORNIA.

RESIDENCES—1 and 2 story and
base, frame. Cost not stated. Sacra-
mento, Cal. Architect, none. The fol-
lowing Day Labor jobs are reported
as about to be started in Sacramento:
E. A. Pierce, 2207 1st street, Sacra-
mento, 3 2-story frame dwellings, \$2,-
00 and \$3,000 respectively.

RESIDENCES—1 and 2 story and
base, frame. Cost not stated. Stock-
ton, San Joaquin Co., Cal. Architect,
none. The following Day Labor jobs
are reported as about to be started in
Stockton: C. A. Kennedy, 720 East
Weber street, 1 story frame dwelling,
\$1,500; J. E. Rice, 32 South Sutter street,
1 story frame dwelling, \$2,000; C. Ken-
yon, 727 East Fremont street, 2 story
frame dwelling, \$2,200; Charles F.
Carlsman, Stockton, 1 story frame
dwelling, \$1,500; W. E. Stuart, Stock-
ton, 1 story frame dwelling, \$1,000, and
George Lytle, 343 North Union street,
1 story frame dwelling, \$1,500.

CHURCH—1 story and base, frame,
\$8,000. Willits, Mendocino Co., Cal.
Architect, E. W. Hyde, Willits. Own-
ers, First Baptist Church of Willits.
The building will be erected on a cor-
ner site and has been designed with a
large auditorium and Sunday School
rooms. Interior will be finished in
pine and redwood. A central heating
system, probably furnace heat, will be
installed. Some art glass windows will
be used. Design is in the Mission style
and exterior will be covered with ce-
ment plaster on metal lath. A clay
tile roof will be used. Plans for this
work are now being prepared.

HIGHWAY CONSTRUCTION — Cost
not stated. State Highways, Califor-
nia. Engineer, State Highway Com-
mission, Forum Bldg., Sacramento.
Owners, State of California. Plans
have been completed for state highway
work in three counties and figures are
now being called. Five separate con-
tracts will be let for the work as fol-
lows: Fresno County from Fowler to
Kingsburg, (VI, Pre., 4, A), about 8
miles in length, to be built of Portland
cement concrete. Fresno County from
Fowler to Fresno, (VI, Pre., 4, B);
about 8 miles in length, to be built of
portland cement concrete. San Ber-
nard County from Upland to Citrus
Avenue, (VII, S. Bd., 9, A); about 10 1/2
miles in length, to be built of Portland
cement concrete. Santa Barbara Coun-
ty from Rincon Creek to Carpinteria
Creek, (V, S. B., 2, H); about 2 1/2 miles

Veneered Panels that

5th and Brannan Streets

San Francisco

Insist on getting the best made panels

You have a right to get the best for your money. You should therefore **insist** upon getting the WYBRO panels whenever you want the best made panels at the lowest price.

WYBRO panels are uniform in quality—they are everlastingly good—and they cost no more than the inferior makes.

in length, to be graded and paved in part with Portland cement concrete. San Luis Obispo County from Paso Robles to the northerly county boundary (V. S. L. O. 2, A); about 10½ miles in length, to be built of Portland cement concrete. San Luis Obispo County from Santa Margarita to Atascadero Creek, (V. S. L. O. 2, C); about 8½ miles in length, to be built of Portland cement concrete. Plans, specifications and full particulars can be secured by addressing the State Highway Commissioners at Sacramento. Bids will be opened on November 17th. An official proposal appears in another column of this issue.

HOTEL AND STORES—2 story and base, brick and steel, \$20,000. Willits, Mendocino Co., Cal. Architect, E. W. Hyde, Willits. Owner, T. Scheve. The building is being erected on a corner and will contain stores, the postoffice and a moving picture theatre on the first floor. Upper floors are arranged for guest rooms. Interior finish will be of pine throughout. A central heating system and hot water supply will be installed. All interior finish in the post office will be of metal. There will be patent store fronts. Exterior of the building will be faced with cement plaster. The work is being carried on by Day Labor.

Contracts Awarded.

GARAGE—1 story and base, brick and steel. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Ralph E. Morrell, Odd Fellows' Bldg., Stockton. Owner, Mrs. Frankenhimer. Contractor, Frank Tucker, North Sierra Nevada street, Stockton. Contract price not stated. Notes—The entire building has been leased to Lee and Tucker, North Eldorado street, Stockton.

Building Contracts

SACRAMENTO COUNTY.

LOT 3, N. L. 12TH AND 9TH STS., Sacramento. Alter dwelling.
Owner.....Mrs. Julia G. Runkel, 12th & K Sts., Sacramento.
Architect...None.
Contractor, A. V. Henry, 1621 12th St., Sacramento.
COST, \$500

LOT 6, J. K. 9TH AND 10TH STS., Sacramento. Alter dwelling.
Owner.....G. O. S. Sauer, 1719 P St., Sacramento.
Architect...None.
Contractor, Marshall & Haley.
COST, \$4,000

LOT 6, I. J. 29TH AND 30TH STS., Sacramento. Alter dwelling.
Owner.....W. R. Meiss, 2917 J St., Sacramento.
Architect...None.
Contractor, Cippa Bros., 314 21st St., Sacramento.
COST, \$1250

LOT 13 BLK 3 Boxler Tct., Sacramento. Erect dwelling.
Owner.....E. A. Pierce, 2207 1st St., Sacramento.
Architect...None.
Day's work.
COST, \$2600

LOT 15 BLK 3 Boxler Tct., Sacramento. Erect dwelling.
Owner.....E. A. Pierce, 2207 1st St., Sacramento.
Architect...None.
Day's work.
COST, \$2500

LOT 7 SUB 2, Boxler Tct., Sacramento. Erect dwelling.
Owner.....E. A. Pierce, 2207 1st St., Sacramento.
Architect...None.
Day's work.
COST, \$3000

DEL PASO HEIGHTS, School Site. One-story frame school building.
Owner.....Del Paso Heights School District.
Architect...None.
Contractor, Sacramento Home Bldrs., Forum Bldg., Sacramento.
Filed Oct. 24, '13. Dated Oct. 23, '13.
COST, \$688

LOT 14 BLK 44 Oak Park, Sacramento. Erect dwelling.
Owner.....Roy Smith, 3425 Orange Ave., Sacramento.
Architect...None.
Contractor, J. C. Dillard, 3117 Magnolia St., Sacramento.
COST, \$2500

LOT 1, T. U. 4TH AND 5TH STS., Sacramento. Alter dwelling.

SAN JOAQUIN COUNTY.

LOT 18 BLK 6, Yosemite Terrace, Stockton. All work for one-story frame bungalow.
Owner.....Mrs. S. Campbell, Stockton.
Architect...None.
Contractor, Smett Bros., 826 N-Van Buren St., Stockton.
Filed Oct. 28, '13. Dated Oct. 27, '13.
Roof on\$750
Plaster completed 750
Building accepted 750
Usual 35 days 750
TOTAL COST, \$3,000
Bond, limit, forfeit, none. Plans and specifications filed.

LOT 6 BLK 76 W of Center, Stockton. All work for one-story frame residence.
Owner.....N. I. Ross, N-Sutter St., Stockton.
Architect...A. Walter King, Elks' Bldg., Stockton.
Contractor, Arthur Paulson, Stockton.
Filed Oct. 24, '13. Dated Oct. 27, '13.
Foundation in\$200
Frame work up 400
Building enclosed 354
All plastering completed 354
All work completed 294
Usual 35 days 568
TOTAL COST, \$2,270
Bond, \$1135. Sureties, T. S. Dowman and Geo. Smith. Limit, Dec. 13, '13. Forfeit, \$3 each day not completed. Plans and specifications filed.

SAN JOAQUIN AND JACKSON STS., Stockton. Remodel stairs, etc in Jackson School.
Owner.....Board of Education, Stockton.
Architect...Stone & Wright, 26 So. California St., Stockton.
Contractor, W. Daniels and H. Green, 623 W-Park St., Stockton.
Filed Oct. 28, '13. Dated Oct. 24, '13.
On 1st of each month 75%
Usual 35 days 25%
TOTAL COST, \$37,540
Bond, \$19,000. Surety, Globe Indemnity Co. Limit, 120 days. Forfeit, \$10 each day after date said. Plans and specifications filed.

LIENS RELEASED.

SACRAMENTO COUNTY.

RECORDED AMOUNT
Oct. 23, 1913—W ½ OF LOT 7, R. S. 16th and 17th Sts., Sacramento.
Clark & Henry Constr Co to Elizabeth Ott, \$187.69; Same to Same
.....\$187.69

gravel roof, brick floor on the first story, pine above, and steel beams and girders. The cost will be \$10,000. There will be a frame office building 21x60 feet, with rustic interior, and electric wiring. Cost, \$2,500. A frame machine shop 10x100 feet will cost \$3,550, and a sand house will cost \$3,000. There will be a concrete toilet building 26x15 feet, with cement floors and composition roof to cost \$5,000. A reinforced concrete machine shop 60x114 feet, with concrete floors and composition and tin roof will be built to cost \$12,500.

MOVING PICTURE THEATRE—1 story and base, brick, \$15,050. Los Angeles, Cal. Architects, Austin and Ponnell, Wright and Callender Bldg., L. A. Owner, Joseph L. Murphy, Contractors, Boman and Klarnquist, Union League Bldg., L. A. Contract price, \$15,050.

PORTLAND AND OREGON.

PILE AND CONCRETE BRIDGE—Cost not stated. Salem, Ore., Engineer, W. W. Lucius, Portland. Owners, City of Salem. Plans are now being prepared for a bridge 600 feet in length. A portion of this bridge 250 feet will be of reinforced concrete construction and the balance of pile and timber. There will be a 30 foot roadway and 2 six foot walks, one on each side of the roadway. Plans will be completed in the course of three weeks and bids will then be called for by the City Council. Further mention will be made of this work at that time.

CREAMERY—3 story and base, reinforced concrete, \$30,000. Portland, Ore. Architects Emil Schacht & Son, Commonwealth Bldg., Portland. Owners, Townsend Creamery Co. The building is to be erected at the corner of 7th and Everett streets covering an area of 100 feet square. Only the first floor will be of reinforced concrete, upper two stories being of brick and mill construction. The various departments of the creamery will be housed in separate parts of the building. Construction will be fireproof. Much marble and tile will be used. Concrete floors will be used throughout. The estimated cost does not include pasteurizing or cold storage machinery. Separate contracts will be let for the mechanical equipment. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

GARAGE—1 story and base, steel and reinforced concrete, \$15,000. Tillamook, Ore. Architect, E. E. McLaren, Lunt or Exchange Bldg., Portland. Owner's name withheld. The building has been designed for a commercial garage and will cover an area of 100 by 162 feet. There will be a steel frame and exterior walls of reinforced concrete. A cement floor will cover the entire area. Plans provide for metal window sashes and frames and special gasoline storage tanks. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken. A general contract will be let.

Contracts Awarded.

CHURCH—1 story and base, frame, \$9,000. Portland, Ore. Architect, C. A. Hoot, Belling & Co., Henry Bldg., Portland. Owner, Episcopal St. Vincent Parish. Contractor, J. P. Dango, no. 295 151 1/2 street, Portland. Contract price, \$10,000.

BANK—2 story and base, brick and steel, \$20,000. Beaverton, Ore. Architects, Claussen & Claussen, Macley Bldg., Portland. Owner, F. W. Cady, Contractor, Bert Houten, Beaverton. Contract price not stated.

DEPOT SHEDS—Steel frame, \$10,000. Portland, Ore. Architect, Engineering Department Northern Pacific Terminal Portland. Owners, Shrdin Shrdindun Co., Portland. Owners, Northern Pacific Terminal Co., Contractor, Charles McGonigle, Chamber of Commerce Bldg., Portland. Contract price, \$10,000.

SEATTLE AND WASHINGTON.

PACKING PLANT—Group of 1 and 2 story concrete and frame buildings, \$200,000. Steveston, B. C. Architect, none. Owners, British Columbia Packers' Association, Steveston, B. C. All buildings will be carried on pile foundations and will have reinforced concrete walls. Other parts of the work will be of frame construction. Three separate contracts will be let, general construction of the buildings, electric work and mechanical equipment. Exteriors will be covered with cement plaster and rustic. Plans are complete and in the hands of the owners who are now taking figures on the work.

PAINTING CONCRETE AND CEMENT WALLS.

By A. Ashmun Kelly in the National Builder.

Owing to the porous nature of concrete and cement work generally, it is found necessary to protect the exposed surface from the action of rain or dampness. Water filters easily through it, and this is the reason for works, constructed from such material, deteriorating in time. A variation exists in the permeable qualities of concrete or cement work, the determining factor in the case of concrete being mainly the density of the mixture; where considerable cement is added the porosity will not, of course, be as great as where less quantity is employed. Capillarity decreases with the process of time. It is well to remember these facts when about to treat such material with filler or paint.

Many substances have been tried in the effort to decrease the porosity of concrete, most of them incorporated with the mixture of sand, etc. Most of these experiments have not proven satisfactory. The purpose of these treatments is to make the substance impervious to water. Some have proven quite satisfactory, the best resulting in the taking up of only five per cent. of the amount of moisture taken up by untreated blocks. In some instances it has been found that the addition of certain waterproofing substances has weakened the concrete, while in others it has not thus affected it, but has materially improved it.

Coming to the painting of concrete or cement surfaces, we may say that two purposes are served thereby, namely, the sealing of the pores of the material, and the enhancing of appearance of same. One of the troubles with cement work is the efflorescence, or exudation, of soluble salts from the action of moisture on the cement. This

can be overcome only by either filling the substance with some waterproofing liquid, or painting the surface with a proper paint or filler.

It has been found that certain pigments have a bad effect on cement. But any inert pigment, such as the earth colors, ochre, umber, sienna, Vandyke brown, etc., being inert, have no harmful influence in this case. Water-soluble dyes have not been found harmful; they are used when more brilliant coloring is desired. Grease will injure fresh cement but not old cemented work.

Floors made of concrete and cemented soon become dusty, and sweeping the floor aggravates the evil. The only thing to do is to paint the floor. This ought to be done in the beginning, or before dust begins to show.

All cements contain more or less alkali, hence in order to prevent action of the alkali on any oil the paint may carry we must neutralize the said alkali. But an acid will injure the cement. Some substance capable of changing the alkali to insoluble salts has been tried, but it is found that to attempt to change the alkali thus, or to get rid of the alkali by neutralizing it, is not satisfactory. First, there should be applied a filler substance, something like a thinned varnish, which will penetrate and fix the alkali, and leave a good surface for ordinary oil paint. On a floor done this way there may be used the ordinary best floor paint. Before applying filler or paint let the surface be carefully brushed off, to remove every particle of dust or grit. But do not make the mistake of washing the surface first with water, for the moisture will sink in more or less and is hard to get out. Concrete requires a long time to dry out. And if a concrete floor is not perfectly dry before it is painted there will be some scaling off of the paint at some subsequent time.

As with painting on wood, thin coats are to be preferred to heavy coats, and even more so in the case of concrete than with wood, for there is not as good a holding surface in the former case. While one coat of paint over the filler will answer, yet two thin coats are still better.

The filled, alluded to as something akin to a thinned varnish, should not be applied so as to leave a glossy or varnish-like surface, for it will not give as good a result. The filler should sink in and leave a mere stain to indicate its presence. If the filler has been applied too thick, brush some turpentine over it before applying the coat of paint.

It has been established that exterior walls coated with cement will take paint all right and without any preparing with filler or other waterproofing, if allowed to stand to the weather for, say, a year. In this time the alkali bleaches out and the cement hardens and so affords a very safe surface for any ordinary paint.

THE VARIOUS USES OF MAPLE WOOD

Maple, the Forestry Bureau says, is one of the chief woods used for agricultural implements and farm machinery, being so employed because of its strength and hardness. All kinds of wood-ware are made of maple, which holds important rank also in the

manufacture of shuttles, spoons and bobbins. It competes with black gum for first place in the manufacture of rollers of many kinds. From these employed in house moving to the less massive ones used on farm mowers. Athletic goods, school supplies, brush backs, pulleys, type cases and patches are a few of the other articles for which maple is in demand.

Seven species of maple grow in the United States, of which sugar maple, sometimes called hard maple, is the most important. The total output of maple in the United States annually amounts to about 1,150,000,000 feet. Nearly one-half is produced by Michigan, with Wisconsin, Pennsylvania, New York and West Virginia following in the order named. Sugar maple, says the department, is in little danger of disappearing from the American forests, for it is a strong, vigorous, aggressive tree, and though not a fast grower is able to hold its own. In Michigan it is not unusual for maple to take possession of land from which pine or hardwoods have been cut down, and from New England westward through the Lake states and southward to the Ohio and Potomac rivers, few other species are often seen in woodlots.

HOW THE STATE CONDUCTS ITS BUSINESS.

It is doubtful if there is a corporation in California that conducts its affairs along more businesslike lines than does the State. Under the new order of things that came with the Johnson administration.

A system of pre-estimated expenditures by the Board of Control gives that body direct supervision over all proposed expenditures by the divisions, department and offices, and enables it to call a halt where it is planned to exceed the available fund. Where it is planned to expend money for a purpose not contemplated in the appropriation granted by the Legislature. This is check No. 1, and is an important check it is too.

But if no objection is found to a pre-estimate of expenditures and the proposed indebtedness is approved, there are other systems of checks to see to it, first, that the money is ordered or work as contracts for some up to standard; second, that the profits charged do not exceed the figures given in the pre-estimate; third, that all extensions and totals are correct; and, fourth, that the claims against the State are drawn against the proper funds. All claims are audited by the Board of Control and the State Comptroller and if found correct the latter draws the warrants for payment.

The Board of Control and the Comptroller's office, as a matter of fact, work together and constitute a checking system by which it is practically impossible for the State to be deprived of what properly belongs to it. While their duties to some extent are identical, yet they differ materially in other respects. The Board of Control inaugurates proceedings by means of the pre-estimate system, while the Comptroller winds them up by checking the payments, the responsibility falling upon him in the final analysis to see that no illegal claim is paid and that no warrant is drawn except on the proper fund.

Never in the history of the State has

its business been conducted so efficiently. Not only has graft been stopped, but waste as well. The people are now getting a dollar's worth for every dollar spent. The saving to the taxpayer has been tremendous.

Despite the natural increase in the cost of running the State, due to its wonderful development, and regardless of many unusual expenses, such as \$500,000 for free school books, the rate of taxation under Governor Johnson has averaged much less than the rate for any two years during the office.

NATURAL-GAS PRODUCTION.

Related return, to the Geological Survey show that the total production of natural gas in West Virginia in 1912 was 239,088,068.000 cubic feet, valued at \$33,349,021, and in Pennsylvania, 112,149,855,000 cu ft. feet, valued at \$18,539,672. This gives West Virginia an additional lead of \$4,000,000 in value over figures recently issued by the Survey.

RAILROAD NEEDED TO YUKON VALLEY, ALASKA.

The estimated value of the gold produced in the Alaska portion of the Yukon basin in 1912, was \$8,645,000, compared with \$9,050,000 in 1911. This decrease is due to the falling off of the output from the Fairbanks and Hot Springs districts, for the other Yukon camps either held their own or somewhat increased their output compared with the preceding year.

The Fairbanks district continues to be the largest producer of placer gold in the Yukon country. It can not maintain this position long, however, without a radical change in mining conditions which will make it possible to exploit profitably its extensive bodies of low-grade placers. But little has been accomplished in this direction and the best hope of the future lies in obtaining direct railway connection with tidewater.

BORAX DEPOSITS IN CALIFORNIA.

Deposits of colemanite, an ore of boric acid and borax, were discovered in Ventura County, Cal., in 1898, and the district has yielded about 25,000 tons of crude ore, valued at approximately \$1,000,000. This colemanite, although classed among the few important deposits of this kind of ore in the country, has suffered the disadvantage of being a long distance from the main routes of transportation. As in the case of many other western industries, however, it is expected that the opening of the Panama Canal will greatly stimulate production. An examination of the borate deposits of Ventura County was recently made by Hoyt S. Gale, of the United States Geological Survey, and while the investigation was not sufficiently detailed to permit an expression of opinion as to the magnitude of the undeveloped deposits, it is believed that they are very considerable. Mr. Gale's report of the investigation, as just been published as division of mines from the Bureau of Mines, is available to the public upon application to the Director, U. S. Geological Survey, Washington, D. C.

START \$300,000 TANK.

MARYSVILLE (Yuba Co.), October 29.—The Cahill Construction Company has commenced the erection of the \$300,000 gas tank for the Pacific Gas and Electric Company at Fifth and Walnut Streets in this city. The tank, which will be the largest in the State east of Sacramento, will hold 150,000 cu. feet.

The present work consists of placing the foundation, which will be completed by the end of this month. It is estimated that the tank will be completed by Christmas.

AMERICAN SAWMILL FOR JAMAICA.

An American company has built a sawmill at St. Margaret's Bay, seven miles from Port Antonio (Jamaica), which will shortly be ready to go into operation. This mill has a capacity of sawing 10,000 feet of lumber and of making 5,000 to 10,000 shingles a day. It is proposed to saw mahogany, Spanish or West Indian cedar, mahoe, greenheart, bullet, satinwood, ebony and lignum vitae for export and local consumption. This mill gives to cabinet makers and furniture manufacturers in the United States an opportunity to test the value of some of the woods of Jamaica.

PROVERBS FOR CHINESE WOMEN.

From "China Revolutionized," by John Stuart Thomson.

You cannot tell a good husband that his wife has a defect.

Early and beautiful daughters all have one face to a true mother.

Mother's love is even in beasts, for the strongest tiger will not eat its mother.

Deeds are better than admiration.

A virtuous wife is like a loyal statesman; she knows only one king, her husband.

Mother and father first and wealth last.

She is dead indeed who walks around with a dead heart.

If you listen to everyone's advice, the same will never be straight on the road.

Don't pine purse and not thine eyes.

Don't see what to buy.

You cannot expect the looking glass to reveal more than you put in it.

CONSTRUCTION WORK ABROAD.

Argentina.

Electric-Light Plants.

Mr. Barthelémy will shortly apply to the Municipality of Garin (Buenos Aires) for a concession for an electric-light station.

There is a movement in Azul to connect the Co-operative Electric Light Plant with the city. The contract for public lighting of the Cba. de Electricidad de la Ciudad de Buenos Aires shortly executed and it is not yet known if it will be awarded. The commissioner is consulting with the leading citizens on the subject.

Heligian Kongo.

New Port on Lake Tanganika—Railway Construction.

The construction of the port of Alton on Lake Tanganika is to be started at once, under the supervision of Capt. Mauritzen, hydro-

grapher of the Danish navy. This town is situated in Kougo on the western bank of the lake and is the terminus of the Great Lakes Railroad, which, when completed, will connect the lake with Kabalo, just south of Bull, on the Kougo River.

This will open up a new commercial route for the Katanga district, offering quicker means of transportation for passengers and merchandise between the district and Europe than is possible under existing conditions. The Germans are already building their lake port at Kigoma-Ujiji, in German East Africa, which will be the terminus of the railroad to Dar-es-Salaam. The two lake ports will be connected by a line of steamers, the first of which, a vessel of nearly 1,000 tons, is now being constructed by a German company. The new route to the Katanga district will have a great effect upon the development of this part of Africa. The itinerary from Europe will be as follows: By steamer to Dar-es-Salaam, thence by rail to Kigoma, across Lake Tanganyika by steamer to Albertville, and from that port by rail to the interior of Katanga. This will occupy several days less than the present means of communication via Boma, Matadi, Leopoldville, and the long and tiresome river trip up the Kougo. The actual difference in time will probably be about 12 days.

Work on the Dar-es-Salaam or Tanganyika Railway to Kigoma is being pushed, and great numbers of native laborers are now employed in its construction. The contractors hope to reach Kigoma at the end of 1913.

Ceylon.

The Indo-Ceylon Railway.

In continuation of the announcement in Daily Consular and Trade Reports for August 4, 1913, it is stated that the new railway connecting India with Ceylon across Adam's Bridge will be opened on the Indian side on January 7, 1914, for freight carrying only, as the Ceylon railways have not yet sufficient cars available to handle the expected passenger traffic at that time. Three new ferry steamers from England are expected to reach Tuticorin by the end of October. The contract for running them has been awarded to the British Indian Steam Navigation Co. Straits Settlements.

Durian Daun Hospital.

The Government Gazette of August 29 announces that the Legislative Council, on June 22, approved the expenditure of \$23,275 (U. S. currency) for carrying out additions and repairs, including European ward and nurses' quarters, at Durian Daun Hospital, Malakka.

New Zealand.

DISPLACEMENT OF COAL BY OIL.

On account of the large production of petroleum in California and its use for fuel, coal mining has practically ceased in that State, the production in the last two years being only 16,717 tons in 1911 and 16,978 tons in 1912, according to Edward W. Parker of the United States Geological Survey.

The production of petroleum in California in 1912 was 86,150,767 barrels, of which not less than 50,000,000 barrels was used directly for fuel. Large quantities of oil are also used in place

of coal for gas making, and on the estimate that three and a half barrels of petroleum is equivalent to one ton of ordinary bituminous coal, it is probable that from 1,100,000 to 1,500,000 tons of coal would be required to perform in California the service now rendered by petroleum in the production of heat, light and power. California oil is the principal fuel for locomotives as far north as Washington and across the Sierra and Cascade range, its freedom from spunk serving as a great protection against forest fires, as compared with coal or wood fuel. It is used almost exclusively on inland and coastwise steamers, and to an increasing extent by the transpacific steamers. It has even displaced coal on Puget sound, many of the steamers of the Canadian Pacific fleet plying between Vancouver, Victoria and other points having been equipped for oil burning. There is still, however, some demand for coal in California, particularly for domestic use and for bunker trade at San Francisco, but it is almost exclusively supplied by coals from other states and from abroad.

There are, however, in California, a number of small, widely separated coal fields, chief among which are the Mount Diablo field of Contra Costa county, the Corral Hollow field of Alameda county, the Priest valley and Trafton fields of San Benito county and the Stone Canyon field of Monterey county. The first two, which are on the eastern border of San Francisco bay, and consequently in the west-central part of the State, produce black lignite or subbituminous coal. The coals in Monterey county are of the same geologic age as those farther north, but they have been altered into true bituminous coals. The alteration in the San Benito county areas has not progressed so far as in Monterey county, but the coals closely approach the bituminous grade. None of them possess coking qualities.

A LOCOMOTIVE 24 FEET HIGH.

From the Chicago Examiner.

The largest passenger locomotive in the world pulled into the La Salle Street Station the other day. It is the first of thirty monsters building for the Chicago, Rock Island & Pacific Railroad and will run on the Western division. The locomotive, with tender, is one hundred feet long, the engine eighty-five feet and the tender fifteen. It is twenty-four feet high and weighs 333,000 pounds, or 166,000 pounds without the tender.

It can pull twenty passenger or Pullman cars with ease. There are four 69-inch driving wheels on each side, the largest wheels on any locomotive in the world. The weight on the driving wheels is 221,000 pounds. The engine has a traction power of fifty thousand pounds and runs with a steam pressure of 185 pounds.

New steel equipment necessitates these powerful machines. The Rock Island passenger equipment is now 25 per cent steel and on through mainline trains 51 per cent, exclusive of the Pullmans. The locomotives are built by the American Locomotive Company at the Schenectady plant, at a cost of \$181,161,000 in autos, not including works.

RAILROADS' ANNUAL REPORT.

The annual meeting of the stockholders of the Sacramento & Woodland Railroad Company was held Saturday, and all the outgoing Directors and officers were re-elected, headed by T. T. C. Gregory, its President. Practically all the stock was represented.

The company's report for the year showed a surplus earned over bond interest and charges and expenditures of every sort of \$21,000. This net sum was distributed as dividends on the company's outstanding stock, aggregating \$1,000,000. Very few roads achieve as good a showing as this in their first year of operation.

The main line has been completed from far up in the Suisun Valley to Vacaville Junction, with two branches connecting Vacaville and Suisun and Fairfield. It is proposed now to extend the main line from Woodland in the direction of Winters.

The Northern Electric Railway Company, the holding corporation, applied to the Railroad Commission for an order extending from November 1, 1913, to November 1, 1914, the effective date of the Commission's previous order authorizing the company to issue \$8,000,000 bonds. Of this sum \$5,500,000 is desired for the construction of the Vallejo & Northern Railway and the balance was for refunding purposes.

CALIFORNIA AUTOMOBILES.

The total number of automobiles now licensed in California is 129,776, which, at an average cost of \$1,500 a car, shows

The number of automobile licenses issued during October to the close of business yesterday afternoon was 2,391, an increase of 100 over the number of automobiles registered during September, according to figures compiled by Motor Clerk Mansfield. Four hundred and fifty-five chauffeurs were also licensed, and 123 transfers made.

EXPERIMENTS WITH WIRELESS POWER.

ELK GROVE (Sacramento Co.), October 27.—Representatives of the Pacific Gas & Electric Company of Sacramento and several automobile loads of Elk Grove citizens journeyed to the De Roza ranch, two miles west of Elk Grove, yesterday, to see young Roy Thompson operate a thirty-five-horse-power test motor by electricity attracted from the atmosphere by magnets, Leyden jars and tuning coils.

The electric people have become so interested in Thompson's experiments that they loaned him the test motor, saying that if he could make it run by his device he could operate a street car by the same system. It required 400 volts to start the motor.

Thompson's experiment with the motor was a perfect success, for he had the motor running at full speed in the presence of all without any visible means of power.

Another valuable principle that this young electrical genius has discovered is to compel the sound waves that carry wireless messages to operate a Morse telegraph instrument. This he has done.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

CALL Douglas 2944

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires
Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London
The Ritz, London

The Hyde Park, London
The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelrys with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

OTIS ELEVATOR COMPANY

Stockton, North Point and Beach Sts.
San Francisco

Offices in all Principal Cities of the World.

OFFICE PACIFIC TEL. & TEL. CO.

Basement walls 22 ft. high. Cement plastered on inside against severe water pressure. Plaster waterproofed with Imperial Water Proofing.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

"KINNEAR" STEEL ROLLING DOORS & SHUTTERS

KINNEAR STEEL ROLLING DOORS are designed to afford fire protection and for the closure of all openings in which ease and speed of operation and economy of space are considerations. They are adaptable to all classes of new or old building construction and by their use make possible the closing of very large openings which could not otherwise be conveniently covered.

In addition to the above uses, their extensive employment for fire protection and the high degree of efficiency shown by them in actual fires, has caused the KINNEAR Company to produce a shutter of a distinctly fire retardant character. With this end in view, numerous tests extending over a period of five years were made, and effects carefully noted. As a result, we are now in a position to offer for special fire protective purposes KINNEAR Steel Rolling Doors and Shutters of the "Abacus" Construction, all of which bear the label of the "National Board of Fire Underwriters' Laboratories."

Special Catalogue showing Abacus Construction can be obtained on application.

Recent great conflagrations have fully vindicated the claim of the "KINNEAR" STEEL ROLLING DOOR to pre-eminence as a fire-stop. Placed side by side with various other forms of fire retardants it has in every case remained in place even after the others were destroyed.

We will consider ourselves favored if allowed to explain and make quotations on any constructions meeting your definite needs.

**We have just received from the press a new Handbook on Steel Rolling Doors and Shutters Illustrated only with California Installations.

Editorial Comment.

Building construction for the month of October showed a slight decline in the amount of contracts filed for private construction. Less than two million dollars is the total amount recorded including that of the Panama Pacific Exposition. Segregated the figures are as follows: Brick and fireproof construction, \$843,385; frame buildings, \$665,392; alterations and additions, \$145,432; Panama-Pacific Exposition contracts, \$283,863; total \$1,838,077.

This record, however, is about an average one for the month of October in the City and County of San Francisco. Compared with other years the record for the past decade is as follows:

October, 1904.....	\$1,398,524
October, 1905.....	1,499,510
October, 1906.....	6,826,331
October, 1907.....	4,986,508
October, 1908.....	3,632,947
October, 1909.....	2,983,385
October, 1910.....	1,772,952
October, 1911.....	1,928,826
October, 1912.....	1,918,839
October, 1913.....	1,878,077

It will thus be seen that for the past three years construction work and private contracts have not varied much for the month of October. Outside of the rebuilding period October has generally gone below the two million mark. This year has been no exception to the rule. And from the indications the year will finish out about as it started in with a good general average under the circumstances and a better average than most other cities representing building centers will show.

The situation in Mexico seems to have reached a crisis. Dictator Huerta has a wildcat by the tail, he can neither hold on or let loose. So far as reports go President Wilson has demanded that he be eliminated and get out of the position of authority. This seems the only method of clearing the situation and establishing any kind of a just or free government.

The President has been criticised for giving warning to all Americans to leave Mexico. It is said that he refuses American citizens the protection of the flag. The fact is that he has sought by the most fair means to establish justice and lend support to any fair government that might be established in Mexico. Had he told Huerta or any body else to protect Americans in Mexico any of them would have been equally unable to do so. If war had been declared or a movement had been made to coerce the country, in all probability a great many Americans would have been murdered before any

protection could have been furnished by anybody.

Whether Huerta can see the handwriting on the wall will soon be determined. If he is wise he will see that there is but one end to it all and that is for him to get out. The only hope that he can entertain is to play one power off against another if intervention becomes necessary and even then his power and even his life hangs by a single thread. For he placed himself in power by betraying and assassinating the president under whom he served. There are many of his countrymen who would be glad to deal with him in the same manner. Certainly he sails a stormy sea in which there are many hidden rocks. Uneasy lies the head that wears a crown, when the crown has been secured by such means as he has employed.

Things in Mexico seem to be going mostly on in true Mexican fashion. Now comes the report that Gen. Felix Diaz has been stabbed at Havana in an attempt at his assassination. Dead men tell no tales and are poor centers around which to build a revolution seems to be the motto of the Huerta government. If the thing keeps up the stinks of the generals in Mexico will be as dangerous a situation as that of the common soldiers. Certainly the succession of events are not increasing Huerta's claim for the head of the government.

Reports on the rice crop in California state that from 150,000 to 250,000 sacks of that food will be harvested in this state this year. This means an addition to the products of this commonwealth which are already more varied than that of any state in the Union. Rice is a staple food product and forms the principal diet of more than half of the human race. With the river lands used for rice growing a new crop is added which ought to be profitable to the growers.

Reports from the Exposition show a goodly pay roll on the buildings being constructed, and improvements being made. From now on for the period of one year the number of men employed should be on the increase as the State buildings and other structures to be erected will be steadily on the increase.

The contracts on the Municipal railway extension will soon be let. What will the auditorium being under construction, the new City Hall being erected and improvements going on in the Civic Center the new year ought to open with a goodly number of men employed in the building business. And with these improvements going on there ought to be at least as good times in San Francisco for the builders as in any other place, perhaps a little better.

Foundation Problems In Erecting Structures

—By John L. Hall—

The first essential to a great structure is a good foundation. Let us, therefore, go below. Following one of the steel columns to its base, you will probably find a cast iron pedestal that serves to spread the column load over a larger area of concrete. This concrete which supports the column base is known as the "caisson." It is in the form of a cylinder or a rectangular prism, which penetrates deep into the soil and stands on a firm rock floor.

If foundations are among the most important—they are also among the most interesting engineering features of building construction. Caisson foundations are used very extensively in the lower end of New York, where the rock lies at considerable depth below the surface. There is usually a layer of cemented gravel hardpan on top of the rock and then a bed of beach sand filling up to near the surface of the ground. The sand is saturated with water so that an open excavation cannot be made to any great depth. As many of the caissons reach a depth of 60 to 100 feet, the work is done by the aid of compressed air.

The method employed is as follows: The place selected for a caisson is laid out, and a strong wooden box, called the working chamber, is built over it. The bottom is left open, and the bottom of the sides is sharpened to an edge. This edge rests on the ground and is called the cutting edge. A round hole is made in the center of the top about 21 inches in diameter, and to this is fitted a tall iron tube or vent having an iron ladder inside for the laborer's use. At the top of the vent tube is an enlargement called the air chamber. This has a door or a valve in the bottom communicating with the tube, and a door in the top opening to the outer air.

Forms are now built up from the working chamber and a mass of concrete is poured around the vent forming a block just covering the top of the working chamber, and built to any height desired.

The weight of the concrete forces the cutting edge into the ground. Laborers inside shovel the soil into buckets, which are hoisted through the vent. When the water line is passed and the water begins to be troublesome the air chamber above is closed and air pumped into the vent until the pressure forces the water outside the working chamber and the excavation proceeds to the desired depth. As the caisson sinks, the concrete is built up, and the vent lengthened. Finally, when rock is reached, or the cutting edge penetrates the hard pan, the working chamber and vent are filled with concrete, the air chamber is removed, and the caisson is ready to receive the column base.

As the depth of excavation below the water line increases, the air pressure must be increased at the rate of about three pounds per square inch for every seven feet of depth. Life at sea level is adjusted to an air pressure

of 15 pounds. At a depth of 35 feet in the pneumatic caisson this pressure is doubled. At 70 feet it is four atmospheres, at 105 feet five atmospheres, and at 140 feet six atmospheres, a pressure which is practically prohibitive to human life.

The deeper excavations require very short shifts and long rests for the men. The progress becomes very slow and expensive, and many human lives are unavoidably sacrificed.

Where the rock is too deep to be reached by pneumatic caissons, as it was at the new Municipal Building near the entrance to Brooklyn bridge, the caissons are widened out at the bottom by undercutting the sides and are permitted to rest permanently on the sand.

There was a man in the Scriptures who built his house upon the sand, but that was apparently above the ground—for sand in a deep excavation makes a pretty firm foundation. I have here known a pressure of 30 tons to the square foot to cause only a fraction of an inch settlement. The important thing about sand for the support of foundations is that it must be at a depth which will not be disturbed by subway or other excavations.

The method of building in Chicago is much simpler. The rock or overlying hard pan which serves to support the caissons is 80 to 100 feet below the surface in the business center, but the soil is a blue clay which is nearly impervious to water. So that it is practicable to dig open wells to the depth desired. The wells are walled with short wood staves, which are driven ahead as the digging proceeds, and the staves are held in place by iron hoops made in two half circles and fitted together inside of the staves.

Among the other types of foundations used are wood piles, which are driven in soft wet ground on the tide lands, and concrete piles for soft ground where the saturation is not sufficient to preserve wood piles. After these come spreading footings of steel grillage, reinforced concrete, or masonry.

All of these types are used on Manhattan Island—for if you could follow the rock floor updown from the building we have been examining, you would presently find yourself at the surface. When it becomes necessary to blast the rock for basements, it is often feasible to set the column directly on the rock, by leveling up with cement.

After foundations, the most important structural member is often the column. Let us therefore return to the place of beginning and look at the steel column. It will be found to be the largest in its lowest story and becoming in size with each succeeding story to the top of the building. Each column carries its portion of the top floor, besides the column above. It therefore carries part of one floor and roof. The next story column lower carries a corresponding part of two

floors and roof and so on to the bottom story, which carries part of all floors and roof.

Thus it will be seen that a column in a high building is like the trunk of a tree, which increases toward the bottom as its load increases. Except, of course, the increase in a tree trunk is more gradual and more graceful.

Consider next how the several floors are supported. The weight of a floor rests upon steel beams and the beams connect to girders, which are riveted to the columns. A beam or girder, unlike a column, carries only one floor. The corresponding beam therefore may be of the same size in all floors. The walls also are carried on beams at the floor level in each story—so there is never much load on the masonry in a tall building. An exception to this rule occurs in the north half of the Monadnock block in Chicago. This 17-story building has self-supporting walls, which are four or five feet thick at the ground story.

In fireproof buildings the floors between beams are constructed of hollow tile arches or concrete slabs. Brick arches are no longer used for that purpose except occasionally in vaults and sidewalks.

You have now seen the principal elements that make up what is known as skeleton construction, namely: Beams, girders, columns and foundations. One thing in the walls may have escaped your notice, and that is the wind bracing. In tall buildings this becomes a very important factor.

The designing of the foundations and framework of buildings constitutes the work of a structural engineer. His problem consists in determining what forces are to be resisted, and in providing the safest and most economical means of resisting those forces. The principal forces are of two kinds: vertical and horizontal. The vertical forces are the weight of the materials used in the construction, and the floor loads to be carried. The horizontal forces are the wind pressure and the earth pressure.

The structural design comprises the calculations, framing plans, foundation plan and specifications. Afterward the shop details follow as part of the steel contract, and these may either be made by the designing engineer or simply approved by him.

It would be possible to enlarge upon the various elements of the construction; to note, for instance, the changing styles of columns beginning with round and square cast iron columns; next the circular steel columns known as the Phoenix column, the Z-bar column, the channel column, the angle and plate column, the Gray column, made of I-beams, the Lathier column, made of angles and battens plates, and the new H-shaped columns rolled at Bethlehem, Pennsylvania. Then we might note the various kinds of beams and girders, including plate girders, lattice girders and trusses of many varieties.

It would be interesting also to note the special conditions in certain buildings, as, for example, the New York Times building, with the subway station under it intercepting most of the columns, so that they must be carried on heavy girders to other columns situated outside the subway. Similar conditions obtain at the new Municipal building.

It would be interesting to discuss the properties and strength of materials, the fire-resisting qualities, the best way to protect steel from rust, the expansive effect of heat and the stresses in material due to it—the best type of construction to resist vibration and earthquake shock; the changes in the type of construction due to different heights of buildings, and the customary construction in different localities.

It would be interesting to note the investigation and tests conducted in our state universities and at Watertown arsenal, and the changes being made in the building laws of our cities on account of more definite knowledge.

Thus far we have limited our thought to steel skeleton construction. This is the only type suitable for very high buildings. It is also the most available type in the eastern cities for buildings of moderate height, say 10 stories and upward. In the east, short spans are the rule in the floor construction. Hollow tile arches are generally used. Hollow tile and steel are there plentiful and cheap.

In the west, conditions are different. The freight on steel from Pittsburg is \$16 per ton. The materials to make concrete are ready at hand. Cement, sand and gravel are plentiful and cheap, and this construction requires only about one-third as much steel as the other. We therefore find it more economical out here to use reinforced concrete. This construction is suitable for buildings to a height of about 12 stories, and that is probably about as high as it is profitable to build in Seattle as a general proposition.

The subject of reinforced concrete would require a lengthy discussion if one should undertake to describe and discuss the various patented systems, forms of reinforcing bars, etc. The theory is coming to be fairly well established, however, and we are able to design structures in this material with confidence and to build them economically.

Universal approval is accorded the "Ancient Monuments Act" passed by the recent Parliament in London, England. The late Lord Avebury led the way in bringing the subject to the notice of Parliament, and in 1882 Mr. Shaw-Lefevre (now Lord Eversley), as First Commissioner of Works in Mr. Gladstone's Government, passed the first Ancient Monuments Act. It extended only to monolithic and other prehistoric remains, and was purely permissive in its character. The owner of such a monument might place it in the guardianship of the Commissioner of Works, and it then became an offence on the part of anyone (including the owner) to injure or deface the monument. In 1900 these provisions were extended to any "structure, erection, or monument of historic or architectural interest," with the exception of a structure occupied (otherwise than for caretaking) as a dwelling

house, but the application of the Act still depended upon the consent of the owners of monuments.

The fabulous sums offered by Americans to transport ruins across the Atlantic has only been conjured up to raise the market value of ancient monuments. Another serious matter is the purchase of old structures to despoil it of its intrinsic value for the enrichment of modern buildings.

The London "Times" says it is obvious that in relation to such traffic the mere scheduling of monuments or any other arrangement devoid of some machinery for arresting destruction merely attracts the destroyer. Hence the existence of the Royal Commissions which have been at work for the last five years examining and scheduling the places of historic interest in England, Scotland and Wales, and which have already made valuable reports, is an additional reason for protective legislation. At the same time the Commissions form a nucleus for an authoritative advisory body to share with the Commissioners of Works the responsibility of restrictive action.

These considerations have been in the minds of the framers of the new Act, which not only amends but consolidates the existing law. In the first place, it authorizes the purchase of monuments either by the Commissioners of Works or by the Council of any county or borough, or the Common Council of the City of London; but such a purchase can be carried out only by agreement with the owner. The gift or devise of a monument to the same bodies is also authorized. The alternative machinery of guardianship is then provided, as in the existing Acts, and the effect of guardianship is explained.

By constituting the Commissioners of Works or the local authority guardians of his monument the owner does not divest himself of any right of property except that of destruction, active or passive; in other words, the guardians of the monument may restrain the owner from injuring it, and may, concurrently with the owner, do any work necessary to maintain and protect it.

So far the Act follows on previous lines, and can only be applied with the consent of the owner. On this stem is grafted the compulsory machinery of the Act. An Ancient Monuments Board, representative of the three Historic Monuments Commissions, the Societies of Antiquaries of London and Scotland, and other artistic bodies, is to be constituted by the Commissioners of Works, and upon their report that any monument is in danger of destruction, removal or damage, and that the preservation of the monument is of national importance, the Commissioners may make a preservation order, placing the monument under their protection, and while such an order is in force the monument cannot be demolished, removed, added to, or altered without the consent of the Commissioners.

There is a further piece of machinery designed to keep the Commissioners of Works acquainted with the area of their work. They are, after notice to the owners, to prepare and publish a list of monuments of national importance, and when a monument is included in this list the owner must, under a penalty, give a month's notice to the Commissioners of any proposed

work of demolition, removal, alteration, or addition.

The influence of French legislation may be traced in the new Act. In France the grip of the State on buildings and remains of interest has long been effective. In the time of the great Napoleon, the acquisition of any private building merely to prevent its destruction was authorized, and in 1837 a Commission des Monuments Historiques was appointed with the Minister of Public Instruction and the Fine Arts as its president. In 1887 a registration of monuments was initiated, and powers of compulsory acquisition where the owner objected to registration, conferred. Nor is there any disposition to leave this machinery idle. Three general inspectors of historic monuments and a large staff of architects are attached to the Commissions, and the annual grant for the upkeep of monuments is substantial, amounting to as much as \$600,000 in one year.

RICHARD HERRING.

A Tribute to His Memory, By His Friend, James A. Wilson.

Seventy-two years ago, the Bow-bells in London Town rang out, and a child was born. The sound of the bells and the fact that he heard them, made Richard Herring a Cockney.

And he grew as most children do, and went to work and learned a trade, as all men should, and married, as all men ought to. This brought greater desires and ambitions and America became the Eldorado of his desires, and the day came in the early sixties when his friends assembled at the pier, on the shores of the British Isles, to say farewell to Dick, as he had become known, and there were handkerchiefs waving, smiling encouragement from those who wanted to send him on to the success which they knew he would achieve, and there were handkerchiefs wet with tears by those who dreaded the parting,—and the Bow-bells rang again and Dick was on his way. His passage was safe, and his arrival in a strange country caused him little occasion for worry, for he was always self-reliant. His selection of San

Francisco as his permanent home was not surprising, and his activities here are a part of the history of the City in the actual building of the Western metropolis.

He went into the mill business and by energy and honesty of purpose, built up a reputation which his successors can well be proud of. The Mill Owners Association honored him by electing him their president.

The Builders' Exchange soon noticed his business ability and for many years elected him again and again as one of the directors and finally made him vice-president.

In fraternal orders he has had many honors. He was honored and respected by all who knew him, and many, many there are who knew Dick Herring.

A few days ago the friends he had made in this new world assembled at the pier of the shores of Time, and the same good-byes were said, though there was no waving of handkerchiefs.

The Bow-bells, the Bow-bells of Eternity rang, and Dick heard them.

SHOWING HOW THE BEAMS WERE CUT.

Anything to burn must be heated in the presence of oxygen. Steel, for example, requires a very high temperature, and the more directly the oxygen is supplied the more rapidly will it burn. Intimate contact with pure oxygen, rather than air, in which the oxygen is greatly diluted with nitrogen, will hasten the starting and increase the rate of the combustion. The cutting of steel by this process has become commercially practical only since there have been available torches giving a flame of sufficient heat intensity, such as the oxy-acetylene torch, the flame of which has a temperature of 4300 deg. F. After the steel to be cut is heated to the melting point, a special supply of oxygen under higher pressure than that used for the torch flame is delivered through a separate outlet close to the flame jet. By moving the torch along at proper speed a smooth cut is obtained by burning that can be made practically as deep and narrow as one made by a tool, due to the localization of heat possible with the very high temperature. The metal disappearing from the cut is in a great measure combined with the oxygen to form oxide of iron, passing off in the form of fine particles. The carbon goes off as carbon monoxide or carbon dioxide. These are both gases and so pass off into the atmosphere. A part of the metal runs out of the cut in molten condition but is still iron. Cast iron cannot be cut. The materials to which the cutting process is applied are commercial wrought iron and steel. Steel can be cut in any form, whether rolled, forged, or cast, and very thick sections as well as thin ones. Steel a inches thick can be cut at the rate of about one foot in three minutes.

By this same process cast iron, steel, bronze, etc., are welded—concrete mixer parts, shear castings and many other implements used by contractors and builders could just as well be repaired in this way as to be thrown in the junk heap. A casting when welded by a skillful operator is just as strong as when new. The prices for welding depends upon the nature of the break and for cutting so much per square inch or about half the cost of sawing.

This work is done under the supervision of H. Sanders and W. S. Evans who before entering this business in San Francisco, were employed by a large Eastern engineering concern. Sanders manages the cutting and outside work and Evans manages the shop and welding end of it.

CUTTING STEEL BEAMS BY OXY-ACETYLENE PROCESS.

The above picture shows one of the men connected with the Oxy-Acetylene Welding Company, 675 Golden Gate Ave., making a cut in an 18 inch "I" beam on the sidewalk of the First National Bank Building. In this job there are two "I" beams close together packed solid with concrete. Many of the contractors have noticed with interest the remarkable work done by this concern in cutting beams on Montgomery street. By their process they are able to make a cut against concrete, and in many cases where a cut by other means could not be made.

In many cases their men are sent out at night to do this work. Recently they cut 125 feet of steel off the first story of a building being erected at Battery and Hallock streets. This job consisted of eight strips of boiler plate, each plate 16 feet long of 3/4 inch stock. The work was done at night so as to save the contractor from delaying his regular work.

The Scientific American lately offered a prize for the best essay on what are the Ten Greatest Inventions of our time. By our time was defined to mean within the last twenty-five years. Only such inventions were included as were most revolutionary in their character and in the broadest fields, which affected our mode of living or which opened up the largest new sources of wealth.

The lists that the competitors in this contest submitted showed a wide diversity of opinion. No two competitors selected the same set of inventions. Only one invention, that of wireless telegraphy, was conceded by all to be among the ten greatest.

The essay that was awarded the first prize gives the following list with their approximate date of successful commercial introduction: (1) Electric furnace, 1859; (2) steam turbine, 1894; (3) gasoline automobile, 1890; (4) moving pictures, 1893; (5) wireless telegraphy, 1900; (6) aeroplane, 1906; (7) cyanide process, 1890; (8) linotype machine, 1890; (9) induction motor, 1890; (10) electric welding, 1889.

While no single inventions of the last twenty-five years initiated an industrial epoch in the sense that the locomotive and the Bessemer converter did, yet no similar period of time has been so prolific in the really wonderful fruits of invention. Man has been able to fly, the dream of all ages. Opaque objects have been rendered transparent, communication has been established between distant points without any material communicating means. It has been a mechanical age and so prolific in wonderful inventions that it is not strange that experts like those who competed in the contest should entirely disagree except as to one single invention out of ten.

And this reminds us that the vast machinery hall now being completed in the Exposition Grounds will house three great inventions. Here the great development during the last twenty or twenty-five years will be displayed. And there will be the demonstration of the world's progress at the present time which mark the last word in the story of applied mechanics and the mechanical arts.

The elections in New York and in the East have mainly been along the lines of the progressive cause. Tammany after having humiliated and impeached Sulzer is itself defeated. The control of the New York legislature has passed into the hands of the Republicans. New York City has beaten the Tammany candidate for Mayor. So that there is generally a revolt against the old time political methods as evidenced in Tuesday's election.

In order to accomplish Sulzer's downfall it was necessary for Tammany to come out in the open. As a result Boss Murphy laid himself open to attack and the result has been an ever overwhelming defeat.

In New Jersey President Wilson has been upheld. In Massachusetts the democratic candidate was elected, the Republican vote being divided between the Progressive candidate and old line organization, with the Progressives polling the larger number of votes.

So that taken all together the elections show that the Progressives of both parties have won and the reactionaries have lost.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, story and base, frame. Cost not stated. Architects, Havens & Toepke, 6 Kearny street, S. F. Owners, United State. The building will be erected at the intersection of Powell, Union and Columbus avenue and will cover considerable area. The first floor has been arranged for nine stores and upper floor for a number of living apartments of two and three rooms. Interior finish will be of pine with elm panels. All suites will have wall beds and private bath rooms. A central heating system and hot water plant will be installed. Stores will have large plate glass windows and metal store fronts. Exterior of the building will probably be faced with cement plaster on metal lath and shiplap. Plans are now being prepared.

SAN FRANCISCO—Apartment house, story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Dr. Nubbe. This building will be erected at 951 1/2 McAllister street and has been designed to contain six suites of two and three rooms. All apartments will have wall beds and private baths. Interior finish will be of pine, elm panels and some hardwood floors. Plans provide for a central heating system and hot water plant. Exterior will be covered with cement plaster on metal lath and rustie. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, story and base, frame, \$12,000. Architect, David C. Coleman, Merchants' National Bank Bldg. owner, J. Friedman. The building will be erected on the east side of Dolores street south of Railroad avenue and will cover an area of 38 feet by 75 feet. Interior will be arranged for 12 suites, all of which will have wall beds and private baths. Pine and redwood will be used for interior finish. Bath rooms will have tile wainscot. A hot water system will be installed. Exterior of the building will be covered with rustie and shiplap. Plans are complete and a contract will be let within a few days.

SAN FRANCISCO—Apartment house, story and base, frame, \$12,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, James Ward. This work has been mentioned here a number of times before when plans were first started. The building will be erected on the east side of Taylor street near Clay and has been arranged to contain 22 suites of four rooms and bath each. Interior will be finished in pine, elm panels and hardwood. There will be a steam heat, elevator service and a vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Wall beds will be used in all suites. Tile and marble will be used in the entrance. Exterior of the building will be covered with rustie, cement plaster on metal lath and a brick veneer base. Plans have been out for figures and a general contract will be awarded at once.

SAN FRANCISCO—Apartment house, story and base, brick and steel. Cost

not stated. Architect's name, W. J. Owners, Lachman Bros., 2019 Mission street. The building will be erected on the southeast side of Mission street between 16th and 17th streets and will cover an area of 60 by 105 feet. The first floor will be arranged for stores and upper floors will contain a number of well arranged apartments of two and three rooms. All suites will have private bath rooms and wall beds. Interior finish will be of pine throughout. There will be steam heat, vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and a permit has been applied for.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, John Carson, Bacon Bldg., Oakland. Owner, E. R. Lumb. The building will contain six suites of four rooms and bath each. Interior finish will be of pine with some elm panels and hardwood floors. A central heating system, probably hot air, will be installed. All rooms will be supplied with hot and cold running water. There will be private bath rooms and wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster on metal lath and shiplap. Plans are now being prepared and when complete the work will be done by Day Labor.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick, \$10,000. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, S. G. Bangsman. The building will be erected at the corner of 1st and Western avenue and has been designed for a high class picture show on the first floor and a number of modern living apartments on the upper floor. Interior will be finished in pine and elm panels. Gas steam radiators will be used for heat. All suites will have wall beds and private bath rooms. The doors and vitallite will be used in the lobby and bath rooms. Interior of the picture show will be handsomely finished. Modern ventilation is provided. Exterior of the building will be faced with white enameled pressed brick. Plans are being prepared.

EVERETT, WASH.—Apartment house, 2 story and base, frame, \$10,000. Architect, W. W. Hastings, Everett. Owner, James E. Gowen. The building will be erected at the corner of Wall and Hoyt streets and will contain a number of well arranged apartments with wall beds and private baths. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the living rooms and entrance lobby and halls. There will be a hot water system of heating. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be let on a percentage basis.

Contracts Awarded.

IMPERIAL, IMPERIAL CO., CAL.—Apartment house, 2 story and base, \$143,000. Architects, Noe and Shoen, Union League Bldg., L. A. Owners, Imperial Valley Syndicate, 1500 1/2 Pershing, Hunziker and Berger, 1100 1/2 Worth Bldg., L. A. Contract price, \$143,000.

BRIDGES.

SAN ANDREAS, CALAVERAS CO., CAL.—Bridge, reinforced concrete, Cost not stated. Engineer, C. E. Cotton, San Andreas. Owners, Calaveras County. Plans have been completed and have received the approval of the Board of Supervisors for a reinforced concrete road bridge which will be erected at San Andreas. Bids are now being called for on the work and will be opened by the Board of Supervisors on November 18th. Plans and specifications can be secured from the County Clerk at San Andreas.

VERNON, LOS ANGELES CO., CAL.—Bridge, steel and concrete, \$25,000. Engineer, F. Dupuy, Pacific Electric Bldg., L. A. Owners, City of Vernon. Plans have been completed and have received the approval of the City Trustees for the construction of a highway bridge across the Los Angeles River at San Antonio avenue. The structure will be 25 feet wide with a 20 foot roadway and 5 foot walk. There will be three six foot spans. Plans can be secured from either the engineer or from T. J. Furlong, City Clerk. Bids will be opened on November 18th.

CHURCHES.

FRESNO, FRESNO CO., CAL.—Church, 2 story and base, brick and steel, \$20,000. Architect, Henry F. Starbuck, Fresno. Owners, American Holy Trinity Church. The building will be erected at the corner of Ventura and M streets covering a considerable ground area. Interior has been arranged for a church auditorium and gallery seating 200 people. Basement will contain glass rooms, study hall and social rooms. Interior finish will be of pine with a mahogany and marble sanctuary. There will be a central heating system. Art glass will be used in the windows and also in a large dome. Exterior of the building will be faced with cement plaster trimmed with granite and large granite columns. Plans are complete and figures are being taken on the work.

LOS ANGELES, CAL.—Church, 2 story and base, Class A construction, \$25,000 to \$300,000. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, First Methodist Church of Los Angeles. A new site has been selected for this building at the southwest corner of 8th and Hope streets and the architects were formally commissioned at the last meeting of the Finance Committee. The site is 156 by 200 feet and the new edifice will occupy the entire area. Construction will be of Class A throughout. Preliminary plans will be submitted to the Finance Committee at their next meeting. No definite date for building can be given at this time.

LOS ANGELES, CAL.—Church, 3 story and base, frame, cost not stated. Architect, Montrose Warn, 3126 Winter street, L. A. Owners, West Fifty-fourth Street Methodist Church. The building

will be erected on a corner site and will cover an area of 30 by 48 feet. Plans provide for a main auditorium, Sunday School rooms and Epworth League rooms. Interior will be finished in pine throughout. The exterior of the building will be covered with rustic. A shingle roof is specified. Plans are complete and work will be done by Day Labor.

Contracts Awarded.

SAN FRANCISCO—Church, 2 story and base, Class A construction, \$100,000. Architect, John J. Foley, 46 Kearny street. S. F. Owners, St. Joseph's Church. Contractors, W. F. Vitt Electric Co., electric work. Contract price, \$1,435.

LOS ANGELES, CAL.—Church addition, 1 story and base, frame, \$6,000. Architect, A. B. Benton, 114 North Spring street, L. A. Owners, Church of the Epiphany. Contractor, W. R. Phelps, L. A. Contract price, \$6,000.

COURT HOUSES.

LOS ANGELES, CAL.—City hall addition, 1 story brick and steel, \$18,000. Architect, J. J. Backus, City Hall Los Angeles. Owners, City of Los Angeles. Architect Backus has been commissioned to prepare plans for an addition of one story to the present two story City Hall annex. Construction will be of brick and steel. Interior will be finished in pine throughout. Elevator service will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared.

KELOGG, IDAHO—City hall and jail, 2 story and base, reinforced concrete. Cost not stated. Architect, L. R. Stritisky, Spokane. Owners, City of Kellogg. The building will be designed in the classic style and will cover a considerable area. Plans provide for a building housing all city departments including the fire department and city jail. Interior will be finished in pine throughout. There will be special jail equipment. A steam heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

FACTORIES & WAREHOUSES.

NAPA, NAPA CO., CAL.—Laundry building, 1 story and base, reinforced concrete and frame. Cost not stated. Architect, State Architect George B. McDougal, Sacramento. Owners, State of California. Plans and specifications for a new laundry building which is to be erected at the Napa State Hospital have been completed and have received the approval of the State Board of Control. Bids are now being called for and will be opened by the State Board of Control on November 28th. Plans can be secured from the State Department of Engineering, Sacramento. An official proposal appears in another column of this issue.

SEATTLE, WASH.—Factory addition, 1 story and base, brick, \$25,000. Architect, Carl Sorenson, Arcade Bldg., Seattle. Owners, Seattle Brewing and Malting Co. This building has been designed for a four-story structure but only the first story will be erected at this time. The building will contain the bottling works and a cooperage shop. The structure is to cover an area of 50 by 200 feet. Interior finish will be of pine. Exterior of the building will be faced with pressed brick.

Plans are complete and in the hands of James Horton, Supt. of Buildings for the Seattle Brewing and Malting Co., and the work will be done by Day Labor.

Contracts Awarded.

COMPTON, LOS ANGELES CO., CAL.—Factory, 1 story and base, brick and concrete, \$21,926. Architect's name not given. Owners, Panama Rubber Co., Los Angeles Investment Bldg. Contractors, Huntsberger-Reed Co., Van Nuys Bldg., L. A. Contract price, \$21,926.

LOS ANGELES, CAL.—Warehouse, 4 story and base, brick and steel, \$20,480. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owners, Barker Bros. Contractors, Alpetter, Hall & Alpetter, Ferguson Bldg., L. A. general construction except plumbing, electric work and elevators. Contract price, \$20,480.

LOS ANGELES, CAL.—Warehouse, 4 story and base, brick and steel, \$20,480. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owners, Barker Bros. Contractors, Alpetter, Hall & Alpetter, Ferguson Bldg., L. A. general construction except plumbing, electric work and elevators. Contract price, \$20,480.

will be of pine throughout. Exterior of the structure will be faced with brick. Plans are complete and figures are being taken. Bids will be opened about November 20th.

Contracts Awarded.

OAKLAND, CAL.—Garage, 1 story and base, brick and steel, \$10,300. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, F. W. Taylor. Contractors, Finley and Seabolt, brick work only. Contract price, \$3,100; George G. Kneppeler and H. J. Horst, Alameda, general carpentry work. Contract price, \$7,200.

BAKERSFIELD, KERN CO., CAL.—Garage, 1 story and base, brick and steel, \$15,000. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Erb and Drury. Contractor C. D. Brown, 1600 P street, Bakersfield. Contract price, \$15,000.

FLATS.

Contracts Awarded.

SAN FRANCISCO—Flats, 2 story and base, frame, \$7,000. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owner, Mary Wagner. Contractor, J. Eric Johanson, 2726 20th street, S. F. Contract price, \$7,000.

GARAGES.

OAKLAND, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, H. O. Harrison Co. The building will be erected on the east side of Broadway between 29th and 30th streets, covering a considerable ground area. Front portion of the building will be handsomely finished in pine, hardwood and tile. Rear portion will contain the repair shop and shipping department. There will be a tile floor and considerable masonry work. Plans call for metal window sash and frames and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

EVERETT, WASH.—garage, 1 story and base, reinforced concrete. Cost not stated. Architect, W. W. Hastings, Everett. Owners, Haley-Sheridan. The building will be erected at the corner of Colby and California streets and will be practically fireproof in construction. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened about November 20th.

EVERETT, WASH.—Garages, 2 story and base, reinforced concrete. Cost not stated. Architect, W. W. Hastings, Everett. Owner, John Ganso, Everett Sales Co. The building will be practically fireproof and will cover a large ground area. A site at the corner of Rucker and Pacific streets has been secured. Besides the usual garage garage fittings the buildings will contain two elevators, special gasoline tanks, metal window sash and frames and a cement floor. Interior finish

GOVERNMENT WORK AND SUPPLIES.

Pocatello, Idaho, Public Building.

All bids received by the Supervising Architect for the construction of the public building at Pocatello, Idaho, have been rejected.

Grass Valley, Cal., Public Building.

All bids received for the construction and completion of the United States public building at Grass Valley, Cal., have been rejected.

Reclamation Work.

The secretary of the interior has authorized the expenditure of \$70,000 in the extension of the canal and lateral system, Yuma irrigation project, Arizona-California. The work will bring a considerable additional area under ditch, for which the main canals have already been constructed. The land which will be served by the new ditches has all been filed upon.

Drinking Fountains.

The following communication has been forwarded by the general purchasing officer of the Isthmian Canal Commission to manufacturers of drinking fountains:

Sirs: The commission is considering the question of installing drinking fountains in the permanent shops which are being constructed at Balboa in order to do away with the water coolers, which have been used up to the present time. The general requirements for these fountains will be approximately as follows:

A rough estimate in this office would call for approximately 100 fountains. Each of the larger buildings will be equipped with at least four fountains. They will be situated on the corners of a rectangle about 175 feet by 60 feet. The fountains themselves should be of iron, porcelain-covered, so fitted that the water will not run continuously, but will only bubble up when a control valve is opened. The supply will be lead, and it is particularly desired to obtain information in regard to some type of equipment which will allow the use of large blocks of ice which, however, do not come in contact with the water itself. This would

mean that the coils through which the water circulates must be very carefully protected from damage. It is possible, however, that a satisfactory equipment could be supplied in which the ice is placed directly in the water supply. Information in regard to the necessary pressure for satisfactory operation of the fountain is desired, as in the case of the ice being placed in the drinking water it might possibly be necessary to seal the tanks after ice had been put in them in order to connect them to the regular pressure in the water mains. This arrangement, however, is not desirable. As complete information as can be supplied is requested and the installation need not conform entirely to the above outline. Any type which will permit of cooling the water before delivering it to a drinking fountain will be considered. It is preferred that the cooling tank or coils, if provided separately, be connected directly and continuously to service water mains. You may kindly submit to this office, in triplicate, complete data in line with above as to fountains made by your company, together with estimates of the cost of the apparatus delivered at our New York warehouse; also stating if possible approximately the time which would be required for delivery. The more complete data supplied by you the better it will serve the purposes for which required. Your reply with the data you intend to supply should be in this office at an early date. Very respectfully, E. C. Dole, acting general purchasing officer.

Sent Rings for Balanced Valves.

The following bids were opened by the U. S. reclamation service, Los Angeles, Cal., for furnishing sent rings or balanced valves, Salt river project, Arizona:

Item 1, 6 seat rings for balanced valves; 2, 48 cap screws for same.

Llewellyn Iron Works, Los Angeles, Cal., item 1, \$397.50; 2, \$72; time, 16 days.

Acme Brass Works, Los Angeles, Cal., item 1, \$1,070; 2, \$49; time, 29 days.

Fulton Engine Works, Los Angeles, Cal., for both items, \$2,125, in 14 days, or \$1,655, in 30 days.

33,000-Volt Wall Brushes.

The following bids were received by the engineer of the U. S. reclamation service, Los Angeles, Cal., for furnishing three 33,000-volt wall brushes for the Burley substation:

Westinghouse Electric and Mfg. Co., Los Angeles, Cal., \$14.94; 2 weeks, at East Pittsburgh.

Western Electric Co., Los Angeles, Cal., \$14.94; 12 days, at East Liverpool, Ohio.

Pacific States Electric Co., Los Angeles, Cal., \$14.94; 4 weeks, East Liverpool.

Douglas, Wyo., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, including mechanical equipment, interior lighting fixtures, and approaches of the U. S. post office at Douglas, Wyo.:

W. D. Lovell, Minneapolis, Minn., \$1,990.

J. P. Jenkins & Co., Ocala, Fla., \$6,950.

Puget Sound, Pier No. 8.

The contract for creosoted pile and timber extension to pier No. 8 at the Puget Sound navy yard, bids for which were opened Sept. 13, has been awarded to J. A. McEachern Co., Seattle, Washington, at \$9,865.

Casper, Wyo., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office at Casper, Wyo.:

Bid 1. A. A. Matschman, Paragould, Ark.

2. W. D. Lovell, Minneapolis, Minn.

3. J. P. Jenkins & Co., Ocala, Fla.

4. Wm. D. O'Neil & Son Co., Fairbault, Minn.

5. Ed. Krep, 3428 Bryant street, Denver, Colo.

For using limestone for all stonework, except where granite is required—

Bid 1, \$52,980; 2, \$53,445; 3, \$51,000; 4, \$57,659; 5, \$59,840.

For using Newcastle (Wyo.) white sandstone for all stonework, except where granite is required—

Bid 5, \$59,952.

For alternate No. 1 (substituting Keene's cement for hard plaster in connection with all walls, as specified), add—

Bid 1, \$200; 2, \$700; 3, \$500; 4, \$150; 5, \$375.

For alternate No. 2 (painting plaster surface of finished rooms throughout the building, as specified), add—

Bid 1, \$800; 2, \$1,000; 3, \$800; 4, \$1,150; 5, \$861.

For alternate No. 3 (substituting terra cotta for wood cornice, tin parapet coping, and stone keys, as specified), add—

Bid 1, \$2,250; 2, \$4,250; 3, \$4,000; 4, \$4,200; 5, \$2,275.

For alternate No. 4 (omitting cupola, as specified), deduct—

Bid 1, \$150; 2, \$250; 3, \$350; 4, \$200; 5, \$100.

For alternate No. 5 (for omission of certain cement coping, etc., as specified), deduct—

Bid 1, \$300; 2, \$500; 3, \$375; 4, \$275; 5, \$1,200.

For alternate No. 6 (for omission of certain copings, etc., and substituting macadam for concrete driveway inside of lot lines as specified), deduct—

Bid 1, \$700; 2, \$900; 3, \$400; 4, \$500; 5, \$800.

For alternate No. 7 (substituting 2-inch radius cove for all interior plaster cornices), deduct—

Bid 1, \$500; 2, \$175; 3, \$600; 4, \$200; 5, \$600.

For alternate No. 8 (changing design of main entrance steps, etc., as specified), deduct—

Bid 1, \$150; 2, \$250; 3, \$140; 4, \$225; 5, \$450.

For alternate No. 9 (covering walls, cornice, etc., of mailing vestibule with galvanized sheet metal, as specified), add—

Bid 1, \$85; 2, \$250; 3, \$150; 4, \$250; 5, \$75.

Amount included in the proposal for all work specified under "lighting fixtures"—

Bid 1, \$750; 2, \$650; 3, \$615; 4, \$1,150; 5, \$1,018.

Cand Circular S04-A.

An advertisement appears elsewhere in this issue calling for bids to be opened November 3 for furnishing supplies under circular S04-A, as follows:

Class 1, 34 heavy vitreous lavatories, 12 slop sinks, 30 urinals, 46 siphon jet closets, and 3 water closets.

Class 2, 25 transformers.

Class 3, 20,000 ft. stage cable.

Class 4, 100,000 ft. weatherproof copper wire.

Class 5, 1,400 inclosed fuses.

Class 6, 2,000 flat porcelain shades.

Class 7, 1,000 lbs. friction tape.

Class 8, 30,000 ft. white oak flooring.

Oil-Drying Outfit.

The following bid was received October 18 at the office of the U. S. Reclamation Service, Los Angeles, Cal., for forming an oil-drying and purifying outfit for the Minidoka project under advertisement No. 242:

Westinghouse Electric & Mfg. Co., Los Angeles, Cal., type A outfit, \$362.88; oven, \$64.90; including 3 reams filter paper, handles 10 to 12 gals. per minute, paper, \$5.02 per ream of 44 lbs.; type B outfit, \$246.24; oven, \$51.84, including 2 reams filter paper, handles, 2 1/2 gals. per minute; paper, \$1.95 per ream of 13 lbs.; delivery f. o. b. Pittsburgh in 10 days.

Steel Tugs for Panama Canal Entrances.

The Isthmian Canal Commission expects to advertise in the near future for bids for furnishing four sea-going steel tugs for handling and docking vessels at the entrances to the Panama Canal. These tug boats are to be of extra-heavy construction. The approximate dimensions are: Length overall, 128 feet; beam, 30 feet; depth, 17 feet, and mean draft, 14 feet. It has not yet been decided what the horsepower of each of the tugs will be nor what make of boiler will be used. The tugs are to be equipped, however, with all usual auxiliaries of a vessel for the service intended, including extra-large steam steering gear, electric-light plant, etc.; also a refrigerating plant, and provided with cabin accommodations for a crew of 14 men. The specifications are still in course of preparation in the office of the Isthmian Canal Commission on the Isthmus of Panama.

Piping for Arrow Rock Dam.

The following bids were opened under advertisement No. 232 at the office of the U. S. Reclamation Service, Los Angeles, Cal., for furnishing air belt and control piping for Arrow Rock dam, above project:

Bid 1. Rosedale Foundry & Machine Co., Pittsburgh, Pa.

2. U. S. Cast Iron Pipe Co., San Francisco, Cal.

3. Advance Machine Co., Los Angeles, Cal.

4. Queen City Foundry Co., Denver, Colo.

5. Union Machine Co., San Francisco, Cal.

6. Pittsburgh Valve Foundry & Construction Co., Pittsburgh, Pa.

7. Minneapolis Steel & Machinery Co., Minneapolis, Minn.

8. Independent Foundry Co., Portland, Oreg.

9. Working point—Bid 1, Pittsburgh, Pa.; 2, Bessemer, Ala.; 3, Los Angeles, Cal.; 4, Denver, Colo.; 5, San Francisco, Cal.; 6, Pittsburgh, Pa.; 7, Minneapolis, Minn.; 8, Portland, Oreg.

Item 2, Bell-mouth terminals—Bid 1, \$110, 10 days; 2, \$212, 20 days, 3, \$148, 15 days; 4, \$153.50, 20 days, 5, \$163.50, 15 days; 6, \$258, 25 days, 7, \$317.93, 20 days; 8, \$1,576, on original 91 terminals asked for, 30 days.

Weight—Bid 2, 1,620 lbs; 3, 1,200; 4, 1,350; 5, 1,100; 6, 2,100; 7, 1,363; 8, 19,500.

Item 2. Air vent units—Bid 1, \$360, 40 days; 2, \$163.98, 20 days; 3, \$354, 28 days; 4, \$265.50, 30 days; 5, \$375, 45 days; 6, \$348, 35 days; 7, \$236.45, 30 days; 8, \$250, 20 days.

Weight—Bid 1, 5,600 lbs; 2, 6,900; 3, 2,260; 4, 5,760; 5, 6,500; 6, 7,400; 7, 5,052; 8, 6,000.

Item 3. 4-in. control pipe units—Bid 1, \$610, 50 days; 2, \$262.50, 30 days; 3, \$325.90, 56 days; 4, \$412.50, 30 days; 5, \$565.50, 45 days; 6, \$560, 45 days; 7, \$412.71, 30 days; 8, \$265, 10 days.

Weight—Bid 1, 10,200 lbs; 2, 9,100; 3, 8,540; 4, 9,100; 5, 9,240; 6, 11,200; 7, 8,596; 8, 7,100.

HALLS AND SOCIETY BUILDINGS.

SAN MATEO, SAN MATEO CO., CAL.—City hall, 2 story and base, brick or reinforced concrete, \$40,000. Architects, Havens and Toupke, 46 Kearny street, S. F. Owners, City of San Mateo. The architects have just been commissioned to prepare plans for this building and complete details are now available. The structure will be designed in the classic style and will be as near fireproof as the amount available will permit. Plans are to be so arranged that the building will house all the city offices including the police and a part of the city fire department. Several fireproof vaults will be installed. Interior finish will probably be of pine and hardwood. A large council chamber is to occupy a large portion of the second floor. There will be steam heat. Exterior of the building will be faced with either pressed brick or cement plaster. Further mention will be made of the work as plans progress.

BAKERSFIELD, KERN CO., CAL.—City hall alterations, interior and exterior work and heating, \$27,000. Architect, Thomas B. Wiseman, Producers' Bank Bldg., Bakersfield. Owners, City of Bakersfield. The city has purchased the old County Court house and have had plans prepared for the alteration of the building into a modern City Hall. This work will include hollow tile interior partitions, plastering, metal ceilings, new floors, interior finish, plumbing, heating and electric work. Plans are complete and figures are now being taken. Bids will be opened by the City Council on November 18th. Plans and specifications can be secured from C. F. Murdoch City Clerk, Bakersfield, or from the architect.

HOSPITALS.

SAN FRANCISCO—Hospital group, 5 story and base, Class A construction, \$569,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, University of California. The building will be erected on the heights back of the Affiliated Colleges. This structure will cost over \$600,000 and has been made possible by contributions from John M. Keith, \$150,000; William H. Crocker, \$50,000. Mrs. Harriet Alexander, \$50,000; Templeton Crocker, \$25,000; Mrs. Malcolm Whitman, \$25,000; George Blanding, \$25,000 and Mrs. F. W. Sharon, \$25,000, besides a large number of smaller amounts from others whose names have not been given out. The building will be eight stories high and of an ornamental design. Con-

struction will be started early in February. Full particulars are not available at this time and will be given later.

ELDRIDGE, SONOMA CO., CAL.—Nursery building, 2 story and base, frame. Cost not stated. Architect, George B. McDougal, Sacramento. Owners, State of California. The plans for this building which is to be erected at the Sonoma State Home has been designed for a nursery building for males. Interior finish will be of pine throughout. Plans have been approved and bids are now being called. Figures will be opened by the State Board of Control on November 26th. Plans can be secured from the State Department of Engineering at Sacramento. An official proposal appears in another column of this issue.

SAN RAFAEL, MARIN CO., CAL.—Infirmary building heating. Cost not stated. Architect, Thomas O'Connor, San Rafael. Owners, Marin County. All bids received at the last meeting of the Board of Supervisors for the heating and ventilating in the new County Infirmary were rejected as being above the amount available. The work has been readvertised and new figures will be opened on November 17th. The following is a complete list of the bids received:

J. M. Leppich	\$4,750
Kiernan and O'Brien	4,693
Atlas Heating & Ventilating Co.,	4,990
R. Kinshella	4,873
J. R. Hurley Co.,	4,688

Contracts Awarded.

SAN FRANCISCO—Nurses' Home, 4 story and base, Class A construction. Architects, Ward and Blohm, Alaska Commercial Bldg., S. F. Owners, Children's Hospital. Contractor, J. W. Cobby, 180 Jessie street, S. F., general construction. Contract price \$20,000.

HOTELS.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete, \$25,000. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owner's name withheld. The building will be erected on California street near Kearny and will have a frontage of 46½ feet by a depth of 86 feet. Plans provide for a total of 50 guest rooms besides a large lobby, office, parlors, public dining room and kitchen. Interior finish will be of pine and redwood with some hardwood veneer. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Considerable tile and marble will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within a few days.

SAN FRANCISCO—Hotel, 4 story and base, brick and steel, \$35,000. Architect, Joseph Cohen, 45 Kearny street, S. F. Owner, Harry Rosenberg. The building will be erected on the west side of Hyde street between Sutter and Bush streets and will have a frontage of 10 feet and a depth of 127 feet. There will be a large lobby and parlors on the first floor besides a number of guest rooms. Upper floors will be subdivided into 68 guest rooms and a number of public and private baths. Interior finish will be largely of pine with some hardwood veneer. Plans provide for steam heat, elevator service, vacuum cleaning system and hot

water supply. Bath rooms will have composition floors and tile wainscot. Marble an dille and ornamental plaster will be used in the lobby. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Hotel, 10 story and base, Class A construction. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected in the down town district but the exact location is withheld for the present. Plans provide for a total of 50 guest rooms, large lobby, office, parlors and public dining room. Construction will be fireproof throughout, with steel frame, reinforced concrete walls and floors and interior partitions of hollow tile or metal lath and plaster. Interior will be finished in pine and hardwoods. All best rooms will have private baths which will be finished in tile. There will be steam heat, elevator service, a vacuum cleaning system and other modern conveniences. Exterior of the building will be faced with cement plaster. Plans are now being prepared. Further information will be given shortly.

OAKLAND, CAL.—Hotel and stores, 3 story and base, brick and steel, \$35,000. Architects, Bakewell and Brown, 251 Kearny street, S. F. Owner, R. G. Ellis. The building will be erected at the southwest corner of 10th and Franklin streets. The first floor will be arranged for a number of stores besides the entrance to the hotel. Upper floors will contain in the neighborhood of 75 guest rooms and a number of public and private baths. Interior finish will be of pine and redwood with some elm panels. There will be steam heat and a hot water plant. Bath rooms will have composition floors and tile wainscot. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the contractors for figures. A contract will be awarded shortly.

Contracts Awarded.

SOUTH SAN FRANCISCO, SAN MATEO CO., CAL.—Hotel, 3 story and base, Class B construction, reinforced concrete type, \$50,000. Architects, Havens and Toupke, 46 Kearny street, S. F. Owners, South San Francisco Land and Improvement Co. Contractors, Thomas Dwyer Sons, Sharon Bldg., S. F. Contract price, \$50,000.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$31,200. Architects, Richards-Neustadt Const' Co., Wright and Callender Bldg., L. A. Owner, Newton E. Cramer, Contractors, Willard Slater Co, 2314 Santa Fe ave., L. A., general construction. Contract price, \$31,200.

LIBRARIES.

WATTS, LOS ANGELES CO., CAL.—Library, 1 story and base, brick and reinforced concrete, \$10,000. Architect, Elmore R. Jeffery, Citizens' National Bank Bldg., L. A. Owners, City of Watts. Plans have been approved by the Carnegie Library Corporation for the new building to be erected at Watts. The structure is classic in design and will cover an area of 30 by 70 feet. Plans provide for two reading rooms, a large stack room, librarian's office and lavatories. Interior will be finished in pine and hardwood. There will be a central heating system and

vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. P. F. Adelsbach is secretary of the Library Board. Plans can be secured from him or from the architect.

GLENDALE, LOS ANGELES CO., CAL.—Library, 1 story and base, brick and concrete, \$10,457. Architect, Paul V. Tuttle, Delta Bldg., L. A. Owners, City of Glendale. T. H. Addison, 316 Belmont street, Glendale, submitted the lowest bid for this work. All figures were referred to the Library Committee. An award of contract will be made this week.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Structural steel and iron work. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications have been completed and approved for furnishing, fabricating and erecting of the structural steel and iron work for the main entrance tower of the exposition. Bids for this work are now being taken and will be opened by the Buildings and Grounds Committee on November 28th. An official proposal appears in another column of this issue. Plans and specifications can be secured from the Director of Works.

SAN FRANCISCO—Court of Honor, general construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on November 20th by the Buildings and Grounds Committee for the general construction of the Court of Honor, one of the largest buildings on the exposition grounds. Plans and full particulars of this work can be secured from the Director of Works. An official proposal appears under another heading in this issue.

SAN FRANCISCO—State Building, concrete and frame construction. Cost not stated. Architect, A. F. Heide, 46 Kearny street, S. F. Owners, State of Washington. Architect Heide, who has recently opened offices in this city, has been commissioned by the State of Washington to prepare plans for the two state exhibit buildings which are to be erected at the Panama-Pacific International Exposition in this city, and also for the building which will be erected by the state of Washington at San Diego. Details of this work have not been determined upon and pending the time when action is taken on granting a larger site to the state of Washington no information can be given. It is expected that a considerably larger appropriation will be made for the building in this city than was originally planned. Further mention will be made as the work progresses.

RAILROAD CONSTRUCTION—AND EQUIPMENT.

SAN FRANCISCO—Railroad track construction, \$20,000. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans and specifications have been completed and have gone to the War Department at Washington for approval for construction on a standard gauge track at the Transport

Docks connecting with the Belt Line Railroad of the State Board of Harbor Commissioners. The track will be 5,100 feet long, carried on 114 pound rails and 127 pound guard rails. Redwood ties and crushed roadbed will be used. Bids will not be called for until the plans have received the approval of the War Department. Notice will be given in these columns when bids are called.

RESIDENCES.

SAN FRANCISCO—Residences, 2 1/2 story and base, frame, \$2,300 each. Architect, none. Owner, B. J. Hooper, 450 12th avenue, S. F. These houses will be erected on the east side of 19th avenue south of Anza street and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with hardwood floors in the living rooms, dining rooms and reception halls. There will be large open fire places in the living rooms and brick mantels. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, Cleve Carson and Son, 219 32nd ave., S. F. The house, which has been designed for a seven room dwelling, will be erected on Castaneda avenue west of San Marcus. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and a composition floor. An automatic water heater will also be installed. Exterior of the house will be covered with cement plaster on metal lath. Work will be done by Day Labor and all materials are now being purchased.

SAN FRANCISCO—Residence, 2 story, attic and base, frame, \$35,000. Architect, Willis Polk, Merchants' Exchange Bldg., S. F. Owner, Mrs. Katherine P. Hooker. The house will be erected on the south side of Pacific avenue west of Walnut and has been designed for a modern city home. The dwelling will contain in the neighborhood of 14 rooms, several baths and sleeping porches. A private garage will also be erected on the lot. The interior of the house will be handsomely finished in hardwoods and white enamel. Hardwood floors will be used throughout except in the baths which will have tile floors and wainscot. Marble and tile will also be used in the butler's pantry. There will be steam heat and open fire places. Mantels will be of tile and brick. Entrance will be finished in marble. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures are now being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,600. Architect, Joseph Calen, 15 Kearny street, S. F. Owner, Mrs. Harris. The dwelling, designed for a six room house, will be erected on Clifford street in the Ashbury Heights district. Interior will be

finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Plans provide for furnace heat. There will be tile wainscot in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Residences, 2 2-story and base, frame, \$7,000 each. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Matthew A. Little, 1347 4th avenue, S. F. These houses will be erected on the west side of 18th avenue north of Lake street and each has been designed to contain eight rooms, baths and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the bath rooms. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. Clay tile roofs will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,750. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, M. C. Vaughn. The dwelling has been designed for a seven room house and will be erected in the Fourth Avenue Terrace. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Tile wainscot will also be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, Maury I. Diggs, 2544 Bowditch street, Berkeley. Owners, Marshall-Diggs Co. The dwelling has been designed for an eight room house with baths and sleeping porch and will be erected on the south side of Russell street west of Claremont. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. There will be tile wainscot in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. An automatic water heater will be installed. Plans are complete and the work will be done by Day Labor. All materials are being purchased by the owners.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$1,500. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mrs. Parker. The house will be erected in Fourth Avenue Terrace and has been designed to contain seven rooms, bath and sleeping porch. Interior finish

will be of pine, redwood and hardwood veneer. There will be furnace heat and open fire places. Hardwood floors will be used in the principal rooms. Mantels will be of tile or brick. Tile wainscot and composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story, attic and base, frame. Cost not stated. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, H. M. Wright. The dwelling will be erected in Claremont Court and has been designed to contain seven rooms, baths and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscoting will be used in the bath rooms and kitchens. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

EUREKA, HUMBOLDT CO., CAL.—Residence, 2 story and base, frame, \$7,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Judge Wilson, Eureka. The dwelling has been designed for an eight room house with two baths. Interior finish will be of pine, redwood and hardwoods. Hardwood floors will be used in the living room, den, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

SACRAMENTO, CAL.—Residence, 2 story and base, frame, \$2,700. Architect, none. Owner E. D. Pierce, 2207 1st avenue, Sacramento. The dwelling has been designed for a seven room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. There will be tile wainscot in the bath room and kitchen. An automatic water heater will be installed. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, L. Arthur, 1230 1st avenue S. F. The dwelling has been designed for a seven room house and will be erected on the west side of Sta. avenue south of Irving street. Interior will be finished in pine and redwood with some redwood veneer. Oak floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. A brick veneer will be used. Plans are complete and work will be done by Day Labor. All materials are being purchased.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,500. Architects, Newsum and Dixon, 1844 5th avenue, Oakland. Owner, W. C. Barrell. The dwelling has been designed for a six room house with bath and sleeping porch. Interior will be finished entirely in pine. Some oak floors will be used. A large open fire place will be a feature of the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

LOS ANGELES, CAL.—Residence, 2 story and base, hollow tile construction. Cost not stated. Architect, J. Martyn Haenke, Story Bldg., L. A. Owner, Mary Garden. This dwelling which is to be erected in Beverly Hills will contain fourteen rooms, five baths and sleeping porches. Interior will be finished in hardwoods and white enamel. Oak floors will be used throughout. There will be a central heating system, probably steam or hot water supply, vacuum cleaning and hot water supply. Bath rooms will be finished in tile. A garage will also be erected on the lot. Exterior of the dwelling will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Residence, 2 story, attic and base, frame. Cost not stated. Architect, David C. Coleman, Merchants' National Bank Bldg., S. F. Owner, Adolph Becker. This dwelling will be erected on Dewey boulevard in St. Francis Wood and has been designed to contain 12 rooms, two baths and sleeping porches. The design is in the English style with exterior covered with cement plaster and half timber. Interior finish will be of pine, mahogany and oak. Hardwood floors will be used throughout. There will be a central heating system and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot. Plans are being prepared.

SAN FRANCISCO—Residences, 7 2 story and base, frame, \$5,000 each. Architect, none. Owners, Cleeve Carson and Son, 219 32nd avenue, S. F. These houses will be erected on Castaneda Way in St. Francis Wood and each has been designed to contain seven rooms, baths and sleeping porches. Interiors will be finished in pine and hardwoods. Oak floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath, shingles and rustle. Plans are being prepared and when complete the work will be done by Day Labor. All materials will be purchased by the owners.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, G. Peterson, 351 12th avenue. The dwelling, designed for a seven room house, will be erected on the west side of 15th avenue near Anza. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the principal rooms. There will be a large open fire place in

the living room with brick or tile mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Joseph C. Kirby, 3947 18th street, S. F. The dwelling will be erected on the east side of 16th avenue south of Anza and has been designed for a seven room house with bath. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantels will be of tile. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath, rustle and brick veneer. Plans are complete and the work will be done by Day Labor.

VANCOUVER, B. C.—Residence, 2 story, attic and base, Class A construction, \$100,000. Architect, W. Marbury Somervell, White Bldg., Seattle. Owner, B. T. Rogers of the British Columbia Sugar Refinery. The architect has just been commissioned to prepare plans for this work and details are not available. Construction will be fireproof throughout and the interiors will be elaborately finished. Further information will be given as plans progress.

Contracts Awarded.

SAN FRANCISCO—Residence, 2 story, attic and base, frame, \$34,000. Architects, H. Geiffuss and Son, 46 Kearny street, S. F. Owner, Mrs. A. B. S. Knauer. Contractor, Holm and Son, Foxcroft Bldg., general carpentry work. Peterson-James Co., plumbing, and Becker Electric Co., electric work. The total of these contracts is about \$16,000. Additional contracts will be awarded shortly.

HOLLYWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame, \$20,000. Architect, B. Cooper Corbett, Union Oil Bldg., L. A. Owner, C. F. Perry. Contractor, E. H. MacGibbon, Los Angeles Investment Bldg., L. A., general construction. Contract price, \$20,000.

SCHOOLS.

BERKELEY, ALAMEDA CO., CAL.—University Campanile clock. Cost not stated. Architect, John Galen Howard, 604 Mission street, S. F. Owners, University of California. Bids are now being called for the installation of a large clock in the campanile at the University of California. Plans and specifications can be secured from the architect. Bids will be opened by the Comptroller of the University at 10 o'clock on December 15th. An official proposal appears in another column of this issue.

LOS ANGELES, CAL.—State Normal School work, program clock and bells, telephone system and grand stand. Cost not stated. Architect, State Architect George P. McQuinn, Sacramento. Owners, State of California. Plans are complete and figures are now being called for the installation of a complete program clock and bell system, a telephone exchange and for the construction of a grand stand at the Los Angeles

les State Normal School. Plans can be secured from the State Department of Engineering, Sacramento. Bids will be opened on December 1st. Official proposals appear under another heading in this issue.

CHINO, SAN BERNARDINO CO., CAL.—School, 1 story and base, brick and steel, \$35,000. Architects, Withey and Davis, Story Bldg., L. A. Owners, Chino School District. The building has been designed for a grammar school and will contain twelve class rooms, principal's office, teachers' room and a library. Interior will be finished in pine with pine and maple floors. Plans include slate blackboards, modern school plumbing, a plenum system of heating and program clocks. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

SANTA ANA CANYON, SAN BERNARDINO CO., CAL.—Power station, 2 story and base, Class A construction, \$500,000. Architect, H. Allan Reeves, Chamber of Commerce Bldg., L. A. Owners, Southern California Edison Co. General Manager, Ben Pearson. San Bernardino, states that construction will shortly be started on one of the largest power houses in the state. Construction will be fireproof with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior will be finished in pine and metal. Exterior of the building will be faced with cement plaster. The work will be carried on by Day Labor under the direction of Mr. Pearson.

SOUTH BEND, WASH.—School, 3 story and base, reinforced concrete, \$75,000. Architect's name not given. Owners, South Bend School District. All bids received for this work have been rejected as above the amount available. The lowest bid received was from the Manhattan Co., Central Bldg., Seattle, for \$79,993. Plans will probably be revised to bring the structure within the amount available and new figures will be advertised.

SCHOOL DISTRICT NO. 51, WASH.—School, 2 story and base, brick and concrete, \$35,000. Architect, V. W. Voorhees, Ellet Bldg., Seattle. Owners, School District No. 51. This building will be erected about one mile north of Seattle and will contain ten standard sized class rooms, principal's office and teachers' room. Interior will be finished in pine with maple floors. The building will cover an area of 70 by 120 feet. Plans provide for steam heat, modern school plumbing and a vacuum cleaning system. Exterior will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

UNIVERSITY CAMPANILE CLOCK.—Cost not stated. Berkeley, Alameda Co., Cal. Architect, John G. Eden, Howard, 604 Mission street, S. P. Owners, University of California. Bids are now being called for the installation of a large clock in the campanile at the University of California. Plans and specifications can be secured from the architect. Bids will be opened by the Comptroller of the University at 10 o'clock on December 15th. An official proposal appears in another column of this issue.

STATE NORMAL SCHOOL, WORK.—Program clock and bells, telephone system and grand stand. Cost not stated. Los Angeles, Cal. Architect, State Architect George B. McDougal,

Sacramento. Owners, State of California. Plans are complete and figures are now being called for the installation of a complete program clock and bell system, a telephone exchange and for the construction of a grand stand at the Los Angeles State Normal School. Plans can be secured from the State Department of Engineering, Sacramento. Bids will be opened on December 1st. Official proposals appear under another heading in this issue.

Contracts Awarded.
SACRAMENTO, CAL.—School, 2 story and base, reinforced concrete, \$55,426. Architect's name not given. Owners, City of Sacramento. Contractors, McGillivray Construction Co., Sacramento. Contract price, \$55,426.

YAMHILL, ORE.—School, 2 story and base, hollow tile construction, \$20,000. Architects, Jacobberger and Smith, Board of Trade Bldg., Portland. Owners, Yamhill School District. Contractor, John Abmeyer, Builders' Exchange Portland. Contract price, \$20,000.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO.—Power station, 1 story and base, Class A construction, \$50,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. P. Owners, Pacific Gas and Electric Co. This building will be erected on the south side of Commercial street west of Montgomery and will cover a considerable ground area. Construction will be of the Class A type with a complete steel frame and exterior walls of brick and concrete. There will be a cement floor and roof. Interior partitions will be of hollow tile. Interior will be finished in pine and metal. Tile will be used extensively. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick. Bids are now being taken for the general construction. Separate contract will be awarded for the foundation work.

STORES & OFFICE BUILDINGS

SAN FRANCISCO.—Stores and offices, 12 story and base, Class A construction. Cost not stated. Architect, Lewis P. Hobart, Crocker Bldg., S. P. Owner, William H. Crocker. Architect Lewis P. Hobart, Crocker Bldg., has prepared preliminary plans for a large addition to the present Crocker building, which, if carried out, will make that building one of the largest office structures in the west. Property to the west of the present building having a Market street frontage of 62 feet 3 inches and extending through to Post street where it has a frontage of 66 feet 3 inches, is to be improved. The depth of the lot varies from 135 feet to over 170 feet. At present this property is covered with four two-story brick buildings of a more or less temporary nature with stores on the first floor and upper floors nearly vacant. Just what improvements will be made has not been fully determined, but it is stated that the Crocker Bank needs considerable more ground space and that a large portion of the market street frontage in the new building will be occupied by that institution. A plan, said to be most generally favored, contemplates carrying the new building up to the height of the present structure. Construction will be fireproof throughout.

Contracts Awarded.
LOS ANGELES, CAL.—Stores and bldgs., 6 story and base, brick and steel, \$30,000. Architect, Harold Cross, Consolidated Realty Bldg., L. A. Owners, Lyon, McKinney and Smith. Contractors, The Carl Lang Co., Mason Bldg., L. A. general construction only. Contract price, \$50,000. Note—Subfigures are now being taken on the various parts of the work.

BAKERSFIELD, KERN CO., CAL.—Store, 1 story and base, brick, \$6,500. Architect, none. Owner, A. H. Karpe, Contractor, E. F. Leierlich, Bakersfield. Contract price, \$6,500.

THEATRES.

TUOLUMA, STANISLAUS CO., CAL.—Theatre, 2 story and base, brick and steel, \$25,000. Architect not selected. Owners, Arakelian Bros., Fresno. These men have purchased the site of the old Tuoluma Opera House on Broadway and will wreck the present buildings and construct a modern two story brick building on the site. Besides the theatre plans will provide for several stores. It is the intention of the owners to have plans prepared with foundations and exterior walls heavy enough to carry four stories. Exterior will be faced with pressed brick. Further mention will be made of the work.

Contracts Awarded.
SEATTLE, WASH.—Theatre, 2 story and base, brick and concrete, \$20,000. Architect, J. A. Creutzler, New York Bldg., Seattle. Owners, Iris Land Co. Contractors, Bromley Const. Co., Oriental Bldg., Seattle. Contract price, \$25,000. Note—Subcontracts are now being let on the work.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR NO. 5.—Proposals for Cast Iron Door and Window Frames and Sashes and General Electric Station and Varnished-Cambric and Covered Cables.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. November 14, 1913, at which time they will be opened in public, for furnishing the above-mentioned articles. Blank and general information relating to this circular (No. 5) may be obtained from this office or the offices of the assistant purchasing agents, 1004 North Point street, San Francisco, Cal., also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; E. C. DODGE, major, corps of engineers, U. S. army, general purchasing officer.

C., until 10:30 a. m. November 22, 1913, at which time they will be opened in public, for furnishing the above-mentioned articles. Blank and general information relating to this circular (No. 6) may be

obtained from the office of the offices of the assistant purchasing agents, 1086 North Point street, San Francisco, Cal., also from the U. S. Engineer's office in the following cities: Seattle, Wash.; Los Angeles, Cal. E. P. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

NOTICE TO BRIDGE CONTRACTORS.

Sealed bids will be received by the Board of Supervisors of the County of Calaveras, California, at the office of said Board, in the town of San Andreas, in said county, up to Tuesday, November 18th, 1913, at the hour of 10 o'clock a. m. of said day, for the furnishing of all material, labor, and the construction complete of a reinforced concrete bridge over San Andreas creek, on North Main street, in the town of San Andreas, Calaveras County, California. All bids must be in accordance with the plans and specifications submitted by C. E. Cotton and adopted by the said Board on the 28th day of October, 1913.

The bidder shall submit a bond for the work and a price per cubic yard for any additional concrete required. Five per cent of the amount of the bid accepted is to be retained by the Board of Supervisors out of the money due the contractor for the plans and specifications for the work, and to be paid by said Board for the plans and specifications, to be paid.

All bids must be subject to the stipulations referred to in (An Act limiting the hours and services of laborers, etc.), approved March 10th, 1903, and must be accompanied by a certified check for ten per cent of the amount bid, payable to the County Treasurer of Calaveras County. The said check to be on the condition that if the bid is accepted, said the bidder fails or neglects to enter into a contract, and furnish a bond for the faithful performance of his contract, within 15 days after being notified that the bid is accepted, that in that event the said certified check to be forfeited and paid into the County Treasury as liquidated damages.

The Board reserves the right to reject any or all bids, and to accept any bid. A copy of the plans and specifications may be secured from the Clerk of this Board upon payment of One Dollar.

By J. A. Smith, Deputy.

PROPOSALS FOR JAIL WORK.

Pursuant to Resolution No. 6588 N. S., passed by the Council of the City of Oakland on November 5th, 1913, the Council of the City of Oakland will receive proposals or bids, and alternate bids for furnishing of all the materials, labor and workmanship required in connection with the Jail Work required for the City Hall Building in the City of Oakland, California.

All proposals shall be made upon and conform to the specifications and the forms of proposals prepared and furnished by the City, through the Architects, and shall be enclosed in sealed envelopes, addressed "Bid for furnishing of all the materials, labor and workmanship required in connection with the Jail Work required for the City Hall Building, addressed to the Council and deposited by the bidder to his agent with said Council while in session, between eleven o'clock a. m. and twelve o'clock noon, Pacific Time, on the 20th day of November, 1913, at the office of the Council, 14 and 15 Chestnut Streets, Oakland, and at the expiration of the time named the bids will be opened, examined and public bids declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of Palmer, Hornstedt & Jones, Architects at City Hall Building, to which said plans and specifications reference is hereby made.

No bid will be received or considered which is not accompanied by a check for the larger amount of the sum of ten per cent (10%) of the amount bid, payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent (10%) of the aggregate amount of the larger amount of the sum of ten per cent (10%) of the amount bid. The bidder's Alternate bids need not be accompanied by certified checks but no alternate bid will be considered unless accompanied by a proposal for at least one of the items specified in Section 56, entitled "Bids" of the Specifications for Jail Work for the Oakland City Hall

Building, as modified by Resolution No. 6587 N. S., passed by the Council of the City of Oakland on November 5th, 1913, which said proposal or proposals shall be accompanied by a certified check, said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within five (5) days after receiving notice of award.

A set of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgment and specifications will be furnished contractors on demand at the office of the Architects at City Hall Building. The plans and drawings may be had at the said office of the Architects after November 11th, 1913, within a reasonable time after application, and upon a deposit of Twenty-five Dollars (\$25.00) which deposit will be returned to the applicant when the said plans and drawings are returned to the Architects in good condition; one complete set of plans and drawings required for the work will be furnished to each applicant, and copies will, however, be furnished provided the applicant pays the cost of reproduction, such additional copies to be returned to the Architects, together with the fee of \$5.00.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Architects upon application at their office at the City Hall Building.

The right is reserved to the Council, in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter.

By order of the Council of the City of Oakland,

FRANK SMITH, City Clerk.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received at the office of the Comptroller of the University of California, Berkeley, California, at or before 10:00 A. M., Monday, November 18, 1913, for Furnishing and Erecting a Clock in the Sather Campanile at Berkeley, California, as per plans and specifications on file at said office.

A deposit of \$3.00 will be required for each set of plans and specifications, which deposit will be refunded upon return of said plans and specifications. The bids will be received and accompanied by check, or bond, in favor of the undersigned, equal to ten per cent (10%) of the bid, to secure execution of contract by the successful bidder.

The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA
Berkeley, Cal., November 6th, 1913.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SAN FRANCISCO.

STRUCTURAL STEEL AND IRON WORK—Cost not stated. San Francisco. Architect Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications have been completed and approved for furnishing, fabricating and erecting of the structural steel and iron for the main entrance tower of the exposition. Bids for this work are now being taken and will be opened by the Buildings and Grounds Committee on November 28th. An official proposal appears in another column of this issue. Plans and specifications can be secured from the Director of works.

COURT OF HONOR—General construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on November 20th by the Buildings and Grounds Committee for the general construction of the Court of Honor, one of the largest buildings on the exposition grounds. Plans and full particulars of this work can be secured from the Director of Works. An official proposal appears under another heading in this issue.

RESIDENCES—2 1/2 story and base, frame, \$2,300 each. San Francisco. Architect, none. Owner, B. J. Hooper, 450 12th avenue, S. F. These houses will be erected on the east side of 19th avenue south of Anza street and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with hardwood floors in the living rooms, dining rooms and reception hall. There will be large open fire places in the living rooms and brick mantels. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owners, Cleve Carson and Son, 219 32nd avenue, S. F. The house which has been designed for a seven room dwelling, will be erected on Castaneda avenue west of San Marcus. Interior will be finished in pine and redwood with some white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and a composition floor. An automatic water heater will also be installed. Exterior of the house will be covered with cement plaster on metal lath. Work will be done by Day Labor and all materials are now being purchased.

RESIDENCE—2 story attic and base, frame, \$3,500. San Francisco. Architect, Willis Oak, Merchants' Exchange Bldg., S. F. Owner, Mrs. Katherine P. Hooper. The house will be erected on the south side of Pacific

avenue west of Walnut and has been designed for a modern city home. The dwelling will contain in the neighborhood of 14 rooms, several baths and sleeping porches. A private garage will also be erected on the lot. The interior of the house will be handsomely finished in hardwoods and white enamel. Hardwood floors will be used throughout except in the baths which will have tile floors and wainscot. Marble and tile will also be used in the butler's pantry. There will be steam heat and open fire places. Mantels will be of tile and brick. Entrance will be finished in marble. Exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$3,500. San Francisco. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner, Mrs. Harris. The dwelling, designed for a six room house, will be erected on Clifford street in the Ashbury Heights district. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Plans provide for furnace heat. There will be tile wainscot in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCES—2 2-story and base, frame, \$7,000 each. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Matthew A. Little, 1347 4th avenue, S. F. These houses will be erected on the west side of 18th avenue north of Lake street and each has been designed to contain eight rooms, baths and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. The wainscot and composition floors will be used in the bath rooms. Automatic water heaters will be installed. Exterior will be covered with rustic and cement plaster on metal lath. Clay tile roofs will be used. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

STATE BUILDING—Concrete and frame construction. Cost not stated. San Francisco. Architect, A. F. Heide, 16 Kearny street, S. F. Owners, State of Washington. Architect Heide, who has recently opened offices in this city, has been commissioned by the State of Washington to prepare plans for the two state exhibit buildings which are to be erected at the Panama-Pacific International Exposition in this city, and also for the building which will be erected by the state of Washington at San Diego. Details of this work have not been determined upon and pending the time when action is taken on granting a larger site to the state

of Washington no information can be given. It is expected that a considerably larger appropriation will be made for the building in this city than was originally planned. Further mention will be made as the work progresses.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. San Francisco. Architects, Havens and Toepke, 46 Kearny street, S. F. Owners, Cuneo Estate. The building will be erected at the intersection of Powell, Union and Columbus avenue, and will cover a considerable area. The first floor has been arranged for nine stores and upper floor for a number of living apartments of two and three rooms. Interior finish will be of pine with some elm panels. All suites will have wall beds and private bath rooms. A central heating system and hot water plant will be installed. Stores will have large plate glass windows and patent store fronts. Exterior of the building will probably be faced with cement plaster on metal lath and shiplap. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mr. Nuhbe. This building will be erected at 951 1/2 McAllister street and has been designed to contain six suites of two and three rooms. All apartments will have wall beds and private baths. Interior finish will be of pine, elm panels and some hardwood floors. Plans provide for a central heating system and hot water plant. Exterior will be covered with cement plaster on metal lath and rustic. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architect, David C. Coleman, Merchants' National Bank Bldg. Owner, I. Friedman. The building will be erected on the east side of Dolores street south of Railroad avenue and will cover an area of 38 feet by 75 feet. Interior will be arranged for 12 suites, all of which will have wall beds and private baths. Pine and redwood will be used for interior finish. Bath rooms will have tile wainscot. A hot water system will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are complete and a contract will be let within a few days.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, James Ward. This work has been mentioned here a number of times before when plans were first started. The building will be erected on the east side of Taylor street near Clay and has been arranged to contain 12 suites of four rooms and bath each. Interior will be finished in pine, elm panels and hardwood. There will be steam heat, elevator service and a vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Wall beds will be used in all suites. Tile and marble will be used in the entrance. Exterior of the building will be covered with rustic, cement plaster on metal lath and a brick veneer base. Plans have been out for figures and a general contract will be awarded at once.

APARTMENT HOUSE—3 story and

base, brick and steel. Cost not stated. San Francisco. Architect's name not given. Owners, Lachman Bros., 2019 Mission street. The building will be erected on the southeast side of Mission street between 16th and 17th streets and will cover an area of 60 by 105 feet. The first floor will be arranged for stores and upper floors will contain a number of well arranged apartments of two and three rooms. All suites will have private bath rooms and wall beds. Interior finish will be of pine throughout. There will be steam heat, vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are complete and a permit has been applied for.

HOSPITAL GROUP—A story and base, Class A construction, \$600,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, University of California. The building will be erected on the heights back of the Affiliated Colleges. This structure will cost over \$600,000 and has been made possible by contributions from John M. Keith, \$150,000; William H. Crocker, \$50,000; Mrs. Harriet Alexander, \$50,000; Templeton Crocker, \$25,000; Mrs. Malcolm Whitman, \$25,000; George Blanding, \$25,000 and Mrs. F. W. Sharon, \$25,000, besides a large number of smaller amounts from others whose names have not been given out. The building will be eight stories high and of an ornamental design. Construction will be started early in February. Full particulars are not available at this time and will be given later.

HOTEL—4 story and base, reinforced concrete, \$25,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on California street near Kearny and will have a frontage of 46½ feet by a depth of 86 feet. Plans provide for a total of 50 guest rooms besides a large lobby, office, parlors, public dining room and kitchen. Interior finish will be of pine and redwood with some hardwood veneer. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Considerable tile and marble will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within a few days.

HOTEL—4 story and base, brick and steel, \$35,000. San Francisco. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner, Harry Rosenberg. The building will be erected on the west side of Hyde street between Sutter and Bush streets and will have a frontage of 40 feet and a depth of 127 feet. There will be a large lobby and parlors on the first floor besides a number of guest rooms. Upper floors will be subdivided into 65 guest rooms and a number of public and private baths. Interior finish will be largely of pine with some hardwood veneer. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile and ornamental plaster will be used in the lobby. Exterior of the building will be faced with pressed

brick. Plans are now being prepared.

HOTEL—10 story and base, Class A construction. Cost not stated. San Francisco. Architects, Rousseau and Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected in the down town district but the exact location is withheld for the present. Plans provide for a total of 50 guest rooms, large lobby, office, parlors and public dining room. Construction will be fireproof throughout with steel frame, reinforced concrete walls and floors and interior partitions of hollow tile or metal lath and plaster. Interior will be finished in pine and hardwoods. All guest rooms will have private baths which will be finished in tile. There will be steam heat, elevator service, a vacuum cleaning system and other modern conveniences. Exterior of the building will be faced with cement plaster. Plans are now being prepared. Further information will be given shortly.

RAILROAD TRACK CONSTRUCTION—\$30,000. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans and specifications have been completed and have gone to the War Department at Washington for approval for construction on a standard gauge track at the Transport Docks connecting with the Belt Line Railroad of the State Board of Harbor Commissioners. The track will be 5,100 feet long carried on 114 pound rails and 127 pound guard rails. Redwood ties and crushed roadbed will be used. Bids will not be called for until the plans have received the approval of the War Department. Notice will be given in these columns when bids are called.

BUNGALOW—1½ story and base, frame, \$3,000. San Francisco. Architect, none. Owner, L. Arthur, 1230 1st avenue, S. F. The dwelling has been designed for a seven room house and will be erected on the west side of 8th avenue south of Irving street. Interior will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. A brick veneer base will be used. Plans are complete and work will be done by Day Labor. All materials are being purchased.

RESIDENCE—2 story, attic and base, frame. Cost not stated. San Francisco. Architect, David C. Coleman, Merchants' National Bank Bldg., S. F. Owner, Adolph Becker. This dwelling will be erected on Dewey boulevard in St. Francis Wood and has been designed to contain 12 rooms, two baths and sleeping porches. The design is in the English style with exterior covered with cement plaster and half timber. Interior finish will be of pine, mahogany and oak. Hardwood floors will be used throughout. There will be a central heating system and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms will have tile floors and wainscot. Plans are being prepared.

RESIDENCES—7 2-story and base, frame, \$5,000 each. San Francisco. Architect, none. Owners, Cleeve Carson

and Son, 219 32nd avenue, S. F. These houses will be erected on Castaneda Way in St. Francis Wood and each has been designed to contain seven rooms, baths and sleeping porches. Interiors will be finished in pine and hardwoods. Oak floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath, shingles and rustic. Plans are being prepared and when complete the work will be done by Day Labor. All materials will be purchased by the owners.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, G. Peterson, 351 12th avenue. The dwelling, designed for a seven room house, will be erected on the west side of 15th avenue near Anza. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with brick or tile mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Owner, Joseph C. Kirby, 3947 18th street, S. F. The dwelling will be erected on the east side of 16th avenue south of Anza and has been designed for a seven room house with bath. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of tile. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath, rustic and brick veneer. Plans are complete and the work will be done by Day Labor.

POWER STATION—1 story and base, Class A construction, \$50,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Pacific Gas and Electric Co. This building will be erected on the south side of Commercial street west of Montgomery and will cover a considerable ground area. Construction will be of the Class A type with a complete steel frame and exterior walls of brick and concrete. There will be a cement floor and roof. Interior partitions will be of hollow tile. Interior will be finished in pine and metal. Tile will be used extensively. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick. Bids are now being taken for the general construction. Separate contract will be awarded for the foundation work.

STORES AND OFFICES—12 story and base, Class A construction. Cost not stated. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owner, William H. Crocker. Architect Lewis P. Hobart, Crocker Bldg., has prepared preliminary plans for a large addition to the present Crocker building, which, if carried out, will make

that building one of the largest office structures in the west. Property to the west of the present building having a Market street frontage of 62 feet 3 inches, and extending through to Post street where it has a frontage of 66 feet 2 inches, is to be improved. The depth of the lot varies from 153 feet to over 170 feet. At present this property is covered with four two-story brick buildings of a more or less temporary nature with stores on the first floor and upper floors nearly vacant. Just what improvements will be made has not been fully determined, but it is stated that the Crocker Bank needs considerably more ground space and that a large portion of the Market street frontage in the new building will be occupied by that institution. A plan, said to be most generally favored, contemplates carrying the new building up to the height of the present structure. Construction will be fireproof throughout.

Contracts Awarded.

CHURCH—2 story and base, Class A construction, \$100,000. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Joseph's Church. Contractors, W. F. Vitt Electric Co., electric work. Contract price, \$1,435.

RESIDENCE—2 story, attic and base, frame, \$34,000. San Francisco. Architects, H. Gelfuss and Son, 46 Kearny street, S. F. Owner, Mrs. A. B. S. Knauer. Contractor, Holm and Son, Foxcroft Bldg., general carpentry work; Peterson-James Co., plumbing, and Decker Electric Co., electric work. The total of these contracts is about \$16,000. Additional contracts will be awarded shortly.

FLATS—2 story and base, frame, \$7,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mary Wagner. Contractor, J. Eric Johanson, 2726 20th street, S. F. Contract price, \$7,000.

NURSES' HOME—4 story and base, Class A construction. San Francisco. Architects, Ward and Blohne, Alaska Commercial Bldg., S. F. Owners, Children's Hospital. Contractor, J. W. Cobby, 180 Jessie street, S. F., general construction. Contract price, \$20,000.

OAKLAND AND ALAMEDA

RESIDENCE—2 story and base,
 frame, \$37,500. Oakland, Cal. Archi-
 tects, Hutchison Bros, 120 15th street
 Oakland. Owner, M. C. Vaughn. The
 dwelling has been designed for a seven
 room house and will be erected in the

Fourth Avenue Terrace. Interior fin-
 ish will be of pine and redwood. Hard-
 wood floors will be used in the living
 room, dining room and reception hall.
 Plans provide for furnace heat and
 open fire places. Mantels will be of
 tile or brick. Bath room will have
 tile wainscot and composition floors.
 An automatic water heater will be in-
 stalled. Tile wainscot will also be
 used in the kitchen. Exterior of the
 dwelling will be covered with cement
 plaster on metal lath. Plans are com-
 plete and work will be done by Day
 Labor. All materials are being pur-
 chased.

RESIDENCE—2 story and base,
 frame, \$4,000. Berkeley, Alameda Co.,
 Cal. Architect, Maury I. Diggs, 2544
 Bowditch Street, Berkeley. Owners,
 Marshall-Diggs Co. The dwelling has
 been designed for an eight room house
 with lath and sleeping porch and will
 be erected on the south side of Russell
 street west of Claremont. Interior
 finish will be largely of pine and red-
 wood. Hardwood floors will be used
 in the living room, dining room and
 reception hall. There will be furnace
 heat and open fire places. Mantels
 will be of tile. There will be tile
 wainscot in the bath rooms and kitchen.
 Exterior of the house will be covered
 with cement plaster on metal lath.
 An automatic water heater will be in-
 stalled. Plans are complete and the
 work will be done by Day Labor. All
 materials are being purchased by the
 owners.

RESIDENCE—2 story and base,
 frame, \$4,500. Oakland, Cal. Architect,
 Charles W. McCall, Central Bank Bldg.,
 Oakland. Owner, Mrs. Parker. The
 house will be erected in the Fourth
 Avenue Terrace and has been designed
 to contain seven rooms, bath and sleep-
 ing porch. Interior finish will be of
 pine, redwood and hardwood veneer.
 There will be furnace heat and open
 fire places. Hardwood floors will be
 used in the principal rooms. Mantels
 will be of tile or brick. Tile wainscot
 and composition floors will be used
 in the bath rooms. An automatic water
 heater will be installed. Exterior of
 the house will be covered with cement
 plaster on metal lath. Plans are now
 being prepared.

RESIDENCE—2 story, attic and
 base, frame. Cost not stated. Berke-
 ley, Alameda Co., Cal. Architect, Albert
 Fort, Foxcroft Bldg., S. F. Owner,
 H. M. Wright. The dwelling will be
 erected in Claremont Court and has
 been designed to contain seven rooms,
 bath and sleeping porch. All interior
 finish will be of pine or redwood.
 Hardwood floors will be used in the
 living room, dining room and recep-
 tion hall. There will be furnace heat
 and open fire places. Mantels will be
 of tile or brick. Tile wainscot will
 be used in the bath rooms and kitchens.
 An automatic water heater will be in-
 stalled. Exterior of the house will be
 covered with cement plaster on metal
 lath. Plans are complete and figures
 are being taken.

APARTMENT HOUSE—3 story and
 base, frame. Cost not stated. Berke-
 ley, Alameda Co., Cal. Architect, John
 Carson, Bacon Bldg., Oakland. Owner,
 E. R. Lamb. The building will contain
 six suites of four rooms and bath each.
 Interior finish will be of pine with
 some elm panels and hardwood floors.
 A central heating system, probably hot
 air, will be installed. All rooms will be

supplied with hot and cold running
 water. There will be private bath
 rooms and wall beds. Bath rooms will
 have composition floors and tile wains-
 cot. Exterior of the building will be
 faced with cement plaster on metal
 lath and shiplap. Plans are now be-
 ing prepared and when complete the
 work will be done by Day Labor.

GARAGE—1 story and base, brick.
 Cost not stated. Oakland, Cal. Archi-
 tects, Rousseau and Rousseau, Monad-
 nock Bldg., S. F. Owners, H. O. Har-
 rison Co. The building will be erected
 on the east side of Broadway between
 29th and 30th streets, covering a con-
 siderable ground area. Front portion
 of the building will be handsomely fin-
 ished in pine, hardwood and tile. Rear
 portion will contain the repair shop
 and shipping department. There will
 be a tile floor and considerable marble
 work. Plans call for metal window
 sash and frames and patent store
 fronts. Exterior of the building will
 be faced with pressed brick. Plans are
 complete and figures are being taken.

HOTEL AND STORES—3 story and
 base, brick and steel, \$35,000. Oakland,
 Cal. Architects, Bakewell and Brown,
 251 Kearny street, S. F. Owner, R. G.
 Ellis. The building will be erected at
 the southwest corner of 10th and
 Franklin streets. The first floor will be
 arranged for a number of stores be-
 sides the entrance to the hotel. Upper
 floors will contain in the neighborhood
 of 75 guest rooms and a number of pub-
 lic and private baths. Interior finish
 will be of pine and redwood with some
 elm panels. There will be steam heat
 and a hot water plant. Bath rooms
 will have composition floors and tile
 wainscot. Metal window sash and
 frames are specified. Exterior of the
 building will be faced with pressed
 brick. Plans are complete and in the
 hands of the contractors for figures. A
 contract will be awarded shortly.

BUNGALOW—1 story and base,
 frame, \$2,500. Oakland, Cal. Archi-
 tects, Newsum and Dixon, 1844 5th ave-
 nue, Oakland. Owner, W. C. Burrell.
 The dwelling has been designed for a
 six room house with bath and sleeping
 porch. Interior will be finished en-
 tirely in pine. Some oak floors will be
 used. A large open fire place will be
 a feature of the living room. Mantel
 will be of brick. Tile will be used in
 the bath room and kitchen. Exterior
 of the dwelling will be covered with
 cement plaster on metal lath. Plans
 are complete and the work will be done
 by Day Labor.

Contracts Awarded.

GARAGE—1 story and base, brick
 and steel, \$10,500. Oakland, Cal. Archi-
 tects, Rousseau and Rousseau, Monad-
 nock Bldg., S. F. Owner, F. W.
 Taylor. Contractors, Finley and Sea-
 coin brick work only. Contract price,
 \$3,100. George G. Knepper and H. J.
 Harst, Alameda, general carpentry
 work, contract price, \$7,200.

SAN JOSE AND THE SANTA CLARA VALLEY.

CITY HALL—2 story and base, brick or reinforced concrete, \$40,000. San Mateo, San Mateo Co., Cal. Architects, Havens and Toepke, 46 Kearny street, S. F. Owners, City of San Mateo. The architects have just been commissioned to prepare plans for this building and complete details are not available. The structure will be designed in the classic style and will be as near fireproof as the amount available will permit. Plans are to be so arranged that the building will house all the city offices including the police and a part of the city fire department. Several fireproof vaults will be installed. Interior finish will probably be of pine and hardwood. A large council chamber is to occupy a large portion of the second floor. There will be steam heat. Exterior of the building will be faced with either pressed brick or cement plaster. Further mention will be made of the work as plans progress.

Contracts Awarded.

HOTEL—3 story and base, Class B construction, reinforced concrete type, \$50,000. South San Francisco, San Mateo Co., Cal. Architects, Havens & Toepke, 46 Kearny street, S. F. Own-

ers, South San Francisco Land and Improvement Co. Contractors, Thomas Dwyer Sons, Sharon Bldg., S. F. Contract price, \$50,000.

Nov. 1, 1913—SE. PINE 450 NE Cedar, Linda Vista Tract, San Anselmo.

Hans Walder to whom it may concern Oct. 31, 1913

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

CHURCH—2 story and base, brick and steel, \$20,000. Fresno, Fresno Co., Cal. Architect, Henry F. Starbuck, Fresno. Owners, Armenian Holy Trinity Church. The building will be erected at the corner of Ventura and M streets covering a considerable ground area. Interior has been arranged for a main auditorium and gallery seating 1000 people. Basement will contain class rooms, study hall and social rooms. Interior finish will be of pine with a mahogany and marble sanctuary. There will be a central heating system. Art glass will be used in the windows and also in a large dome. Exterior of the building will be faced with cement plaster trimmed with granite and large granite columns. Plans are complete and figures are being taken on the work.

CITY HALL ALTERATIONS—Interior and exterior work and heating, \$27,000. Bakersfield, Kern Co., Cal. Architect, Thomas B. Wiseman, Producers' bank Bldg., Bakersfield. Owners, City of Bakersfield. The city has purchased the old County Court house and have had plans prepared for the alteration of the building into a modern City Hall. This work will include hollow tile interior partitions, plastering, metal ceilings, new floors, interior finish, plumbing, heating and electric work. Plans are complete and figures are now being taken. Bids will be opened by the City Council on November 18th. Plans and specifications can be secured from C. F. Murdock, City Clerk, Bakersfield, or from the architect.

THEATRE—2 story and base, brick and steel, \$25,000. Turlock, Stanislaus Co., Cal. Architect not selected. Owners, Arakelian Bros., Fresno. These men have purchased the site of the old Turlock Opera House on Broadway and will wreck the present buildings and construct a modern two-story brick building on the site. Besides the theatre plans will provide for several stores. It is the intention of the owners to have plans prepared with foundations and exterior walls heavy enough to carry four stories. Exterior will be faced with pressed brick. Further mention will be made of the work.

Contracts Awarded.

GARAGE—1 story and base, brick and steel, \$15,000. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Erb and Drury. Contractor, C. D. Brown, 1660 F street, Bakersfield. Contract price, \$15,000.

STORE—1 story and base, brick, \$6,500. Bakersfield, Kern Co., Cal. Architect, none. Owner, A. H. Karpe. Contractor, E. F. Leierlitz, Bakersfield. Contract price, \$6,500.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

RESIDENCE—2 story and base, frame, \$7,000. Enreka, Humboldt Co., Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Judge Wilson, Enreka. The dwelling has been designed for an eight room house with two baths. Interior finish will be of pine, redwood and hardwoods. Hardwood floors will be used in the living room, den, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$2,700. Architect, none. Owner, E. D. Pierce, 2207 1st avenue, Sacramento. The dwelling has been designed for a seven room house with bath. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. There will be tile wainscot in the bath room and kitchen. An automatic water heater will be installed. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

BRIDGE—Reinforced concrete. Cost not stated. San Andreas, Calaveras Co., Cal. Engineer, C. E. Cotton, San Andreas. Owners, Calaveras County. Plans have been completed and have received the approval of the Board of Supervisors for a reinforced concrete road bridge which will be erected at San Andreas. Bids are now being called for on the work and will be opened by the Board of Supervisors on November 18th. Plans and specifications can be secured from the County Clerk at San Andreas.

Contracts Awarded.

SCHOOL—2 story and base, reinforced concrete, \$55,436. Sacramento, Cal. Architect's name not given. Owners, City of Sacramento. Contractors, McGillivray Construction Co., Sacramento. Contract price, \$55,436.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—2 story and base, brick, \$10,000. Los Angeles, Cal. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, S. G. Ranshman. The building will be erected at the corner of 1st and Western avenue and has been designed for a high class picture

show on the first floor and a number of modern living apartments on the upper floor. Interior will be finished in pine and elm panels. Gas steam radiators will be used for heat. All suites will have wall beds and private bath rooms. Tile floors and vitlute will be used in the lobby and bath-rooms. Interior of the picture show will be handsomely finished. Modern ventilation is provided. Exterior of the building will be faced with white enameled pressed brick. Plans are being prepared.

BRIDGE—Steel and concrete, \$25,000. Vernon, Los Angeles Co., Cal. Engineer, F. Dupuy, Pacific Electric Bldg., L. A. Owners, City of Vernon. Plans have been completed and have received the approval of the City Trustees for the construction of a highway bridge across the Los Angeles River at San Antonia avenue. The structure will be 25 feet wide with a 20 foot roadway and 5 foot walk. There will be three 80 foot spans. Plans can be secured from either the engineer or from T. J. Furlong, City Clerk. Bids will be opened on November 18th.

CHURCH—2 story and base, Class A construction, \$250,000 to \$300,000. Los Angeles, Cal. Architects, Austin and Pennell, Wright and Callender Bldg., L. A. Owners, First Methodist Church of Los Angeles. A new site has been secured for this building at the southwest corner of 8th and Hope streets and the architects were formally commissioned at the last meeting of the Building Committee. The site is 156 by 200 feet and the new edifice will cover the entire area. Construction will be Class A throughout. Preliminary plans will be submitted to the trustees at their next meeting. No details of the building can be given at this time.

CHURCH—1 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Montrose Warn, 3126 Winter street, L. A. Owners, West Fifty-fourth street Methodist Church. The building will be erected on a corner site and will cover an area of 30 by 48 feet. Plans provide for a main auditorium, Sunday School rooms and Epworth League rooms. Interior will be finished in pine throughout. Exterior of the building will be covered with rustic. A shingle roof is specified. Plans are complete and work will be done by Day Labor.

CITY HALL ADDITION—1 story, brick and steel, \$18,000. Los Angeles, Cal. Architect, J. J. Backus, City Hall, Los Angeles. Owners, City of Los Angeles. Architect Backus has been commissioned to prepare plans for an addition of one story to the present two-story City Hall annex. Construction will be of brick and steel. Interior will be finished in pine throughout. Elevator service will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LIBRARY—1 story and base, brick and reinforced concrete, \$10,000. Watts, Los Angeles Co., Cal. Architect, Elmore R. Jeffery, Citizens' National Bank Bldg., L. A. Owners, City of Watts. Plans have been approved by the Carnegie Library Corporation for the new building to be erected at Watts. The structure is classic in design and will cover an area of 30 by 70 feet. Plans provide for two reading rooms, a large stack room, librarian's office and lavatories. Interior will be finished in pine

and hardwood. There will be a central heating system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. T. F. Adelsbach is secretary of the Library Board. Plans can be secured from him or from the architect.

LIBRARY—1 story and base, brick and concrete, \$10,457. Architect, Paul V. Tuttle, Delta Bldg., L. A. Owners, City of Glendale. T. H. Addison, 316 Belmont street, Glendale, submitted the lowest bid for this work. All figures were referred to the Library Committee. An award of contract will be made this week.

SCHOOL—1 story and base, brick and steel, \$35,000. Chino, San Bernardino Co., Cal. Architects, Withey and Davis, Story Bldg., L. A. Owners (Chino School District). The building has been designed for a grammar school and will contain twelve class rooms, principal's office, teachers' room and a library. Interior will be finished in pine with pine and maple floors. Plans include slate blackboards, modern school plumbing, a plenum system of heating and programme clocks. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story and base, hollow tile construction. Cost not stated. Architect, J. Martin Haenke, Story Bldg., L. A. Owner, Mary Garden. This dwelling, which is to be erected in Beverly Hills, will contain fourteen rooms, five baths and sleeping porches. Interior will be finished in hardwoods and white enamel. Oak floors will be used throughout. There will be a central heating system, probably steam or hot water, vacuum cleaning and hot water supply. Bath rooms will be finished in tile. A garage will also be erected on the lot. Exterior of the dwelling will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

POWER STATION—2 story and base, Class A construction, \$200,000. Santa Ana Canyon, San Bernardino Co., Cal.—Architect, H. Alban Reeves, Chamber of Commerce Bldg., L. A. Owners, Southern California Edison Co. General Manager Ben Pearson, San Bernardino, states that construction will shortly be started on one of the largest power houses in the state. Construction will be fireproof with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior will be finished in pine and metal. Exterior of the building will be faced with cement plaster. The work will be carried on by Day Labor under the direction of Mr. Pearson.

Contracts Awarded.

APARTMENT HOUSE—2 story and base, brick, \$13,000. Imperial, Imperial Co., Cal. Architects, Noe and Spencer, Union League Bldg., L. A. Owners, Imperial Valley Syndicate. Contractors, Hunziker and Berger, Hollingsworth Bldg., L. A. Contract price, \$13,000.

RESIDENCE—2 story and base, frame, \$20,000. Hollywood, Los Angeles Co., Cal. Architect, B. Cooper Corbett, Union Oil Bldg., L. A. Owner, C. E. Perry. Contractor, E. H. MacGilliblow, Los Angeles Investment Bldg., L. A. general construction. Contract price, \$20,000.

STORES AND LOFTS—6 story and base, brick and steel, \$50,000. Los Angeles, Cal. Architect, Harold Cross, Consolidated Realty Bldg., L. A. Owners, Lyon, McKinney and Smith. Contractors, The Carl Lang Co., Mason Bldg., L. A. general construction only. Contract price, \$50,000. Note—Sub-figures are now being taken on the various parts of the work.

CHURCH ADDITION—1 story and base, frame, \$6,000. Los Angeles, Cal. Architect, A. B. Benton, 114 North Spring street, L. A. Owners, Church of the Epiphany, Contractor, W. R. Phelps, L. A. Contract price, \$6,000.

FACTORY—1 story and base, brick and concrete, \$21,026. Compton, Los Angeles Co., Cal. Architect's name not given. Owners, Panama Rubber Co., Los Angeles Investment Bldg. Contractors, Huntsberger-Reed Co., Van Nuys Bldg., L. A. Contract price, \$21,026.

HOTEL—4 story and base, brick and steel, \$31,200. Los Angeles, Cal. Architects, Richards-Konstadt Const. Co., Avright and Callender Bldg., L. A. Owner, Newton E. Cramer, Contractors, Willard Slater Co., 2314 Santa Fe ave., L. A. general construction. Contract

PORTLAND AND OREGON.

terior will be finished in pine and hardwood veneer. Oak floors will be used in the living rooms and entrance lobby and halls. There will be a hot water system of heating. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be let on a percentage basis.

GARAGE—1 story and base, reinforced concrete. Cost not stated. Everett, Wash. Architect, W. W. Hastings, Everett. Owners, Haley-Sheridon. The building will be erected at the corner of Colby and California streets and will be practically fireproof in construction. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened about November 20th.

GARAGE—2 story and base, reinforced concrete. Cost not stated. Everett, Wash. Architect, W. W. Hastings, Everett. Owner, John Gurnso, Everett Sales Co. The building will be practically fireproof and will cover a large ground area. A site at the corner of Rucker and Pacific streets has been secured. Besides the usual garage fittings, the building will contain two elevators, special gasoline tanks, metal window sash and frames and a cement floor. Interior finish will be of pine throughout. Exterior of the structure will be faced with brick. Plans are complete and figures are being taken. Bids will be opened about November 20th.

FACTORY ADDITION—1 story and base, brick, \$25,000. Seattle, Wash. Architect, Carl Siebrand, Arcade Bldg., Seattle. Owners, Seattle Brewing and Malting Co. This building has been designed for a four story structure but only the first story will be erected at this time. The building will contain the bottling works and a cooperage shop. The structure is to cover an area of 50 by 200 feet. Interior finish will be of pine. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of James Horton, Supt. of Buildings for the Seattle Brewing and Malting Co. and the work will be done by Day Labor.

RESIDENCE—2 story, attic and base, Class A construction, \$100,000. Vancouver, B. C. Architect, W. Marbury Somerville, White Bldg., Seattle. Owner, B. T. Rogers of the British Columbia Sugar Refinery. The architect has just been commissioned to prepare plans for this work and details are not available.

Construction will be dropped throughout and the interiors will be elaborately finished. Further information of the work will be given as plans progress.

SCHOOL—3 story and base, reinforced concrete, \$75,000. South Bend, Wash. Architect's name not given. Owners, South Bend School District. All bids received for this work have been rejected as above the amount available. The lowest bid received was from the Manhattan Co., Central Bldg., Seattle, for \$79,993. Plans will probably be revised to bring the structure within the amount available and new figures will be advertised.

SCHOOL—2 story and base, brick and concrete, \$35,000. School District No. 51, Wash. Architect, V. W. Voorhees, Elitel Bldg., Seattle. Owners, School District No. 51. This building will be erected about one mile north of Seattle and will contain ten standard sized class rooms, principal's office and teachers' room. Interior will be finished in pine with maple floors. The building will cover an area of 70 by 120 feet. Plans provide for steam heat, modern school plumbing and a vacuum cleaning system. Exterior will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

THEATRE—2 story and base, brick and concrete, \$25,000. Seattle, Wash. Architect, J. A. Creutzler, New York Bldg., Seattle. Owners, Iris Land Co. Contractors, Bromley Const. Co. Oriental Bldg., Seattle. Contract price, \$25,000. Note—Subcontracts are now being let on the work.

CITY HALL AND JAIL—2 story and base, reinforced concrete. Kellogg, Idaho. Architect, L. R. Struck, Spokane. Owners, City of Kellogg. The building will be designed in the classic style and will cover a considerable area. Plans provide for a building housing all city departments including the fire department and city jail. Interior will be finished in pine throughout. There will be special jail equipment. A steam heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

MUNICIPAL OWNERSHIP.

Some Results at Edmonton, Where the People Operate and Control Directly the Public Utilities of the Municipality.

By William Short, K. C.

When Edmonton adopted municipal ownership, it was because the time and conditions were favorable. We were little more than a frontier village then, but all our citizens had but one desire, and that was the betterment of our common lot. Glasgow and other British cities had made a great success of municipal ownership and operation of public utilities, and we were optimistic for success. We began with the things that were most needed. At the time water was supplied to our citizens by hauling it in tanks from the Saskatchewan river, and a barrel stood at the back door and was filled as often as conditions seemed to require. Fire protection there was practically none. We had a number of wooden tanks situated in various parts of the city, but in point of fact none was ever known to have any considerable quantity of water in it when a fire happened.

It was an easy matter, therefore, to count the cost and to figure out that the system in vogue was costing us more than a waterworks system would. Citizens were paying from \$15 upwards for the barrel supply. The additional cost of insurance amounted to something, besides conditions were not tolerable, so we cast about to find what the cost would be to install an adequate water system. We found that we could not expect private capital to engage in such an enterprise when we were a mere village, with comparatively little but high expectations to justify our ambitions. However, one advantage of being a small place is that it is easy to get at public opinion, and the business men of Edmonton of that day were men of no ordinary business ability or experience. They had always been of the opinion that Edmonton was a proper place for the upbuilding of a city; they had many reversals, and had met them with a dogged determination not to give in.

Municipal ownership was a good thing, but it was looked upon not altogether with friendly eyes by the financial world. One can quite appreciate that attitude. We were all busy men; it was with difficulty that men could give up their own time and attention to public affairs, but we were all optimists, and so were determined to get at the bottom of things. In any event matters were talked over by a few of the younger and perhaps more daring members of the community, and an enquiry was constituted as to the probable cost. The cost outlined seemed to be large for a small place, but we counted up the number of people that were likely to take water from the city, and in other ways ascertained just exactly how we could be prepared to meet our payments. Having given careful consideration to this point, the council decided to submit the matter to the rate-payers.

At the same time the question of electric light came up. A company which had previously been supplying electric light had not found conditions very satisfactory, and were faced with the necessary additions to the plant. The company had made no dividends, but it was thought that this condition would not prevail if adequate capital were put into the enterprise. Calculations were made on this score, and at the same time that it was decided to submit the question of installing water and sewer, as well as the question of the town owning and operating an electric light plant.

The supplying of adequate sewerage systems has always been considered as part and parcel of the duty of a municipality, so we took our courage and submitted the whole proposition to the rate-payers. Careful explanations were made, matters thoroughly canvassed, citizens at large were acquainted with every phase of the question. Everything seemed to promise success, but almost at the last moment it was feared that the whole project would be defeated because of a strong opposition that developed in one of the newspapers. That opposition, however, appeared to have been entered into under a misapprehension, and was soon cured, and a vote being taken it was found that for water and sewer

protection there were only three of the local vote opposed, or electric light installation only five were opposed to the plan. Work, therefore, was continued.

We considered that we had embarked in something quite new and very much up-to-date, and so proud were we of our venture that we began to advertise to act far and wide. That advertising had no small part in the success which ultimately attended our efforts. At once we began to have an influx of settlers, and from 2,600 as we were when we started, we soon crept up to 4,000, then to 8,000, and from that time on the growth was steady and comparatively rapid. (The population of Edmonton is about 70,000.) No doubt that assisted considerably in the successful operation of our utilities.

Needless to say, in the early days of municipal ownership there was comparatively little difficulty. When any enterprise is small, it is easy to keep track of all the details, and to a very large extent, successful management means a careful oversight of all details. It is particularly true in municipal ownership as in everything else, if you take care of the pence the pounds will take care of themselves. However that may be, it was apparent from the start that our venture was to prove a success.

Under municipal ownership in five years Edmonton has built up a street car system utilizing 65 cars and extending over 40 miles of streets. Its water system has advanced to 119 miles; the city has 97.40 miles of sewers, 31 miles of boulevards, 149 miles of sidewalks, 250 miles of graded streets, 811 acres of parks, with an electric system adequate to the needs of a population of 70,000 souls. The city also owns its telephone system, power and incinerator and paving plants, public market, an exhibition grounds and speed course and a large livestock pavilion. Whenever a public utility is called for it is installed under municipal ownership.

There is doubt if these results could have been accomplished under private ownership. Unlike private ownership, each system has been extended by an amount of expenditure equal to demands. Instead of the public paying into the treasury of a private corporation millions of dollars tribute on overcapitalization and suffering attendant vicissitudes, occasioned by a profit-making system, the money paid in taxes goes for the purpose for which it was collected. Those funds that might go to make up profits find their way again into extensions and improvements of service, profits being confined to interest on bonds and fair earning basis commensurate with the demands of the city.

Under the public ownership system Edmonton has been enabled to make advances in civic improvements that would have been years in materializing, and at the same time has enjoyed the privileges of becoming a partner in all enterprises looking to the comfort and convenience of mankind.

CABINET WORKS SOLD.

K. HELD has on September 8, 1913, sold its Cabinet & Fixture Shop "The Pottingtime Cabinet Works," to L. T. Brown, and is now connected with the Home Manufacturing Co., Brannan Street near Fourth.

CALIFORNIA PRODUCES NINETY-TWO MILLION DOLLARS IN MINERALS.

Increase of \$2,216,730 in 1912 Over Production for Preceding Year.

California, first among the States west of the Mississippi and fifth among all the States in the total value of its mineral production, rests its principal claim to distinction as a mineral producer on its output of petroleum. In this it leads all the other States, as does Pennsylvania in the production of coal. The total value of the mineral production in 1912, according to Edward W. Parker, of the United States Geological Survey, was \$92,837,374, an increase of \$2,216,730 over 1911.

In the quantity of petroleum produced California is credited with nearly 40 per cent of the total output of the United States. The gold produced in California holds second place in the mineral production of the State, and first place among the States. Petroleum and gold represent about 42 and 23 per cent respectively of California's mineral output.

Next to gold the principal metal product of California is copper, the production of which decreased from 26,316,126 pounds in 1911 to 23,451,672 pounds in 1912, but the value increased from \$4,539,517 to \$5,519,526.

The relatively small production of silver is recovered largely as a by-product in the copper mines. The production of lead and zinc is unimportant.

One of the important industries in California is the manufacture of Portland cement, the value of this product exceeding \$8,000,000 in both 1911 and 1912.

The clay products of the State increased nearly a million dollars in 1912 over 1911, being, respectively, \$5,912,450 and \$4,915,866.

The total value of the quarry products, which consist chiefly of granite, trap rock, and limestone, decreased from \$1,676,902 in 1911 to \$3,962,313 in 1912.

The other mineral products of the State which exceeded a million dollars in value in 1912 were asphalt, \$2,186,403; borax, \$1,127,815; and natural gas, \$1,154,456.

In addition to being first in the production of petroleum and gold, California is also the premier producing State in asphalt and quicksilver and enjoys a monopoly in the production of borax and magnesite, the combined value of these substances being over \$3,000,000. The other mineral products of commercial importance in California are Coromite, Corl, feldspar, fuller's earth, iron ore, lime, manganese ore, mineral paints, mineral waters, platinum, sand and gravel, sand-lime brick, sulphuric acid, talc, and tungsten (concentrates).

ALAMEDA—THE FIRST MUNICIPAL PLANT.

By Edward P. K. Troy

The Alameda municipal electric plant enjoys the unique distinction of being the second in point of age among the electric plants owned by cities in the United States. It was built in 1881, and acquired by the city in 1888. The

plant in Lansing, Michigan, was first, having been built in 1880; but it was not acquired by the city until 1902. When Alameda took over the plant, no other city in California owned an electric plant, and many of larger population were using coal oil lamps to light their streets.

The original plant furnished the town with fifty-two arc lamps for street lighting, at a cost of \$190 each, per year. The plant was bought for \$40,000 by the city. In a few months it had over one hundred similar lamps, costing but \$72 each, per year.

This alone is a valuable lesson in the advantage of municipal ownership. To-day, twenty-five years later, most of the cities and towns in California are paying the Pacific and other companies more than that sum for electric street lamps of less candle power. San Francisco paid \$117 per annum for each arc lamp for many years.

A vigorous war has been waged against the municipal plant from the beginning by the Pacific Gas and Electric Company and its predecessor and others in Oakland. Alameda papers were subsidized to attack and misrepresent municipal ownership. One of them was said to have been paid \$100 per month for this despicable work for many years. The courts were used to prevent the sale of bonds, and even the right of the town to operate a public utility was questioned.

The assets of the Alameda municipal undertaking now exceeds \$511,000. Its annual income from public and private lighting is \$20,745. The net profit last year, after deducting all operating, maintenance, depreciation and interest charges, was \$47,538.86. The service given is the best, the voltage not varying two per cent. In Oakland, the voltage of the Pacific Company has varied as much as sixty per cent, breaking lamps and shortening their life. The rates charged for many years have not exceeded seven cents. During the same period the Pacific Company has charged in Oakland and San Francisco nine cents.

The municipal light plant has made Alameda famous as the best lighted residence city in the United States. The "Alameda Electric Lamp Post" is being adopted by cities everywhere. In Alameda there are 4,118 of them, placed along the sidewalk about 125 feet apart. They are nine feet high, and surmounted by an electric lamp that gives an uniform light all over the street.

San Francisco supplied by the Pacific Gas & Electric Company, in strong contrast to Alameda, is the poorest lighted city in California. The political power of that Company can not only get its inexperienced employee appointed Chief of Police, but it has also caused the retention of gas for street lighting. Over 7,000 of that kind of dim, flickering lamps are being used in that city.

The electric lights furnished by that Company in San Francisco are on the tops of the high poles which carry its wires, and lose most of their light up in the air. A large part of what is cast towards the ground is obstructed by the pole and a mass of wires and cross arms, which put a dark shadow on nearly half of the street below. That city, spending half a million dollars a year for public lighting, is a striking

example of the inefficient service of privately owned lighting systems.

MODERN METHOD OF MIXING CONCRETE.

In the October 4th issue of Engineering Record there is a very interesting article on the methods used in the construction of the Elephant Butte Dam. The concrete mixing plant consists of three 80 foot Milwaukee concrete mixers. The mix is delivered into a hopper capable of holding two or three batches, in order that the mixer may be kept in operation continuously without waiting for the arrival of the skip or bucket. Above the mixer are located three measuring hoppers, shaped something like truncated pyramids, connected by a rectangular piece, which is so arranged that one part of it telescopes on the other. In this way the capacity of the measuring hopper can be changed by loosening or tightening four bolts.

These measuring hoppers are so large that it is practically impossible to operate them by hand and an automatic, hydraulically operated interlocking mechanism is so arranged as to perform all the functions of opening the gates to the bins, and after several months operation is said to work very satisfactorily.

To any one interested in contracting the article is well worth reading, particularly as to the handling of concrete quantities.

The Milwaukee mixer is handled in California by the Graves-Spears Road Machinery Co., San Francisco, and was awarded the gold medal at the Mechanics' Fair, held in this city last September.

RELIEF COMMITTEE ORGANIZED.

Masons and Builders and Journeymen Bricklayers Form Joint Committee To Provide Funds For Families of Victims of Accident.

Following the accident which happened on the building at Golden Gate avenue and Market street on October 29th last in which two bricklayers, Robert Hartley and Thomas Hopper, lost their lives, definite action has been taken by their brethren of the craft to provide for the families of the deceased. To devise ways and means of raising a fund for this purpose a joint committee from the Masons' and Builders' Association and from the Bricklayers' Union has been formed.

The committee from the Masons' & Builders' Association consist of the following members:

Joseph J. Phillips, James S. Fennell, Chas. B. Hadley, Walter N. Reed, W. S. Scott

From the Bricklayers' Union:

Hon John J. Sullivan, John A. Johnson, Joseph P. Duffy, Joseph Linehan and Chas. Noonan.

These men are to set about to procure a substantial fund for the widows and orphans of the workmen who lost their lives in this unexpected and fatal accident which occurred on October 29th last.

FULLER'S EARTH.

A report on fuller's earth, by Jefferson Middleton of the United States Geological Survey, has been published

as an advance chapter from Mineral Resources for 1912, and copies will be sent to interested persons free, on application to the Director of the Survey at Washington, D. C. The value of the fuller's earth mined in 1912 in the United States was \$365,522, and Florida was the principal producer.

The principal use of fuller's earth in this county is in the bleaching, clarifying, or filtering of fats, greases, and oils. The common practice with mineral oils is to dry the earth carefully after it has been ground to 30 to 60 mesh and run it into long cylinders, through which the crude, black mineral oils are allowed to percolate slowly. As a result the oil that first comes out is perfectly water white and much thinner than that which follows. The oil is allowed to continue percolating through the earth until the color reaches a certain maximum shade.

With the vegetable oils the process is radically different. The oil is heated beyond the boiling point of water in large tanks, from 3 to 10 per cent of its weight of fuller's earth is then added, and the mixture is vigorously stirred and then filtered off through bag filters. The coloring matter remains with the earth, the filtered oil being of a pale straw-color, provided the operation has been conducted with sufficient care.

LITTLE COAL AND OIL DEVELOPMENT IN ALASKA.

Alaska coal fields continue to be undeveloped, according to the United States Geological Survey. The only coal being mined is some lignite coal taken out for local use at Cook Inlet, on Seward Peninsula, and at several other localities. The total production in 1912 did not exceed 100 or 200 tons.

One oil company continued operations in the Katalla petroleum field in 1912, as in 1911. One of the two producing wells is said to have been sunk to a depth of about 800 feet. The oil is procured by pumping and is refined in a small plant located near Katalla, and the gasoline finds a ready sale in the coastal settlements of this part of Alaska. There are several other oil companies which control property in this field, but these seem to have done little in the way of development during 1912.

POWER ON A LARGE SCALE.

Unusual interest attaches to the new extension of the Commonwealth Edison Company of Chicago. Large generating units are employed. The large machines are selected not only on account of their steam economy, but because they are needed owing to the remarkable expansion of the business of the company. One of the English electrical journals, referring to a tabulation of its own, supposed to be complete, made the statement recently that the output of all the 303 electric service undertakings in Great Britain and Ireland, both privately owned and municipal, was 1,127,499,742 kilowatt hours for the year 1912. The output of the Commonwealth Edison Company alone in 1912 was, in round numbers, 739,000,000 kilowatt hours, or two-thirds of that of the entire United Kingdom.—Electric World.

RENO OFFERED NEW WATER SYSTEM.

RENO, Nev., October 30.—James J. Chambers of Salt Lake City and his attorney, A. C. Agnew, appeared before the Reno City Council Monday night and offered to install a new water system in this city by piping water from the head of Galena Creek into cement lined and covered reservoirs above the city. Galena Creek has its source on Mt. Rose.

Chambers offered to install the plant for \$750,000 cash or bonds and to guarantee the city 4,000,000 gallons of water daily. He also guaranteed to furnish the city with a gravity water system for fire fighting purposes.

W. G. Caffery, an electrical engineer of Reno, and W. B. Albertson of Salt Lake City, are associated with Chambers.

YOLO PLANS IMPROVEMENTS.

WOODLAND (Yolo Co.), October 28. Roy M. Pike, President of the Yolo Water and Power Company, has authorized an expenditure of \$175,000 on the irrigation system of this county. The expenditure will be for the extension and maintenance of the system.

More than 200 men are now in the employ of the company in this vicinity preparing the canals by which the entire county can be placed under irrigation.

A new canal is being constructed through the Madison section. This ditch will connect the Capay dam with the Moore system and will afford irrigation facilities to thousands of acres not heretofore benefited.

In Lake County the main dam at the outlet of Clear Lake is under construction.

OUT TWO TONS OF CASTING DAILY.

The first steel manufacturing plant in Toronto and the first electrical steel furnace in Canada started work October 15th and is turning out steel castings at the rate of about two tons per day.

For five years James A. Moffat and T. C. Irving, Jr., have been conducting investigations and experiments. Within the last few months they claim to have got the manufacture of steel in an electric furnace to such a point that it can be carried on a commercial basis. The iron of Canada is for the most part low grade magnetites, which cannot be used economically in the blast furnace owing to the low iron content, and in order to be of value they must be crushed and then concentrated mechanically.

Tests show, it is claimed, that the steel turned out is of a good quality and possesses a good tensile strength. It is also claimed that it is full of gas pockets and of uniform urbanity.

ASKS CONSTRUCTION PERMIT.

RED BLUFF (Tehama Co.), November 1.—E. L. Sisson, Secretary of the Sacramento Valley Electric Railroad Company, says his company has applied to the State Railroad Commission for permission to expend a certain amount of money to begin construction on the first unit of the road which will be run from a point

twelve miles south of Dixon, on the Oakland and Antioch line, to Woodland. The company, he states, wants to begin construction as soon as the desired permission is obtained.

COMMENCE SURVEY OF SAN JOAQUIN RIVER.

STOCKTON (San Joaquin Co.), November 1.—For the purpose of determining the irrigation and navigation possibilities of the San Joaquin River a survey was started Saturday which will entail an expenditure of \$64,000 before its completion, which Major Cheney, Chief of the United States Army Engineers, believes will be before the summer of 1915.

Three engineers were placed in the field, starting work a short distance from this city. They will work their way up the river to Herndon. Data will be gathered to determine whether the river can be used both for irrigation and navigation. It has been freely conceded that the use of the water for irrigation is of far more importance to the San Joaquin Valley than its use for navigation, and the report will show whether or not irrigation will be sacrificed if navigation is established.

CAPITALIST INSPECTS LANDS.

OROVILLE (Butte Co.), November 1.—The presence of Alden Anderson, banker of Sacramento, on an inspection trip over the property of the Feather River Canal Company, has led to the report that the Fleishacker interests are to take over the property. Anderson is regarded as the land agent of these capitalists.

Anderson recently accompanied the Fleishackers on a trip of inspection over the system.

MICHIGAN BUILDING FOR FAIR.

Advertising men of Michigan have joined together through their respective clubs to uphold the honor of their State and are perfecting plans to raise \$50,000 for a building to be representative of the State at the Panama-Pacific Exposition.

At a recent meeting of several advertising clubs in Detroit, Grand Rapids, Kalamazoo and other cities, the committee was assured of unlimited co-operation and financial support in the completion of arrangements and management of the building during the exposition.

This movement places Michigan as the thirty-fifth State to accept the invitation of Congress to participate in the State representation at the Panama-Pacific Exposition.

Here is a "lawyer" story taken from a country newspaper. An old contractor now dead, never seemed to be satisfied unless he had several cases pending in court. He has just won a case in the justice court when the loser, in a combative frame of mind, exclaimed: "I'll law you to the circuit court!"

Old Man—I'll be thar.
Loser—And I'll law you to the supreme court!
Old Man—I'll be thar.
Loser—I'll law you to 'e.e!
Old Man—My attorney'll be thar.

FOREIGN TRADE OPPORTUNITIES.

[Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

CORRESPONDENCE WITH CONSULS.

The suggestion is made that all communications to consular officers be addressed

The American Consul,

At _____,

the name of the officer not being given. Any communication so addressed will be opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name, it might be forwarded to him unopened, should he be absent, and delay would thus result.

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 11801. Agency for Australia.—An American with considerable experience as traveling salesman in foreign countries has written an American consul in Australia that he is prepared to offer his services as a salesman to any American manufacturer on a commission basis, or in consideration of a monthly retainer. For the benefit of manufacturers who have not touched the Australian field he will be glad to undertake a preliminary investigation of the possibilities for the sale of their goods free of charge. If he forms connections, his work will include the introduction of the manufacturers' products, the consistent conduct of an adequate sales campaign, and the general promotion of the manufacturers' interests.

No. 11892. Timber for Chinese Government railways.—The American consul general at Tientsin, China, has forwarded copies of an advertisement calling for tenders for timber to be used by the Chinese Government railways, Peking-Mukden line, to which are attached the official forms of tenders, on which all bids are required to be sent in. These papers may be obtained from the Bureau of Foreign and Domestic Commerce. Tenders must be submitted by December 5, 1913.

No. 11891. Stone-working machinery.—An American consul in the Near East reports that a firm of ironworkers in his district desires to be put in communication with American manufacturers of machinery for sawing, cutting and smoothing stone. Catalogues should be forwarded, with prices and discounts, and quotations should be made c. i. f. the ports of Alexandria and Tripoli, Syria. Correspondence should be in French.

No. 11865. Sheet piling.—A report from an American consul in a Latin-American country states that information is desired from American manufacturers regarding prices and materials for sheet piling for cofferdams for construction work at a river dock railway freight terminal. Catalogues and correspondence, which may be in French, should be sent to a person named in the report.

No. 11903. Agents for American Bricks.—An American consul in a Latin American country has forwarded a

copy of a letter from a business firm in his district stating that it is extending its business as manufacturers' agents with a view to increased trade at the opening of the Panama Canal. The firm states that it has been in business for 27 years, is familiar with the wants of the people and the possibilities of the introduction of the better class of goods, and has commercial travelers to keep in close and constant touch with the trade. The firm desires to make one connection only with the larger manufacturers of such goods as would find a ready sale in tropical countries.

No. 11882. Hardware and electrical goods.—A firm of manufacturers' agents having good connections in Canada informs an American consular officer that it desires to be put in touch with hardware and electrical-goods manufacturers in the United States with the intention of receiving agency rights.

No. 11878. Electrical supplies.—An American consular officer in a European country reports that a business man in his district is desirous of obtaining the agency of American manufacturers of electrical supplies of all description. This person also states that he is open to purchase considerable quantities of such supplies if American manufacturers will get in touch with him and supply catalogues, prices, etc.

No. 11789. Automobiles.—A business firm in southern Europe requests an American consul to place it in touch with American manufacturers of low-priced automobiles. The firm states that it desires to represent an American firm manufacturing low-priced, light-cycle shaft-driven motor vehicles, and also to carry such machines in stock. Catalogues, prices, terms, and discounts are requested; correspondence may be in English. The firm furnishes as references a list of companies it already represents.

No. 11881. Agricultural implements.—An American consul reports that a business man in his district desires to be placed in communication with manufacturers of agricultural implements, especially plows of a medium grade. Price lists and catalogues should be sent, and correspondence may be in English. The inquirer, who was in the Balkan States for almost 10 years, has business connections, there and thinks there is a good opening for substantial American agricultural machinery of moderate grade.

No. 1188. Automobiles, motor cycles, and motor boats.—A European business man informs an American consulate that he desires to be placed in communication with American manufacturers of automobiles and parts of same, motor cycles, and motor boats, with the object of importing the same. The inquirer states that he will represent such manufacturers as selling agent, or purchase direct on his own account. Catalogues, prices and terms of discount are requested. Correspondence should be in English. This man furnishes a list of English firms that he Catalogues, prices, and terms of discount represents, whose names are given as references.

No. 11855. Motor fire trucks. A report from an American consul in Canada states that as a result of a trade opportunity from his office a local firm has purchased in the United States an au-

tomobile truck which is said to be cheaper and much better than the Canadian article. The possibilities of further sales are thought to be very favorable. The fire department of the city has under consideration the purchase of an automobile truck, and American manufacturers would do well to get in touch with the chief of the fire department.

No. 11886. Water meters.—An inquiry has been received at an American consulate in the United Kingdom for the names of water-meter manufacturers in the United States. The inquirer desires to purchase some for use in connection with a new local invention.

No. 11888. Pulp license.—The American consulate general at Vancouver, British Columbia, Canada, reports that sealed tenders will be received by the Minister of Lands until January 2 for the purchase of pulp license to cut 10,302,000 feet of timber. Three years will be allowed for the removal of this timber. Further particulars of this sale can be had of the Chief Forester, Victoria, British Columbia.

At this season of the year when the rains come and occasionally an earthquake shock, the weather man's barometer becomes a thing of interest. It is not an uncommon thing at this season for the barometer to shift an inch within twenty-four hours. Sometimes the change is even greater.

Few persons have any idea what tremendous changes in the atmosphere are indicated by such a rise or fall in the mercury column.

A cubic inch of mercury weighs a half pound. When the mercury falls an inch a weight of one ton is removed from every four thousand square inches of surface. This is a ton for every area five and one-quarter feet square. If your house, for instance, is twenty-five feet by forty, with an area of a thousand square feet, a load of about thirty-six tons is lifted from the roof every time the barometer shows an inch fall. That is, a 26-ton load would be lifted if the house were air-tight. But as air presses in every direction there is as much of a push upward against the roof from below as there is a push downward from above. So the roof actually feels no effect from the removal of this heavy load.

In the same way, a man of average size would be relieved of a weight of about a ton and a half if there were no air chambers in the human body.

It has been figured that a fall of an inch in the barometer over a territory four hundred miles square removes a weight from the surface of the earth of 160 billion tons. If this were loaded on freight cars, twenty tons to the car, and thirty cars to the train, more than 260 million trains would be required to move it. If each train were five hundred feet long they would stretch out in a line more than 25 million miles long.

The only disturbance or noise that such a tremendous change causes is a windstorm or a movement of the atmosphere to adjust itself. In countries like California where an occasional shake occurs this barometric change naturally affects any condition of unstable equilibrium.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

“KINNEAR” STEEL ROLLING DOORS & SHUTTERS

KINNEAR STEEL ROLLING DOORS are designed to afford fire protection and for the closure of all openings in which ease and speed of operation and economy of space are considerations. They are adaptable to all classes of new or old building construction and by their use make possible the closing of very large openings which could not otherwise be conveniently covered.

In addition to the above uses, their extensive employment for fire protection and the high degree of efficiency shown by them in actual fires, has caused the KINNEAR Company to produce a shutter of a distinctly fire retardant character. With this end in view, numerous tests extending over a period of five years were made, and effects carefully noted. As a result, we are now in a position to offer for special fire protective purposes KINNEAR Steel Rolling Doors and Shutters of the “Abacus” Construction, all of which bear the label of the “National Board of Fire Underwriters’ Laboratories.”

Special Catalogue showing Abacus Construction can be obtained on application.

Recent great conflagrations have fully vindicated the claim of the “KINNEAR” STEEL ROLLING DOOR to pre-eminence as a fire-stop. Placed side by side with various other forms of fire retardants it has in every case remained in place even after the others were destroyed.

We will consider ourselves favored if allowed to explain and make quotations on any constructions meeting your definite needs.

**We have just received from the press a new Handbook on Steel Rolling Doors and Shutters Illustrated only with California Installations.

Editorial Comment.

So far as building is concerned San Francisco presents about an even balance with the rest of the country for the month of October. In fact so far as amount of contracts filed go it is ahead of the general average. Reports from more than fifty cities representing the chief building centers throughout the country made to the American Contractor, Chicago, show an aggregate loss of about 14 per cent as compared with the same month last year. The great cities of the country all showed a loss of a material character. This some of them off set the normal gain of the interior cities and brings up the balance on the wrong side of the ledger for the month. However, this is but the swinging of the pendulum at the close of a rather inactive year. In August the showing was unfavorable. In September the balance was on the right side. In October the pendulum swings back again. Particulars are to be found in the following table:

Uncertainty as to the tariff legislation, crop failures in the middle west, and a cessation in speculative business enterprises probably accounts for much of the inactivity of the money market and the consequent dullness of business that finds its reflection in the building situation. As soon as the tariff situation is settled and some currency measures adopted that will insure stability in business matters we may confidently expect a steady revival in building along with a healthy growth of business.

The currency system of this country has always been more or less defective. The great majority of the business of the country is done on credit and that credit is controlled under our present system by a small band of financiers. And that band of financiers belong to the federal age. They think in their own mind that they are the overlords of creation and designated by God to rule the financial world.

While there has been a general knowledge that the currency system is defective there has been no general agreement as to the remedies needed and reform seemed far distant. It was thought that nothing would be done until there had been another panic. But President Wilson has stayed with the ship and by rare perseverance and patience has succeeded in linging up his party for a currency measure that is a marked improvement on the present system. The bill has passed the house but is now threatened in the Senate by the opposition of stand pat senators who are the vassals of the overlords of the money world.

In this action, however, the President has the support of the people and however servile the Senate may be it is only a question of time till they hear from home.

And it is only a question of time till the senators will be elected by the people directly. The more often they are forced into the open and made to declare themselves for or against the people the sooner will there be reform and direct government instead of government by indirection.

"PRACTICAL SUBJECTS."

The Interaction of Two Elemental Forces, Mind and Material, in the Development of Architectural "Art."

By G. G. Irvine, A. R. I. B. A.

The subject which I have chosen for this short paper, while not at first glance appearing to come within the ordinary range of what are usually known as "Practical Subjects," is yet one which I hope to be able to prove is of practical value and one which properly understood may act as a master key to many of the secrets of the art which we practice. I can only attempt here and now to touch on a few of its aspects.

The interaction of two elemental forces, the mind of the architect and the material with which he builds, is what is at the back of every development in our art, every style, whether Classic or Gothic, great or decadent, however different in outward seeming in which it has been manifested. It lies at the root of our successes and our failures and it will continue to do so as long as there are architects or architecture, or in other words, until the end of time. In a sense we might express the embodied realization of any architectural scheme in terms of a combination of these two elements.

One should not press analogy too far, but I will carry that of the chemical element a little further; the result of the combination of two elements is something entirely new and different from either of its components; but having established from experience what that result is, we can predict it with certainty, and by varying their relations we may produce results with corresponding variations of character.

Let us see how far this principle holds good in our own case, taken first of all in its broadest aspect. Here we have our two elements, the first an active, inspiring and directing energy, a quickening spirit, the second an inert mass of facts and materials, with unknown potentialities.

I think it can be shown that the whole history of our art is a record of the effect of the interaction of these elements upon one another, and that the cause of the success or otherwise of the work of any particular time or country may be traced to the dominance of one or other of these two factors, for there is a constant struggle between them for predominance.

Looking back to the earliest times we find the second of our elements which so far at any rate as building materials are concerned, may be considered as a constant practically overwhelming the first, the feeble strength of the material.

Egyptian work exemplifies this. Why is it that the work of this vast period, some three thousand years, or double the whole length of time that has elapsed since the flood, during which a great empire was building great buildings, was the most imperishable material is well judged by the criteria of the *Illustrated London News*, size and cost of construction, never been approached—why is it that we do not accept it as a model of art that has had practically no influence on the forms of more intelligent and more artistic

or the archaeologist than the architect? The reason lies in the fact that all through this period the mind of the architect has not been able to dominate completely the dead weight of the material. We can see how the forms of this architecture were evolved far back beyond the dawn of history from the natural common sense use of the materials available, in this case mud and reeds; how these forms were then continued in structures of stone and finally granite, with practically no change, the same proportions, the same mouldings, the same flat scheme of wall decorations—there is an evident want of elasticity, mind is in bondage to matter, the dead weight of material dominates all.

What a change strikes us when we turn to the work of the Greeks. Here we have something very different, there is no question here of success or failure. It is universally admitted that the summit of Greek art is one of the great outstanding peaks, perhaps the one in which our art has soared nearest to the ultimate perfection. It is worth while enquiring a little more closely here into the causes for this. Greek architecture did not spring forth ready armed like Minerva from the brain of Zeus, it was the result of growth, of experiment, of thought, especially the latter; it, too, passed through its time of bondage, the Egyptian derived his forms from the primitive use of mud and reeds; the Greek, from a primitive style founded on the use of crude brick, wooden columns, and a curious method of construction with small rubble, stiffened by wood, gradually evolved those magnificent works which are likely to remain the highest standard of abstract beauty in architecture. Here we see the earliest instance in which our first element has assumed its rightful position; it is not as mere building works that we look upon such examples as the Parthenon or Erechtheum. They are not remarkable for size or very great richness of decoration; they are, it is true, of marble, but so are many buildings, it is as the clear-cut expression of mind that they make their appeal to us, the material is so absolutely dominated that we almost ignore it.

Yet when we come to analyze them we see that there is no single feature or detail used that does not still carry with it what may be called its birth marks; in a sense the Greek was one of the least original of men, he was content to take the features and ornaments he inherited and use them, but before using them he passed them through the crucible of his mind and brought them forth refined and purged of every crudity and every discordant note, yet he always kept them true to type. We know that the Greek anti or pilaster originated in the upright sheathing of timber at the end of a crude brick or rubble wall, it is doubtful if the architect of the age of Pericles knew as much, yet in his treatment of it, he never treated it as

semi-column. He never diminished it or gave it an entasis even when it responded to a line of columns, and its cap and base were quite independent. In the same way the Doric and Ionic entablatures retain the forms stamped upon them by their birth in another material but so modified and refined as to be completely in harmony with the material in which they were executed. Greek architecture was necessarily limited in some respects by the material in which it was constructed, for instance, the space that could be spanned by a stone beam; but, on the whole, there is no phase of architecture which is so nearly the pure product of mind and shows so little of the influence of material.

We must then, if I am right, ascribe the cause of the success of Greek architecture to the result of the continuous efforts of many generations, through some five or six centuries at least, to arrive at what would satisfy the subtle, intellectual, artistic, and ethical Greek mind as the perfect type of beautiful building. It is a complete triumph of mind, so complete that no sign of struggle is visible, it seems effortless, and its results have that feeling of inevitableness that runs through the Greek tragedy.

Let us now turn to the work of our own ancestors, the northern races of Europe. The contrast is excessive between the calm atmosphere which surrounds Greek work and the fierce energy, the almost feverish effort which pervades Gothic; nevertheless, the climax of Gothic architecture forms another of the high peaks to which architecture has risen.

We are all prepared to admit its success; we are sorry for the man who cannot see beauty in the porches of Chartres, the choir of Beauvais, the interior of Westminster or the country churches of England, but when we ask for an explanation of the fundamental causes of that success we are met by the most conflicting statements and theories. The school of which Ruskin is the prophet ascribes it entirely to the spiritual qualities of its builders, their devotion to those lamps which form the theme of one of his most beautiful works; another school, of which we hear more in these later days, seems inclined to place everything to the credit of the skill (which is something apart from what we mean by mind) of the craftsman, and the nature of the materials. I believe the truth lies somewhere between the two and that the causes of its successes and failures may be gauged by the same criteria that we employed in the previous cases. We see in its beginnings in what we call Romanesque a style in which the mind is clearly under the dominion of the material, then we see an awakening, a mental power and growth manifesting itself with a suddenness which seems almost miraculous and which leaps almost at a bound to the highest pinnacle. The mental power which could conceive,

the daring which could carry out such stupendous works as the great stone-vaulted cathedrals of Northern France. Who can read the description of the building of the Sainte Chapelle in Paris, where the vaulting ribs were said to sway in the wind like the boughs of trees, and when the centres were struck the workmen ran like rats, without feeling that the mind that could plan and carry out that work with confidence, was fully master of the material with which he dealt, but this predominance is very different from that of the Greek; he worked with material in such a way that it still remains the inert vehicle in which the mind expresses itself. Our Gothic architect on the other hand, having conquered his material, takes it into partnership, he breathes inspiration into it, and draws inspiration from it, he almost makes it live; it is this that gives Gothic architecture its distinctive character and this close partnership between mind and material gives rise to the very divergent standpoints from which it is regarded.

In all these early styles that I have touched upon, our problem is a comparatively simple one and we can arrive at a conclusion by thinking of our elements in their simplest and broadest aspects. It is when we come to consider the work of the Renaissance and later times down to and including our own that we are brought face to face with much more complex conditions; but the analogy with which I started will still help us here; we have been looking at these elements in the way in which I suppose we were all taught to regard them, as the ultimate, indivisible and unchangeable points beyond which we could not go. We are told now that the elements are themselves capable of division, of change, of alteration of character. The Renaissance which changed the human standpoint in every other line of thought assuredly did no less for architecture, the essence of that change consists in the addition it made to the character of our elemental material. Architectural material has at all times, of course, included much more than mere building materials, but in the early styles we can take that as the type and ignore other considerations without vitiating the argument. Not so with any work built since the birth of the Renaissance. The Renaissance was a period of discovery, new worlds were discovered, not only physical but mental, scientific and artistic. What we are concerned with was the vast mine of new material which it placed at the disposal of the architect by the rediscovery of the antique world and the recognition of the value of the products of previous civilization, the study and analysis of this eventually resulted in the formation of a code of rules, and the fixing of certain canons of proportion, giving a definite standard of taste by which all subsequent work must be prepared to submit to be measured. It is of no use for us to protest against the tyranny of "The Orders." They are there. If we except religious ritual there is no other form which human thought has moulded to express an abstract idea which has persisted with the strength and unchangeableness of this. The Orders are the conveyer, but I take it to include the final type of the idea which I wish to

study of all previous styles by the architect, so far as they are likely to be of practical use to him; not to merely copy their forms, but to use them intelligently, and with due regard to their own meaning and their fitness for the use to which he proposes to put them.

Since the Renaissance we can no longer take mind and material (considered as building material merely) as summing up our combination. We cannot leave out of account that intelligent knowledge of past building forms which must be considered as a part, and a very important part, of the material which the architect must assemble before he can begin to give form to his ideas even on paper.

The relation of mind and material is still the key to the cause of success or failure in architecture; but in stating it thus we must bear in mind this new and more complex conception of what is included in the element of material. In the early days of the Renaissance, when the mind seemed capable of rising to any height under the influence of the great outburst of energy which swept all before it, it showed itself able to assimilate and dominate the whole of the material available, and we see the results of the work of the giants of those days, for instance Brunelleschi, one of the most interesting of architects, and the other men who made Florence what it is; then as more and still more of this material becomes available by the scholarly research of such men as Alberti and Raphael, it is seized upon and made their own, by such minds as Samicheli, Peruzzi and Michel Angelo, and once again we have a period in which mind is complete master of material, dominating it, yet in sympathy with it, the sympathy of complete understanding. This I take to be the secret of the success of these great masters. As time went on, however, the energy which marked the birth of this period somewhat died down, at the same time the material continued to increase in strength and volume. Owing to the facilities afforded by books and illustrations more and more of it became available, and once more material—but in this new form—began to dominate mind and the era of the textbook is in sight. The process was slow and was broken by many brilliant exceptions, such as Palladio, Vignola, and our own Inigo Jones and Wren, but the general tendency is unmistakable until we come to that death in life which seems to have overtaken architecture after Chambers.

We may learn something from failures as well as successes and the cause of this failure I would ascribe to the predominance of material in the shape of the great mass and weight of classic forms and traditions which the mind of the time was unable to assimilate and which stifled its energies. We have, thank goodness, passed that stage, and once more fine work is being done, work which we believe may justly be styled successful, and I believe we may apply the same criteria to the most modern work as to the most ancient, the cause is still to be found in the relation of the mind to the material which it must employ; the mind is once more showing itself capable of taking its rightful place, of using the forms it has inherited with

the power of a master, not copying them as a servant.

The secret of power is knowledge, and it is only by acquiring a thorough and scholarly knowledge of what the past has to teach us that we can hope to use those materials in a way that will satisfy the demands of the present and the future, for remember we must use them one way or the other. We cannot avoid it, and if we have not the training, the knowledge and the insight to use them intelligently and consistently, we must use them ignorantly.

Does not the success attained by the work of such firms as McKim, Mead and White, or Carrère and Hastings, to take examples familiar to all of us on this continent, rest ultimately upon their authors' complete understanding and sympathy with the antique styles, the forms of which they are content to take as their material? And is it not a perhaps unconscious feeling of the necessity for some readjustment of the relation between mind and material which is at the bottom of the great strides which the subject of architectural education has taken in the last few years and the importance with which it is regarded by all bodies representative of the profession both in Europe and America? I do not know what has been done or is being done in that matter by our Association. We occupy a position here to which architects in the old country have for many years been vainly aspiring and only now begin to see some hope of attaining, a position of rightful privilege; that position is granted to us not as individuals but as representatives of the great art that we represent and whose credit is in our keeping and is an acknowledgement of its value to the community.

The possession of rights and privileges implies the performance of duties, and I have no doubt whatever that the Alberta Association will take its place in the movement for better education in architecture which is now going on all over the world and thereby advancing what must be the ultimate aim of all our different bodies, the advancement of architecture.

Before closing, I would like to say a few words on that subject of architectural education.

It has three aspects more or less interdependent. First, the education of the public. Architecture has to a great extent lost that position which it held up to a period not so long ago, when some knowledge of it was considered a necessary part of a liberal education. There are signs that in the most advanced centres steps are being taken to retrieve this position. The effect of a healthy public opinion and public taste on such matters can hardly be exaggerated; it is really necessary if the best work is to be done. The public always gets in the long run what it demands, also what it deserves, and it is one of the first duties of a representative body such as this to do what may be possible, from time to time, to form and mould that public opinion. You are all better judges than I of what is possible or desirable in that respect here. I would suggest that the consideration of such a matter as the proper representation of art generally and architecture in particular, as well as subjects relative to construction in the program outlined for the proposed

university here comes well within the scope of the Association's work. In a general way, I think that every means possible should be taken to interest the public in our work and our aims.

The second aspect is the one we are most familiar with, that of the education of the student. This is one which must, shortly at any rate, be faced as our towns begin producing their own students instead of relying entirely upon their education elsewhere. At the present time there must be many here who would be glad of some opportunity to supplement the training they have had, and I would like to see some attempt made to organize these students to give them a helping hand and bring them in touch with the Association. The great thing is to bring them together, they will educate each other to a great extent once that is accomplished I would like to draw out suggestions on this subject.

The last aspect is the education of ourselves. We are all students. When we cease to learn we cease to live. Meetings such as these we are holding help to keep us from falling into grooves. They may give us fresh

ideas. Could it not be carried further? Would it not be possible to meet somewhat more frequently for the purpose of talking over matters of interest to all of us, from the Mechanics' Lien Act, to Town Planning, or even to smoking our pipes together. I think the meeting of those interested in the same thing is always of benefit to all of them, and it would certainly foster a spirit of comradeship and mutual respect. Those of us who have lived in towns where no regular organization existed, as I have, will know the cut-throat spirit with which architects unfortunately regard each other, a spirit which seems to be minimized at least in those places where they have frequent opportunities of meeting and co-operating with each other. I may seem in these remarks on the subject of education to have traveled rather far from the theme which I took as my subject, but I shall have failed in my purpose if I have not been able to show you that they have a practical bearing upon it and that the subject itself is not of mere abstract interest, but that it is one of the most vital and practical to all of us whose aim is to produce good architecture.

terior of the building will be faced with pressed brick. Plans are being prepared.

BANKS.

SANTA ANA, ORANGE CO., CAL.—Bank and Offices, 5 story and base, Class A construction. Cost not stated. Architects, T. Beverly Klein, Jr., & Co., Los Angeles Investment Bldg., L. A. Owners, Farmers' and Merchants' Bank of Santa Ana. The building will be erected on one of the principal business corners having a frontage of 50 feet on one street and 100 feet on the other. Construction will be fireproof with a steel frame, reinforced concrete floors, walls and roof slabs. First floor will be occupied by the bank. Upper floors will contain a large number of offices. Interior of the banking rooms will be finished in tile, marble and hardwoods. There will be special coin and safe deposit vaults. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior will be faced with pressed brick. Plans are being prepared.

BRIDGES.

MULTNOMAH FALLS, ORE.—Viaduct and bridge, reinforced concrete construction. Cost not stated. Engineer, Samuel C. Lancaster, County Engineer Multnomah Co., Portland. Owners, Multnomah County. The combination bridge and viaduct will be built around a rocky point and will be 100 feet in length. Construction, including piers and approaches, will be of reinforced concrete. Plans have received the approval of the Board of Supervisors and are now out for figures. Plans, specifications and full particulars can be secured from the County Engineer.

CHURCHES.

DIXON, SOLANO CO., CAL.—Church, 2 story and base, reinforced concrete, \$25,000. Architect, John J. Foley, 16 Kearny street, S. F. Owners, Roman Catholic Church of Dixon. The building has been designed in the Spanish Mission style and will be of reinforced concrete construction throughout. The main auditorium will have a seating capacity of 600 people. Interior finish will be of pine and ornamental plaster. There will be a central heating system. Considerable marble and tile will be used. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are now being prepared and figures will be called for as soon as working drawings can be completed.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 1 story and base, brick and steel, \$100,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Congregational Church of Long Beach Contractors, Kling Co., Union League Bldg., general construction. Contract price, \$100,000.

COURT HOUSES.

STOCKTON, SAN JOAQUIN CO., CAL.—Court house alterations. Cost not stated. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners,

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architects, Dunn and Kearns, Monadnock Bldg., S. F. Owner, M. Byrne. The building will be erected on the west line of Webster street south of Pacific and will cover an area of 46½ by 100½ feet. Interior has been arranged for twelve large suites which will be designed for a high class of tenants and which will be finished in the most modern style. Plans provide for steam heat, elevator service, dumb waiters, vacuum cleaning and a hot water supply. All suites will have private baths and wall beds. Bath rooms will be finished in tile with composition floors. Entrance will have marble wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame \$10,000. Architect, none. Owner, F. Rossi, 1795 Filbert street, S. F. The building will be erected on Lombard street near Franklin and will cover a ground area of 27½ by 77½ feet. Interior has been arranged for six suites of two and three rooms with wall beds and private baths. Interior finish will be of pine throughout. A hot water supply will be installed. Exterior of the building will be covered with cement plaster on metal lath and a pressed brick veneer face. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$100,000. Architects, Dunn and Kearns, Monadnock Bldg., S. F. Owner's name not given. Cost of building steel work and various other parts of the work on the building at the northeast corner of

Post and Leavenworth streets have been let. The architects are now taking subfigures for other parts of the work. Full particulars can be had at their offices.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$8,000. Architect, none. Owner, Paul N. Nippert, Insurance Exchange Bldg., S. F. The building will be erected on the west side of Divisadero street south of Haight covering an area of 24 by 56 feet. There will be six apartments arranged in four room suites with private baths and wall beds. Interior will be finished in pine throughout. There will be a hot water supply and vacuum cleaning system. Bath rooms will be finished in tile. Entrance will have tile wainscot and marble steps. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

OAKLAND, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, Rousseau and Rousseau, Monadnock Bldg., S. F. Owner, F. G. Baird. The building will be erected on the west side of Oak street between 14th and 15th streets and will have a frontage of 50 feet and a depth of 150 feet. The building has been designed to contain a total of 75 rooms which will be arranged in suites of two, three and four rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine, redwood and some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be steam heat, an automatic elevator, a hot water supply and a vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Ex-

San Joaquin County. This work will consist of extensive alterations to the County Clerk's office in the County Court House. Included in the work is a large amount of cabinet work, oak finish, one Tucker Alarm draw, marble and tile work and electric work. Plans have been completed and figures are now being taken. Plans and specifications can be secured from the architect.

MERCED, MERCED CO., CAL.—County Hall of Records, 1 story, base, and mezzanine floor, reinforced concrete. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, Merced County. The following bids were opened at Merced on Tuesday, November 11th, for the construction of a one story and base fireproof Hall of Records. The structure was designed by Architect C. H. Russell of this city. Separate figures were received for the general construction and for the heating and ventilating. Fred J. Amweg, 244 Kearny St., San Francisco, was lowest bidder at \$35,995. No award of contract was made and all figures were taken under advisement. Merced Hall of Records—Campbell & Turner, \$40,980; Graham & Jensen, \$38,447; Johnson Bros. and Brolinne, \$54,485; Fred J. Amweg, \$35,995; George W. Boston & Son, \$39,440. Heating and ventilating—Pacific Blower and Heating Co., steam, \$2,860; hot air, \$2,135.

SAN FRANCISCO—City Hall work, Class A construction, \$4,500,000. Architects, Bakewell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Architects Bakewell & Brown state that plans and specifications for the plumbing, electric work and heating and ventilating on the City Hall will be completed within a week or ten days. Aside from the large contracts already awarded these are among the largest of the contracts to be let. Bids will be called for by the Board of Public Works as soon as the plans and specifications receive final approval. Contracts for marble and tile work and elevators will follow in the course of the next month or six weeks.

Contracts Awarded.

SAN FRANCISCO—City Hall work, Class A construction, \$4,500,000. Architects, Bakewell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F., plain, reinforced concrete and fireproofing for City Hall. Contract price, Proposition A, \$156,375; Proposition B, \$32,875; total, \$189,250.

FACTORIES & WAREHOUSES.

SEATTLE, WASH.—Factory, 2 story and base, reinforced concrete. \$25,000. Architect, V. W. Voorhees, Elitel Bldg., Seattle. Owners, A. F. Ghiglioline and Sons. The building will cover an area of 90 by 165 feet and will be practically fireproof with reinforced concrete walls, floors and interior partitions of hollow tile. Plans provide for elevator service, fireproof doors and metal window sash and frames. A steam heating and drying system will be installed. Interior of the building will be finished in pine. About \$5,000 worth of special machinery will be installed. Exterior will be faced with cement plaster. Plans

and specifications will be complete by December 1st. A general contract will be let.

PORTLAND, ORE.—Stable building, 2½ story and base, brick and mill construction, \$20,000. Architect, C. A. Houghtaling and Co., Henry Bldg., Portland. Owner, Robert O'Neill. The building will be erected on the east side and will cover an area of 100 feet square. Construction will be of brick and mill type with brick walls and heavy timber floors and joists. No interior finish will be used. Exterior will be faced with stock brick. Plans are complete and figures will be called for about November 20th.

Contracts Awarded.

ASTORIA, ORE.—Flour mills, reinforced concrete, \$60,000. Architect, none. Owners, Astoria Flouring Mills, Astoria. Contractor, C. L. Houston, Astoria, general construction. Contract price, \$60,000.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Fire house, 2 story and base, brick and concrete. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and have received official approval for the construction of Engine House No. 48. The building will be erected at the northwest corner of 22nd and Wisconsin streets. First floor has been designed to accommodate the equipment, stables and lounging room. Upper floors will contain captain's office, reading room, showers and sleeping quarters for the men. Interior will be finished in pine with some hardwood. There will be a steam heating system and special electrical equipment. Exterior of the building will be faced with pressed brick. Plans are now out for figures and bids will be opened by the Board of Public Works on November 26th.

OAKLAND, CAL.—Jail plumbing and equipment. Cost not stated. Architects, Palmer, Hornbostel and Jones, New York City, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids are being called for on the plumbing for the City Jail, located in the new City Hall building. Bids will be opened on November 20th. Plans and specifications can be secured from the supervising architect, J. J. Donovan, Security Bank Bldg., Oakland. An official proposal appears in another column of this issue.

FLATS.

SAN FRANCISCO—Flat alterations, 2 story and base, frame, \$5,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner's name withheld. This work will consist of the alteration of the present two story frame dwelling at the corner of Larkin and Greenwich streets into a modern flat building containing four flats of four and five rooms. There will be new plastering, interior finish, plumbing, electric work and tile and painting. Exterior of the building will also be altered. Plans are complete and figures will be called for at once.

Contracts Awarded.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architects, Smith

and Stewart, 244 Kearny st., S. F. Owner, Sidney Pringle. Contractor, Louis J. Diebel, 1554 Leavenworth st., S. F. Contract price, \$5,000.

GOVERNMENT WORK AND SUPPLIES.

Pearl Harbor Dry Dock Problem.

The officials of the bureau of yards and docks of the Navy Department have been in consultation during the past week with the contractors, whose work on the big dry dock at Pearl Harbor was interrupted some months ago by a serious disaster at a time when the successful progress on the project seemed assured. The Navy Department has carefully considered the report of Civil Engineer Noble, who was specially employed to examine into the situation, and it has been decided that the amended method of construction, suggested by that expert, shall be adopted. It remains to be determined to what extent the Navy Department is involved in additional cost on account of the accident, requiring further appropriation by Congress. The negotiations which have been conducted this week have been with a view to settling some of the minor technical details. In the meantime, Civil Engineer E. R. Gayler, U. S. Navy, who has been in charge of the Pearl Harbor dock construction as a representative of the government, has been ordered to Washington to consult with the department officials, and he left for Honolulu for this purpose on Saturday. Other work at the Pearl Harbor station is progressing satisfactorily. Steps have been taken to obtain bids for the steel work on the million-dollar coaling plant which is to be erected. The first contract to be awarded will amount to about \$100,000 and is the largest project now pending under the bureau of yards and docks.

Marine Island, Cal., Kitchen.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for constructing an addition to the kitchen at the U. S. marine barracks, Marine Island, Cal.:

Gutleben Bros., San Francisco, Cal., \$3,188; alternate bid, deduct \$200. Pringle, Dunn & Co., San Francisco, Cal., \$3,850.

R. S. K. MacMillan, San Francisco, Cal., \$3,044.

Pearl Harbor, H. T., Ice-Making Plant.

The following bid was received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for an ice-making and cold-storage plant to be constructed at the naval station, Pearl Harbor, H. T.:

Item 1, building, complete; 2, price for building if roof is sheathed and covered with asbestos slate in place of corrugated steel roofing; 3, price for building, but omitting succo, leaving terra cotta exposed.

Lord-Young Engineering Co., Honolulu, H. T., item 1, \$11,200; 2, \$12,000; 3, \$11,600.

PROSPECTIVE BIDDERS. Supervising Architect.

Specifications for work under the office of the supervising architect have been furnished to the following firms

in addition to those previously noted in these columns:

Albany, Oreg., Construction, November 26.

J. E. & A. L. Pennock, 1003 Land Title Building, Philadelphia, Pa.
King Lumber Co., Charlottesville, Va.

Hilo, Hawaii, Construction, January 15.
Sound Construction and Engineering Co., 1007 Lowman Building, Seattle, Wash.

J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

Henry D. Whitfield, 160 Fifth avenue, New York City.

W. N. Concanon, Monadnock Building, San Francisco, Cal.

Southwestern Construction Co., Central Building, Los Angeles, Cal.

Grant Fee, 2440 16th street, San Francisco, Cal.

Spalding Construction Co., Grant avenue and Bush street, San Francisco, Cal.

Campbell Building Co., Salt Lake City, Utah.

Pacetto, Idaho, Construction, December 11.

J. F. Jenkins & Co., Ocala, Fla.
Campbell Building Co., Salt Lake City, Utah.

Yards and Docks.

Specifications for work under the bureau of yards and docks, Navy Department, have been furnished to the following firms in addition to those previously mentioned in these columns:

Kauai, Building, December 6.
Panley dail Building Co., New York City.

Standard Construction and Engineering Co., Seattle, Wash.

Pearl Harbor, Officers' Quarters.

The contract for the construction of a double set of officers' quarters at the marine barracks, Pearl Harbor, H. T., has been awarded to the Lord-Young Engineering Co., Honolulu, H. T., at \$17,700.

Puget Sound, Officers' Quarters.

The contract for the construction of marine officers' quarters at the navy yard, Puget Sound, Wash., has been awarded to J. L. Murphy & Son, Tacoma, Wash., at \$34,217.

Douglas, Wyo., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office at Douglas, Wyo.:

Bid 1. W. D. Lovell, Minneapolis, Minn.

2. J. F. Jenkins & Co., Ocala, Fla.

For building, complete—Bid 1, \$61,990; 2, \$61,950.

For alternate No. 1 (substituting terra cotta for certain reinforced concrete floor construction), add—Bid 1, \$200; 2, \$100.

For alternate No. 2 (additional painting of interior plaster), add—Bid 1, \$1,600; 2, \$650.

For alternate No. 3 (substituting Keene's cement for plastering), add—Bid 1, \$1,200; 2, \$610.

Amount included in the proposal for furnishing and installing of all interior lighting fixtures—Bid 1, \$1,350; 2, \$1,200.

Canal Circular 806.

An advertisement appears elsewhere in this issue calling for bids to be

opened November 22 by the purchasing officer, Isthmian Canal Commission, for furnishing supplies under circular 806 as follows:

Class 1, 2 lightning transformers; Class 2, 1 7-panel switchboard and 1 panel switchboard; Class 3, Varinoid cambric lead-covered cable; Class 4, miscellaneous conduit and wiring; Class 5, circuit boxes, junction boxes, and bells, reflectors, etc.; Class 6, 2 synchronous motor generator sets and 2 auto transformers.

Canal Circular 807.

The Isthmian Canal Commission will open bids November 24, 1913, under Canal circular No. 807, for furnishing the following supplies and material: Class 1, operating devices for monitor sashes; Class 2, 6 transformers; Class 3, card time recorders, self-winding master clock, card racks, and time cards; Class 4, 208 porcelain lavatories, 64 urinals, 61 water closets, and 8 slop sinks; Class 5, 40 shower heads; Class 6, 60 compression bibbs and 50 compression stops; Class 7, 75 reducing ferrules, 125 ferrules, 75 soldering nipples, and 75 brass vent fittings; Class 8, 125 lead bends; Class 9, 288 ft. brass tubing; Class 10, 1,800 lbs. special hexagon bronze; Class 11, 10,000 lbs. low-grade Rabbit metal; Class 12, a quantity of reinforcing bars; Class 13, 50,000 ft. hoisting cable; Class 14, 5,000 ft. filler rope cable; Class 15, 10,000 lbs. soft steel wire; Class 16, 19,900 lb. cone-head boiler rivets; Class 17, 21,300 machine bolts; Class 18, 9,600 lbs. plate or cut washers; Class 19, 300 machinists' hammers; Class 20, 40 sledge hammers; Class 21, 96 twist drills for Paulus track drills; Class 22, 35 wood snatch blocks; Class 23, 80 wood tackle blocks; Class 24, 6 differential chain blocks; Class 25, 3 double-geared chain blocks; Class 26, 50 cargo trucks; Class 27, 2 unmounted grindstones; Class 28, 4,000 ft. wire-wound steam hose; Class 29, 275 manhole gaskets; Class 30, 2,500 yds. cotton canvas; Class 31, 24 prs. oars; Class 32, 5,000 baker's deeps, 6,000 fruit dishes, 3,600 flats, 1,300 dessert plates, 4,400 dinner plates, and 2,500 soup plates; Class 33, 1,050 glass iced tea pitchers; Class 34, 50 wicker waste baskets; Class 35, 152 boxwood rulers; Class 36, 500 sheets binder's board; Class 37, 100 journal books; Class 38, 200 "mining" transit books; Class 39, 1,000 gals. gasoline; Class 40, 100,000 ft. B. M. long-leaf yellow pine or Douglas fir flooring lumber; Class 41, 15,000 ft. B. M. white pine or sugar pine rough lumber; Class 42, 45,000 ft. B. M. white pine or sugar pine (pattern lumber) rough lumber.

Reclamation Service, Transformer.

The following bids were received at the office of the U. S. reclamation service, Los Angeles, Cal., for furnishing one 10-K. V. A. transformer for the Sun river project:

Allis-Chalmers Co., Los Angeles, Cal., \$75.52.

B. F. Kierulff, Jr., & Co., Los Angeles, Cal., \$90.

Crocker-Wheeler Co., Los Angeles, Cal., \$92.31.

Westinghouse Electric and Mfg. Co., Los Angeles, Cal., \$93.18.

Reclamation Service, Bolts and Washers.

The following bids were received at the office of the U. S. reclamation service,

Los Angeles, Cal., for furnishing, item 1, 140 anchor bolts, 4 ft. by 2 in.; item 2, 140 cast-iron washers, 12 in. sq.; Continental Bolt and Iron Works, Chicago, Ill., \$402.50.
Arthur J. O'Leary & Son, Clearing, Ill., \$494.20.

Walker Mfg. Co., Denver, Colo., \$530.
Baker Iron Works, Los Angeles, Cal., \$511.

Minneapolis Steel and Machine Co., Minneapolis, Minn., \$564.

Independent Foundry Co., Portland, Oreg., \$623.

Advance Machine Co., Los Angeles, Cal., \$623.

Union Machine Co., San Francisco, Cal., \$630.

Lewellyn Iron Works, Los Angeles, Cal., \$672.

Fulton Engine Works, Los Angeles, Cal., \$714.

Pearl Harbor, Structural Steel Work.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for structural steel work for coaling plant at the naval station, Pearl Harbor, H. T.:

Item 1, net price for the work completely erected and ready for laying railway ties and rails; 2, net price for the steel work fabricated and delivered at naval station, Pearl Harbor, government to erect; 3, net price for the steel work fabricated and delivered "free alongside" at New York, government to transport and erect; 4, net price for work as under item 1, with the omission of steel work under two most easterly lines of track shown on plans; 5, net price for work as under item 2, with the omission of steel work under two most easterly lines of track shown on plans; 6, net price for work as under item 3, with the omission of steel work under two most easterly lines of track shown on plans.

U. S. Steel Products Co., 30 Church street, New York City, item 1, \$377,200; 2, \$241,900; 3, 191,850; 4, \$322,690; 5, \$206,943; 6, \$164,151. Deduct \$8,200 from items 1 or 2. Deduct \$7,000 from items 4 or 5, conditionally.

The Phoenix Bridge Co., Philadelphia, Pa., item 3, \$244,000; 6, \$204,200.

The King Bridge Co., Cleveland, Ohio, item 1, \$559,000; 2, \$366,700; 3, \$293,000; 4, \$478,500; 5, \$313,000; 6, \$250,000.

Hamilton & Chambers, 29 Broadway, New York City, item 1, \$367,800; 2, \$249,800; 4, \$216,500; 5, \$209,500.

W. N. Concanon Co., San Francisco, Cal., item 1, \$346,960; 4, \$308,230; alternate bid, item 1, deduct \$25,500; 4, \$28,000.

Ritter-Conley Mfg. Co., Pittsburgh, Pa., item 1, \$357,260; 2, \$285,135; 3, \$231,740; 4, \$306,540; 5, \$242,740; 6, \$198,935.

McClintic-Marshall Co., Pittsburgh, Pa., item 3, \$245,100; 6, \$217,920.

HALLS & SOCIETY BLDGS.—

SACRAMENTO, CAL.—Lodge hall, stores and offices, 4 story and base, reinforced concrete, \$135,000. Architect, Washington J. Miller, 45 Kearny st., S. F. owners, Sacramento Native Sons Hall Association. Architect Washington J. Miller has been commissioned to prepare plans for a large reinforced concrete building which will be erected by the Sacramento Native Sons Hall Association on their property at the north-

west corner of 11th and J streets in Sacramento. The structure will cost in the neighborhood of \$135,000 and has been designed in the Florentine style. Construction will be practically fireproof. There will be one large store on the first floor. Banquet room will occupy the basement. Second and third floors will be arranged for lodge rooms, social halls and parlors. The fourth floor will be arranged for modern offices fitted up for physicians and dentists. Interior partitions and floors will be of fireproof construction. Plans provide for steam heat, elevator service and a vacuum cleaning system. Considerable marble and tile work will be used. Exterior of the building will be faced with cement plaster. Figures will be called for as soon as plans can be completed.

BAKERSFIELD, KERN CO., CAL.—Addition to lodge hall, 2 story and base, brick, \$30,000. Architect's name not given. Owners, Bakersfield Elks' Hall Association. The present Elks' building on Chester avenue will undergo extensive repairs and a two story addition will be constructed. New portion of the building will contain social rooms, banquet hall and living apartments. Interior finish will be of pine and hardwoods. A maple floor will be used in the ball room. There will be a central heating system. Exterior will be faced with pressed brick to correspond with the present building. Plans are being prepared. G. H. Galbraith is chairman of the Building Committee.

SHERIDAN, ORE.—Lodge hall, 2 story and base, brick, \$10,000. Architect, L. R. Bailey Co., Abington Bldg., Portland. Owners, Masonic Lodge of Sheridan. The structure will be 53x85 in size, and will have concrete foundations. A face brick will be used in the front and work has already been started on the foundation. The first floor will be used for storage purposes while the two upper floors will be used for lodge and office purposes. Plans will be completed in about three weeks, when bids will probably be called for.

Contracts Awarded.

GLENDALE, LOS ANGELES CO., CAL.—Lodge hall, 2 story and base, brick and steel. Cost not stated. Architect, Paul V. Tuttle, Delta Bldg., L. A. Owners, Glendale Masonic Temple Association. Contractor, E. D. Yard, 127 1/2 Maryland street, Los Angeles. Contract price not stated.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$22,000. Architect, Charles J. Rousseau, 45 Kearny st., S. F. Owner's name withheld. The building will be erected at the southeast corner of Lombard and Steiner streets covering an area of 50 by 95 feet. There will be five stores on the first floor besides the hotel lobby and entrance. Upper floors have been arranged to contain in the neighborhood of 50 guest rooms and several private and public baths. Interior will be finished in pine and redwood. There will be steam heat, a hot water system and other modern conveniences. Bath rooms will have composition floors and tile wainscot. Stores will be provided with patent fronts and plate glass windows. Exterior of the building will be covered with rustic and

cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, \$50,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Columbia Realty Co. This building has been mentioned here before, when preliminary plans were started. The structure will be erected on the west line of Taylor street north of Sutter and has been designed for a store and hotel lobby and entrance on the first floor and about 65 rooms on the upper floors. Interior will be finished in pine and hardwoods with some ornamental plaster in the office and lobby. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are nearly ready for figures.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$25,000. Architect, Charles J. Rousseau, 45 Kearny street, S. F. Owner's name withheld. This building, similar in design to another hotel structure, plans for which are being prepared by the same architect, will be erected at the southwest corner of Lombard and Scott streets. The building will have frontages of 50 by 100 feet and will be arranged for five stores on the first floor and 65 guest rooms and a number of public and private baths on the upper floors. Interior finish will be of pine and redwood. Plans provide for steam heat, running hot and cold water and a vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Ornamental plaster will be used in the lobby. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

OAKLAND, CAL.—Hotel heating system. Cost not stated. Architect, Fred H. Voorhees, Central Bank Bldg., Oakland. Owner, H. A. Powell. Plans are complete and figures are now being called for the installation of a steam heating system in the new seven story and base brick and steel hotel building which is now under construction at the corner of 13th and Webster streets. Plans are out for figures. Full information as to the system can be secured from the architect.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and steel. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owners, F. W. Wachter and associates. The building will be erected on north 4th street east of San Pedro, having a frontage of 75 feet by a depth of 95 feet. Plans provide for four stores and the hotel entrance on the first floor. Upper floors will be subdivided into 60 guest rooms and a number of public and private baths. Interior finish will be of pine throughout. There will be steam heat a hot water system and vacuum cleaning. All rooms will be provided with lavatories. Bath rooms will have composition floors and tile wainscot. Patent store fronts and plate glass windows will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotel, 4 story and base, brick

and steel. Cost not stated. Architects, S. Tilden Norton and F. H. Wallis, Title Insurance Bldg., L. A. Owners, W. M. Gottschalk and A. Sieroty. The building will cover an area of 47 by 83 feet and will contain 5 stores in the first story and 48 guest rooms and 12 bath rooms in the upper stories. Pressed brick facing, structural steel, plate glass windows, galvanized iron cornice, composition roofing, fire escapes, nine trim and floors, lavatory in each room, steam heat, plumbing, elevator, metal bath, vacuum cleaning, electric wiring, etc. Plans are complete and the work will be done by Day Labor.

PORTLAND, ORE.—Hotel, 2 story and base, brick, \$35,000. Architect, Robert Tegen, Morgan Bldg., Portland. Owner, A. L. Parkhurst. This work has been mentioned here before. The building will be arranged for stores on the first floor with hotel rooms above. Interior finish will be of pine throughout. Plans provide for steam heat. A number of the rooms will have private baths. Hot and cold running water will be supplied to all rooms. Bath rooms will have cement floors and tile wainscot. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans have been revised and new figures will be called for at once.

RAILROAD CONSTRUCTION—AND EQUIPMENT.

SEATTLE, WASH.—Railroad commissary building, 2 story and base, steel and concrete, \$30,000. Architect, A. R. Cook, Chief Engineer N. P. R. R. Co., Seattle. Owners, Northern Pacific Railroad Co. The building will be erected on the King street property of the company and will cover an area of 40 by 190 feet. Construction will be fireproof throughout with a steel frame, reinforced concrete walls and floors. Interior partitions will be of metal lath and plaster. Interior will be finished in pine throughout. There will be steam heat. Considerable white porcelain and terra cotta tile will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

RESIDENCES.

SAN FRANCISCO—Residence 2 story and base, frame, \$3,000. Architect, A. H. Peterson, Mills Bldg., S. F. Owner, Charles Anderson, 762 Cole street, S. F. This dwelling will be erected on the east side of 25th avenue north of Judah and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with oak floors in the principal rooms. There will be a large open fire place in the living room with a tile or brick mantel. The wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. A brick veneer base is also to be used. Plans are complete and the owner will do the work by Day Labor.

SAN FRANCISCO—Residences, 6 2-story and base, frame, \$2,500 each. Architect, none. Owner, Jonathan Anderson, 423 16th avenue, S. F. These

houses will be erected on the east side of 29th avenue near Anza street and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Oak floors will be used in the living and dining rooms. There will be large open fire places in the living rooms with mantels of brick or tile. The wainscot will be used in the bath and kitchens. Exteriors will be covered with cement plaster on metal lath, rustic and shiplap. Plans are in the hands of the owner and he will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, S. M. Mistrick, 8 Regent street, S. F. The house has been designed for a six room dwelling and will be erected on the north side of Regent street near Winlap. Interior will be finished in pine and redwood with hardwood floors in the two principal rooms. There will be a large open fire place with brick mantel. The wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor. He is now purchasing all materials.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000 each. Architect, none. Owner, C. A. Hall, 1318 5th avenue, S. F. These houses have been designed to contain seven rooms and bath and will be erected on the east side of 23rd avenue north of California. Interiors will be finished in pine with some hardwood veneer. Oak floors will be used in the principal rooms. The living rooms will have large open fire places and tile or brick mantels. Automatic water heaters will be installed. Tile wainscoting will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Bungalow, 1 story and base, frame, \$2,000. Architect, J. M. Geary, 23rd and Folsom streets, S. F. Owners, Parkside Home Building Co. The house has been designed for a five room dwelling with bath. Interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be a large open fire place and brick mantel in the living room. The dwelling is to be erected on 23rd avenue south of Taraval. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Miss Jeanne Wintermute. The dwelling will be erected in the Claremont Tract and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Automatic water heater will be installed. Exterior of the dwelling will be covered with shingles and shingles. Plans are nearly complete and

figures will be called for shortly.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck ave., Berkeley. This dwelling, which is to be erected in Thousand Oaks Park, will contain seven rooms, bath and sleeping porch. Interior will be abnormally finished in pine and redwood. Oak floors will be used in the living room, dining room and den. There will be furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the owners will do the work by Day Labor.

There will be furnace heat and open fire places. Mantels will be of brick and tile. Interior will be finished in pine and hardwoods. Oak floors will be used in the principal rooms. Exterior of the house will be covered with cement plaster on metal lath.

SCHOOLS.

PATERSON, STANISLAV CO., CAL.—School, 1 story and base, reinforced concrete, \$40,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Paterson School District. The building will cover a large ground area and has been designed to contain ten class rooms, assembly hall and principals office. Interior finish will be of pine with maple and pine floor. There will be a plenum heating system and modern ventilation. Included in the work will be program clocks, and a oil system. Exterior of the building will be faced with cement plaster. A red clay tile roof will be used. Plans are being prepared and figures will be called for within a few weeks. Further mention will be made in these columns when bids are being called.

SAN JOSE, SANTA CLARA CO., CAL.—School gymnasium, 1 story, frame and concrete. Owners, State of California. Plans have been completed and approved for the construction of a gymnasium in the San Jose State Normal School bldg. will be opened by the State Board of Control on December 5th at 12 o'clock. Plans and specifications and full particulars of this work can be secured from the State Engineer at Sacramento. An official proposal appears in another column of this issue.

SAN JOSE, SANTA CLARA CO., CAL.—School addition, 1 story, brick, \$10,000. Architect, Charles S. McKenzie, Bank of San Jose Bldg., San Jose. Owners, City of San Jose. A one-story brick addition is to be made to the present San Jose High School. The addition will contain a number of class rooms. Interior finish will be of pine throughout. The present heating system will be extended into the new portion of the building. Exterior will harmonize with the older portion of the building. Plans are complete and work will be started at once.

FRESNO, FRESNO CO., CAL.—Orphans' Home addition, 1 story and base, brick. Cost not stated. Architect, County Surveyor Scott McKay, Fresno. Owners, Fresno County. Plans have been completed and have received the approval of the County supervisors for a one-story brick building to be erected at the County Home for Orphans. Bids will be opened on December 2nd. Plans and full particulars can be obtained from D. N. Barnwell, County Clerk, Fresno. A check for 10 per cent must accompany each bid.

GLENDALE, LOS ANGELES CO., CAL.—School, 1 and 2 story and base, brick, \$300,000. Architects, Allison and Allison, Hibernian Bldg., L. A. Owners, Glendora School District. The building will be erected in a central portion of the city and has been designed to contain ten standard size class rooms, principals' office, assembly room and teachers' rooms. The interior will be finished in pine with maple and pine floors. Plans provide for steam heat and vacuum cleaning. Marble will be used. There will be a program clock system. Exterior of the building will be faced with pressed brick. Plans are being prepared. Further mention will be made of this work when figures are called.

CHENEY, WASH.—School group of 1 and 2 story reinforced concrete buildings, \$300,000. Architect, Julius Zittel, Jameson Bldg., Spokane. Owner, State of Washington. This group has been designed for a State Normal School. Construction will be fireproof with steel frames and reinforced concrete walls and floors. All modern conveniences will be installed. Exterior will be faced with cement plaster. Plans are complete and separate figures are now being taken on the general construction, plumbing, heating and electric work. Bids will be opened on November 29th. The principal at Cheney or the architect will furnish full particulars.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—School, 2 story and base, brick, \$76,718.16. Architect, A. B. Surges, Story Bldg., L. A. Owner, Long

Beach School District. Contractor, J. W. Davison, 325 Walnut street, Long Beach, general construction; Long Beach Plumbing Co., plumbing, \$6,822; Southern California Electric Co., Long Beach, electric work, \$1,317; The Long Beach Improvement Co., heating and ventilating, \$9,394.

BRAWLEY, IMPERIAL CO., CAL.—School, 2 story and base, brick, \$14,500. Architect, Norman P. Marsh, Broadway Central Bldg., L. A. Owners, Brawley School District. Contractor, James Martin, Selma, general construction, \$14,500; Wormell and Drawbaugh, Pasadena, painting, \$1,968; Standard Electric Time Co., L. A., program clocks, \$477.50.

SEWERS, STREET WORK AND WATER SYSTEMS.

CALIFORNIA—Steel storage tanks, 10 concrete and steel tanks, \$50,000 each. Engineer, V. N. Dalton, Foxcroft Bldg., S. F. Owners, American Gasoline Co., Kohl Bldg., S. F. Structural Engineer V. N. Dalton has prepared plans for 40 steel and concrete gas olive storage tanks, which will be erected at various places on the coast, mostly in California, by the American Gasoline Co., Kohl Bldg. Each tank will be 150 feet in diameter and 50 feet high. The tanks will have steel covers. Each tank has a capacity of 55,000 barrels. Contracts will be let by the owners. An estimate of \$50,000 each is placed on the work.

RICHMOND, CONTRA COSTA CO., CAL.—Tunnel and road work, \$250,000. Engineers, Haviland, Dozier and Tibbatts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. The first of the important work in connection with extending Richmond avenue through to the outer harbor is to be started at once. Plans have been completed for the construction of 5000 feet of road which will include a tunnel of some length. Completion of the entire project, bonds for which have been voted, will involve an expenditure of \$1,170,000. Included in this work will be the construction of wharfs and docks. Bids for the road and tunnel work will be opened on December 29th. Further particulars can be secured from the engineers.

SEATTLE, WASH.—Watermains and tunnel work, \$500,000. Engineer, A. H. Dimock, City Engineer, Seattle. Owners, City of Seattle. Plans have been completed by the City Engineer, A. H. Dimock for the construction of two 150 ft. shafts and a 900 ft. tunnel for watermains under Lake Union from 7th avenue and East Lake to 7th avenue and North Lake at a total cost of \$500,000, divided as follows: Shafts \$50,000, tunnel \$220,000. It is expected that bids will be called for in the near future. The shafts will be from 16 to 17 feet inside diameter and will take 1627 cubic yards of concrete for lining. The tunnel, which will be 12 ft. in diameter, is built primarily for a 42 inch watermain.

Contracts Awarded.

SAN JOSE, SANTA CLARA CO., CAL.—Incinerator plant, \$26,796. Engineer's name not given. Owners, City of San Jose. Contractor, Z. O. Field, San Jose. Contract price, \$26,796.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores and loft, 2 story and base, brick, \$19,000. Architect, William Knowles, Hearst Bldg., S. F. Owner, Mrs. Carrie Rea. The building will be erected on the north side of Mission street east of 7th and when complete will be occupied by an art glass firm. Interior finish will be of pine throughout. The building will have a frontage of 25 feet and a depth of 79 feet. There will be patent store fronts, modern plumbing and electric work and some special machinery. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Stores and loft, 2 story and base, brick, \$27,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. This building will be erected in the wholesale district and has been designed for two commission stores on the first floor and lofts above. Foundations and walls will be heavy enough to carry additional stories in the future. There will be metal window sash and frames, pine interior finish and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SACRAMENTO, CAL.—Store alterations, brick construction, \$10,000. Architect, Charles E. Wallace, Consumers' Ice Co., Sacramento. Owners, Consumers' Ice Co. This work will include new interior finish, plumbing, electric work and painting. The building is located on Lot 7 between 8th and 9th streets. Some exterior brick work will be called for in the contract. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, Class B construction, \$110,000. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, Bensinger Estate. Contractor Carl Leonardt, H. W. Hellman Bldg., L. A., general construction. Contract price, \$110,000. Note—This work does not include plumbing, heating, electric work, elevators and automatic sprinkler system.

THEATRES.

BERKELEY, ALAMEDA CO., CAL.—Theatre, 2 story and base, Class A Construction, \$100,000. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Williamson and Mason. This work has been mentioned here before when the architect was first commissioned to prepare plans. Working drawings are complete and figures are being taken. The building will be erected on the west side of Shattuck avenue south of University covering an area of 60 by 125 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior will be finished in metal and hardwoods with considerable ornamental plaster. There will be steam heat and a modern system of ventilation. The main auditorium and galleries will have a combined seating capacity of 2000 people. Exterior of the building

will be faced with cement plaster. The building has been leased for a long term of years to the Turner and Dahlgren Circuit.

SEATTLE, WASH.—Theatre, 2 story and base, reinforced concrete, \$40,000. Architect, J. A. Creutzler, New York Bldg., Seattle. Owner, Ole Hansen. This building will be erected at the corner of 15th avenue and Republican street covering a ground area of 36 by 120 feet. Construction will be fire-proof throughout with reinforced concrete floors, walls and roof slabs. Interior will be finished in pine and metal with some ornamental plaster. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with cement plaster and terra cotta. Plans are being prepared and contracts will be let as soon as the working drawings can be completed.

SEATTLE, WASH.—Theatre, 4 story and base, Class A construction, \$125,000. Architects, Becker Bros., or E. W. Houghton, Seattle. Owners, Jensen and Von Herberg, Alhambra Theatre, Seattle. The building is to be erected on 1st avenue north of Pike. The owners have not commissioned either of the architects as yet but state that one or the other of these firms will prepare plans. Further information will be given in these columns when plans are selected.

SEALED PROPOSALS.

PROPOSALS FOR EXCAVATING AND CONCRETE WORK.

STEEL, LUMBER, PIPE, CONCRETE, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States reclamation service, Great Falls, Mont., until 2 o'clock p. m., December 18, 1913, for the construction of structures of the Fishkum reservoir supply canal and Sun river canal, involving about 82,000 cubic yards of excavation, 14,000 cubic yards of concrete, the placing of about 664,000 pounds of reinforcing steel, the erection of about 10,000 pounds of structural steel, the placing in wooden structures of about 66,000 feet, B. M., of lumber, and the laying of about 24,000 linear feet of 4-in. pipe. The work is situated on the north side of Sun river, from 25 to 70 miles west of Great Falls, Mont., and is near the line of the Sun river branch of the Great Northern Railway. For particulars address the United States reclamation service, Washington, D. C., Great Falls, Mont., or Fort Shaw, Mont., A. P. DAVIS, acting director.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 807.—Proposals for Operating Devices for Monitor Sashes, Transformers, Card Time Recorders, Sanitary Fixtures, Dressing Rooms, Ironing Bars, Radiant Metal, Bar Infusing Steel Bars, Steel Cable, Steel Wire, Rivets, Bolts, Washers, Hammers, Twist Bits, Slack Blocks, Tackle Blocks, Chain Blocks, Grindstones, Hose, Asbestos Gaskets, Cotton Canvas, Oars, Chinaware, Glass Pitchers, Rules, Waste Baskets, Binder's Board, Blank Books, Gasoline and Lumber.—Sealed proposals will be received at the office of the general purchasing office, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., November 24, 1913, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 807) may be obtained from this office or the offices of the assistant purchasing agents, 1634 North Point street, San Francisco, Cal.; also from the U. S. engineer of canal in the following cities: Seattle, Wash.; Los Angeles, Cal.; Honolulu, major corps of engineers, U. S. army, general purchasing office.

PROPOSALS FOR JAIL PLUMBING.

Pursuant to Resolution No. 6316, N. S., the Council of the City of Oakland will receive proposals for bids, and alternate bids for furnishing of all the materials, labor and workmanship required for the Plumbing for the Jail in the City Hall Building in the City of Oakland, California.

All proposals shall be made upon and conform to the requirements of the forms of proposals prepared and furnished by the City, through the Architect, and shall be enclosed in sealed envelopes, endorsed "Bids for furnishing of all the materials, labor and workmanship required in connection with the Plumbing for the Jail required for the City Hall Building," addressed to the Council and deposited by the bidder, or his agent, with said Council while in session, between eleven o'clock a. m. and twelve o'clock noon, Pacific time, on the 20th day of November, 1913, in the room of the Council in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time within which they will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by the City in accordance with the plans, drawings and specifications prepared therefor and on file in the office of Palmer, Horthostel & Jones, Architects, in the City Hall Building, to which said plans and specifications reference is hereby made.

No bid will be received or considered which is not accompanied by a check or cash, in a registered bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent (10%) of the aggregate amount of the proposal submitted by the bidder. Said check or cash to be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bond of the forms to be provided by the City and as required by the Charter of the City of Oakland, within five (5) days after receiving notice of award.

The contractor will be required to begin work within five (5) days from the execution of the contract, unless otherwise notified in writing by the Owner or Architects, and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawings and specifications prepared therefor, to the entire satisfaction of the Commissioner of Public Works and the City, on or before eighty (80) working days from and after the beginning of the work. The City of Oakland will retain Fifteen (15) per cent of the bid price as retention or money due the Contractor as proper, liquidated and ascertained damages, for each and every working day consumed by the Contractor for the performance and completion of the work in excess of the eighty (80) working days allowed and mentioned above.

A set of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgment and specifications will be furnished contractors on demand at the office of the Architects at City Hall Building.

All information relative to the requirements for bidding and all drawings necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Architects upon application at their office at the City Hall Building.

The right is reserved to the Council, in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter of the City of Oakland.

FRANK M. SMITH, City Clerk.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 26th day of November, 1913, for doing the following work, including the furnishing of all necessary labor and materials therefor, to wit:

The general construction of Engine House at the San Francisco Fire Department, to be located on city property, situate at the northwesterly

corner of Twenty-second and Wisconsin streets.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from receipt of written notice from the Board of Public Works, and completed within two hundred and ten (210) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$5,000.

All proposals offered must be accompanied by a check certified by a responsible bank payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL, Secretary.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including twelve o'clock, noon, Monday, December 8, 1913, said bids then and there to be publicly opened and read in the presence of the contractors and labor, and doing the work required for the construction and erection of a Gymnasium Building at the State Normal School, San Jose, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five (\$5.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposal for Gymnasium Building, State Normal School, San Jose, California."

(Signed) W. F. McClure, State Engineer. (*)

PROPOSALS FOR BUILDING.

BUILDING—Office of Constructing Quartermaster, Fort Mason, Cal.—Sealed proposals, in triplicate, for constructing two reconstructed connected buildings at the army supply depot, Fort Mason, Cal., will be received here until 11 a. m., November 21, 1913, and then opened. Plans, specifications, blanks and necessary information can be obtained here. Deposit of \$25 required to insure return of plans, etc. Proposals to be inclosed in sealed envelopes and addressed to Lieutenant Colonel GEO. JACK WILLIAMSON, quartermaster corps.

BUILDERS' BONDS.

Nov. 12, 1913.—N SUTTER 109 W. Powell 3745x13174. Owner, M. D. Grosh, B. J. Larzelere and Louise M. Sage; contractors, L. A. Morris Co. Sureties, Royal Indemnity Co. Bond \$7500; Same with James L. Brown, Inc., contractor. Sureties, Aetna Accident & Liability Co. Bond, \$11,000; Same with William Wade, contractor. Sureties, Morris and Jacob Stulsalt. Bond, \$8000.....

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base, frame, \$3,000, San Francisco. Architect, A. H. Peterson, Mills Bldg., S. F. Owner, Charles Anderson, 762 Cole street, S. F. This dwelling will be erected on the east side of 25th avenue north of Judah and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with oak floors in the principal rooms. There will be a large open fire place in the living room with a tile or brick mantel. The wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. A brick veneer base is also to be used. Plans are complete and the owner will do the work by Day Labor.

RESIDENCES—6 2-story and base, frame, \$2,500 each, San Francisco. Architect, none. Owner, Jonathan Anderson, 123 16th avenue, S. F. These houses will be erected on the east side of 29th avenue near Anza street and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Oak floors will be used in the living and dining rooms. There will be large open fire places in the living rooms with mantels of brick or tile. The wainscot will be used in the baths and kitchens. Exteriors will be covered with cement plaster on metal lath, rustic and shiplap. Plans are in the hands of the owner and he will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,500, San Francisco. Architect, none. Owner, S. B. Misrack, 8 Regent street, S. F. The house has been designed for a six room dwelling and will be erected on the north side of Regent street near Winnipeg. Interior will be finished in pine and redwood with hardwood floors in the two principal rooms. There will be a large open fire place with brick mantel. The wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor. He is now purchasing all materials.

RESIDENCES—2 2-story and base, frame, \$3,000 each, San Francisco. Architect, none. Owner, C. A. Hall, 1318 5th avenue, S. F. These houses have been designed to contain seven rooms and bath and will be erected on the east side of 23rd avenue north of California. Interiors will be finished in pine with some hardwood veneer. Oak floors will be used in the principal rooms. The living rooms will have large open fire places and tile or brick mantels. Automatic water heaters will be installed. The wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

PHOTOGRAPH—1 story and base, frame, \$2,000, San Francisco. Architect,

J. M. Geary, 23rd and Folsom streets, S. F. Owners, Parkside Home Building Co. The house has been designed for a five room dwelling with bath. Interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be a large open fire place and brick mantel in the living room. The dwelling is to be erected on 23rd avenue south of Taraval. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$10,000, San Francisco. Architects, Dunn and Kearns, Monadnock Bldg., S. F. Owner, M. Byrne. The building will be erected on the west line of Webster street south of Pacific and will cover an area of 46½ by 100½ feet. Interior has been arranged for twelve large suites, which will be designed for a high class of tenants and which will be finished in the most modern style. Plans provide for steam heat, elevator service, dumb waiters, vacuum cleaning and a hot water supply. All suites will have private baths and wall beds. Bath rooms will be finished in tile with composition floors. Entrance will have marble wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$10,000, San Francisco. Architect, none. Owner, E. Rossi, 1795 Filbert street, S. F. The building will be erected on Lombard street near Franklin and will cover a ground area of 27½ by 77½ feet. Interior has been arranged for six suites of two and three rooms with wall beds and private baths. Interior finish will be of pine throughout. A hot water supply will be installed. Exterior of the building will be covered with cement plaster on metal lath and a pressed brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—6 story and base, brick and steel, \$100,000, San Francisco. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner's name not given. Contracts for the steel work and various other parts of the work on the building at the northeast corner of Post and Leavenworth streets have been let. The architects are now taking subfigures for other parts of the work. Full particulars can be had at their offices.

APARTMENT HOUSE—3 story and base, frame, \$8,000, San Francisco. Architect, none. Owner, Paul N. Nippert, Insurance Exchange Bldg., S. F. The building will be erected on the west side of Divisadero street south of Haight covering an area of 24 by 86 feet. There will be six apartments arranged in four room suites with private baths and wall beds. Interior will be finished in pine throughout. There will

be a hot water supply and vacuum cleaning system. Bath rooms will be finished in tile. Entrance will have tile wainscot and marble steps. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

CITY HALL WORK—Class A construction, \$1,500,000, San Francisco. Architects, Bakewell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Architects Bakewell & Brown state that plans and specifications for the plumbing, electric work and heating and ventilating on the City Hall will be completed within a week or ten days. Aside from the large contracts already awarded these are among the largest of the contracts to be let. Bids will be called for by the Board of Public Works as soon as the plans and specifications receive final approval. Contracts for marble and tile work and elevators will follow in the course of the next month or six weeks.

FIRE HOUSE—2 story and base, brick and concrete. Cost not stated, San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and have received official approval for the construction of Engine House No. 48. The building will be erected at the northwest corner of 22nd and Wisconsin streets. First floor has been designed to accommodate the equipment, stables and lounging room. Upper floors will contain captain's office, reading room, showers and sleeping quarters for the men. Interior will be finished in pine with some hardwood. There will be a steam heating system and special electrical equipment. Exterior of the building will be faced with pressed brick. Plans are now out for figures and bids will be opened by the Board of Public Works on November 26th.

FLAT ALTERATIONS—2 story and base, frame, \$5,000, San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner's name withheld. This work will consist of the alteration of the present two story frame dwelling at the corner of Larkin and Greenwich streets in a modern flat building containing four flats of four and five rooms. There will be new plastering, interior finish, plumbing, electric work, and tile and painting. Exterior of the building will also be altered. Plans are complete and figures will be called for at once.

HOTEL—3 story and base, frame, \$22,000, San Francisco. Architect, Charles J. Rousseau, 46 Kearny St., S. F. Owner's name withheld. The building will be erected at the southeast corner of Lombard and Steiner streets covering an area of 50 by 95 feet. There will be five stores on the first floor besides the hotel lobby and entrance. Upper floors have been arranged to contain in the neighborhood of 50 guest rooms and several private and public baths. Interior will be finished in pine and redwood. There will be steam heat, a hot water system and other modern conveniences. Bath rooms will have composition floors and

tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

HOTEL—5 story and base, brick and steel, \$50,000. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owners, Columbia Realty Co. This building has been mentioned here before when preliminary plans were started. The structure will be erected on the west line of Taylor street north of Sutter and has been designed for a store and hotel lobby and entrance on the first floor and about 65 rooms on the upper floors. Interior will be finished in pine and hardwoods with some ornamental plaster in the office and lobby. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are nearly ready for figures.

HOTEL—3 story and base, frame, \$25,000. San Francisco. Architect, Charles J. Rousseau, 45 Kearny st., S. F. Owner's name withheld. This building, similar in design to another hotel structure, plans for which are being prepared by the same architect, will be erected at the southwest corner of Lombard and Scott streets. The building will have frontages of 50 by 100 feet and will be arranged for five stores on the first floor and 65 guest rooms and a number of public and private baths on the upper floors. Interior finish will be of pine and redwood. Plans provide for steam heat, running hot and cold water and a vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Ornamental plaster will be used in the lobby. Exterior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

STEEL STORAGE TANKS—40 concrete and steel tanks, \$50,000 each. Engineer, V. N. Dalton, Foxcroft Bldg., S. F. Owners, American Gasoline Co., Kohl Bldg., S. F. Structural Engineer V. N. Dalton has prepared plans for 40 steel and concrete gasoline storage tanks, which will be erected at various places on the coast, mostly in California by the American Gasoline Co., Kohl Bldg. Each tank will be 150 feet in diameter and 50 feet high. The tanks will have steel covers. Each tank has a capacity of 55,000 barrels. Contracts will be let by the owners. An estimate of \$50,000 each is placed on the work.

STORES AND LOFT—2 story and base, brick, \$10,000. San Francisco. Architect, William Knowles, Hearst Bldg., S. F. Owner, Mrs. Carrie Rea. The building will be erected on the north side of Mission street east of 7th and when complete will be occupied by an art glass firm. Interior finish will be of pine throughout. The building will have a frontage of 25 feet and a depth of 79 feet. There will be patent store fronts, modern plumbing and electric work and some special machinery. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES AND LOFT—2 story and base, brick, \$27,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. This building will be erected in the wholesale district and has been designed for two commission stores on the first floor and lofts above. Foundations and walls will be heavy enough to carry additional stories in the future. There will be metal window sash and frames, pine interior finish and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

CITY HALL WORK—Class A construction, \$4,500,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Contractors, Clinton Fireproofing Co., Mutual Bank Bldg., S. F., plain reinforced concrete and fireproofing for City Hall. Contract price, Proposition A, \$156,375; Proposition B, \$32,875; total, \$189,250.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architects, Smith and Stewart, 244 Kearny street, S. F. Owner, Sidney Pringle, Contractor, Louis J. Diebel, 1534 Leavenworth st., S. F. Contract price, \$5,000.

OAKLAND AND ALAMEDA

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Miss Jeanne Wintermute. The dwelling will be erected in the Claremont Tract and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Automatic water heater will be installed. Exterior of the dwelling will be covered with shakes and shingles. Plans are nearly complete and figures will be called for shortly.

RESIDENCE — 2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck ave., Berkeley. This dwelling, which is to be erected in Thousand Oaks Park, will contain seven rooms, bath and sleeping porch. Interior will be handsomely finished in pine and redwood. Oak floors will be used in the living room, dining room and den. There will be furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the owners will do the work by Day Labor.

RESIDENCES — 2 2-story and base, frame, \$4,000 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, Interurban Home Builders, The, Alameda and Solano ave., Berkeley. This firm will shortly start construction on two handsome dwellings, each of which is to contain seven rooms and which will be erected in the Northbrae Tract. Interiors will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms and kitchens will have tile wainscot. Automatic water heater will be installed. Exterior will be covered with cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor. Material figures are now being taken.

RESIDENCES — 2-story and base, frame, \$5,750 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck ave., Berkeley. These houses will be erected on Sierra street and have been designed for seven room dwellings with bath and sleeping porches. Interiors will be finished in pine, white enamel and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscoting will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and the owners will do the work by Day Labor.

BUNGALOWS — 1 1/2 story and base,

frame, \$2,700 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, Interurban Home Builders, The, Alameda and Solano ave., Berkeley. These houses will be erected in the Northbrae Tract and each will contain six rooms, bath and sleeping porch. Interior finish will be largely of pine. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels in the living rooms. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with cement plaster, shingles and rustic. Plans are complete and work will be done by Day Labor. Bids on materials are wanted.

BUNGALOW — 1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck ave., Berkeley. The dwelling will be erected on Sierra street in Northbrae and will contain six rooms, bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with brick mantel. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$10,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected in Adams Point and has been designed for a nine room house with several baths and sleeping porch. Interior finish will be of Pine and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have composition floors and tile wainscot. Automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BUNGALOW — 1 story and base, frame, \$2,750. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck avenue, Berkeley. The house will be erected on Sonoma ave., and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished largely in pine with oak floors in the living and dining room. The wainscoting will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$1,500. Berkeley, Alameda Co., Cal. Architect, Julia Morgan. Merchants' Exchange Bldg., S. F. Owner, T. S. Mathis. The dwelling will be erected on Cedar street and has been designed for a seven room house with bath and sleeping porch. Interior finish will be of pine and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the

work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$4,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected on Walla Vista avenue and has been designed for a seven room house with bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat. A large open fire place with brick or tile mantel will be used in the living room. An automatic water heater will be installed. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck ave., Berkeley. The dwelling, designed for a seven room house, will be erected at the northeast corner of Sonoma and Sierra streets. Interior will be finished in pine with some hardwood veneer and white enamel. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Tile wainscot is specified in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$6,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected on Calmar avenue and has been designed to contain eight rooms, baths and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Oak floors will be used in the principal rooms. There will be furnace heat, vacuum cleaning and an automatic water heater. Large open fire places with brick or tile mantels will be used in several of the rooms. Bath rooms will have composition floors and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$1,500. Piedmont, Alameda Co., Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected on Mountain View ave. and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine with some oak veneer in the dining room. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 1 1/2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Frank S. Forester, 1417 Arch street, Berkeley. Owner, Mrs. A. T. Burns. The dwelling, designed for a six room house with

bath and sleeping porch, will be erected in the Claremont Tract. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and an open fire place. Mantel will be of brick or tile. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, W. G. Appleton, First National Bank Bldg., Berkeley. The dwelling will contain seven rooms and bath. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the principal rooms. The plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the kitchen and bath rooms. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck ave., Berkeley. The dwelling will be erected at the corner of Sonoma and Tulare avenue and has been designed for an eight room house with bath and sleeping porch. Interior finish will be largely of pine. Oak floors will be used in the principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick or tile. Tile wainscot will be used in the bath and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1 story and base, frame, \$2,000. San Leandro, Alameda Co., Cal. Architect, Erwin Schapfer, Albany Block, Oakland. Owner, Emil Storz. The dwelling has been designed for a five room house with bath. Interior finish will be of pine. Oak floors will be used in the living and dining rooms. There will be a large open fire place in the living room with a brick or tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCES—3 2-story and base, frame, \$4,500 each. Piedmont, Alameda Co., Cal. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner, H. P. Houston. These houses will be erected in Piedmont Manor and each has been designed to contain seven rooms, bath and sleeping porch. Interiors will be finished in pine, redwood and some hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heaters will be installed. Tile wainscot will be used in the bath rooms and kitchens. Ex-

teriors will be covered with cement plaster on metal lath. Plans are being prepared. When complete the work will probably be done by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2011 Shattuck avenue, Oakland. The dwelling will be erected at the northeast corner of Sonoma and Ventura avenue and has been designed to contain eight rooms, bath and sleeping porch. Interior will be finished in pine, white enamel and hardwood veneer. Oak floors will be used in the living, dining room and reception hall. There will be furnace heat. Open fire places and brick or tile mantels will be used in the principal rooms. Plans provide for an automatic water heater. Tile wainscot will be used in the bath and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete work will be done by Day Labor.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. Oakland, Cal. Architects, Rousseau and Rousseau, Monadnock Bldg., S. E. Owner, F. G. Ealrd. The building will be erected on the west side of Oak street between 14th and 15th streets and will have a frontage of 50 feet and a depth of 150 feet. The building has been designed to contain a total of 75 rooms which will be arranged in suites of two, three and four rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine, redwood and some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be steam heat, an automatic elevator, a hot water supply and vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are being prepared.

JAIL PLUMBING AND EQUIPMENT—Cost not stated. Oakland, Cal. Architects, Palmer, Hornbostel and Jones, New York City, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owner, City of Oakland. Bids are being called for on the plumbing for the City Jail, located in the new City Hall building. Bids will be opened on November 20th. Plans and specifications can be secured from the supervising architect, J. J. Donovan, Security Bank Bldg., Oakland. An official proposal appears in another column of this issue.

HOTEL HEATING SYSTEM—Cost not stated. Oakland, Cal. Architect, Fred D. Voorhees, Central Bank Bldg., Oakland. Owner, H. A. Powell. Plans are complete and figures are now being called for the installation of a steam heating system in the new seven story and basement brick and steel hotel building which is now under construction at the corner of 13th and Webster streets. Plans are out for figures. Full information as to the system can be secured from the architect.

THEATRE—2 story and base, Class A construction, \$100,000. Berkeley, Alameda Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. E. Owners, Williamson and Mason. This work has been mentioned before

before when the architect was first commissioned to prepare the plans. Working drawings are complete and figures are being taken. The building will be erected on the west side of Shattuck avenue south of University covering an area of 60 by 125 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior will be finished in metal and hardwoods with considerable ornamental plaster. There will be steam heat and a modern system of ventilation. The main auditorium and galleries will have a combined seating capacity of 2000 people. Exterior of the building will be faced with cement plaster. The building has been leased for a long term of years to the Turner and Dohken Circuit.

SAN JOSE & SANTA CLARA CLARA VALLEY.

RESIDENCE — 2 story and base, frame, \$14,000. Woodside, San Mateo Co., Cal. Architects, W. Garden Mitchell and Charles Edward Hodges, Bankers Investment Bldg., S. F. Owner, William Fitzhugh. A contract for bams and out buildings which are to be a part of an extensive country home which is to be erected in the Portola Tract, near Woodside, has been let. Plans for the dwelling are nearly complete and figures will be called for shortly. The house will contain in the neighborhood of 10 rooms, several baths and sleeping porches. There will be furnace heat and 10 open fire places. Mantels will be of brick and tile. Interior will be finished in pine and hardwoods. Oak floors will be used in the principal rooms. Exterior of the house will be covered with cement plaster on metal lath.

SCHOOL GYMNASIUM — 1 story, frame and concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, State Architect George B. McBoagall, Sacramento. Owners, State of California. Plans have been completed and approved for the construction of a gymnasium at the San Jose State Normal School. Bids will be opened by the State Board of Control on December 8th at 12 o'clock. Plans and specifications and full particulars of this work can be secured from the State Engineer at Sacramento. An official proposal appears in another column of this issue.

SCHOOL ADDITION — 1 story, brick, \$10,000. San Jose, Santa Clara Co., Cal. Architect, Charles S. McKenzie, Bank of San Jose Bldg., San Jose. Owners, City of San Jose. A one story brick addition is to be made to the present San Jose High School. The addition will contain a number of class rooms. Interior finish will be of pine throughout. The present heating system will be extended into the new portion of the building. Exterior will harmonize with the older portion of the building. Plans are complete and work will be started at once.

Contracts Awarded.

INCINERATOR PLANT — \$26,796. San Jose, Santa Clara Co., Cal. Engineer's name not given. Owners, City of San Jose. Contractor, Z. O. Field, San Jose. Contract price, \$26,796.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

BUNGALOW — 1 story and base, frame. Cost not stated. Headlands, Sonoma Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Laura E. Gillis. The dwelling will contain seven rooms, bath and sleeping porch. Interior finish will be of pine throughout. There will be hardwood floors in the living room and dining room. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

CHURCH — 2 story and base, reinforced concrete, \$25,000. Dixon, Solano County, Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Roman Catholic Church of Dixon. The building has been designed in the Spanish Mission style and will be of reinforced concrete construction throughout. The main auditorium will have a seating capacity of 600 people. Interior finish will be of pine and ornamental plaster. There will be a central heating system. Considerable marble and tile will be used. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are now being prepared and figures will be called for as soon as working drawings can be completed.

TUNNEL AND ROAD WORK — \$250,000. Richmond, Contra Costa Co., Cal. Engineers, Haviland, Dozier and Tibbetts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. The first of the important work in connection with extending Richmond avenue through to the outer harbor is to be started at once. Plans have been completed for the construction of 500 feet of road which will include a tunnel of some length. Completion of the entire project, bonds for which have been voted, will involve an expenditure of \$1,170,000. Included in this work will be the construction of wharves and docks. Bids for the road and tunnel

work will be opened on December 29th. Further particulars can be secured from the engineers.

Harry Wygant, 1225 I street, 2 story, frame, \$2,000; A. Andrew, Palmetto and Terrace ave., 1 story, frame, \$1,500, and H. H. Sanders, 2564 Monterey ave., 1 story, frame, \$1,700.

COURT HOUSE ALTERATIONS—Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, San Joaquin County. This work will consist of extensive alterations to the County Clerk's office in the County Court House. Included in the work is a large amount of cabinet work, oak finish, one Tucker Alarm draw, marble and tile work and electric work. Plans have

been completed and figures are now being taken. Plans and specifications can be secured from the architect.

LODGE HALL, STORES AND OFFICES—4 story and base, reinforced concrete, \$125,000. Sacramento, Cal. Architect, Washington J. Miller, 45 Kearny st., S. F. Owners, Sacramento Native Sons' Hall Association. Architect Washington J. Miller has been commissioned to prepare plans for a large reinforced concrete building which will be erected by the Sacramento Native Sons' Hall Association on their property at the northwest corner of 11th and J streets in Sacramento. The structure will cost in the neighborhood of \$125,000 and has been designed in the Florentine style. Construction will be practically fireproof. There will be one large store on the first floor. Banquet room will occupy the basement. Second and third floors will be arranged for lodge rooms, social halls and parlors. The fourth floor will be arranged for modern offices fitted up for physicians and dentists. Interior partitions and doors will be of fireproof construction. Plans provide for steam heat, elevator service and a vacuum cleaning system. Considerable marble and tile work will be used. Exterior of the building will be faced with cement plaster. Figures will be called for as soon as plans can be completed.

STORE ALTERATIONS—Brick construction, \$10,000. Sacramento, Cal. Architect, Charles E. Wallace, Consumers' Ice Co., Sacramento. Owners, Consumers' Ice Co. This work will include new interior finish, plumbing, electric work and painting. The building is located on Lot 7 between 8th and 9th streets. Some exterior brick work will be called for in the contract. Plans are complete and the work will be done by Day Labor.

PORTLAND AND OREGON.

VIADUCT AND BRIDGE—Reinforced concrete construction. Cost not stated. Multnomah Falls, Ore. Engineer, Samuel C. Lancaster, County Engineer Multnomah County, Portland. Owners, Multnomah County. The combination bridge and viaduct will be built around a rocky point and will be 400 feet in length. Construction, including piers, and approaches will be of reinforced concrete. Plans have received the approval of the Board of Supervisors and are now out for figures. Plans, speci-

fications and full particulars can be secured from the County Engineer.

STABLE BUILDING—2½ story and base, brick and mill construction, \$20,000. Portland, Ore. Architects, C. A. Houghtaling & Co., Henry Bldg., Portland, Owner, Robert O'Neil. The building will be erected on the east side and will cover an area of 100 feet square. Construction will be of brick and mill type with brick walls and heavy timber floors and joists. No interior finish will be used. Exterior will be faced with stock brick. Plans are complete and figures will be called for about November 20th.

LODGE HALL—2 story and base, brick, \$10,000. Sheridan, Ore. Architect, L. R. Bailey Co., Abington Bldg., Portland, Owners, Almonse Lodge of Sheridan. The structure will be 53x85 in size, and will have concrete foundations. A face brick will be used in the front and work has already been started on the foundation. The first floor will be used for store purposes while the two upper floors will be used for lodge and office purposes. Plans will be completed in about three weeks, when bids will probably be called for.

HOTEL—2 story and base, brick, \$35,000. Portland, Ore. Architect, Robert Tegan, Morgan Bldg., Portland, Owner, A. L. Parkhurst. This work has been mentioned here before. The building will be erected at the corner of Second and Couch street and will be arranged for stores on the first floor with hotel rooms above. Interior finish will be of pine throughout. Plans provide for steam heat. A number of the rooms will have private baths. Hot and cold running water will be supplied to all rooms. Bath rooms will have cement floors and tile wainsot. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans have been revised and new figures will be called for at once.

Contracts Awarded.

FLOUR MILLS—Reinforced concrete \$60,000. Astoria, Ore. Architect, none. Owners, Astoria Flouring Mills, Astoria, Contractor, C. L. Houslon, Astoria, general construction. Contract price \$60,000.

SEATTLE AND WASHINGTON.

FACTORY—2 story and base, reinforced concrete, \$25,000. Seattle, Wash. Architect, V. W. Voorhees, Etzel Bldg., Seattle, Owners, A. F. Glushko & Sons. The building will cover an area of 90 by 105 feet and will be practically fireproof with reinforced concrete walls, floors and interior partitions of hollow tile. Plans provide for elevator service fireproof doors, and metal window sash and frames. A steam heating and drying system will be installed. Interior of the building will be finished in pine. About \$5,000 worth of special machinery will be installed. Exterior will be faced with cement plaster. Plans and specifications will be complete by December 1st. A general contract will be let.

RAILROAD COMMISSARY BUILDING—2 story and base steel and concrete \$30,000. Seattle, Wash. Architect, A. R. Cook, Chief Engineer, N. P. R. Co., Seattle, Owners, Northern

Pacific Railroad Co. The building will be erected on the King street property of the company and will cover an area of 40 by 190 feet. Construction will be fireproof throughout with a steel frame, reinforced concrete walls and floors. Interior partitions will be of metal lath and plaster. Interior will be finished in pine throughout. There will be steam heat. Considerable white porcelain and terra cotta tile will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

SCHOOLS—Group of 1 and 2 story, reinforced concrete buildings, \$300,000. Cheney, Wash. Architect, Julius Zittel, Jamieson Bldg., Spokane, Owner, State of Washington. This group has been designed for a State Normal School. Construction will be fireproof with steel frames and reinforced concrete walls and floors. All modern conveniences will be installed. Exterior will be faced with cement plaster. Plans are complete and separate figures are now being taken on the general construction, plumbing, heating and electric work. Bids will be opened on November 29th. The principal at Cheney or the architect will furnish full particulars.

WATER MAINS AND TUNNEL WORK—\$200,000. Engineer, A. H. Dimock, City Engineer, Seattle, Owners, City of Seattle. Plans have been completed by the City Engineer, A. H. Dimock for the construction of two 150 ft. shafts and a 900 ft. tunnel for water mains under Lake Union from 7th avenue and East Lake to 7th avenue and North Lake at a total cost of \$200,000, divided as follows: Shafts \$80,000, tunnel \$220,000. It is expected that bids will be called for in the near future. The shafts will be from 16 to 17 feet inside diameter and will take 1627 cubic yards of concrete for lining. The tunnel, which will be 12 ft. in diameter, is built primarily for a 42 inch watermain.

THEATRE—2 story and base, reinforced concrete, \$10,000. Seattle, Wash. Architect, J. A. Grentzer, New York Bldg., Seattle, Owner, Ole Hansen. This building will be erected at the corner of 15th avenue and Rondo street covering a ground area of 26 by 120 feet. Construction will be fireproof throughout with reinforced concrete floors, walls and roof slabs. Interior will be finished in pine and metal with some ornamental plaster. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with cement plaster and terra cotta. Plans are being prepared and contracts will be let as soon as the working drawings can be completed.

THEATRE—4 story and base Class A construction, \$125,000. Seattle, Wash. Architects, Beezer Bros., or J. W. Houghton, Seattle, Owners, Jensen and Von Herberg, Alhambra Theatre, Seattle. The building is to be erected on 1st avenue north of Pike. The owners have not commissioned either of the architects as yet but state that one or the other of these firms will prepare plans. Further information will be given in these columns when plans are selected.

OKLAHOMA HAS BIG GAS PRODUCTION.

Oklahoma enjoyed in 1912 her most prosperous year in the history of her natural-gas industry. The frequent advances in the price of crude petroleum gave an impetus to drilling and resulted in the extension of oil territory and the discovery of some gas pools of considerable importance. There were 329 producing gas wells completed during the year, making a total of 870 productive wells in the State at the close of 1912.

The total production of natural gas in Oklahoma in 1912, as estimated by David T. Day, of the United States Geological Survey, was 73,799,319,000 cubic feet, valued at \$7,406,528, or 10.01 cents per thousand cubic feet, compared with 67,276,608,000 cubic feet, valued at \$6,731,770, or 10.01 cents per thousand cubic feet, in 1911.

Since large quantities of gas are consumed in Oklahoma for both domestic and industrial purposes at a flat rate, no meters being used, it is impossible to arrive at the exact quantity of gas consumed, but it is estimated that in 1912 there was used for domestic purposes 5,600,062,000 cubic feet, compared with 5,816,723,000 cubic feet in 1911. The estimated quantity of gas consumed for industrial purposes in 1912 was 33,949,341,000 cubic feet, compared with 22,397,148,000 cubic feet in 1911.

Much of the gas produced from the oil wells of Oklahoma is wasted, but where this "casing-head" gas is found to be rich in gasoline several plants have been installed for the extraction of the gasoline. This has become a considerable industry, as there is a ready sale for the product. At the close of 1912 there were twelve of these plants in operation, compared with nine at the close of 1911.

GOLD PLACERS IN ALASKA.

During the summer of 1912 Henry M. Eakin, of the United States Geological Survey, visited the Ruby, Innoko, and Iditarod districts in Alaska, and a report on the gold placers in those districts has been issued by the Survey as Bulletin 342-G. The mining center of the Ruby district is about 25 miles south of Yukon River at Ruby and comprises half a dozen creeks, all within an area a few miles square. The first discovery of gold in this district was probably that made on Ruby Creek in 1907, near the site of the present town. This discovery proved to be of no great importance, and it was not until 1910 that the discoveries on Long Creek and its tributaries created widespread interest in the region. Exact data regarding the amount of gold produced in the district are not available, but the total in 1912 was probably between \$150,000 and \$175,000.

The Innoko-Iditarod region lies in west-central Alaska and embraces most of the upland area north of Kushovim River, that is drained by Innoko and Iditarod rivers. In all 24 claims, located on five creeks, were worked in the Innoko district in 1912, by a total force of about 140 men. The total value of the placer gold produced during the year in the district was probably in excess of \$250,000.

Twenty-nine claims, located on eight different creeks, were worked in the Iditarod district in 1912. Thirty-six

panas were engaged in the work, and about 975 men were employed. The value of the total gold production of the district, including Moore Creek, for the year was probably about \$2,750,000.

EXPOSITION WORK PROGRESSING RAPIDLY.

At the present time, the Court of the Four Seasons is the farthest advanced of any of the five great interior courts of the main group of exhibit palaces at the Panama-Pacific International Exposition. This court is the one west of the Court of Sun and Stars, the principal of all, in the center of the group, and its concrete walls are up to the cornice line of the Palace of Education and of Food Products, which bound it on the west, and up to the spring line of the arch, on the east, where it abuts against the Palace of Agriculture and of Liberal Arts.

Like the other courts, the Court of the Four Seasons has concrete walls, in order that it may act as a fire resistant in case flames should break out in one of the four palaces about it. It was designed by Henry Bacon of New York, and is to be executed in Roman Ionic style, modified with a touch of modern detail. It is 340 feet square and is open to the north, and to the Bay of San Francisco, by way of a colonnaded avenue, 473 feet long and 171 feet wide. Through a passage in a great niche or half-dome, at the south end, it opens into the Court of Palms, designed in Italian style by George W. Kelham.

The installation of the electric conduits for transmission of light and power at the Panama-Pacific International Exposition has kept pace with the rapid progress of construction work in general. The general distributing cables for the trunk system and all the operating apparatus are in order, and also the apparatus for the decorative lighting, such as projectors and the like. Shipments of the latter will be made next year, long before needed.

The conduits for the trunk system is the concessions and in the states and foreign districts of the grounds are completed and it only remains now to put in the service leads. The system is as far advanced in the main exhibit district as the progress of work on the palaces and the piles of lumber will permit.

Plans for the wiring in the Court of the Four Seasons and in the Court of the Sun and Stars have been completed and bids for the same have been called for.

The curbs of the roads and walks throughout the grounds of the Exposition are being placed rapidly. They are well advanced in the concessions and in the main exhibit districts and are being extended into the states and foreign district.

Colonel George W. Goethals, Chief Engineer of the Isthmian Canal Commission, will preside over the Engineering Congress which is to be held at the Panama-Pacific International Exposition from September 20th to 25th, 1915.

This great Congress will be held under the auspices of the American Society of Civil Engineers, the American Institute of Mining Engineers, the American Society of Mechanical En-

gineers, the American Institute of Electrical Engineers, and the Society of Naval Architects and Marine Engineers. Engineers from all over the world have signified their intention of attending and the delegation from Great Britain promises to be large in point of numbers and great in distinction.

A tentative schedule of general sessions has been formulated and the following sections will be considered:

The Panama Canal; Waterways and Irrigation; Railways; Municipal Engineering; Materials of Engineering; Construction; Mechanical Engineering; Electrical Engineering; Mining Engineering; Naval Architecture and Marine Engineering; Military Engineering; Miscellaneous.

Each of these sections will hold independent sessions during the congress, such joint sessions as may be deemed advisable will also be called. On account of the convention of the International Congress of Electrical Engineers, just prior to the International Engineering Congress, the activity of the later in the field of Electrical Engineering of contact between Electrical Engineering and other engineering phenomena and work.

GREATEST MINERAL PRODUCTION IN HISTORY.

Final Figures of the United States Geological Survey for 1912 Show Enormous Total of Two and a Quarter Billion Dollars.

All records have been broken in the great mineral production of the United States for the year 1912. The boom year of 1907 has heretofore been considered the banner year of American mineral output, with a total value of \$2,072,666,639, but even this great figure was exceeded in 1912 by over \$170,000,000. As compared with 1911, the increase in 1912 is \$316,098,198, or 16.40 per cent. These figures are shown in a summary of the mineral production of the United States for 1912, compiled by W. T. Thom, of the United States Geological Survey, now in press.

As heretofore, iron and coal are the most important of our mineral products. The value of iron (pig iron being the basis of valuation) in 1912 was \$120,563,388; the value of coal was \$695,606,671. The value of the fuels—coal, natural gas, and petroleum—increased from \$835,231,197 in 1911 to \$943,972,362 in 1912, a gain of \$108,740,865. Coal showed an increase in value of \$69,049,866, from \$626,555,211 in 1911 to \$695,606,671 in 1912.

The production of metals increased in value \$186,571,502, from \$608,531,782 in 1911 to \$867,103,085 in 1912. The nonmetals increased 129,276,895, from \$1,216,759,316 in 1911 to \$1,376,027,241 in 1912. The unspecified products, including cadmium, selenium, rutile, uranium, vanadium, and other minerals, valued at \$569,000, increased \$250,000, bringing the total value of the mineral production for 1912 up to \$2,213,639,426.

The production of pig iron in 1912 gained more than \$93,000,000, or 28 per cent; ferro-alloys gained nearly \$4,000,000, or about 46 per cent; silver gained more than \$6,000,000, or 20 per cent; copper gained about \$68,000,000, or nearly 50 per cent; zinc gained nearly \$11,000,000, or 44 per cent, and aluminum gained nearly \$1,000,000, or

47 per cent. Gold, which lost about \$3,500,000, was the only important metal to show a decrease. Among the nonmetals bituminous coal gained approximately \$67,000,000, or about 15 per cent; anthracite coal gained more than \$2,000,000; natural gas gained almost \$10,000,000, or 13 per cent; petroleum gained nearly \$30,000,000, or 22 per cent; clay products gained more than \$10,000,000, or 6.5 per cent; and sulphuric acid from copper and zinc smelters (a product mined as it were out of the air and changed from a destructive waste to an absolute gain) increased \$15,000,000, or 55 per cent.

NEW YORK'S MAGNIFICENT BUILDINGS.

Further, I can trace a clear connection between the scrupulous care of the body and the style of architecture which has given New York and Washington the finest railway stations in the world, and New York a Postoffice which takes one's breath away with admiration for its Greek perfection of simplicity and strength. Amid the squalor of Eighth Avenue there has arisen the wonder of the new world. Raised well above the street level and approached by notable steps, is a portico of twenty Ionic columns, the longest I remember to have seen. Simply that, nothing to lessen the dignity of their just balance or to mar their beauty, unsmiling, yet not austere: Along the architrave runs this inscription: "Neither snow nor rain nor heat nor gloom of night stay these couriers from the swift completion of their appointed rounds." That exactly matches the reticence of the conception. Nothing could better correct the European misjudgment of the American character than this magnificent public building, fit to be set beside the finest of ancient or modern temples.

The outside of the Pennsylvania Railway station opposite is made to look commonplace by this unexpected recapture of the Greek spirit in architecture. But passing through its lofty corridors and ample halls, I have felt the same content. As one snuffs up salt air at the sight of the sea, filling the lungs with its vigorous tang; so there is a deep-breathing of the soul when the eye and the imagination are suddenly delighted. Both here and in the new Grand Central Station there is a largeness of conception, a shaking-off of the bondage of "good enough," a bold soaring toward a great aim. The men who planned and built them must be men with a passion for harmony and order. The people who daily pass through them cannot but feel its influence and live in a finer, freer air.

The floors are so clean that (in farm house phrase) "you could eat your dinner off them." The mind is soothed by the spacious calm of the halls, the quietly perfect organization, the neat spick-and-span convenience of ticket and baggage counters, dining-rooms, buffets, bookstalls, information offices. The spotless white caps of the officials are allegorical. They are emblems of the ideal aimed at by the most excellent railway stations the world has yet seen. Stations where there is no opening for the scramble and rush which usually disturb the traveler. Stations for supermen who move calm and certain to their appointed ends.

The white new City Hall in New

York, the cream-and-gold splendor of the Woolworth tower near it, reflect the same ideal, an ideal of brightness and good order without and within. What is it but this, too, we drag scandals to the light and are sweeping out the foul stables of public life? Do you not see now the connection between it and "a room with a bath?"—H. Hamilton Fyfe in *London Daily Mail*.

TO PREVENT WHITE ANTS FROM ATTACKING WOOD.

WASHINGTON, D. C., Nov. 18.—The Bureau of Entomology, under its Branch of Forest Insects, under the charge of Dr. A. D. Hopkins, has been conducting experiments with wood treated by various methods to determine how they may be protected from injury by our native white ants. Experiments are also under way to determine the immunity of the resistance of various native and tropical species of untreated wood to the attack.

The specialist in charge of these experiments has submitted a report on the treated and untreated woods which have been subjected to attack from white ants for from 5 to 12 months. Yellow pine stakes charred or burning for about five minutes were attacked at the end of one year, and the treatment only delays attack. Yellow pine stakes impregnated by the "couch tank" method, with coal tar and wood creosotes; dipping and brushing treatments with wood and coal tar creosotes, and stakes treated by two closed chamber pressure processes with several different creosote compounds were not attacked at the end of one year. Untreated alternating check stakes were attacked by white ants.

An examination of test blocks, showed that after being buried in the ground with infested logs for nearly 6 months some of the blocks impregnated with paraffine wax were attacked by white ants while wood treated with chlorinated naphthalene was not attacked. Untreated teak, greenheart and peroba test blocks and tropical woods were not attacked, while untreated white and red oak, sugar maple, birch, and red gum were attacked and more or less seriously damaged.

CO-OPERATION IN ITALY.

Cooperation in Italy has gone beyond mere buying and selling. It has invaded the building trade and has even undertaken construction of railroads. This is a new development of the labor movement which has alarmed contractors to the point of having started a campaign for the abolition of co-operative labor organizations from public work and have provoked counter demonstrations. The contractors profess to aim at making a profit from the state, but to so organize adequate wages, to give good work and to prevent speculation.

The movement has gained such strength that the latest official statistics, which are for the year 1910, show the existence of 177 co-operative associations, 774 branches, 95,000 members, a capital of \$10,000 and reserve funds of \$300,000. There are 336 agricultural societies, 263 of which have over 100 members.

\$280,000 capital and \$135,000 reserve funds.

Between 1889 and 1909 these organizations had executed contracts with the state for public work to the amount of \$14,890,000 and for provinces and cities to the amount of \$1,620,000. During the last two years they have completed public contracts involving nearly \$5,000,000. A large of these societies improved the harbor of the Reno at a cost of about \$2,000,000 and other societies have taken the contract to build the Reggio-Emilia Railroad. They finance their own work and share the proceeds among the members. They are favored by the state through not being required to give the money guarantees demanded of individual contractors.

But it would be interesting to know how they reach an agreement on an equitable division of the proceeds of a contract. Do they concede that the brains and skill of the director of a \$2,000,000 contract, of the foreman over each gang of men and of the men who manage the finances are worth more than those of the manual laborer? That has been the stumbling block in the way of many co-operative enterprises. It would be interesting to know how dissension is avoided.—Portland Oregonian.

Completion of a Great Engineering Work.

The completion of the Los Angeles aqueduct marks the successful ending of an arduous struggle with nature in its most rugged aspects of mountain, desert, and with powerful and subtle private interests for the possession of a priceless supply of water. Ten aqueducts of ancient Rome were marvels of engineering skill and durability; but their construction stretched over a period of five centuries, against the eight years that have elapsed since the Los Angeles aqueduct was first proposed, and the length and dimensions of the ancient Roman aqueducts bear no comparison with that of modern Los Angeles. The longest of the Roman aqueducts was 62 miles, while the Los Angeles aqueduct is 254 miles in length from the intake on Owens River to the city limits of Los Angeles. The irrigation aqueducts of the Incas and of ancient Peru, one of which was 350 miles long, are among the wonders of the world, especially so when it is considered that they were constructed by a people untrained in modern engineering science and its methods, but these probably exhausted centuries of time. The 350 miles of iron pipe line, 30 inches in diameter, which conveys water across the arid plains of western Australia to the gold mining districts of Kalgoorlie and Coolgardie, is one of the triumphs of modern constructive hydraulic engineering; but this construction, though in a hot and waterless country, was comparatively level, while the Los Angeles aqueduct forces through narrow valleys on pillars of solid rock, crosses in others, and is as far greater in dimensions than the notable Australian structure.

The great Alaskan aqueduct to supply the city of New York, now under construction, is the only one of the

same enterprise intended mainly for domestic and industrial use, that crosses fairly with the Los Angeles aqueduct. The New York aqueduct crosses the Hudson over a thousand feet beneath the river bed, and it will supply the metropolis with 500,000,000 gallons daily at a cost, including its reservoirs, of about \$165,000,000. The Los Angeles aqueduct has not more than half the capacity, it is more than twice as long, crosses through an incomparably rougher country, and its cost, when completed, will be less than one-fifth that of the great New York enterprise.—Scientific American.

TO ADVERTISE FOR HIGHWAY BIDS.

The California State Highway Commission, at a meeting in its San Francisco offices Wednesday, decided to notify the Boards of Supervisors of Tulare and Kings counties that it is prepared to advertise for bids for the construction of the Visalia-Hanford section of the State highway as soon as the counties will guarantee the rights of way of the necessary bridges.

The highway between Visalia and Hanford is really two lateral sections of the main trunk, one from Visalia to a point on the State highway near Goshute, and the other from Hanford to the same intersection of the main road. Altogether it is nineteen miles long, and will cost, according to State Engineer Fletcher's estimates, \$200,000.

ALASKA'S MINERAL WEALTH.

The United States Geological Survey has recently published a report on the mining industry in Alaska in 1912. Alfred H. Brooks. The bulletin—No. 712-A—is one of a series published annually, treating of the progress of mining in Alaska and summarizing the results achieved during the year in the investigation of the mineral resources of the Territory.

ANTHRACITE MINES LARGE PRODUCERS.

The number of anthracite coal mines in Pennsylvania in 1912 was 275, according to E. W. Parker, of the United States Geological Survey, and the average output of each was 289,456 tons. The number of bituminous mines was 1,747, and their average production was 28,184 tons. The average production from each anthracite mine is therefore nearly four times that from the bituminous mines.

COALS TO NEWCASTLE.

Though crude oil and gasoline are being largely substituted for coal as a source of power in Seward Peninsula, Alaska, 16,465 tons of coal were shipped in 1912. In spite of Alaska's coal resources, not over 200 tons of coal are mined in the entire Territory in Alaska is sadly in need of a coal law allowing her to mine or own coal under adequate terms.

TO HOLD ROAD ELECTION.

ESOM (Sacramento Co.) Nov. 18.—The Trustees of the Esom School will soon take steps to hold the calling of an election to elect trustees for the purpose of building

a new school house.

The six rooms of the school are at present located in three different buildings, one of which is two blocks from the school grounds proper. County Superintendent O'Neil is having plans drawn for a school house to contain eight rooms in addition to an assembly room. The building will cost \$15,000.

GENERAL CONTRACTORS ASSOCIATION.

Please take notice that the next regular meeting of the stockholders of the General Contractors Association will be held in the meeting room of the headquarters, 110 Jessie Street, San Francisco, California, on Thursday evening, November 13th, 1913, at the hour of 8 o'clock P. M.
CHAS. W. GOMPERTZ, President.

W. M. E. HAGUE, Secretary.
Monthly financial statement. Monthly work report. Important Committee Reports. Please make a special effort to be present.

NICKEL A BY-PRODUCT.

There are no producing nickel mines in the United States. The output of nickel from domestic ores is merely a by-product from electrolytes of the copper refineries. Salts and metal equivalent to 325 short tons of metallic nickel were saved in domestic refineries in 1912 from both foreign and domestic ores. Nickel ore "imported for consumption," is mostly from the Canadian deposits.

CRESOTE AS A PRESERVATIVE OF TELEGRAPH POLES.

It is estimated by the Canadian authorities that every year some 600,000 telegraph and telephone poles have to be replaced because of their decay. Untreated red cedar poles last for 10 years, if the creosote is put on by the brush, they last 13 years; if they are tank-dipped they last 20 years. White cedar has a life respectively of 14, 17 and 22 years, according to the treatment, and yellow pine, 13, 15 and 20 years. It is estimated that creosote treatment would save upward of 260,000 poles per year.

F. S. LOOP PASSED AWAY.

The many friends of Sumner Loop will be surprised to learn that he passed away last Saturday night. The funeral ceremony will be held at his late residence, 1275 Caroline street, Alameda, today at two o'clock.

Mr. Loop has been identified with the lumber business for the past twenty-five years. He was president of the Loop Lumber Co. at the time of his death.

FOREIGN TRADE OPPORTUNITIES.

[Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to the number.]

CORRESPONDENCE WITH CONSULS.

The suggestion is made that all communications to consular officers be addressed—

The American Consul,
A. —, —, —, —.

the name of the officer not being given. Any communication so addressed will be opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name, it might be forwarded to him unopened, should he be absent, and delay would thus result.

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 11908. Press for making cement bricks and blocks.—An inquiry has been received at an American consulate for a machine for making pressed cement bricks and blocks. There is a demand for cement slabs for flagging purposes, and six firms of contractors were interviewed, three of which expressed a willingness to hear from American manufacturers of such machines with regard to an agency. In the opinion of these firms, an agent should circulate the trade with catalogues and full particulars, and as soon as this is done a traveler should cover the ground so advertised. The names of the firms referred to can be obtained from the Bureau of Foreign and Domestic Commerce.

No. 11909. Agricultural machinery and rural articles.—Several business men in a South American country are contemplating the establishment of an importing house. An American consular officer writes that agricultural machinery and rural articles will be the chief goods they will wish to import, and they would like to communicate with houses in the United States interested in the exportation of such products.

No. 11911. Barrel staves.—An American consul in a Mediterranean country reports that a business firm in his district desires to be placed in communication with American shippers of staves to be used in the manufacture of potato barrels. Correspondence may be in English. Prices should be quoted c. i. f. point of destination.

No. 11911. Oak for office furniture.—A business firm in a European country dealing in office furniture requests an American consular officer to furnish the names of American exporters of oak wood, as the firm desires to work up this wood into office furniture. Correspondence should be direct with the firm in question.

No. 11917. Steel lockers.—An American consular officer in the Far East desires illustrated catalogues, prices, etc., for steel lockers particularly designed for a golf club. These lockers must be especially adapted for use in the Tropics.

No. 12957. Pumps, etc.—Tenders are invited by the Hastings Borough Council for the supply and erection of two sets of high-lift turbo pumps and electric motors, together with suction and delivery piping, etc. Tenders will be received by the Town Clerk, Hastings, New Zealand, until December 18. As the time is limited, this information will probably be of use only to firms having agents in New Zealand who can be instructed by cable.

No. 11936. Machinery for dredging plant.—An American consul reports that a member of a foreign legislature is about to proceed on a tour of the world and will be in New York about

March, 1914. This person is said to be a leading spirit in the political and commercial life of the country in question; he also has extensive interests in the Philippine Islands and his visit to the United States is primarily for the purpose of acquiring machinery to the value of several hundred thousand dollars, to be added to an important dredging plant now in operation.

No. 11932. Motor revenue cutter.—An American diplomatic officer has forwarded a copy of specifications embodying the plan of construction of a revenue cutter for open-sea service best adapted to conditions on the coast of a foreign country. Bids will be received until November 24. The Government will pay cash for the boat. Interested boat builders can obtain a copy of these specifications from the Bureau of Foreign and Domestic Commerce.

No. 11935. Bolts and nuts.—An American consul in the United Kingdom reports that a local firm of manufacturers is desirous of getting into communication with firms exporting bolts and nuts. The firm as present is handling the following goods: Engineers' best bolts and nuts, shipbuilders' and colliery bolts, plow and lurdie bolts, set screws, hand and machine forged nuts, fishbolts, nails, rivets, washers, best bright bolts, coach screws, retort bolts, etc. American manufacturers are requested to send full particulars of their products.

No. 11936. Lanterns.—Tenders are invited by the corporation of Calcutta, India, for 3,000 one-light copper street lanterns, constructed from strong copper sheets throughout. They must be insect and dust proof, 21 ounces best quality English glass, porcelain reflectors, and painted complete, with scroll irons, without ladder bar. These lanterns must be of suitable size for single incandescent gas burner (inverted or upright pattern), consuming about 3½ to 4 cubic feet per hour. Separate prices should be quoted for the scroll irons, also for brass fittings with unions complete to take the Mansfield patent inverted incandescent gas burner. Tenders must include cases and packing; also delivery free of all charges at the corporation lighting stores. Communications should be addressed to the Secretary, Municipal Office, Calcutta.

No. 11939. Electric motor, etc.—Tenders are invited by the Victorian Railway Commissioners until December 3 for supplying a 60-horsepower electric motor and accessories, also 25 steel blooms for piston rods for engines. Tenders should be addressed to the Secretary, Victorian Railway Offices, Spencer Street, Melbourne, Australia, from whom specifications may be obtained. Local representation is necessary.

No. 11947. Office furniture.—The Director of Public Instruction in a foreign country desires offers from American manufacturers of filing cases, desks, cabinets, and other office furniture, a supply of which is needed to fit up a new office of his department. Literature and correspondence should be in French, if possible. An American consul suggests that if American firms will state to the official that the consul may be able to explain catalogues to this official some influence may be used in their behalf.

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

CALL Douglas 2944

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires
Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London
The Ritz, London

The Hyde Park, London
The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelrys with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

"KINNEAR" STEEL ROLLING DOORS & SHUTTERS

KINNEAR STEEL ROLLING DOORS are designed to afford fire protection and for the closure of all openings in which ease and speed of operation and economy of space are considerations. They are adaptable to all classes of new or old building construction and by their use make possible the closing of very large openings which could not otherwise be conveniently covered.

In addition to the above uses, their extensive employment for fire protection and the high degree of efficiency shown by them in actual fires, has caused the KINNEAR Company to produce a shutter of a distinctly fire retardant character. With this end in view, numerous tests extending over a period of five years were made, and effects carefully noted. As a result, we are now in a position to offer for special fire protective purposes KINNEAR Steel Rolling Doors and Shutters of the "Abacus" Construction, all of which bear the label of the "National Board of Fire Underwriters' Laboratories."

Special Catalogue showing Abacus Construction can be obtained on application.

Recent great conflagrations have fully vindicated the claim of the "KINNEAR" STEEL ROLLING DOOR to pre-eminence as a fire-stop. Placed side by side with various other forms of fire retardants it has in every case remained in place even after the others were destroyed.

We will consider ourselves favored if allowed to explain and make quotations on any constructions meeting your definite needs.

**We have just received from the press a new Handbook on Steel Rolling Doors and Shutters Illustrated only with California Installations.

Editorial Comment.

The announcement is made that the Tivoli will be turned into a moving picture theatre at the end of the Grand Opera Season, which closes at the end of this week. This is certainly a commentary upon the change of taste that the theatre going public has undergone. The old Tivoli has a world-wide reputation as the home of music. The old favorites of the comic opera, the old stars of the grand opera are now traditions of the past. Vaudeville and moving pictures have crowded the old melodies from the music hall and the mechanical piano and the tango dances draw the dollars to the vaudeville and the movie show.

The new Tivoli opera house is a splendid show house. Its arrangement of foyer and balconies, its mellow lighting effect, its tasteful decoration all combine to put one in a pleasant frame of mind for an evening's entertainment. Manager Leahy has always put on a creditable show. The comic opera company he assembled was a good representative of the standards of the old show house. The standard light operas of the world were given—works of art that left a pleasant memory for days to come. And the present grand opera company has been giving to its patrons artistic productions at a price that could hardly be equalled anywhere else in the world.

People will support a musical hodge podge like the show at the Gaiety Theatre. They will go to a New York musical comedy and pay two dollars a seat to hear a tum tum comedy and an aggregation of singers that do not have a single voice. They will block the streets for two hundred yards waiting to get in to see a vaudeville show, the majority of whose acts are so absolutely rotten and silly that one wonders how any body with a thimble full of brains has the gall to put them on the stage.

And yet the Tivoli with its splendid show house, with its capable company, and its competent orchestra can not put on such operas as the *Serenade*, *The Bohemian Girl*, and *Robin Hood* and get an audience at from twenty-five to seventy-five cents a seat.

One can not control the public taste. 'Tis true 'tis pity, and pity 'tis 'tis true.' The critics on the yellow journals tell us that the primary function of the theatre is to entertain and that the public is the best judge as to what furnishes it entertainment. On this theory problem plays are put on that have no excuse under heaven for their existence except that they attract the morbid and swell the tax office receipts. The drama of the underworld is enacted for the same reason.

And it seems that the present generation of theatre goers are so taken up with these nondescript productions that real works of art no longer find a living patronage. The Tivoli will close its doors and light opera will be heard about as often as in a country town.

Telegraphic reports state that the Marconi telegraph station at Nova Scotia has succeeded in telephoning across the Atlantic by means of the wireless instruments. This is altogether probable as wireless telephony has been an accomplished fact for a number of years. The Poulsen system of wireless transmission has used the telephone with facility when needed. The only thing about it is that it is not feasible as a business proposition as it furnishes no means of secret communication. Talking across the Atlantic without visible or tangible means of communication is an accomplishment however. And the wireless telephone will be of advantage to ships at sea and to the coast wise trade particularly.

President E. P. Ripley of the Santa Fe Railroad paid five cents each for peaches in Kansas City and saw equally good peaches being fed to pigs in Colorado. Being a great railroad president Mr. Ripley is to institute a special car service that will connect the marketless peaches with the peachless market.

The same enterprise that private industries show might be shown publicly. The transportation of good wagon roads would avoid everywhere the similar experience of farm and orchard products rotting some seasons and glutting the markets at others.

The New York Sun is quoted as saying that one of our highest military authorities at Washington has said that intervention in Mexico to be effective would require an army of 500,000 men and would cost one million dollars a day for two years. Certainly it would be a great expense and it would require a great army to be effective.

Many persons have wondered why the Administration has not allowed arms to be shipped from this country to aid the constitutionalists under Carranza. It is now known that my officers have opposed such action on the ground that if intervention ever became necessary those arms would be used against the Americans. In the meantime revolution thrives, nobody is sufficiently strong to establish order and general chaos reigns. All these considerations tend to complicate matters and the worthless Mexicans continue to kill each other off.

Automatic Sprinkler System As An Investment

By Alvin T. Conte.

In these days of fire prevention education it is getting to be more clearly regarded as an offense against the public welfare when property is lost by fire, and this is the correct point of view. When, in addition to satisfying this sense of moral duty, a financial return can be secured from the installation of fire apparatus, a most happy combination is presented.

Chief and foremost in all the applications for the protection of business property is the automatic sprinkler equipment and the minds of manufacturers in particular are turning toward this apparatus in increasing numbers. Plants are being thus equipped which but a few years ago were thought to be too small to render such an equipment advisable, or where mechanical and engineering difficulties have recently been removed. It is very desirable that manufacturers whose plants are not equipped should have some rule or plan by which they may determine for themselves in at least an approximate way, whether in their particular plants such an equipment is feasible, and it is in the hope of furnishing some such rule that this article is written.

Automatic sprinkler equipments compare naturally with such other apparatus as elevated gravity tanks, fire pumps, electrical supervisory alarms, steam connections and others, but fortunately not all of this apparatus is necessary to secure substantial benefit from the sprinkler equipment itself. Indeed it would seem that the cause of the prevention in many instances may have been hindered by having stress upon equipment so elaborate that it is at once put beyond the reach of hundreds of small manufacturers, who can ill afford to do without some protection as they are able to buy and maintain. In a general way it may be said that all of this accessory apparatus here mentioned is or the purpose of guaranteeing the efficiency of the sprinkler equipment in its hour of need, rather than of adding to it. A single source of water supply is sufficient, provided that supply is ample in quantity and always dependable.

A study of the cases of the loss in sprinkler equipped premises will demonstrate that in many of these plants were equipped with two or more sources of water supply, but that jointly or singly they were inadequate, that the equipment itself was improperly installed, or that a fire attacked the building from a source of undischarged gravity tank, or that as to put the equipment wholly or partially out of use before the tanks were melted.

There are two considerations which determine the success of a sprinkler equipment. First, the protection of the property and second, the reduction of the cost. These considerations should always be joint

in determining the matter. Each manufacturer knows in a general way what his destructible property is worth. He knows what percentage of this destructible value he is able to keep insured and what the cost of this insurance is. He knows, also, the amount of his operating profits and something of the business loss which would be incurred by the destruction of his plant. From 75 to 95 per cent of his insurance cost can be eliminated by the sprinkler equipment, and fully as much of the probability of fire loss obliterated. These, then, are the credit side of the considerations.

The cost of the equipment will, of course, vary according as it is elaborate or simple, has the water supply close at hand or distant, the buildings compact or scattered, and the expense and maintenance is high or low in a general way and subject to these variations. The inside equipment will cost from \$2.50 to \$4 per sprinkler head, while the cost of the outside connections and valves can be with considerable accuracy determined by the length of the mains and the number of valves required. In this calculation the mains connecting the water supply and equipment should not be less than 6-in., and the number of valves will be determined by the number and proximity of the buildings.

A sprinkler head is required for each 61-sq-ft. of ceiling or roof surface, including stairways, decks, mezzanine floors, etc. The same principal may be stated in this wise: A one-source equipment, including the mains and valves, will cost (subject to the varying conditions before mentioned) somewhere near 75 per square foot of ceiling or roof surface, while a two-source equipment, which includes elevated gravity tanks, will cost somewhere near 160 per square foot for the roof and floor surface. If these means of determining the equipment cost do not seem sufficiently accurate, manufacturers will always find the makers of sprinkler apparatus willing and ready to submit their own estimates from a sketch of the plant.

If a further analysis of the question is desired, it will be found that the highest percentage of return upon money invested is upon the internal equipment, with its single source of water supply. This is of special importance to veneer and wood-working plants of moderate money value, where a minimal water supply is available. The one thing which need be said the oftenest and loudest is that the small manufacturer should investigate the cost and result of the single-source equipment. If he wishes to add to this the elevated tank or pump, or other apparatus, after his saving in insurance cost has fully or to a considerable degree reimbursed him for the original outlay, he may, of course, do so.

The unfortunate fact remains, however, that hundreds of wood-working

plants which have been lost by fire, would be standing today if a single-source equipment had been installed in them, and such an equipment would have paid a sufficient return upon the investment, simply by way of reducing the insurance cost. It is further true that there are hundreds of such plants now unequipped whose owners could pay for the equipment, together with the interest on deferred payments, in a few years' time, out of the saving in insurance cost, leaving out of account altogether the larger consideration of protection to their property and business.

Naturally the query arises, What is the cost of maintenance after the equipment is in. Here, again, much depends upon the kind and extent of the equipment. The maintenance cost of a single equipment in wood-working plants is very small. If the buildings are not heated, and a dry system must in consequence be used, there is, of course, some expense in maintaining the necessary air pressure, although rather the cost of the apparatus and the upkeep is large. The cost of preventing water in elevated tanks from freezing, in cold climates, is probably the greatest single element of maintenance expense. This expense is determined largely by whether steam is always kept up regardless of the sprinkler apparatus, and whether additional fuel and firing are required to furnish steam for heating the water.

The factor of repairs and maintenance of the equipment itself is not considerable. Out of 100 inquiries addressed to manufacturers of many different classes, an average expense of 10 per cent for maintenance and deterioration was found, but a large majority of these manufacturers have two and three-source equipments, with fairly severe winters to contend with. The principal cause of deterioration is corroding acids or fumes, and where these are not present deterioration is almost negligible, as the upkeep will be relatively small.

Speaking directly to such wood-workers as veneer and panel planks, playing mills, furniture factories and allied trades, it may be said that, in a general way, where the annual premium paid amounts to \$500 or more upon a premium rate of 2 1/2 per cent or more, a one-source equipment can be profitably installed. It ought, in some manner, to be impressed upon every manufacturer that if a consideration of these statements convinces him that he could profitably install such an equipment in his own plant, he owes it as a duty to the public welfare to install it forthwith. The present fire loss ratio in the United States is a conspicuous and humiliating shame to every American, and constitutes a considerable element in our ability to successfully compete with the manufacturers of the world.

MUNICIPAL OWNERSHIP PROGRESSING — CALIFORNIA CITIES RAPIDLY TAKING OVER ALL UTILITIES.

By Edward P. E. Troy.

Each year more of the cities of California are operating public utilities. They have learned the lesson taught by the prosecution of the railroads in San Francisco. The chief result of the good work of Rudolph Souček and Francis J. Heney in those cases has been to make it plain to the source of municipal corruption is privilege. The control of public utilities by private persons is the cancer that is rotting American municipal life.

Over sixty-two cities in California have municipal water works. Many are generating electricity. Some purchase electricity wholesale and supply consumers from the water plants at a great saving. Santa Clara operates its gas, electric and water system under municipal management.

More than half of the cities are discussing municipal water. San Francisco voted for Hetch-Hetchy bonds of \$15,000,000 in 1909 for water and power, and Los Angeles is to issue more bonds to complete the great water and electric power system. The water and electric companies are being assisted by a corrupt press in both cities in their endeavors to prevent the building of these utilities.

Needley decided unanimously to take over and enlarge its water system. Newport Beach voted 138 in favor to 5 against water bonds. Oxford has commenced to operate its water plant. Glendora sold \$25,000 water bonds voted last August. Montegut voted 8 to 1 for water bonds. Red Bluff is to vote on water supply.

Burlingame has just commenced to operate its water works. Tulare has taken over and will extend its water system; total cost, \$100,000. Fullerton will vote on extensions, and Singer will hold a water election. In South Pasadena a campaign is on for water bonds. Davis is to take over its water works. San Diego has voted for \$1,000,000 bonds to develop and improve its water supply. In Colton a company offers to sell the water system to the town.

Avalon, on Catalina Island, will acquire all of its utilities—water, electric light, sewer and salt water system. Berkeley clubs urge municipal gas, electric light, water and street railways. Fullerton will build a municipal gas system.

The Water District law enabled Richmond and the adjoining territory to secure a permanent water supply. In Alameda County, Watsonville, Township, and Oakland and its surrounding cities are considering similar action.

The good example of San Francisco operating its Ferry Street Municipal Railway for nearly a year and with signal success, has caused the cities on the other side of the Bay. In Alameda and Contra Costa counties, where the Oakland Traction Company is operating, to take steps under the District law to acquire the property of that company, as well as the Key Route Ferry system. In Los Angeles, corrupt influences have been endeavoring for more than two years to prevent the building of a municipal electric railway to its harbor.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such firms all classified and grouped under proper headings, commencing on this page. These same firms are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architects, Roussau and Bessard. Monahuck Bldg., S. F. Owner's name withheld. The building will be erected on a portion of the property at the southwest corner of Latkin and Green, which streets and has been designed for 12 apartments of two and three rooms. Interiors will be finished in pine with some elm panels and hardwood floors. All suites will have wall beds and private bath rooms. There will be steam heat and hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$125,000. Architect, William H. Crim Jr., 125 Kearny street, S. F. Owner, R. A. Crothers, Bulletin office, S. F. The building will be erected on 20th avenue and has been designed to contain six suites of four rooms and bath each. Interior finish will be of pine with some elm panels in the dining rooms. All suites will have private baths and entrances. There will be steam heat and a hot water system. Bath rooms will have the floors and wainscot. Tile and marble will also be used in the entrance. Exterior of the building will be covered with rustic and shiplap with a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

SAN FRANCISCO—Apartment house, 3 story and base, Class C construction, \$25,000. Architects, O'Brien and Wessner, Foxcroft Bldg., S. F. Owners, Talbot Investment Co. This building will be erected on the south side of Mission street 375 feet west of Seventh street and will cover a large area. The first floor will be arranged for stores and upper floors for apartments of two and three rooms. Interior finish will be of pine throughout. All suites will have private baths and wall beds. There will be steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts and sidewalk elevators. Exterior of the building will be faced with pressed brick. Plans are complete and ready for figures.

SAN FRANCISCO—Apartment house, 3 story and base, brick and steel, cost not stated. Architect, Mattanovich, David Hewes Bldg., S. F. Owners, Luchman Bros. The building is being designed for stores on the first floor and a number of two and three room suites on the upper floors. A lot with a frontage of 50 feet on Mission street and a depth of 105 feet is to be improved. Interior of the apartments will be finished in pine. Plans provide for steam heat and a hot water system. All suites will have wall beds and private baths. There will be patent store fronts and a marble base. Exterior of the building will be faced with pressed brick. Plans are nearly complete and the work

is to be awarded to Contractors Beach & Hoffmann, David Hewes Bldg., on percentage basis.

OAKLAND, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Hutchinson Bros., 101 13th street, Oakland. Owner's name withheld. The building will be erected on 21st street and has been arranged to contain six suites of three rooms and bath each. Interior finish will be of pine throughout. There will be a hot water system and steam heat. Bath rooms will have tile wainscot. All suites will be equipped with wall beds and will have private baths. Entrance will be finished in tile. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architect, L. L. Jones, 1 W. Hellman Bldg., L. A. Owner's name withheld. The building will be erected on West Pico street near Harvard covering an area of 45 by 100 feet. There will be two stores on the first floor and a total of 46 rooms arranged for two and three room suites on the upper floors. Interior finish will be of pine and redwood. All suites will have wall beds and private bath rooms. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat and a hot water system. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are being prepared.

PORTLAND, ORE.—Apartment house, 3 story and base, reinforced concrete, \$20,000. Architect, W. H. Downing, Longdon Bldg., Portland. Owner's name withheld for the present. The building will be erected on a corner in the downtown district and when complete will be the largest and most modern apartment house structure in Portland. Preliminary plans only have been prepared but these show a building with a total of over 125 suites of two and three rooms. All apartments will have private baths and wall beds. Provision has been made for a swimming tank, Turkish bath, parlors, amusement rooms and a large ball room. Construction will be fire proof with exterior walls of reinforced concrete, concrete floors and roof. Interior partitions will be of metal lath and plaster. Exterior of the building will be faced with cement blocks. All reinforced concrete work will be in the hands of Hartman and Wals. Further mention will be made of the work as plans progress.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO—Harbor work, docks, truckage, etc. Cost not stated. Engineer, Asst. State Engineer, Ferry Bldg., S. F. Owners, State of California. Work approved by the State Board of Harbor Commissioners, plans of which are complete, include the construction of pier No. 35 at the foot of Bay street, pier No. 37 at the foot

of Kearny street, piers Nos. 25 and 27, both north of the Ferry Building will be enlarged and provided with spur tracks and two new piers Nos. 6 and 8 will be constructed at the foot of Howard street south of the Ferry Building. Each of the new piers will be 200 feet wide and 250 feet in length, costing in the neighborhood of \$250,000. Piers south of the Ferry Building will each be 600 feet long and 140 feet wide and will have spur tracks. Construction will be of cross-tied timber piles in place of the reinforced concrete piles used on several of the recently constructed piers. Bids will be called for as soon as the \$4,500,000 worth of bonds can be sold. These bonds were placed on sale in Sacramento yesterday.

SEATTLE, WASH.—Tunnel and shafts in connection with harbor project, \$300,000. Engineer, City Engineer. Plans have been completed for the construction of a 900 foot tunnel under Lake Union and for two shafts each 150 feet deep. Concrete lining will be used. Bids for this work will be called for at once. Full particulars can be secured from the City Engineer at Seattle.

LOS ANGELES, CAL.—Structural steel for Municipal dock No. 1. Cost not stated. Engineer, City Engineer. Los Angeles. Owners, City of Los Angeles. W. B. Kyle of San Francisco was lowest bidder at \$89,975 for the construction of steel work for a shed on Municipal Dock No. 1, Los Angeles Harbor. Additions or deductions to be made at the rate of 3.15c per lb. Other bids were Llewellyn Iron Works, \$94,991, 24c per lb., additions or deductions; Security Construction Co., \$97,692, 3.43c per lb.; Western Boiler & Steel Co., \$100,043, 3.1-3c per lb.; Baker Iron Works, \$103,000; Russell-Greene-Foell Co., \$104,190; Mesmer Iron \$109,470; Milwaukee Bridge Co., \$110,386; Snavely & Trust Co. \$124,980.

VANCOUVER, B. C.—Viaducts and retaining walls, reinforced concrete construction, \$450,000. Engineer, City Engineer. F. L. Fellows, Vancouver. Owners, City of Vancouver. Plans have been practically completed by the City Engineer, F. L. Fellows, for the construction of the four concrete viaducts in the east end of the city at a cost of \$450,000. The bridges will span the Great Northern Ry. Co.'s tracks and will be of concrete and steel construction, averaging about 500 ft. long and 160 feet wide. Considerable concrete retaining walls are called for. Figures will be called for shortly.

—CHURCHES—

SEATTLE, WASH.—Church, 2 story and base, reinforced concrete, \$45,000. Architect, J. A. Cronizer, New York Bldg. Seattle. The building will be erected at the northwest corner of Roy street and Broadway and has been designed in the classic style. The main auditorium will have a seating capacity of 750 people. Besides this room there will be Sunday School rooms, social parlors and a boy's study. Plans provide for a central heating system, probably steam, vacuum cleaning and other modern conveniences. Interior will be finished in pine and ornamental plaster. Exterior will be faced with cement plaster. Bids will be called for on the foundation work within a short

time. Balance of the structure will be erected later.

Contracts Awarded.

SAN FRANCISCO—Church, 2 story and base, Class A construction, \$160,000. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, First Congregational Church of San Francisco. Contractors, Stockholm and Allyn, Monadnock Bldg., S. F. general construction only. Contract price not stated.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse, 3 story and base, reinforced concrete. Cost not stated. Architect, Henry Gillfuss, 46 Kearny st., S. F. Owner's name withheld. The building will be erected on property at the corner of Bryant and 16th streets. The building will cover an area of 75 by 100 feet. Construction will be of the heavy mill type with reinforced concrete walls and concrete floors. Interior finish will be of pine. There will be special elevator equipment and an automatic sprinkler system. Exterior of the building will be faced with cement plaster. Plans call for fire doors and metal window sash and frames. Plans are being prepared.

SAN FRANCISCO—Warehouse, 2 story and base, brick and steel, \$20,000. Architect, Charles J. Rousseau, 46 Kearny street. Owner's name withheld. The building will be erected on Harrison near 6th street covering an area of 80 by 100 feet. Construction will be of the mill type. Plans provide for fireproof doors, metal window sash and frames and elevator service and spiral chutes. A concrete floor will be used on the first floor. Interior will be finished in pine. Exterior of the building will be faced with stock, tapestry brick and tile. Plans are being prepared and figures will be called for shortly.

LOS ANGELES, CAL.—Warehouse addition, 3 story and base, Class A. Cost not stated. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Lyon Fireproof Storage Co. This work will consist of a three story addition to the present four story Class A building. The structure covers an area of 50 by 145 feet. A new passenger elevator will be installed and the present freight elevator will be extended into the new portion of the building. Interior partitions will be of metal bath and plaster. Interior finish will be of pine. There will be metal window sash and frames and fireproof doors. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

PORTLAND, ORE.—Factory alterations, 4 story and base, brick, \$25,000. Architect, Ernest Kroner, Worcester Bldg., Portland. Owners, Frye and Co. This work will consist of reconstructing the present building and constructing additional buildings for smoke houses, coolers, etc. All construction will be of brick and steel. Interior finish will be of pine 1 roughed. There will be metal window sash and frames and fireproof doors. Exterior of the building will be faced with pressed brick. A large amount of special machinery will be required. Plans are nearly complete and figures will be called for by the architect within a week or ten days.

PORTLAND, ORE.—Steel plant, 2 story and base, concrete and frame

construction, \$40,000. Engineers, Engineering Department, Northwest Steel Co., Portland. The building will cover an area of 580 by 59 feet, giving the main portion of the building a floor area of 57,900 square feet. No interior finish will be used. There will be a cement floor and metal window sash and frames. Special machinery will be required. Exterior of the building will be faced with corrugated iron. Plans are complete and the work will be carried on under the direction of W. H. Cullers, Chief Engineer of the company.

SAN FRANCISCO—Warehouses, 2 story and base, reinforced concrete. Cost not stated. Architect, Constructing Quartermaster's Department, Fort Mason. Owners, United States Government. Bids opened for this work on November 22 show M. Fisher low on both buildings at \$133,582. Twenty-six figures were submitted. A complete list of all bids will be found under the heading of San Francisco in this issue.

Contracts Awarded.

SEATTLE, WASH.—Warehouse, 2 story and base, brick and steel, \$30,000. Architect, I. S. Harding, 1507 Harvard ave., Seattle. Owners, O. L. Willets Co. Contractor, J. S. Harding, 1507 Harvard ave., Seattle. Contract price, \$30,000.

LOS ANGELES, CAL.—Cold storage addition, 3 story addition, brick construction, \$25,000. Architect, John E. Kunst, Higgins Bldg., L. A. Owners, Mathie Brewing Co. Contractor, M. Stepan, 1942 South Los Angeles street, L. A. Contract price, \$25,000.

FIRE HOUSES.

OAKLAND, CAL.—Jail work and plumbing. Cost not stated. Architects, Palmer, Hornbostel and Jones, New York City, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened for jail equipment for the new city jail show M. G. West low on all propositions submitted for equipment. J. Looney Co. submitted the only figure for plumbing. A complete list of all figures appears under the heading of Oakland and Alameda County in this issue.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame. Cost not stated. Architects, Rousseau and Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on a portion of the lot at the southwest corner of Larkin and Greenwich streets. There will be two modern flats of five and six rooms. Interiors will be finished in pine, redwood and some elm panels. Bath rooms will have tile wainscot and composition floors. Open fire places will be used in the living rooms. Mantels will be of tile and brick. Basement will be used for a garage. Exterior of the building will be covered with shiplap and rustle. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Second avenue near Fulton and has been designed to contain two large residential flats. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors

will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared.

SAN FRANCISCO—Flats, 2 2-story and base, frame, \$5,000 each. Architects, none. Owner, C. A. Rushton, 714 9th avenue. These buildings will be erected on the west side of 9th avenue south of Cabrillo and each house has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine and redwood. Hardwood veneer will be used in the living and dining rooms. Oak floors will be used in the principal rooms. There will be large open fire places and tile or brick mantels in the living rooms. Bath rooms will have tile wainscot and sanitary floors. Automatic water heaters will be specified. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by day labor.

SAN FRANCISCO—Flats, 2 story and base, frame. Cost not stated. Architects, Henry Griffluss and Son, 45 Kearny street, S. F. Owner's name withheld. The building will be erected on a portion of the property at the corner of Bryant and 16th streets and will have a frontage of 25 feet by a depth of 58 feet. The first floor will be arranged for stores and upper floors for flats and a rooming house. Interior finish will be of pine and redwood. There will be an automatic water heater and open fire place. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster and shiplap. Plans are being prepared.

SAN FRANCISCO—Flat alterations, 2 story and base, frame, \$5,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. This work will consist of raising the present building and constructing a story underneath. The first floor will be used for a saloon. Upper floors will contain modern four and five room flats. Interior finish will be of pine throughout. New interior finish, plumbing, electric work and plastering is specified. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once. The building is located at the southeast corner of Geary and Masonic avenue, opposite the new baseball park.

OAKLAND, CAL.—Flats, 2-story and base, frame. Cost not stated. Architects, Hutchinson Bros., 479 4th street, Oakland. Owner's name withheld. The building will be erected in Oak Park Tract and has been designed to contain two flats of five and six rooms. Interior finish will be of pine throughout. There will be open fire places in the living rooms. Mantels will be of brick and tile. Automatic water heaters will be installed. Tile wainscot will be used in the bath rooms and kitchens. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Flats, 2 story and base, frame, \$8,000. Architects, Eugene Mathewson, Forsyth Bldg., Fresno. Owner, Fred Teger

The building will be erected on J street and will cover an area of 50 by 61 feet. Interior has been arranged for four flats of four and five rooms. Pine, redwood and elm panels will be used for finish. Oak floors will be used in the living and dining rooms. There will be a central heating system and open fire places. Mantels will be of tile. Tile wainscot will be used in the bath rooms and kitchens. An automatic water heater will be installed in each of the flats. Exterior of the building will be covered with rustic and cement plaster on metal lath. Disappearing beds are specified. Plans are being prepared.

GARAGES.

SAN FRANCISCO—Garage, 1 and 2 story and base, reinforced concrete, \$50,000. Architect, O. R. Thayer, Merchants National Bank Bldg., S. F. Owner, B. Davidson. This work has been mentioned here before when plans were first started. The owner has secured additional property and has had plans revised for a much larger building. The structure will be erected at the corner of Pacific and Van Ness avenues and will be practically fireproof. Interior will be finished in pine, hardwoods and tile. There will be a cement first floor, metal window sash and frames and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans provide for patent store fronts and plate glass windows. Plans are complete and figures are being taken.

CORONADO BEACH, SAN DIEGO CO., CAL.—Garage, 1 story and base, brick and steel, \$30,000. Architect, E. Ervast, Spreckels Bldg., San Diego. Owners, Coronado Hotel. The building will be erected on the hotel grounds and will cover an area of 85 by 200 feet. A concrete floor and foundations, brick walls and steel roof trusses will be used. Exterior walls will be faced with pressed brick. Special gasoline storage tanks are specified. Interior will be finished in pine. There will be metal window sash and frames. Plans are complete and the work is being done by Day Labor.

GOVERNMENT WORK AND SUPPLIES.

Imatilla Project Approved

The secretary of the interior has approved the construction of the sixth unit of the Imatilla irrigation project, Oregon, known as the west extension and embracing 10,000 acres of land. The secretary's approval covers an allotment of \$800,000 for the work.

The Imatilla project embraces some of the most valuable fruit and truck land in the west, and the development already shown on the area under irrigation on the east side predicated a very substantial increase in the population and taxable wealth of the state as soon as the west's lands are brought under cultivation.

The allotment just made makes the government upon a work which will call for a total investment of nearly \$1,000,000 and will provide for the reclamation of nearly 100,000 acres now almost wholly desert and unproductive.

Oregon is one of the largest contributors to the reclamation fund and Secretary Lane has been influenced for

the reason and also because of the doubtful merit of the project to direct the immediate taking up of construction.

Fort McDowell, Turbine.

The bid of Davis-Rogers Co., of San Francisco, Cal., \$44.95 in amount, has been accepted for installing salt water turbine, motor-driven pump and connections at Fort McDowell, Cal.

San Francisco, Cal., Furniture.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing furniture in the U. S. post office and court house, San Francisco, Cal.:

Leuck & Hill, Richmond, Ind., \$1,998.50; 100 days.
Commercial Cabinet Co., Chicago, Ill., \$1,253; 40 days.
Wollacker Mfg. Co., Milwaukee, Wis., \$1,680; 75 days.
Jacob Beitzel & Son, York, Pa., \$2,256; 100 days.
Original Cabinet Co., Evanston, Ill., \$2,391; 80 days.
John Sjostrom, Philadelphia, Pa., \$1,800; 120 days.

Pasadena, Cal., Plaster Models.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for furnishing plaster models for the U. S. post office at Pasadena, Cal.:

J. Brys & F. Bruyninck Co. (Inc.), Washington, D. C., \$1,400.
Emil Jung, Washington, D. C., \$2,171.
Lombard & Ludwig (Inc.), Washington, D. C., \$2,259.
Ernest C. Bairstow, Washington, D. C., \$2,355.

Porcelain Insulators.

The following bids were received by the U. S. reclamation service, Los Angeles, Cal., for furnishing 300 porcelain insulators for the Salt river project, Arizona:

National Insulator Co. of Pittsburgh, Pa., \$23.40 for own make, No. 11011; dry test 40,000, rain test 25,000 volts; alternate proposition, \$38.40 an own make, No. 31311; dry test 40,000 rain test 30,000 volts.

Pierson-Roeding Co., Los Angeles, Cal., \$3 on Locke, No. 296; dry test 40,000, rain test 25,000 volts; deliveries, 7 days; shipping point, New York; alternate proposition, \$40.50 for immediate delivery from stock in San Francisco for the same period.

Power Contract Approved.

The Reclamation Service has accepted the offer of the Grand Junction Mining Company to furnish the power needed during construction of the Grand River division dam and tunnel No. 3, units of the Grand Valley irrigation project, Colo. Under the terms of the contract to be entered into the government will pay approximately \$36,418 for power service an amount considerably less than the cost of installing a new plant.

Mare Island, Addition to Kitchen.

The bid of R. S. K. MacMillan Tacoma, Wash., \$3,014 in amount, has been accepted for constructing an addition to the kitchen at the mining barracks, Mare Island, Cal.

Sacramento, Cal., Shelving.

The contract for the installation of shelving in the U. S. post office at Sacramento, Cal., has been awarded to the California Planing Mills at \$665.

Pearl Harbor, Generator Set.

The following bids were received by the chief, bureau of yards and docks, Navy Department, Washington, D. C., for one 199-kilowatt motor generator set and switchboard accessories for the U. S. naval station, Pearl Harbor, H. T.:

Item 1, price for motor generator set and accessories, complete; 2, in accordance with the spirit of the specification, but with such modifications as may be desired by bidders.

Western Electric Co., 462 West street, New York City, item 1, \$3,300.

Westinghouse Electric & Mfg. Co., Washington, D. C., item 1, \$2,986; 2, \$3,156.

General Electric Co., Schenectady, N. Y., item 1, \$2,896; 2, \$2,705.

Ridgeway Dynamo & Engine Co., Washington, D. C., item 1, \$2,749.

Sun River Irrigation Project.

The completion of the excavation for the foundation of Sun River diversion dam marks an important step in the construction of the Sun River irrigation project, Mont., one of the largest projects so far undertaken by the Reclamation Service.

The dam site is in the narrow rock gorge, through which Sun River flows, about 72 miles west from Great Falls. In excavating for the foundation the engineers encountered conditions similar to those in the Shoshone Canyon, in northern Wyoming, where the Shoshone dam was constructed by the service a few years ago. Huge boulders had ground great holes deep in the rocky bed, and the drills went down 70 feet before finding the solid foundation rock.

So narrow is the canyon that it is estimated one thousand cubic yards of masonry will bring the dam to an elevation well above the normal low-water level. This work will be performed immediately. The structure will have a height of 128 feet and a length along its curved crest of 260 feet, but its length at water level will be only about 18 feet. Water stored in the mountains will be allowed to run down Sun River to this diversion dam when needed for irrigation, where it will be so diverted into the supply canal for Piskun reservoir and later to supply a canal for the Willow Creek Reservoir, which now stores the normal flow of Willow and Little Willow Creeks for the Fort Shaw unit. The machinery used in constructing this dam will all be actuated by electric power.

Failure of Submarine Boat Huller.

The Navy Department has been informed of the inability of the Lake Torpedo Boat Company to complete its government contracts on five submarines, which that concern has under construction or on which the firm is about to begin work. Difficulty in negotiating for the necessary finances is given as the reason for the abandonment of the contracts. There is a proposition to reorganize the company. The Lake Company has well under way submarines G-2 and G-3. At last accounts the former boat was 85.3 per cent completed and the latter boat 72 per cent completed. It will evidently

be necessary for the Navy Department, as is usual in such cases, to take over this work and finish these boats. These boats are under construction at Bridgeport, Conn. The firm also recently received contracts from the Navy Department for the construction of submarines L-5, L-6, and L-7, the first named to be built at Bridgeport and the others at Long Beach, Cal. No work has been done on these vessels, but on L-5 a little more than 7 per cent of material has been ordered and delivered. It is the hope of the Lake Company to have the Navy Department recall the contracts, and this may be done in view of the fact that the government could not be expected to undertake the construction of the boats on which no work had been done by the contractor. Of course, if the next lowest bid received on these boats were accepted the difference in cost would have to be charged to the account of the Lake Company. Bids for the four submarines authorized at the last session of Congress will be opened within a month, and it is expected there will be two or three bidders, notwithstanding the withdrawal of the Lake Company from the field of competition.

Y. & D., Pending Projects.

The following projects, bids for which were opened on dates indicated below, are pending in the office of the chief of the bureau of yards and docks:

Sept. 6, Puget Sound, reconstructing and fireproofing building 39.

Oct. 11, Refrigerating equipments for naval hospitals.

Oct. 18, ice-making and cold-storage plant at Pearl Harbor.

Nov. 1, structural steel for cooling plant at Pearl Harbor.

Nov. 1, building for ice-making and cold-storage plant, Pearl Harbor.

Nov. 8, motor generator set, etc., for Pearl Harbor.

Trial of Steel Couplings for Dredge Pipe Lines.

Trial will be made of a metal coupling for use on the pipe lines of the canal commission suction dredges, and if they meet the test the use of the present rubber sleeves will probably be discarded. The coupling is all steel, does away with clamps and attachments necessary to fasten the rubber sleeve to the pipe line, and it is claimed that after once installed, there will be practically no expense for maintenance. The rubber sleeves give trouble constantly, and their upkeep is a considerable item. The steel device is known as the Parker Universal coupling, and requisition has been made for six for use on 20-inch pipe.

HALLS AND SOCIETY BUILDINGS.

HANFORD, KINGS CO., CAL.—Lodge hall additions and alterations. Cost not stated. Architects, Swartz, Hotchkiss and Swartz, Rowell Bldg., Fresno. Owners, Elks' Hall Association of Hanford. The second floor of an adjoining building has been leased and will be altered into billiard room, card and smoking rooms. Partitions will be rearranged in the present building and doors will be cut through to the new portion. Interior of the old rooms will be decorated and refurnished. Plans are being prepared.

Contracts Awarded.

AUBURN, PLACER CO., CAL.—Club House, 2 story and base, reinforced concrete, \$11,500. Architect, Frank S. Holland, 100 Haight street, S. F. Owners, Tahoe Club. Contractors, Herdall Bros., Auburn. Contract price, \$11,500.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Club house, 2 story and base, brick and steel, \$32,000. Architect, J. Corblye Poole, Bothin Bldg., Santa Barbara. Owners, Neighborhood Housing Association. Contractor, Alfred Jensen, 1298 Chappala street, Santa Barbara. Contract price, \$32,000.

HOSPITALS.

LOS ANGELES, CAL.—Hospital, 3 story and base, Class A construction, \$50,000. Architects, Garrett and Farrell, Currier Bldg., L. A. Owners, French Hospital Association. The building will be erected at the corner of College and Castelar street and will have frontages of 38 and 120 feet. There will be 25 private rooms, operating rooms, 10 baths, and wards. Exterior walls will be of reinforced concrete as will be the floors and roof. Interior partitions will be of hollow tile. Tile floors and wainscoting will be used in the baths and operating rooms. Plans provide for steam heat and elevator service, a vacuum cleaning system and other modern conveniences. Exterior of the building will be faced with cement plaster. Plans are being prepared.

HOTELS.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete. Cost not stated. Architect, William H. Crim Jr., 425 Kearny street, S. F. Owner's name withheld. The building will be erected on a corner lot and will be arranged for etc.s on the first floor and in the neighborhood of 35 guest rooms on the upper floors. There will be steam heat and elevator service. Hot and cold running water will be supplied to all rooms. Interior finish will be of pine throughout. Exterior of the building will be faced with cement plaster. Metal store fronts and plate glass windows are specified. Plans are being prepared.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, \$45,000. Architect, Frank S. Holland, 100 Haight street, S. F. Owners, Estate of Reuben H. Lloyd. This work has been mentioned here several times before. Figures have been taken and contracts will be awarded this week. The building has been designed for a commercial and family hotel.

LIBRARIES.

SAN FRANCISCO—Library, 1 story and base, Class A construction, \$15,000. Architects, Bliss and Paville, Balboa Bldg., S. F. Owners, City and County of San Francisco. Architects Bliss & Paville have completed working drawings for the Richmond Branch of the San Francisco Libraries. The building will be erected on the west line of Ninth Ave. north of Geary street, and has been designed for a one-story classic structure costing \$15,000. Construction will be of the reinforced concrete type and practically fireproof. Interiors of the reading rooms, lecture room and rest room will be finished in

oak, while the balance of the interior finish will be of pine. Composition and maple floors will be used. Plans provide for steam heat, a vacuum cleaning system and other modern improvements. Exterior of the building will be faced with Mantu stone, Raymond granite and terra cotta. Roof trusses will be of steel. Plans have received the approval of the Library Trustees and figures will shortly be called.

RAILROAD CONST., STATIONS AND EQUIPMENT.

LOS ANGELES, CAL.—Arctic station, 1 and 2 story and base, Class A and Class C construction, \$250,000. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Architects, Parkinson and Bergstrom, Security Bldg., L. A., associated Owners, Southern Pacific Co., Contractors, Alta Planing Mill Co., 830 McGarry street, L. A. Contract price, \$250,000. Note—This work has been held up by the city of Los Angeles until recently when resolutions were passed by the City Council permitting the construction of the building. Operations will be started at once.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The dwelling, designed for an eight room house with bath and sleeping porch, will be erected on a portion of the property at the southwest corner of Larkin and Greenview streets. Interior will be finished in pine with some hardwood veneer and white enamel. Oak floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. The wainscot and composition floors will be used in the bath rooms. Exterior of the dwelling will be covered with rustic and shiplap. Plans are being prepared.

SAN FRANCISCO—Residences, 3 2-story and base, frame, \$3,000 each. Architect none. Owner, Fernando Nelson, 30 Presidio Terrace, S. F. These houses will be erected on property at the northeast corner of 16th avenue and California street. Each dwelling will contain six rooms and bath. Interiors will be finished in pine with some veneer hardwood. Oak floors will be used in the living and dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with rustic, shiplap and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, Oscar Heynath and Bro., 742 Market street, S. F. The dwelling will be erected on the west side of Sears street south of Stockton and will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. A large open fire place with brick mantel will be a feature of the living

room. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with shiplap and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, John J. Foley, 16 Kearny street, S. F. Owner, Mr. McCarthy. The dwelling will contain six rooms and bath and will be erected in the Mission District. Interior finish will be largely of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are nearly complete and figures will be called for at once.

SAN FRANCISCO—Residence, 2 story and base, frame, \$15,000. Architect, Oscar Haupt, Phelan Bldg., S. F. Owner's name withheld. The dwelling will be erected in Pacific Heights and has been designed for a handsome city home containing 12 rooms, baths and sleeping porch. A garage will also be erected on the lot. Interior of the house will be finished in pine, oak and other hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heating and open fire places. Mantels will be of tile and brick. Composition floors and tile wainscot will be used in the bath rooms. Automatic water heater will be installed. Exterior of the dwelling will be covered with brick veneer and cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$8,500. Architects, Ward and Blohme, Alaska Commercial Bldg., S. F. Owner, Haig Pattington. This dwelling will be erected at the northeast corner of Hyde and Francisco streets and has been designed for an eight room dwelling with bath and sleeping porch. Interior finish will be of pine, white enamel and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the baths. An automatic water heater will be installed. Exterior of the dwelling will be covered with brick veneer and cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$14,000. Architect, Leonard H. Ford, 1238 Center street, Berkeley. Owner, John G. Weir. The dwelling will be erected in the Claremont Tract and has been designed to contain eight rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in principal rooms. Open fire places will be used in the living room and library. Mantels will be of brick and tile. An automatic water heater will be installed. Plans provide for furnace heat. Tile wainscot will be used in bath rooms and kitchen. Composition flooring is specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mrs. Fisher. The dwelling will be erected on the Fourth Ave. Terrace and has been designed for an eight room house with bath and sleeping porch. Interior finish will be largely of pine with some veneer hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot and composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$2,000. Architect, Olin S. Grove, 2911 Telegraph ave., Berkeley. Owner, H. E. Eveleth. The dwelling will be erected on the north side of Russell street near Piedmont avenue and has been designed for an eight room house with bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile wainscot is specified in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, J. Brown Schuyler. Owners, Interurban Home Builders, Solano ave. and The Alameda, Northgate. This dwelling has been mentioned here before. Plans are complete and work is about to be started. The house will contain six rooms and bath. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantel will be of brick. A large sleeping porch will be built on one side of the house. The wainscot will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster on metal lath. The work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Clay M. Burrell, Albany Bldg., Oakland. Owner, Dr. McMath. The dwelling, designed for an eight room house with bath and sleeping porch, will be erected in Adams Point. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and the work will be done by Day Labor under the supervision of the architect.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Alvin Stern, 1522 Broadway, Oakland. The house will be erected in the 4th

avenue Terrace and will contain six rooms and bath. Interior will be finished in pine throughout. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are being prepared.

OAKLAND, CAL.—Bungalows, 4 1/2 story and base, frame. Cost not stated. Architect, William H. Batchler, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. These houses will be erected on property located at the northeast corner of Kaes avenue and Broadway and each house has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. Each living room will have an open fire place with tile or brick mantel. Tile wainscoting will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalows, 1 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: J. A. Wagner, 320 South 16th street, five room cottage, \$2,000; Michengie Domico, 687 North 14th ave., San Jose, four room cottage, \$650; and Cora Robelton, 470 East St. James street, San Jose, five room bungalow, \$2,000. Materials are now being purchased.

EUREKA, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Judge Wilson. The dwelling has been designed to contain eight rooms and bath. Interior finish will be of pine, redwood and some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Bungalows, 2 1-story and base, frame. Cost not stated. Architect, none. The following day labor jobs are reported as about to be started in Sacramento: C. H. Chatterton, 3125 T street, 2 story frame dwelling, \$1,600; and H. E. C. Court, 1 story frame cottage, \$1,400. Materials are now being purchased.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame and hollow tile, \$10,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, Horace Thorwaldson. The dwelling has been designed for an eight room house with three baths and sleeping porches. A frame garage will also be erected on the lot. Interior will be finished in pine, oak and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will have composition floors and the walls of tile. Tile will also be used in the kitchen. Exterior of the house and garage will be covered with

cement plaster. Granite base will be used. Plans are now being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$7,500. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, John Zapp. The dwelling will be erected in Zapp's Park and has been designed for a seven room house with bath and sleeping porch. A garage will also be erected on the lot. Interior of the dwelling will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the bath rooms. An automatic water heater is specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, Arthur W. Goodfellow. This dwelling will be erected in Hazelwood Park and has been designed for a fourteen room house with several baths, sleeping porches and a garage. Interior will be handomely finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms on both the first and second floors. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Some ornamental plaster will be specified. An automatic water heater and vacuum cleaning plant are specified. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$20,000. Architect, Frank T. Kegley, Consolidated Realty Bldg., L. A. Owner, Dr. C. P. Thomas. This dwelling will be erected in Brentwood Place and has been designed for a 13 room house with baths and sleeping porches. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used throughout. Besides the residence a two story garage with accommodations for four machines and chauffeur's quarters will be erected on the lot. Plans provide for a central heating system, vacuum cleaning and automatic water heaters. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath and shingles. Plans are being prepared.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$50,000. Architects, Hunt and Burns, Laughlin Bldg., L. A. Owner, Mr. House. The dwelling will be erected in Oak Knoll and has been designed for a fifteen room house with several baths and sleeping porches. A garage will also be erected on the lot. Interior of the house will be finished in hardwoods, pine and white enamel. Hardwood floors will be used throughout. Plans provide for steam heat and open fire places. Mantels will be of tile and brick. Tile floors and wainscot will be used in the bath rooms. There will be a vacuum cleaning system and automatic water heater. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

BAKERSFIELD, KERN CO., CAL.—Residence, 2 story and base, frame, \$12,000. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owner J. W. Briscoe. Contractor, Fred L. Bribble, Bakersfield. Contract price, \$9,317. Note.—This contract does not include plumbing, electric work or heating.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Street work and sewers. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. The Constructing Quartermaster's office at Fort Mason will shortly call for figures for extensive electric installation at Quartermaster Dock No. 2 and for sewer construction at Fort Mason. Advertisement will appear in the Daily Pacific Builder during the next week. Plans are being prepared for 23 buildings to replace the present frame buildings composing the Quartermaster Stables.

SEATTLE, WASH.—Power plant, Class A construction, \$100,000. Engineer not selected. Owners, City of Seattle. Plans will be prepared under the direction of Superintendent of Lighting, Ross, Seattle, for the construction of the first unit of the \$500,000 auxiliary steam plant for the lighting department of Lake Union, Seattle. This portion of the work will cost \$100,000. It is probable that the services of a specialist on this class of work will be sought by the Board of Public Works.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, reinforced concrete and frame. Cost not stated. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. The building, to be erected at the southwest corner of 15th and Capp streets, will be known as the Marshall School. Construction will be of the slow burning type, the walls to the second floor line being of reinforced concrete with reinforced concrete stairs and corridors. Plans have been arranged for 16 class rooms, assembly hall and principal's office. Interior will be finished in pine and hardwood. Maple floors will be used in the class rooms. There will be steam heat, vacuum cleaning system and program clocks. Separate figures are now being taken for the general construction, heating and ventilating, plumbing and electric work. Bids will be opened on December 3rd. Plans and specifications can be secured from the Department of Architecture. An official proposal appears in another column of this issue.

COVLEO, MENDOCINO CO., CAL.—School messhall, 1 story and base. Name. Cost not stated. Architect, Bureau of Indian Affairs, Washington, D. C. Owner, United States Government. Plans and specifications have been forwarded to this city for figures for a one story messhall which is to be erected at the Round Valley Indian School. Interior of the building will be finished in pine and redwood. Exterior will be covered with rustic. Plans can be secured from the Indian Warehouse, 268 Market street. An official proposal ap-

appears in another column of this issue.

BISHOP, INYO CO., CAL.—School, 1 story and base, reinforced concrete, \$30,000. Architect, Samuel Clements, Bishop. Owners, Bishop School District. The building will be designed to contain eight class rooms and an assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat and a modern system of ventilation. Program clocks and vacuum cleaning will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

CERES, STANISLAUS CO., CAL.—School, 1 story and base, reinforced concrete, \$20,000. Architect, William H. Weeks, 75 Post street, S. F. Owners, Ceres School District. The building will be erected in the center of a large lot and has been designed for an eight room school. Interior will be finished in pine. Floors in the class rooms will be of maple. Plans provide for a central heating system, vacuum cleaning and program clocks. Besides the class rooms there will be a large assembly hall. Exterior of the building will be faced with cement plaster. A clay tile roof will be used.

SANGER, FRESNO CO., CAL.—School, 2 story and base, brick, \$50,000. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Sanger High School District. The building will contain 12 class rooms, auditorium, office and teachers' rooms. Interior finish will be of pine with maple floors. There will be steam heat, a modern system of ventilation, vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will shortly be called.

CLAREMONT, LOS ANGELES CO., CAL.—Music hall, 2 story and base, reinforced concrete, \$30,000. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Pomona College. The building will be built in a shape of letter Y, and will have a total frontage of 250 ft., and an average width of 15 ft. There will be an audience room to seat 1000, 8 studios and 16 practice rooms; reinforced concrete frame and gallery, tile roof, artificial stone trim, hardwood and pine trim, plumbing, wiring, heating. Plans are complete and figures are being taken.

ONTARIO, SAN BERNARDINO CO., CAL.—School, 2 story and base, brick and steel, \$10,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Chaffey Union High School District. Portions of the old walls are now standing and use will be made of these in constructing the new building. Fireproof stairways and corridors will be used. Interior will be finished in pine throughout. There will be a central heating system and program clocks, vacuum cleaning and a modern system of ventilation. Plans call for eight class rooms, auditorium and offices. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

SOUTH BEND, WASH.—School, 2 story and base, brick and concrete. Cost not stated. Architect, none. Owners, City of South Bend. Contractors, The Amnathian Co., Central Bldg., Seattle. Contract price not stated.

BEND, ORE.—School, 1 story and base, stone, \$20,000. Architects, Swartz and Levesque, Spokane. Owners, Bend

School District. Contractors, Brothers Bros., Bend. Contract price, \$20,000.

STORES AND OFFICES.

SAN FRANCISCO—Office building, 14 story and base, Class A construction, \$300,000 to \$1,000,000. Architect, J. Martin Haenke, Central Bldg., Los Angeles. Owner, Charles F. Sweeney. Architect J. Martin Haenke has spent several days in this city completing arrangements for the construction of the fourteen-story Class "A" office building which is to be erected at the northeast corner of Montgomery and Bush streets, the former site of the old Occidental Hotel. The property has passed into the hands of Charles Sweeney, the Spokane mining magnate. Architect Haenke stated to a representative that working drawings for the big structure, costing between \$300,000 and \$1,000,000, were nearing completion in his Los Angeles offices and that actual construction would be started early in the new year. The building will have a frontage on Montgomery street of 150 feet and 137½ feet on Bush. Since the announcement of the 26-story Hobart Building this is the largest undertaking announced by private capital in this city. Construction will be of the Class A type with a complete steel frame, exterior walls of brick and concrete, faced with pressed brick and terra cotta. Floors will be of reinforced concrete and interior partitions of hollow tile. Halls and corridors will be finished in tile and marble with metal doors, moldings and casings. Plans will provide for vacuum cleaning, steam heat, modern elevator service and mail chutes. Segregated contracts will be let.

SAN FRANCISCO—Store addition and alteration. Cost not stated. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Frank Weiner, 79 Ellis street. This work will include new interior finish, new store fixtures, plumbing, electric work and plastering. Mr. Weiner has secured additional store space at 81 Ellis street adjoining his present store. Both stores will be opened in one and when complete the owner will have the most modern shoe store in the city. Plans for the work are being prepared.

HOLLYWOOD, LOS ANGELES CO., CAL.—Stores and offices, 5 story and base, brick and steel, \$50,000. Architect, E. P. Patcher, McCadden Place, Hollywood. Owner, C. E. Toberman. The building will be erected on Hollywood Boulevard covering an area of 75 feet square. First floor has been arranged for four stores and the upper floors for 80 suites of offices. Foundation will be of reinforced concrete and frame of steel. Exterior walls will be faced with pressed brick. Plans provide for steam heat, elevator service and metal window sash and frames. Interior will be finished in pine throughout. There will be pivot store fronts and marble base. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Telephone exchange, 6 story and base, Class A construction, \$220,000. Architect, Gaddy & Grant ave., S. F. Owners, Pacific Telephone and Telegraph Co. This work has been mentioned here before. The building will be erected on South Hill street and will have a frontage of 71½ feet by a depth of 75 feet. A contract for the structural steel has been awarded

to the Baker Iron Works of Los Angeles for \$25,000. Balance of the work is now out for figures. Bids will close on December 1st.

LOS ANGELES, CAL.—Stores and lots, 5 story and base, Class A construction, \$10,000. Architect, George W. Harding, Washington Bldg., L. A. Owner, J. M. Browne. The building will be erected at the corner of Boyd and Omar streets covering an area of 65 by 100 feet. Construction will be fireproof throughout with reinforced concrete floor, walls and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Interior will be finished in pine and metal. Metal window sash and frames will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and mail chutes. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

TACOMA, WASH.—Department store, 3 story and base, brick and steel, \$100,000. Architects, Heath and Grove, National Realty Bldg., Tacoma. Owners, Dore and Gross, Seattle. The building will be erected on C street near 11th and will cover a large ground area. Construction will be practically fireproof. Interior finish will be of pine and hardwoods. Interior partitions will be of metal lath and plaster. There will be steam heat and elevator service. Arcade front with patent show windows and marble base is specified. Exterior of the building will be faced with pressed brick. Plans are complete and a general contract will be let.

THEATRES.

MARTINEZ, CONTRA COSTA CO., CAL.—Theatre, 1 story and base, frame. Cost not stated. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building has been designed for a moving picture house and will have a seating capacity of about 300 people. Interior will be finished in pine throughout. A modern system of ventilation will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SEALED PROPOSALS.

PROPOSALS FOR BUILDING, OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 10 o'clock a. m. and 3 o'clock p. m., on Wednesday, the 3rd day of December, 1914, for doing the following work including the furnishing of the necessary labor and materials therefor, to-wit:

The general construction of the Marshall School Building, to be located on the southwesterly corner of Fifteenth and Capp streets.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five calendar days from the receipt of written notice from the Board of Public Works, and completed within two hundred and seventy (270) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$20,000.00. All proposals offered must be accompanied by a check certified by a responsible bank payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR PLUMBING AND GAS FITTING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 27th day of December, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to-wit:

The plumbing and gas fitting of the Marshall School Building.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within two hundred and seventy (270) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$1,500.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 808—Proposals for Galvanized Steel, Iron, Steel, Roll, Rivets, Bolts, Nails, Screws, Taps, Cable Clips, Cast Iron Washers, Stove-pipe, Soil Pipe, Pipe Fittings, Valves, Cocks, Lead, Pipe Sheet and Lead, Cold Cocks, Lead, Pipe, Brass, Brass Tubing, Hoses, Hinges, Drawer Locks, Files, Shovels, Wrenches, Hammers, Tool Handles, Hack Saw Blades, Cutters, Macadam, Galvanized Buckets, Water Coolers, Hand Oilers, Steam Whistles, Lanterns, Lantern Globes, Window Glass, Metallic Tapes, Brushes, Hose, Door Mats, Brooms, Cotton Canvas, Sash Cord, Twine, Mop Heads, Oakum, Bunting, Emery Cloth, Belt Lacing, Magnesia Pipe Covering, Magnesia Boiler Lacing, Metal Polish, Toilet Paper, Fire Clay, Lime, Lye, Chipped Soap, Rock Salt, Coal Tar, Putty, Paints, Lampblack, Varnish, Turpentine, Oil.

Lumber. Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. on December 1, 1913, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information may be obtained from this office or the offices of the assistant purchasing agents, 1086 North Point street, San Francisco, Cal.; also from the following cities: Glasgow, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. on January 2, 1914, for the construction, complete (including mechanical equipment, interior lighting fixtures and approaches), of the United States post office at Brigham City, Utah. One-story and mezzanine building, fireproof construction, stone facing, copper and composition roof. Drawings and specifications may be obtained from the custodian in charge at Brigham City, Utah, or at this office, in the discretion of the supervising architect, O. WENDERTH, supervising architect.

Sealed proposals, plainly marked on the outside of the sealed envelope, "Proposals for messhall," and addressed to the Superintendent of the Round Valley Indian School, Covelo, Calif., will be received until 5:00 o'clock p. m. on November 28, 1913, and then opened, for furnishing the labor and materials required in the construction of a messhall of a frame messhall for the Round Valley Indian School, Covelo, Calif., in strict accordance with the plans and specifications furnished by the Office of Indian Affairs, and which may be examined at this school and at the post office at Willits and at Ukiah, and at the Indian Warehouse at Ukiah, California. Bids must be submitted in accordance with the form attached to the plans and specifications. Each bid must be accompanied by a certified check or draft on some United States Depository or solvent National Bank, made payable to the order of the Commissioner of Indian Affairs, for at least ten per cent of the proposal, which check or draft will be forfeited to the United States in case any bidder or bidders receiving an award shall fail to furnish good and sufficient securities, otherwise to be returned to bidder. The right is reserved to reject any and all bids.

T. B. WILSON,
Superintendent.

PROPOSALS FOR EXCAVATING AND CONCRETE WORK.

STEEL, LUMBER, PIPE, CONCRETE, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Great Falls, Mont., until 10:30 a. m. on December 18, 1913, for the construction of structures of the Pishkun reservoir supply canal and San river slope canal, involving 14,000 cubic yards of excavation, 14,000 cubic yards of concrete, the placing of about 664,000 pounds of reinforcing steel, the erection of about 10,000 pounds of structural steel, the placing of about 24,000 linear feet of drain pipe, a wooden structure of about 66,000 feet B. M. of lumber, and the laying of about 24,000 linear feet of drain pipe. The work is situated on the north side of San river, from 25 to 70 miles west of Great Falls, Mont., and is near the line of the San river branch of the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont. or Fort Shaw, Mont. A. P. DAVIS, acting director.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. on December 18, 1913, for the construction, complete (including mechanical equipment, interior lighting fixtures, and approaches), of the United States post office at La Junta, Colo. The building is two stories and base, with a ground area of approximately 3,240 square feet; stone, stucco, and adobe-cotta facing; tile roof; first floor only of brickwork construction. Drawings and specifications may be obtained from the custodian of site at La Junta, Colo., or at this office in the discretion of the supervising architect, O. WENDERTH, supervising architect.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 809—Proposals for Steel Rolling Doors for Permanent Shop Building No. 3 at Balboa—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. on December 1, 1913, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 809) may be obtained from this office or the offices of the assistant purchasing agents, 1086 N. Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps engineers, U. S. army, general purchasing officer.

By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. on January 2, 1914, for the construction, complete (including mechanical equipment, interior lighting fixtures, and approaches), of the United States post office at Brigham City, Utah. One-story and mezzanine building, fireproof construction, stone facing, copper and composition roof. Drawings and specifications may be obtained from the custodian in charge at Brigham City, Utah, or at this office, in the discretion of the supervising architect, O. WENDERTH, supervising architect.

Sealed proposals, plainly marked on the outside of the sealed envelope, "Proposals for messhall," and addressed to the Superintendent of the Round Valley Indian School, Covelo, Calif., will be received until 5:00 o'clock p. m. on November 28, 1913, and then opened, for furnishing the labor and materials required in the construction of a messhall of a frame messhall for the Round Valley Indian School, Covelo, Calif., in strict accordance with the plans and specifications furnished by the Office of Indian Affairs, and which may be examined at this school and at the post office at Willits and at Ukiah, and at the Indian Warehouse at Ukiah, California. PROPOSALS FOR EXCAVATING AND CONCRETE WORK.

STEEL, LUMBER, PIPE, CONCRETE, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Great Falls, Mont., until 10:30 a. m. on December 18, 1913, for the construction of structures of the Pishkun reservoir supply canal and San river slope canal, involving 14,000 cubic yards of excavation, 14,000 cubic yards of concrete, the placing of about 664,000 pounds of reinforcing steel, the erection of about 10,000 pounds of structural steel, the placing of about 24,000 linear feet of drain pipe, a wooden structure of about 66,000 feet B. M. of lumber, and the laying of about 24,000 linear feet of drain pipe. The work is situated on the north side of San river, from 25 to 70 miles west of Great Falls, Mont., and is near the line of the San river branch of the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C.; Great Falls, Mont. or Fort Shaw, Mont. A. P. DAVIS, acting director.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be opened in this office at 3 p. m. on January 2, 1914, for the construction, complete (including mechanical equipment, interior lighting fixtures, and approaches), of the United States post office at Brigham City, Utah. One-story and mezzanine building, fireproof construction, stone facing, copper and composition roof. Drawings and specifications may be obtained from the custodian in charge at Brigham City, Utah, or at this office, in the discretion of the supervising architect, O. WENDERTH, supervising architect.

Sealed proposals, plainly marked on the outside of the sealed envelope, "Proposals for messhall," and addressed to the Superintendent of the Round Valley Indian School, Covelo, Calif., will be received until 5:00 o'clock p. m. on November 28, 1913, and then opened, for furnishing the labor and materials required in the construction of a messhall of a frame messhall for the Round Valley Indian School, Covelo, Calif., in strict accordance with the plans and specifications furnished by the Office of Indian Affairs, and which may be examined at this school and at the post office at Willits and at Ukiah, and at the Indian Warehouse at Ukiah, California. Bids must be submitted in accordance with the form attached to the plans and specifications. Each bid must be accompanied by a certified check or draft on some United States Depository or solvent National Bank, made payable to the order of the Commissioner of Indian Affairs, for at least ten per cent of the proposal, which check or draft will be forfeited to the United States in case any bidder or bidders receiving an award shall fail to furnish good and sufficient securities, otherwise to be returned to bidder. The right is reserved to reject any and all bids.

T. B. WILSON,
Superintendent.

lie Works, and completed within two hundred and ten (210) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.
